## TEKA 88 PIN DRAM CARD CONNECTOR

Conform to JEIDA / JEDEC Standards

### Header Features

- Meets JEIDA/JEDEC Standards
- 1.00 x 1.27mm centerline spacing
- SMT design
- Selective pin lengths and pin loading
- For other options consult Teka Customer Service.
- Polarized guide rails
- Locating feature for exact termination alignment (3 molded-in press-fit studs)
- Vapor phase and infrared compatible

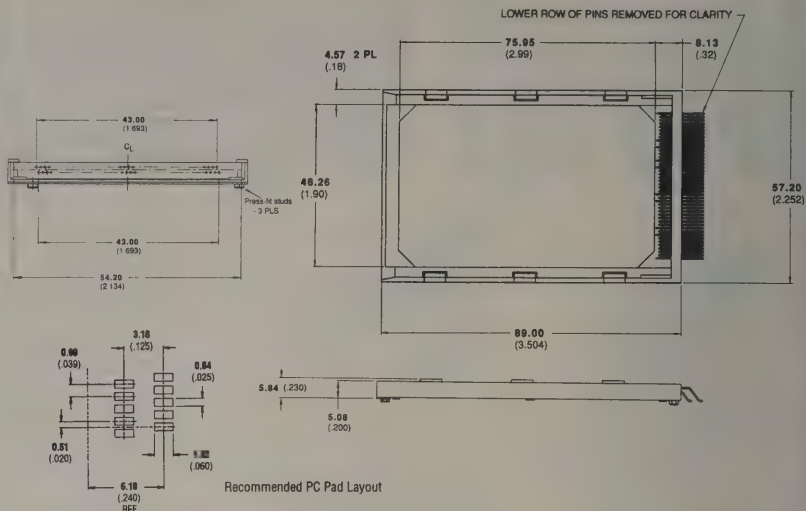

Call Teka Customer service for a quotation on your custom applications!

### Materials

- Contacts : PhosBronze drawn wire
- Hi-temp housings: GF LCP, UL 94VO
- Finish: 30μ" gold min. on contact area only over 50μ" nickel min. on entire contact area, .100μ" min. tin lead alloy tails.

For other plating options consult Teka Customer Service.

All Connectors  
Made in USA

### Performance

- Current rating = 1 amp max.
- Dielectric withstanding = 500 VAC RMS min.
- Insulation resistance = 1,000 megohms min.

### Configurations

- 705 - Standard with guide rails for DRAM card
- 706 - With guide rails for .015 printed circuit boards

## TEKA HIGH DENSITY .050 CONNECTOR SYSTEM

### General Information

Teka's proven High Density Connector System is in wide use throughout the industry in both through-board and SMT configurations. Custom and modified applications are welcome. Contact Teka Customer Service for connector size options, samples, technical information and catalogs.

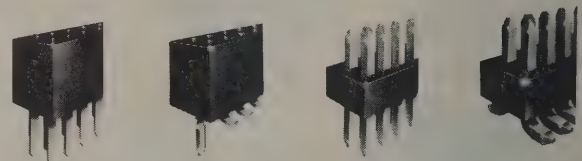

### Design Features

- .050 centerline spacing
- Receptacle mates with .018" square or round pin
- Dual-beam contact design
- Low insertion force receptacle
- Hold-down device available
- Vapor phase and infrared compatible

### Materials

- Contacts (Receptacles): BeCu
- Contacts (Headers): Copper alloy
- Hi-temp housings: GF LCP, UL 94VO
- Finish: 30μ" gold min. over 50μ" nickel min. on contact area only. 100μ" min. tin lead alloy tails.

For other plating options consult Teka Customer Service.

# TEKA MEMORY CARD CONNECTORS

All Connectors  
Made in USA

Compatible with PCMCIA, Release 2.01

## Header and Receptacle Features

- Meets PCMCIA (Release 2.1) / JEIDA Standards (For Type III information, drawings and quotations contact Teka Customer Service.)
- .050" centerline spacing
- Dual-beam contacts mate with .017 round pins; closed entry design
- Selective pin lengths and pin loading per PCMCIA/JEIDA spec (for other options, consult factory)
- Polarized guide rails
- Locating feature for exact termination alignment (header only)
- Low insertion force receptacle
- Vapor phase and infrared compatible
- Designed for reliable performance in excess of 5,000 matings (cycles).

## Materials

- Contacts (Receptacles): BeCu
- Contacts (Headers): Copper alloy
- Hi-temp housings: GF-LCP, UL 94VO
- Finish: 30μ" gold min. on contact area only over 50μ" nickel min. on entire contact area, .100μ" min. tin lead alloy tails.

For other plating options consult Teka Customer Service.

## Performance

- Current rating = 1 amp max.
- Dielectric withstanding = 500 VAC RMS min.
- Insulation resistance = 1,000 megohms min.
- Contact resistance = 30 milliohms max.

## Available Configurations (with part code)

### Headers

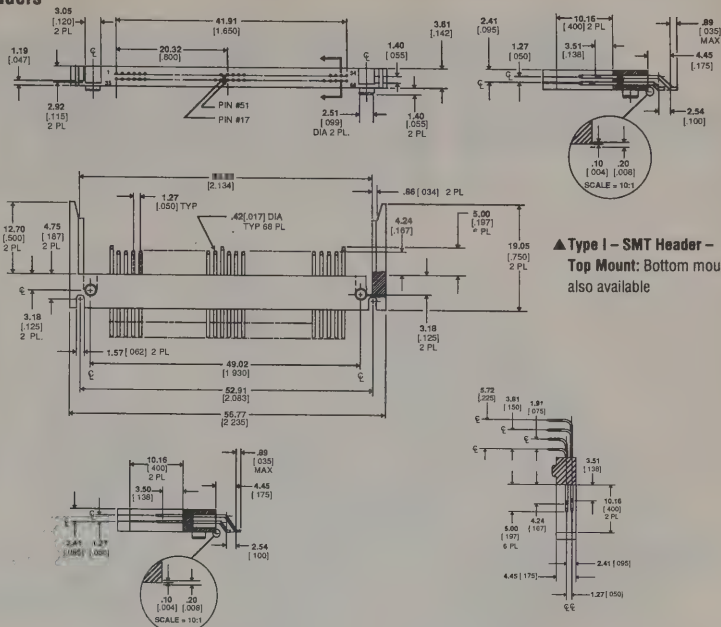

- 209 - Type I, Top Mount, Thru Board
- 201 - Type I, Top Mount, SMT
- 213 - Type I, Bottom Mount, Thru Board
- 211 - Type I, Bottom Mount, SMT
- 205 - Type II, Top Mount, Thru Board
- 202 - Type II, Top Mount, SMT
- 210 - Type II, Bottom Mount, Thru Board
- 212 - Type II, Bottom Mount, SMT

### Receptacles

- 701 - Card Extender
- 702 - Inline Topside Surface Mount
- 703 - Offset Straddle mount (flush to baseline)

For other ear configurations/options consult Teka Customer Service.

# GET RAPID RESPONSE TO YOUR CUSTOM HIGH DENSITY APPLICATIONS.

## CALL THE TEKA/INTERPLEX TEAM.

### When the clock is ticking.

You want results, not excuses. Call Teka and you will get the proposal drawings, prototypes and test results you need quickly.

Teka's complete in-house design and production facilities are geared to provide you the fast turn-arounds you need to complete your electronic system and begin shipping product.

### Choose with confidence.

You are in good company when you choose Teka. Because we build advanced interconnects for some of the top electronics companies in the U.S. Including high-density and surface-mount designs, standard, modified and custom.

In fact we have achieved and maintain "Preferred Vendor" status with a number of major OEMs.

### A leader in U.S. memory card interconnection systems.

As one of the participants in the development of the PCMCIA standard, Teka is ready to apply this compact and cost-efficient technology to the growing number of memory card applications.

### Complete interconnect design and production capabilities.

#### Design

- Engineering consulting
- Proposal drawings
- Prototyping
- Testing

#### Production

- Molding
- Stamping
- Skiving
- Plating
- Assembly
- Testing

### Call us today!

For design consultation, samples, prints or just answers to your questions. We want to help you solve your high-density application problems.

## CALL TEKA.

### YOUR PROBLEM IS THAT...

most connector companies are not organized to effectively respond to the demanding needs of the custom connector business. Fast-paced development and production schedules require extremely tight coordination of the manufacturing process, while the reliability of the end-product remains critical.

### YOUR SINGLE SOURCE

You need only make one call... Teka Interconnection Systems. We provide all the expertise you need *right in-house*—including connector design, tooling, molding, stamping, plating, assembly and testing. Applying the same advanced engineering skills and technology that built the broad line of quality Teka PCB connectors.

### SOLVING PCB CONNECTOR PROBLEMS

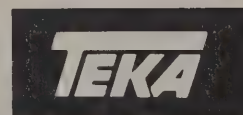

Teka harnesses the resources and experience within the entire group of Interplex Industries companies, and puts it to work for you. Your project benefits through increased cost-efficiency and faster turnaround.

### CALL US TODAY !

End your search for custom and modified standard PCB connectors right here.

Call Teka Interconnection Systems at (401) 785-4110. We have representatives nation-wide, ready to assist you.

# TEKA SPECIAL EDGE CARD

High Reliability

## General Information

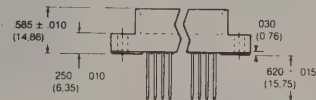

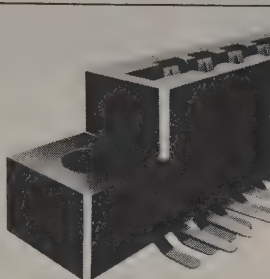

- Modified to fit your requirements
- Spacing: .100, .125 and .156"
- Flush mount or center mount
- Variety of tail configurations:
  - External PCB retention tail
  - Card extender
  - Wire wrap
  - DIP solder
  - Right angle-flush
  - Right angle-uneven
- 2 x 52 PC edgecard available

## Features

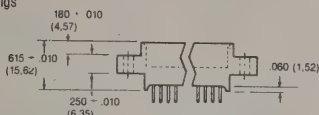

- High reliability pre-loaded bifurcated simple cantilever contact design
- Mates with .054" to .071" PC boards
- With or without mounting ears, threaded bushings or inserts
- Polarization keys: in-contact, in-between
- Standoffs
- Selective plating

## Technical Data

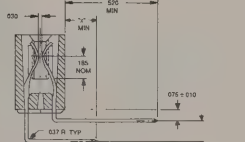

- Insulation Resistance: 5000 megohms min.
- Capacitance (picofarads): 2 max.
- Operating Temperature: -65° to +125° C
- Insertion Force: 16 oz. max. per contact pair
- Withdrawal Force: 1 oz. min. per contact pair
- Life: 500 cycles min.
- Normal Forces: 150 grams min. (.062 PCB)
- Housing: Glass-Filled Thermo-Plastic
  - Polyester UL 94 V-0
- Contact: CA510 Phosphor Bronze
  - CA 172 Beryllium Copper (Solder tail only)
  - CA725 Alloy Copper Nickel
- Floating Bushings: Brass, nickel plated (standard)
- Threaded Inserts: Brass, nickel plated (standard)
- \*Tin alloy: -40° C to +105° C
- \*\*For high temperature material consult factory.

Wire Wrap - .025" sq.

DIP Solder

Right Angle - .025" sq.

# TEKA LOW-COST DIN

Styles C & R

## General Information:

The Teka Econo DIN series is an economical alternative to existing female DIN connectors. The patented one piece dual-beam contact design offers a reliable board-to-board interconnection with optimum contact redundancy, without compromising performance. Teka Econo DIN meets the requirements of the 41612 specification.

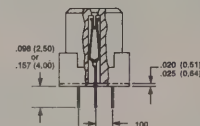

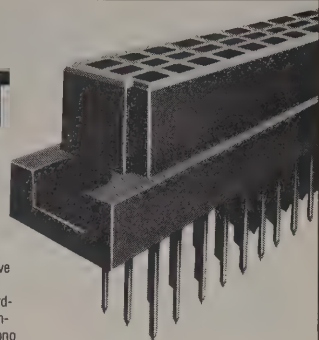

This design advance was made possible by a precision stamping process developed by Teka parent company, Interplex Industries Inc.

## Features

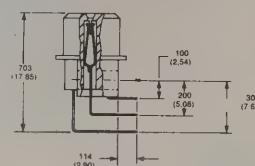

- Low cost/high performance design
- Density: up to 96 contacts in 3 rows
- Mounting: standard and inverse
- Contacts, female: self centering, pre-loaded
- Tails: DIP solder or compliant
- Housings: chamfered lead-ins
- Plating: selective gold on contact area, tin alloy tails
- Specifications: conforms to DIN 41612 styles C & R

## Technical Data

- Operating Voltage: 300 VRMS
- Current (Max): 3 amps per contact
- Contact Resistance: 20 Milliohms (max)
- Dielectric Strength: 1000 V
- Insulation Resistance:  $10^{12}$  Ohms
- Operating Temperature: -55° C to +125° C
- UL Flammability: 94 V-0
- Insertion Force: Style C, 20.2 pounds max. (96 positions)
- Withdrawal Force: Style C, 3.24 pounds min. (96 positions)
- Contacts: Phosphor Bronze
- Housing: Glass filled polyester

Style C - Standard

Style R - Inverse

# TEKA HI-TEMP HEADERS

Standard .025" Square Posts  
.100" x .100" Matrix

## General Information

- Single & dual row, vertical and right angle configurations
- Single row available in 1x36 position double row available in 2x36 position
- .100" centerline spacing; double row headers are on .100" x .100" grid
- Low cost I/O interconnection
- Standard mating pin lengths are .230" and .318"
- Stackable end-to-end
- Consult factory for optional pin lengths and plating

## Features

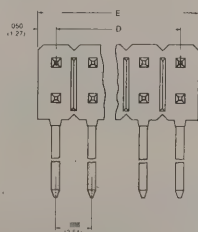

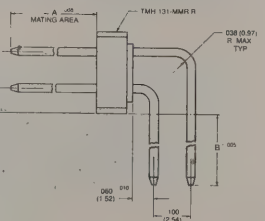

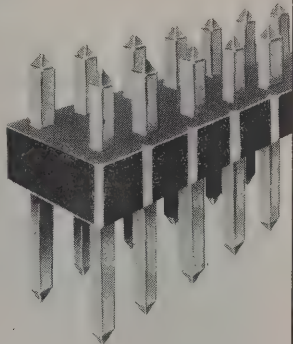

- High temperature plastic allows infra-red and vapor phase soldering.
- Standoffs permit cleaning of soldering contaminates.
- Barb feature provides improved retention.
- Drawn wire pins provide smooth contact surfaces on all sides.
- Selective gold plating available.

## Technical Data

- Current rating = 5 amps (maximum).
- Dielectric withstanding = 7500 VAC RMS (minimum).
- Insulation resistance = 10,000 megaohms (minimum).
- Operating temperatures = 600 VDC (sea level).
- Contact retention = 4 lbs. (minimum).
- Contact = copper alloy
- Insulator body = thermoplastic PET, UL flammability rating 94 V0.

## Test Data

Specifications, prints and samples are available upon request from Teka Customer Service.

# TEKA SMT HEADERS

Single and Double Row

## General Information

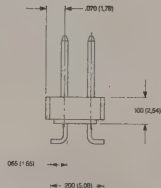

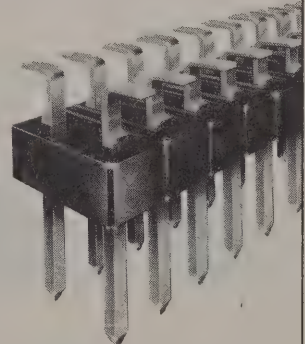

- Single row available in 1x36 position double row available in 2x36 position
- .100" centerline spacing; double row headers are on .100" x .100" grid
- Standard mating pin lengths are .230" and .318"
- Stackable end-to-end
- Consult factory for optional pin lengths and plating

## Features

- High temperature plastic allows infra-red and vapor phase soldering.
- Barb feature provides improved retention.
- Drawn wire pins provide smooth contact surfaces on all sides.
- Selective gold plating available.

## Technical Data

- Current rating = 5 amps (maximum).
- Dielectric withstanding = 7500 VAC RMS (minimum).
- Insulation resistance = 10,000 megaohms (minimum).
- Operating temperatures = 600 VDC (sea level).
- Contact retention = 4 lbs. (minimum).
- Contact = copper alloy
- Insulator body = thermoplastic PET, UL flammability rating 94 V0.

# TELCO MODULAR JACKS

## Modular Jack Technical Information - 200 Series

### Features

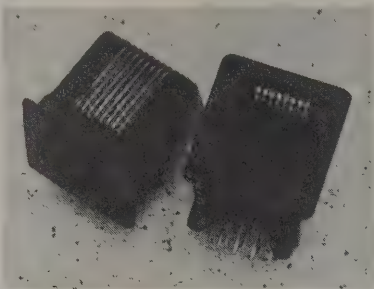

- Listed by Underwriters Laboratories Inc. File number E131564(N)
- Designed for flush mount application
- Selectively gold plated on contact area, tin-lead on solder tails
- Industry compatible profiles and footprints
- Flame retardant plastic material
- Meets FCC part 68
- Available in custom colors with orders of 5000 pieces or more

### Specifications

#### Electrical

Current Rating: 1.5 amps  
Voltage Rating: 150 volts AC max  
Dielectric Withstanding Voltage: 1000 VAC, RMS 60 Hz, 1 min.  
Insulation Resistance: 500 megohms min.  
Surge Test: To 1000 volts

### Parallel Flanged Mount

### Ordering Information

| Positions | Loaded | Plating 1   | Plating 2   |

NOTE: To order desired part, insert number of required circuits (02 thru 40) in place of XX  
Please consult us for availability of pin length and plating not shown above.

## Telephone Accessories and Data Interconnect Devices

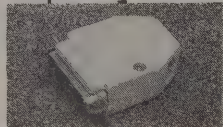

## One Piece Modular Adaptor - 890 Series

### Features

- Listed by Underwriters Laboratories, Inc. File number E131564(N)
- Available with male or female d-sub
- Flame retardant ABS housing
- One piece injection hood
- DEC jack available
- Thumb screws

## Two Piece Modular Adaptor - 870 Series

### Features

- Listed by Underwriters Laboratories Inc. File number E131564(N)
- One or two modular jacks available at side rear
- Available with male or female RS232
- Flame retardant ABS housing
- Two piece hood allows for internal modification
- DEC jack available

## Power Cords

### Features

- Custom mfg. to meet U.S. & International specifications
- UL/CSA and other agency approvals
- Compatible with industry standard cords
- Custom OEM jobs welcomed
- FAX us your requirements today at 1-713-859-8825

### Standard Part Numbers

| Part Number | Wire Type | Rating   | AWG Size & Stranding | Length Ft./Mtrs. | Nominal O.D. (In.) |
|-------------|-----------|----------|----------------------|------------------|--------------------|
| 33300-6F-BB | SVT       | 10A-125V | 18/3 (42 x 34)       | 6'/1.8           | .252               |
| 33300-8F-BB | SVT       | 10A-125V | 18/3 (42 x 34)       | 8'/2.4           | .252               |
| 33500-6F-GG | SJT       | 10A-125V | 18/3 (16 x 30)       | 6'/1.8           | .315               |
| 33500-8F-GG | SJT       | 10A-125V | 18/3 (16 x 30)       | 8'/2.4           | .315               |
| 31101-6F-BB | SPT-1     | 10A-125V | 18/2 (42 x 34)       | 6'/1.8           | .114/.232          |
| 31101-9F-BB | SPT-1     | 10A-125V | 18/2 (42 x 34)       | 9'/2.7           | .114/.232          |

### Foil Shielded PVC Jacketed:

|             |     |          |                |         |      |
|-------------|-----|----------|----------------|---------|------|
| 35626-2M-BB | SJT | 10A-125V | 18/3 (16 x 30) | 6.6/2.0 | .331 |
| 35627-2M-BB | SJT | 13A-125V | 16/3 (26 x 30) | 6.6/2.0 | .355 |

### Unshielded PVC Jacketed:

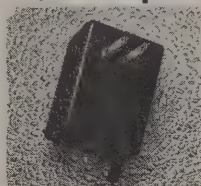

|             |     |          |                |         |      |
|-------------|-----|----------|----------------|---------|------|
| 35526-2M-BB | SJT | 10A-125V | 18/3 (16 x 30) | 6.6/2.0 | .315 |
| 35527-2M-BB | SJT | 13A-125V | 16/3 (26 x 30) | 6.6/2.0 | .343 |

### Foil Shielded PVC Jacketed:

|             |     |          |                |         |      |
|-------------|-----|----------|----------------|---------|------|
| 35650-2M-BB | SJT | 10A-125V | 18/3 (16 x 30) | 6.6/2.0 | .331 |
|-------------|-----|----------|----------------|---------|------|

Standard color codes are NA: Black—Hot, White—Neutral, Green—Ground  
For custom orders, color code can be changed to CEE: Brown—Hot, Blue—Neutral, Green/Yellow Stripe—Ground

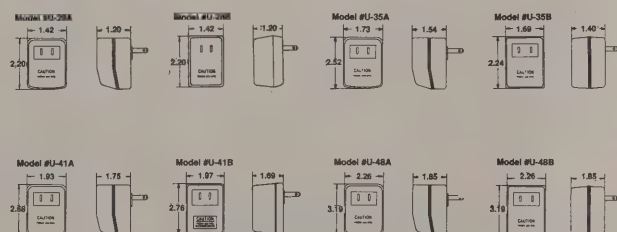

## AC/DC Adaptors

### Features

- Custom mfg. to meet U.S. & International specifications
- UL/CSA and other International approvals
- Specializing in large volume requirements
- Custom OEM jobs welcomed

## TELCO INTERCONTINENTAL CORPORATION

9812 WHITHORN DRIVE, HOUSTON, TEXAS 77095 • TEL: (713) 855-2218 • FAX: (713) 859-8825 • 1-800-678-3526

## MINIGLOSSARY CONNECTORS

**Connector terminology** is often quite confusing. This confusion starts with the very names of connectors. The name of a connector may derive from its shape, application, type of conductor or even method of termination.

**Shape**—Circular, cylindrical, and rectangular.

**Electrical application**—High voltage, RF, microwave, input/output, etc.

**Mechanical application**—Printed circuit, rack & panel, cable, etc.

**Conductor type**—Coaxial, flat cable, ribbon cable, flex circuit, etc.

**Termination method**—Wirewrap, soldercup, solderless, etc.

Hardware such as clamps, hoods, and adapters are frequently used to convert cable connectors to rack and panel types. This adds to the name confusion. A very common telephone connector, for example (the "C" type) got its name from the model number of the original maker.

**Contact:** The part(s) of the connector that actually provides circuit continuity between its two sections—the parts which are normally mated. The back end of the connector should properly be called the *termination*. This is the point where the wires or PC board is attached to the connector.

**Contact alignments:** Often called *contact float*. Describes the amount of allowable contact movement within the connector body. Permits self-alignment.

**Male vs. female:** In the U.S. this describes the contact construction. In Europe this term is more often used to describe the outer shell mating action which may be the reverse of the contacts.

**Closed entry:** A female contact which prevents entry of a male contact larger than a specific size.

**Open entry:** A female contact designed for a specific size of male contact but which will allow entry of larger male contacts by spring action.

**Hermaphrodite:** Contacts or connector bodies which are the same configuration. Male/female designations do not apply. Bodies usually have some mechanical means for maintaining polarity.

**Hermetic seal:** Glass-to-metal seals at terminations. Often used improperly to describe vacuum-tight seals.

**Waterproof seal:** May or may not be truly *waterproof*. May prevent easy entrance of casual water by means of a rubber or other boot.

**Printed circuit connector:** Connectors which are used in conjunction with printed circuit boards. There are two distinctly different styles.

**Edgeboard.** May be called *edge* or *card*. The printed circuit (PC) board edge enters the connector.

**Two-piece:** One part of the connecting pair is physically attached to the PC board itself. The other part is attached to something else such as a cable or a motherboard.

**Readout:** Describes the arrangement at the terminating edge of a PC board.

May be single or double. A double read-out PC board has termination strips on each side not usually interconnected.

**Ribbon connectors:** A type of connector which allows flat "ribbon" cable to be attached to a round or rectangular connector but also used interchangeably for flat connectors to flat cable.

**Ribbon contact connector:** Describes the contacts in a rectangular connector which have a self-wiping mating action. Not the same as ribbon connector.

**Solderless terminal:** Any style of termination which does not require solder for a permanent connection. See *crimp* and *insulation displacement*.

**Crimp termination:** A stripped wire is inserted into a barrel or trough which is then crimped to the conductor with a suitable tool.

**Insulation displacement:** Unstripped insulated wire is fitted into a channel containing metal teeth which are forced through the insulation to make contact with the conductor.

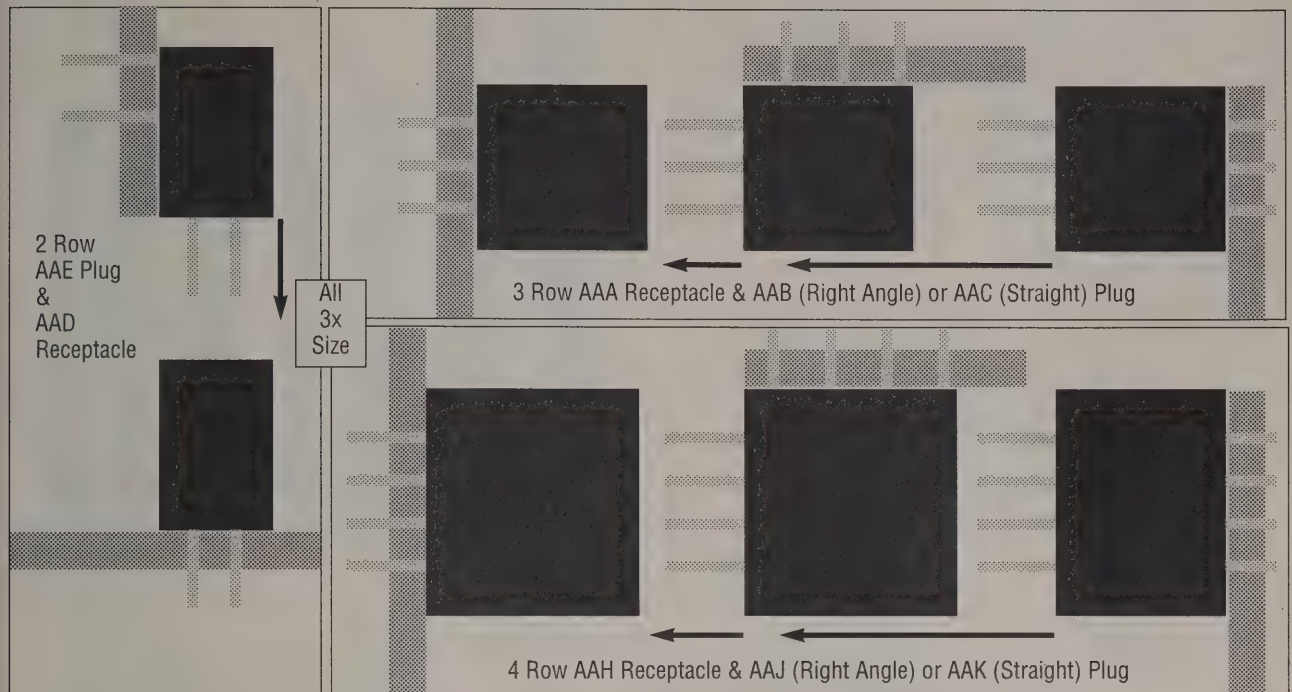

**Service rating:** The maximum rated voltage and/or current which may be applied continuously. May be called *working voltage*. Can be confused with the term used to describe how many times a connector may be mated and separated.

**Withstanding voltage:** Also called *test voltage*. The voltage a connector must withstand for one minute without breakdown. Applied between connectors and between connectors and shell and any grounding devices of the connector.

# VHD Series

The Texas Instruments VHD Series Contact System is on the QPL listings for MIL-C-55302 in a variety of slash configurations. These connectors are intended for very high density applications and are capable of handling currents up to 3 Amperes. The schematic representations above are intended to show the basic configurations available. Note that all receptacles have straight through bodies while the plugs can be either straight or right angle. In the figures above only printed circuit boards are shown. Several other options are available as shown on the next pages. The mating matrices provide guidance on which plugs fit which receptacles and which contacts and hardware will mate. Please contact your distributor or the factory for polarization details. Dozens of polarization schemes are available.

| P2YY |      |      |      |      |      |      |      |      |      |      |      |      |      |      |      |      | X    |      |
| P1YY |      |      |      |      |      |      |      |      |      |      |      |      |      |      |      |      |      | X    |

Polarized guide sets will mate only if both are "YY".

# VHD Series

The VHD Series of connectors are available in 2, 3, or 4 row configurations, straight plug or receptacles and right angle plugs. The 2 row design offers the option of choosing a 10-100 position connector (increment of 10). While the 3 row design is available with 80, 122, 152, or 206 positions. The 4 row connector is available in 210 positions. All VHD connectors meet or exceed MIL-C-55302 requirements and offer a wide variety of contact and hardware configurations.

| Body Insulator | Glass filled polyphenylene sulfide (ryton) per MIL-M-24519                                                                                                       |
| Hardware       | Stainless steel per ASTM-A582, passivated or beryllium copper per QQ-C-550, nickel plated per QQ-N-290, 50-150 µinch                                             |
| Marking        | Per MIL-STD-1285                                                                                                                                                 |

## REFERENCE MIL-C-55302 / 190-193

The designer must check that the contact and hardware styles added to the insulator produce a combination that is on the QPL.

# F Series

10 to 208 Positions, .100" Centerline x .050" Offset  
2, 3 & 4 Row Receptacles & Plugs

The Texas Instruments F-Series Contact System is on the QPL listings for MIL-C-55302 in a variety of slash configurations. These Cable/PWB connectors are intended for PWB applications and are capable of handling currents up to 5 Amperes.

The schematic representations above are intended to show the basic configurations available. Note that all receptacles have straight through bodies while the plugs can be either straight or right angle. In the figures above only printed circuit boards are shown. Several other options are available as shown on the next pages.

The mating matrices provide guidance on which plugs fit which receptacles and which contacts and hardware will mate.

Please contact your distributor or the factory for polarization details. Dozens of polarization schemes are available.

# F Series (MIL-C-55302), .100" Centerline x .050" Offset Straight & Right angle Receptacles & Plugs 1, 2, 3 & 4 Rows, 3-208 Positions

F-Series connectors are available in 3 connector configurations, straight plug or receptacle and right angle plugs. F-Series offers you the option of selecting a 1, 2, 3, or 4 row style connector suitable to your application. All F-Series connectors meet or exceed the requirements of MIL-C-55302 and offer a wide variety of contact and hardware configurations.

## PERFORMANCE

INSTRUCTIONS:

To assure the correct mating of all F Series Connectors, please reference the following:

- 1. Connector Body Mates.  
(same position only).
- 2. Connector Contact Mates.
- 3. Connector Hardware Mates.

CONTACT MATING MATRIX

- Assure all plug connectors have male pin contacts
- Assure all receptacle connectors have female socket style contacts
- All pin contacts will mate with all socket contacts

Please note that straight-through connectors may utilize either straight pin contacts or straight sockets, hence the mating positions of offset contacts should be confirmed with the factory.

Phone (818) 707-2020 Fax (818) 706-1040

## Custom Components...

## A Trompeter Tradition...

The growth of **Trompeter's** product line from only 78 components in 1964, to over 7,000 end items with over 20,000 configurations is proof of our engineering and manufacturing capabilities. With our tradition of custom components comes our reputation for providing *rugged* products that have been *modified* or *specially designed* to perform to your expectations and to meet your specific mechanical requirements.

### Why compromise your design...

when a minor modification might be an affordable solution to your design needs?

### Why settle for less than Trompeter...

when investing in interconnect components for your most demanding applications?

**Trompeter** components meet your most demanding requirements...

when **performance** is critical...

when **compromise** is not an acceptable solution...

and when **cost savings** do little to save the integrity of your design.

**For more information on custom components, contact your local Rep or call... 800-982-2629**

## Cable Assemblies

## Coax, Twinax, Triax, Quadrax

**Trompeter** has been producing high quality cable assemblies for over 25 years.

- Over 850 custom coax cable assemblies
- Over 126 different connector configurations
- Eight standard coax cables
- Over 440 custom twinax/triax cable assemblies
- Over 200 different connector configurations
- Eight standard twinax/triax cables

### Custom Cable Assemblies: General scope of hardware & capabilities...

**Cable:** Coax, Twinax, Triax, Quadrax. Unless otherwise specified, cable assemblies will be made with **Trompeter** cables. **Connectors:** Any cable-attached product produced by **Trompeter**, including plugs, jacks, patch plugs, patch jacks, databus contacts, etc. **Other non-Trompeter products:** e.g. SMA/B/C, coax contacts for multi-pin connectors, etc. (Note: At least one **Trompeter** product required on assembly). **Custom Additions:** Special marking such as ID sleeves, tags, hot stamping, color coding, etc.

**Production Rates:** 24-hour turn-around on many products. **Quality Assurance:** QA to Mil-I-45208A **Testing:** 100% electrical testing for continuity and shorts is standard. Other electrical and mechanical testing available upon request. (Hi-Pot, DWV, Insertion loss, Tensile pull test, etc.) **Delivery:** Full capabilities for sustained high volume deliveries. Deliveries can be adjusted to meet customer needs.

### Standard Cable Assemblies: Coax, Twinax...

These represent only a small portion of **Trompeter's** capabilities for providing high quality cable assemblies. See our full-line catalog for additional standard cable assemblies.

## Patching Systems

Coax/Twinax/Triax  
Normal-through Jacks

**Trompeter...** *Quality doesn't cost... It pays.*

31186 La Baya Drive, Westlake Village, CA 91362-4047

Phone (818) 707-2020 Fax (818) 706-1040

### Continuous Improvement...

### New Trompeter Patching Products!

*Trompeter is proud to announce **enhanced, more robust** versions of our normal-through jacks that you have been using for many years. The **New J24 Series** of coax patch jacks and the **New J74 Series** of twinax/triax patch jacks are **mechanically superior** to previous designs and are **rated at 30,000 cycles!***

### Standard Coax Patching...

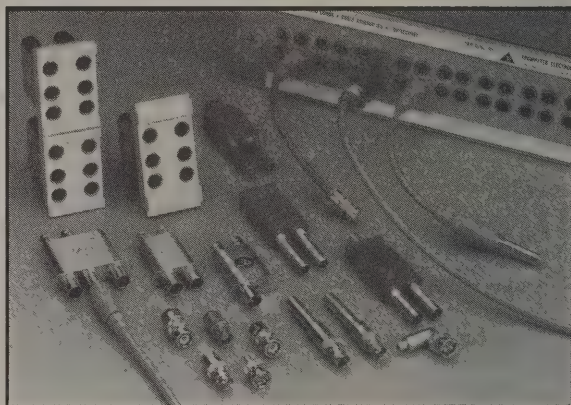

### New J20 Series

#### J24W(T)HF: Serial Digital Patch Jacks

- Rated at 30,000 cycles!
- Extended Bandwidth of DC to 720 MHz  
(For data rates up to 360 Mbits)
- Typical return loss of > 40 dB at 720 MHz
- True impedance matched components.
- 75Ω WE (Western Electric) ..... Center pin .090" dia.

#### J24(W): Analog Patch jacks

- Rated at 30,000 cycles!
- True impedance matched components.
- 75Ω WE (Western Electric) ..... Center pin .090" dia.  
Insertion Loss: 0.4 dB, Return Loss: >18 dB, DC-150 MHz
- 50Ω RCA ..... Center pin .070" dia.  
Insertion Loss: 0.5 dB, Return Loss: >40 dB, DC-550 MHz

*For a J20 Series New Product Bulletin, contact your local Rep or call... 800-982-2629*

### Standard Concentric Twinax/Triax Patching...

### New J74 Series

*Trompeter has championed the development of twinax patching and continues to be a leading innovator in twinax/triax patching.*

**Trompeter standard concentric twinax patching** is designed for use in mil/aero and commercial 78Ω/124Ω applications where signals are protected from extraneous noise (through non-signal carrying shielding). The contact surfaces of these interfacing connectors are isolated from each other and their outer shields. **Trompeter** components will meet or exceed **MIL-STD-1553B** requirements.

### Normal-through Patch jacks...

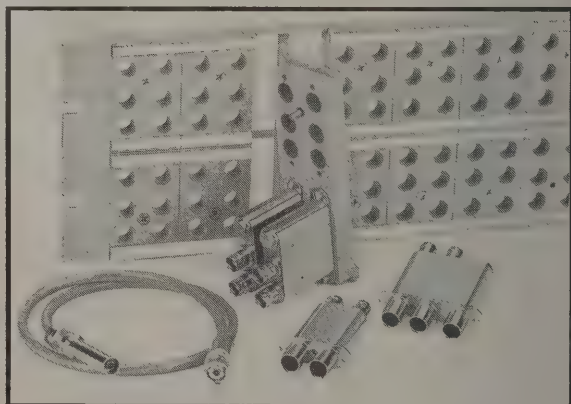

- Rated at 30,000 cycles!
- Same size as our standard coax jacks  
(Replace or mix on standard panels)

#### J74T-R: Self-terminating

Provides a resistive load to the unused side.  
(Plugging into the source side automatically terminates the load side. Plugging into the load side automatically terminates the source side).

#### J74MST-R: Self-terminating, Separate monitor

Provides a resistive load to the unused side.  
Separate monitor jack monitors signal without breaking the normal-through.

**Trompeter's J74** family of dual twinax/triax self-normalizing jacks are complimented by our complete lines of **jacks, plugs, looping plugs, monitor plugs, panels, patch cords and cable assemblies**. These matching components provide improved transmission capabilities in data transmission systems.

*For a J74 Series New Product Bulletin, contact your local Rep or call... 800-982-2629*

## Quality is the Trompeter difference...

### We connect you with Quality...

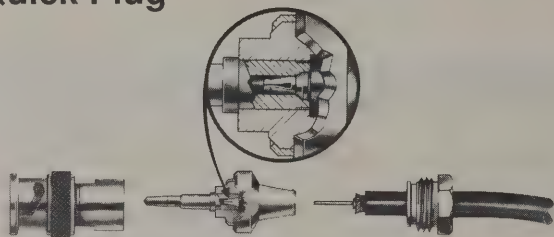

- Fully enclosed, heat treated beryllium copper outer conductor spring for positive electrical contact, improves EMI suppression
- "Pull to destruct force" approaching the tear strength of the cable itself
- 3-piece design for fast easy assembly
- Bayonet or Threaded Versions
- 50 ohm-75 ohm Versions

## Wrench Crimp

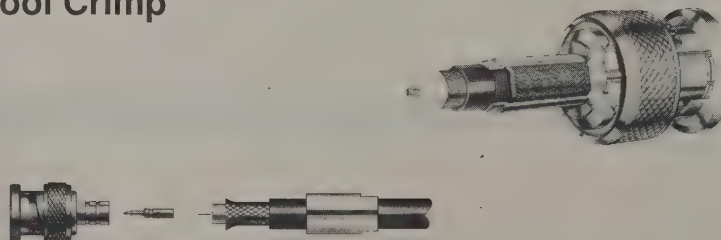

- No insulating material remaining between braid and clamping surfaces when fully assembled
- Holds TFE or similarly jacketed cable without the use of additional hardware
- Floating sleeve permits clamping of the braid without rotary movement
- Captive center contact does not rely on cable for positioning

## Quick Plug

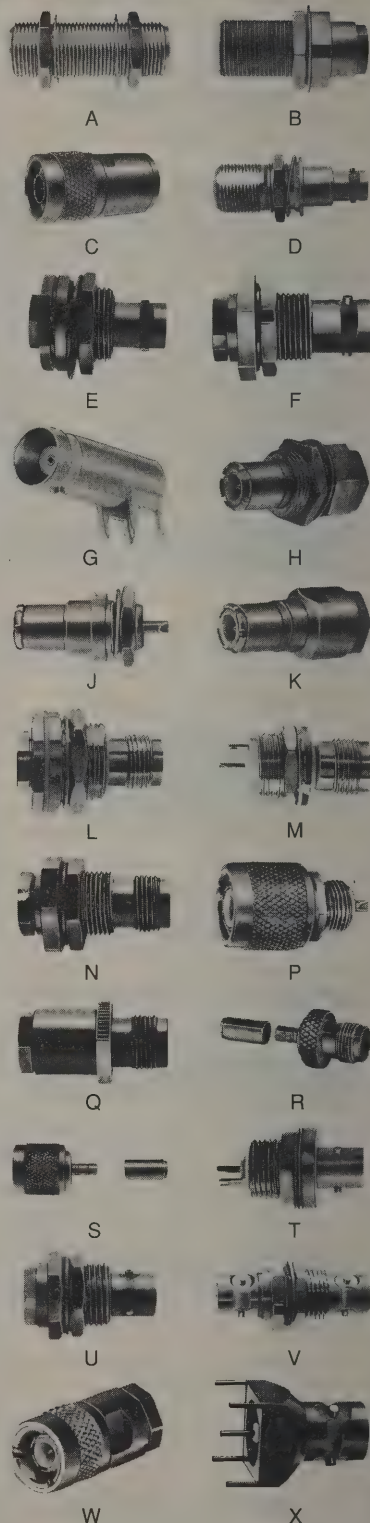

- Wrench crimp design utilizing a solderless, scratch free center conductor retention clamp. (BNC & TNC cable plugs for RG-59, solid center conductor wire only)

## Tool Crimp

- Meets MIL-C-39012B, Category "D" Requirements
- Stepped sleeve crimp provides strong attachment

## Trompeter's Miniature 2, 3, and 4-lug 70 Series Miniature Threaded 370 Series

- Size identical to the BNC / TNC series.
- Available in wrench crimp and tool crimp.
- Twinax concentric connectors used for MIL-STD 1553B Data Bus applications.
- Rugged, dependable twinax and triax applications.
- Provide for polarized primary and redundant data bus needs.
- Concentric patching also available.

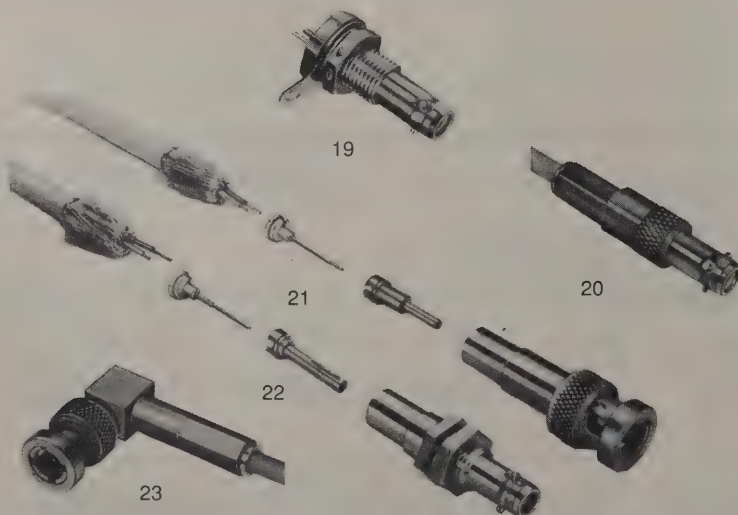

## Trompeter's Subminiature 150 Series

- Concentric twinax & triax jacks, plugs & receptacles for high density installations.
- Series designed specifically for Digital data bus applications where weight is of primary concern (MIL-STD-1553B), Video Pair, baseband circuit & other applications where "Noise Free Guarded" circuits are required.
- Do not require mechanical alignment for mating.
- Concentric patching also available.

## Trompeter's Subminiature 450 Series

- Concentric twinax connectors designed for airborne digital databus applications where weight is of primary concern (MIL-STD-1553B).
- Features "full crimp" design.
- Compatible with Raychem series.
- Available in 3-lug, 4-lug and threaded.
- 3 different keyings available in 3-lug configurations.
- Meets 500 hour (MIL-STD 1344) salt spray requirement.
- Weatherproof designs.
- Inspectable assembly.  
(No blind solder connections)

# Twinax / Triax Connectors

for MIL-STD-1553B Applications

A small business company

Codes: I-Insulated, N-Cable Group, R-Resistance, S-Solder Pot, T-Tool Crimp, W-Wrench Crimp, N/A-Not Available / Applicable, Call-Call factory for availability

**Ambient reference:** Refers to the temperature of the still air surrounding the power supply

**Case reference:** One of the specs that make up the nominal rating. The temperature of the case with the temperature of the surrounding still air at a stated temperature (usually 25°C).

**Crowbar circuit:** Protects the load. A protective circuit that applies a short circuit across the output immediately upon overload. (See overvoltage).

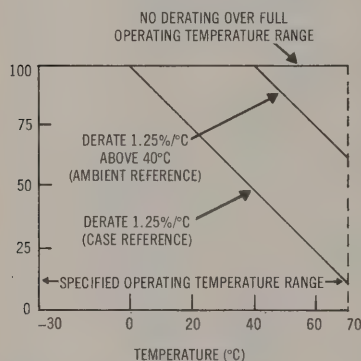

Fig. 1. Power output derating can be referred to ambient or case.

**Derating:** The degree output is reduced as temperature increases. Usually referenced to ambient case temperature and shown on a graph.

**Efficiency:** Ratio of the output power to the required input power. Usually expressed as a percentage given nominal environmental temperature.

**EMI/RFI:** Interference electronic circuitry caused by energy from electro-mechanical or radio frequency power supplies.

**Foldback:** Built-in protective circuits that automatically reduce the output voltage and/or current to very low levels in the event of an overload.

**Holdover (Holdup):** The interval that rated output will continue after input ceases. Usually milliseconds.

**Input reflected current:** The peak-to-peak alternating current generated by switching transients in DC/DC converters. Should not exceed 1%.

**Inrush current limiting:** Built-in circuits that monitor high currents through the rectifiers to the capacitors at turn ON. Circuit is usually inhibited as capacitors attain full charge.

**Nominal rating:** The spec value of the supply at stated conditions of input, output, and temperature.

**Overshoot:** A transient voltage change occurring during turn ON or OFF or during an abrupt load change.

**Overvoltage (Overload) protection:** Built-in circuits that protect the load or the supply by shutting it down or providing foldback.

**Recovery:** The time interval between the termination of an overload and restoration to normal operations.

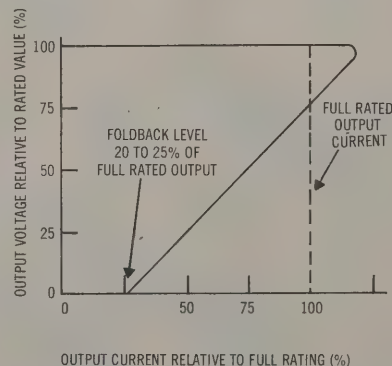

Fig. 2. Current foldback limiting self-resets with removal of fault.

**Response:** The time interval between a stated step change in input voltage or load current and return of output to normal operating conditions.

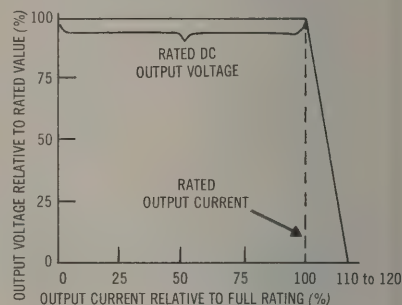

Fig. 3. Current limiting restrictions output current to a valve somewhat greater than full rated output; it resets when fault is removed.

**Sensing:** Regulation techniques that monitor output voltage and/or current. *Local sensing* refers to the output terminals. *Remote sensing* allows a feedback from the load circuit to the power supply.

**Soft start:** Allows the supply to start from zero current and/or voltage over a stated period of time during start up to prevent voltage overshoots and current imbalances.

**Switchers:** Power supplies using switching techniques to achieve high efficiency regulation. These techniques can have attendant EMI/RFI problems.

**Tracking:** The maintaining of fixed ratios between multiple outlets despite variations in line, load or temperature. Particularly important in supplies with symmetrical (+)(-) outputs.

**Transient protection:** Circuitry designed to protect the supply from high amplitude line transients. Generally expressed in terms of peak voltage and maximum transient time duration.

## IT PAYS TO BE WELL CONNECTED

For many years Tru-Connector Corporation has been a principal supplier of radio-frequency components to the great names in the electronics industry. Offering a sound engineering and development organization, backed with well-balanced production facilities, we are ready to meet your needs, large or small, whether they be standard items or special designs.

## 7/16 SERIES RF COAXIAL CONNECTORS

Our 7/16 DIN series connectors are fully compatible to DIN 47223 and IEC 169-4 specifications and designed for coaxial cable up to 0.685 inch dielectric diameter. A 50 ohm impedance, low reflection factor up to 7.5 GHz, and voltage rating of 2700 volts rms make them suitable for medium to high power VHF and UHF applications.

Typical materials and finishes are: Outer connector shell is brass nickel plated. Inner and outer conductors on female connectors are silver plated beryllium copper. Inner and outer conductors on male connectors are silver plated brass. Insulator: Teflon; Gasket: Silicone rubber.

## U.G. &amp; Special Series

We maintain an assortment of piece parts for most U.G. and other special hard to find connectors and adapters. Including those that are no longer supplied by their original manufacturers. We maintain this inventory out of necessity for our valued long-time customers.

## LC/LT Series Connectors

Our large size LC, LC and LT threaded coupling connectors are fully gasketed and weatherproof, with standard impedance of 50 ohms nominal over the 0-1 GHz frequency range. Designed for peak voltages of 5,000 to 10,000 volts rms depending on the coaxial cable type, these connectors are manufactured to meet or exceed MIL-C-3650 specifications and are readily available in most styles.

## Triaxial Series Connectors

Our triax connectors are designed and manufactured to satisfy the most critical specifications for shielding and noise reduction. This series can be supplied in a wide variety of mechanical configurations to meet your exact specifications.

## SC Series Connectors

We manufacture a full line of SC series connectors that are electrically compatible to "C" series connectors, but offer a threaded (rather than bayonet) coupling for improved contact mating and reduced noise under conditions of shock and vibration. Full line in-series and in between adapters are available.

## NEW MODCOM-C® MODULAR FEMALE CONNECTORS

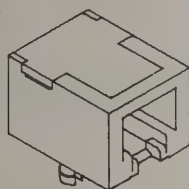

### Low profile features:

- Total height less than 1/2 (.50) inch
- Occupies minimum PCB real estate
- Connector depth less than .75 inch
- Universal connector body size
- One PCB layout fits all connectors in this product family

VIRGINIA PLASTICS  
U.S. PATENT  
4457570 4501464

### Test Data

Contact Durability after bad way mating: All jacks exceeded 2000 cycles of overstress and maintained 150 grams of contact force.

Voltage Standing Wave Ratio (VSWR) : The ratio of the maximum effective voltage to the minimum effective voltage measured along the length of a mis-matched radio frequency transmission line.

|                  | 16Mbps | 50Mbps | 100Mbps | 200Mbps |
|------------------|--------|--------|---------|---------|
| MODCOM-C Jacks   | 1.3    | 1.4    | 1.4     | 1.3     |
| Competitors Jack | 1.4    | 1.5    | 2.0     | 2.3     |

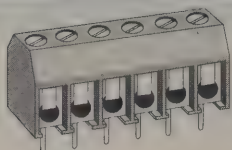

From the test it is obvious that the MODCOM-C connector will give better transmission rates up to and above the FDDI transmission rates.

Additional test data available upon request.

### Description

Series 93 to 97 screw connectors for printed circuit boards are available with both metric and imperial center to center spacings and offer a choice of horizontal, vertical or 45 degree wire entry. All horizontal wire entry versions have standoffs at the base to allow flux and solvents to drain during flow soldering operations. Wire protectors prevent damage to finely stranded wires from the turning screw. Series 93, 94 and 95 can be installed end to end while maintaining center to center spacing. T types feature a dovetail interlocking system and are available in 2 and 3 pole versions which can be combined to form larger configurations. Series 93 features captive screws.

### Technical Data

#### Center to center spacing:

Series 91: 10mm/.394in  
 Series 93: 3.5mm/.138in; 7mm/.276in  
 Series 94: 5.08mm/.200in; 10.16mm/.400in  
 Series 95: 5mm/.197in; 10mm/.394in  
 Series 96: 5.08mm/.200in; 10.16mm/.400in  
 Series 97: 5mm/.197in; 7.5mm/.295in; 10mm/.394in

#### Nominal Cross Section:

Series 91: 4mm<sup>2</sup>/6199mils<sup>2</sup>  
 Series 93: 1mm<sup>2</sup>/1550mils<sup>2</sup>  
 Series 94: 1.5mm<sup>2</sup>/2325mils<sup>2</sup>  
 Series 95: 1.5mm<sup>2</sup>/2325mils<sup>2</sup>  
 Series 96: 2.5mm<sup>2</sup>/3874mils<sup>2</sup>  
 Series 97: 2.5mm<sup>2</sup>/3874mils<sup>2</sup>

#### Breakdown Voltage:

3.5mm spacing >2500  
 5mm spacing >2500  
 7mm spacing >2500  
 7.5mm spacing >4000  
 10mm spacing >5000

#### Wire Stripping Length: 6mm/0.24in

#### Recommended Hole Ø in P.C. Board:

Series 91: 1.30mm/.05in  
 Series 93: 1.20mm/.047in  
 Series 94 - 97: 1.30mm/.05in

### International Approvals

Series UL: File No. E69841  
 91 18-10 AWG Cu; 300V, 25A  
 93 26-16 AWG Cu; 300V, 7A  
 94, 95 26-14 AWG Cu; 300V, 15A  
 96, 97 26-12 AWG Cu; 300V, 20A

Series CSA: File No. LR24322

 93 26-16 AWG Cu; 300V, 7A  
 94, 95 26-14 AWG Cu; 300V, 15A  
 96, 97 26-12 AWG Cu; 300V, 15A

In accordance with VDE 0110  
 VDE 0609 test report for types 970 - 975  
 will be provided on request.

### Material

**Moulding:** Polyamide, self-extinguishing to UL94 V-O, grey colour

#### Temperature Limits:

short time: 140°C/284°F  
 continuous: 80°C/176°F  
 cold resistant: -40°C/-40°F

#### Comparative Tracking Index: CTI>600

#### Terminal Body: tin-plated brass

#### Wire Protector: Copper alloy, tin plated

#### P.C. Pin: Ø1mm/0.04in ± 0.75mm<sup>2</sup>

All types with pin in right angle to wire entrance: tin plated copper.

All types with pin in axis to wire entrance: tin plated brass.

(HG versions: tin plated copper)

**Screw:** zinc-plated steel, yellow chromated

### Available Options

CN: Consecutive Numbering  
 SM: Special Marking (please provide sketch)

BS: Brass Screws

G05: Gold plating (5 microinches)

G30: Gold plating (30 microinches)

S30: Silver plating (30 microinches)

XXMM: Longer P.C. pins up to 75mm/3in. indicate length in millimeters (not available for 931-DS, 941-DS, 961-DS, 977-OPSG-DS, 943-DS and 963-DS).

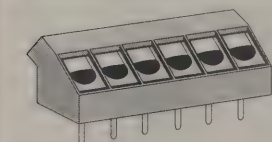

Note: All blocks are available without wire protector (delete -DS from type number)

### Accessories

#### Self Adhesive Marker Strips

| Type        | Center to center spacing | Marked  |
|-------------|--------------------------|---------|
| BST3.50/24  | 3.50mm/.138in            | 1 to 24 |
| BST5.00/12  | 5.00mm/.197in            | 1 to 12 |
| BST5.00/32  | 5.00mm/.197in            | 1 to 32 |
| BST5.08/12  | 5.08mm/.200in            | 1 to 12 |
| BST5.08/32  | 5.08mm/.200in            | 1 to 32 |
| BST7.50/19  | 7.50mm/.295in            | 1 to 19 |
| BST10.00/16 | 10.00mm/.394in           | 1 to 16 |
| BST10.16/16 | 10.16mm/.400in           | 1 to 16 |

Marker strips are UL recognized in the category of marking and labelling systems materials.

### 45° Wire Entry

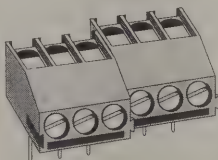

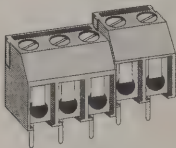

| Type   | Center to Center spacing | Height     | Width        | No. of poles |
|--------|--------------------------|------------|--------------|--------------|
| 974-DS | 5mm/.197in               | 12mm/.47in | 12.5mm/.49in | 2-26         |
| 976-DS | 7.5mm/.295in             | 12mm/.47in | 12.5mm/.49in | 2-3          |
| 975-DS | 10mm/.394in              | 12mm/.47in | 12.5mm/.49in | 2-13         |

### Double Level Horizontal Wire Entry

| Type    | Center to center spacing | Height       | Width        | No. of poles |
|---------|--------------------------|--------------|--------------|--------------|
| 970-EDS | 5mm/.197in               | 27mm/1.063in | 20.2mm/.80in | 4-64         |

### Dovetail Interlocking Versions

2 and 3 position terminal blocks can be assembled to required lengths while maintaining center to center spacing.

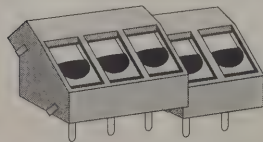

### Horizontal Wire Entry

| Type     | Center to center spacing | Height       | Width     | No. of poles |
|----------|--------------------------|--------------|-----------|--------------|
| 930-T-DS | 3.5mm/.138in             | 6.7mm/.26in  | 8mm/.31in | 2-3          |
| 950-T-DS | 5mm/.197in               | 10mm/.394in  | 8mm/.31in | 2-3          |
| 970-T-DS | 5mm/.197in               | 13mm/.51in   | 9mm/.35in | 2-3          |
| 940-T-DS | 5.08mm/.2in              | 11.5mm/.45in | 8mm/.31in | 2-3          |
| 960-T-DS | 5.08mm/.2in              | 13.5mm/.53in | 9mm/.35in | 2-3          |
| 977-T-DS | 7.5mm/.295in             | 13mm/.51in   | 9mm/.35in | 2-3          |

### Vertical Wire Entry

| Type     | Center to center spacing | Height    | Width        | No. of poles |
|----------|--------------------------|-----------|--------------|--------------|
| 931-T-DS | 3.5mm/.138in             | 6mm/.31in | 8mm/.31in    | 2-3          |
| 951-T-DS | 5mm/.197in               | 8mm/.31in | 10mm/.394in  | 2-3          |
| 971-T-DS | 5mm/.197in               | 9mm/.35in | 13mm/.51in   | 2-3          |
| 941-T-DS | 5.08mm/.2in              | 8mm/.31in | 11.5mm/.45in | 2-3          |
| 961-T-DS | 5.08mm/.2in              | 9mm/.35in | 13.5mm/.53in | 2-3          |
| 977-T-DS | 7.5mm/.295in             | 9mm/.35in | 13mm/.51in   | 2-3          |

### 45° Wire Entry

| Type     | Center to center spacing | Height     | Width        | No. of poles |
|----------|--------------------------|------------|--------------|--------------|
| 974-T-DS | 5mm/.197in               | 12mm/.47in | 12.5mm/.49in | 2-3          |
| 964-T-DS | 5.08mm/.2in              | 12mm/.47in | 12.5mm/.49in | 2-3          |
| 976-T-DS | 7.5mm/.295in             | 12mm/.47in | 12.5mm/.49in | 2-3          |

### Multiple Wire Entry

| Type      | Center to center spacing | Height     | Width     | No. of poles |
|-----------|--------------------------|------------|-----------|--------------|
| 970-TX-DS | 5mm/.197in               | 13mm/.51in | 9mm/.35in | 2 and 4      |
| 970-X-DS  | 5mm/.197in               | 13mm/.51in | 9mm/.35in | 6 and 10     |

#### Description

These connectors with extra large clamping area have a lift-terminal which guarantees a high pressure fitting and a fatigue strength wire protection even after countless disconnections.

All types have captive screws and a dovetail interlocking system with 2 or 3 poles per strip. Blocks can be assembled to form required pole configurations.

Center to center spacing is 5mm/0.197in and 10mm/0.394in. All types have a test hole for a test plug with a diameter of 2.3mm/0.09in. All blocks are shipped unmarked as standard.

#### Technical Data

**Center to center spacing:**  
5.00mm/0.197in and 10.00mm/0.394in

**Nominal Cross Section:**  
4.0mm<sup>2</sup>/619mmils<sup>2</sup>

**Breakdown Voltage:** >2500V

**Wire Stripping Length:** 8.00mm/0.31in

**Recommended Hole Ø in P.C. Board:**  
1.30mm/0.05in

#### Material

**Moulding:** Break Resistant polyamide, self extinguishing, to UL94V-O, grey colour

#### Temperature Limits:

short time: 140°C/284°F  
continuous: 80°C/176°F  
cold resistant: -40°C/-40°F

**Comparative Tracking Index:** CTI>600

**Terminal Body:** nickel-plated brass

**P.C. Pin/Wire Protector:** tin-plated brass

**P.C. Pin Profile:** 1 x 0.8mm/0.04 x 0.03in

**Screw:** M3 zinc-plated steel, yellow chromated tightening torque 4.5lb/in.

#### Available Options

CN: Consecutive Numbering

SM: Special Marking (please provide sketch)

BS: Brass Screws

G05: Gold plating (5 microinches)

G30: Gold plating (30 microinches)

S30: Silver plating (30 microinches)

## SCREW CONNECTORS FOR PRINTED CIRCUIT BOARDS

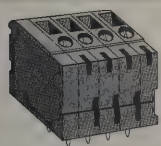

### SERIES 180 AND 182

Wire entrance and set screw are in line with circuit board.

**Type** Center to center spacing  
180-A-111 5mm/0.197in  
182-A-111 7.5mm/0.295in

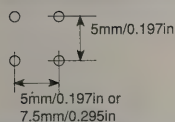

**Dimensions**  
Height: 19.5mm/0.77in  
Width: 18.5mm/0.73in

Wire entrance and set screw are at right angle to circuit board.

**Type** Center to center spacing  
180-A-121 5mm/0.197in  
182-A-121 7.5mm/0.295in

**Dimensions**  
Height: 18.5mm/0.73in  
Width: 19.5mm/0.77in

P.C. Board Hole Layout

#### Description

This design provides accessibility in tight spots, by arranging wire entrances in line with screw driver access. It does so in the horizontal or vertical direction, depending on the type. Reliable torque absorption of screw clamps is achieved by providing two exit pins per pole with center distances of 5.0 or 7.5 mm, and by the mechanical interlock features of the assembly. Connectors can be assembled in any desired length, preferably not exceeding 12 poles.

Beyond providing ease of systems service, the feed-through in-line feature provides designers with a component for dust protected systems by effectively reducing leakage to the environment.

The increasing importance of susceptibility to extraneous electro-magnetic interference (EMI), inter-stage coupling, or conversely, electromagnetic radiation, is also addressed by this connector design. Connections to the inner chassis or cabinet can be made through small holes in the openings in the enclosure, thereby maintaining its properties to the greatest extent, while permitting connecting service from the outside.

#### Technical Data

**Center to center spacing:**

Series 180: 5.00mm/0.197in

Series 182: 7.50mm/0.295in

Center to center spacing may be modified by inserting spacers of 2.5mm/0.098 in between individual connectors, thereby increasing the center to center pin distance to 7.5mm/0.295in. Special versions, or customer-assembled blocks may employ the spacer in any desired position to vary the pin spacing. The last individual connector in a block is closed by an end section.

**Nominal Cross Section:**  
2.5mm<sup>2</sup>/387mmils<sup>2</sup>

**Wire Stripping Length:** 9.00mm/0.37in

**Recommended Hole Ø in P.C. Board:**  
1.30mm/0.05in

#### International Approvals

UL: Pending

File No: E69841

CSA: Pending

File No: LR24322

In accordance with VDE 0110

#### Material

## Description

This plug-in screw connector system is available in various possible combinations.

A reliable connection is provided at the screw side with a lift-terminal and at the plug-in side with a locked contact. The lift system ensures a high pressure fitting and a fatigue strength wire protection even after countless disconnections.

Plugs are equipped with captive screws and are available up to 24 poles per strip. Double level headers are available up to 48 poles. All blocks are shipped unmarked as standard.

## Technical Data

### Center to center spacing:

Series 120: 5.00mm/0.197in  
Series 121: 5.08mm/0.200in

(10.00mm/0.394in and 10.16mm/0.400in available on request)

### Nominal Cross Section:

2.5mm<sup>2</sup> /3874mils<sup>2</sup>

### Breakdown Voltage:

>2500V

### Wire Stripping Length:

7.00mm/0.28in

### Recommended Hole Ø in P.C. Board:

1.40mm/0.06in

## PLUG-IN SCREW CONNECTORS FOR PRINTED CIRCUIT BOARDS

### TYPES 930-FL-DS AND 950-FL-DS

**WECO**®

#### Description

Types 930-FL-DS and 950-FL-DS plugs are available from 2 to 24 poles per strip. The male mating pins are offered in pin-strips up to 16 poles for 930-FL-DS (type 931-SLS) and 64 poles for 950-FL-DS (type 971-SLW) or individually soldered (type LST-1.3 x 6.5).

Pinstrip and connector base design provide directional orientation when mating the two parts. A specially shaped contact spring with integral wire protector ensures a secure contact with relatively small insertion and removal forces.

Type 950-FL-DS features captive screws.

#### Technical Data

##### Center to Center Spacing:

930-FL-DS: 3.5mm/0.138in

932-FL-DS: 7mm/0.276in

950-FL-DS: 5mm/0.197in

952-FL-DS: 10mm/0.394in

##### Nominal Cross Section:

950-FL-DS: 1.5mm<sup>2</sup>/2325 mils<sup>2</sup>

930-FL-DS: 1mm<sup>2</sup>/1550 mils<sup>2</sup>

Breakdown Voltage: 2500V

##### Wire Stripping Length:

930-FL-DS: 5mm/0.20in

950-FL-DS: 6mm/0.24in

##### Recommended Hole Ø in P.C. Board:

Type 931-SLS: 1.3mm/0.05in

Type 971-SLW: 1.3mm/0.05in

Type LST-1.3 x 6.5: 1.5mm/0.06in

#### International Approvals

UL: 950-FL-DS - 300V, 10A

26-14 AWG Cu.

File No. E69841

930-FL-DS - Pending

CSA: 950-FL-DS - 300V, 10A

26-14 AWG Cu.

File No. LR24322

930-FL-DS - Pending

In accordance with VDE 0110

#### Material

**Plug Moulding:** Break resistant polyamide, self extinguishing UL94 V-0, grey colour

#### Temperature Limits:

short time: 160°C/320°F

continuous: 100°C/212°F

cold resistant: -40°C/-40°F

**Comparative Tracking Index:** CTI > 600

**Terminal Body:** nickel plated brass

**Contact Spring/Wire Protector:** copper alloy, tin plated

**Single Pins LST:** Ø1.3mm/0.05 in,

silver plated brass

**Pin Strip Moulding:** PBTP GF (fibreglass reinforced), self extinguishing UL94 V-0, black colour

**Pin:** Tin plated brass

**Screw: 950-FL-DS:** M 2 6 zinc plated steel. Tightening torque max. 0.4Nm/3.5 lb/in.

**930-FL-DS:** M 2 zinc plated steel.

Tightening torque max. 0.2Nm/2.0 lb/in.

#### Available Options

CN: Consecutive Numbering

SM: Special Marking (please provide sketch)

BS: Brass screws

PS: Passivated steel screws

G05: Gold plating (5 microinches)

G30: Gold plating (30 microinches)

S30: Silver plating (30 microinches)

NOTE: If more than one option is required, please separate each option with a dash (-).

#### Accessories

##### Self Adhesive Marker Strips:

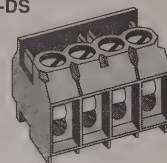

##### Center-to-Center

| Type        | Spacing       | Marked  |

## TAB CONNECTORS FOR PRINTED CIRCUIT BOARDS

### SERIES 900

**WECO**®

#### Description

Series 900 tab type connectors offer the advantage of using receptacle equipped conductors for quick connecting and disconnecting to printed circuit boards. Instead of individually inserting the quick connect blades onto the printed circuit board, the 900 Series combines the required number of tabs into a strip. This eases the handling and cuts down on assembly time and cost. The quick connect blades come in various styles and types to meet your required plug-in direction. All quick connect blades feature double pin soldering and are tightly interlocked into the polyamide insulation housing. This ensures a reliable relief for the solder points when fitting and removing receptables.

#### Technical Data

##### Center to center spacing: No. of Poles

5mm/0.197in 02 - 25

7.5mm/0.295in 02 - 17

10mm/0.394in 02 - 13

# MINI SCREW CONNECTORS FOR PRINTED CIRCUIT BOARDS SERIES 93 3.5MM CENTER TO CENTER SPACING

## Description

Series 93 screw connectors for printed circuit boards are one of the smallest available on the market. These "space savers" on PC boards are available from 2 to 24 poles and 2 and 3 pole dovetail versions. Both types have a center to center spacing of 3.5mm/.138in. Types with 7mm/.176in center to center spacing are also available. All types with pins at right angles relative to the wire entrance have standoffs at the base. This encourages the flow of flux and solvents during the soldering operation. The dovetail interlocking system provides excellent flexibility for the tailoring of connectors to a specific size. This also results in reduced delivery intervals and inventory.

The clamping area of type 938 is box shaped and is best suited for use with larger conductors. The wire protector prevents the clamping screw from damaging the wire. Captive screws are used throughout. All blocks will be shipped without markings as standard. Consecutive numbering, special marking and gold or silver plating are some of the options available.

## International Approvals:

UL File No. E69841

CSA File No. LR24322

| Rating | Current (A) | Voltage (V) | AWG   |
|--------|-------------|-------------|-------|
| UL     | 7           | 300         | 26-16 |
| CSA    | 7           | 150         | 26-16 |

## DIN/VDE Related Information:

VDE 6A, 600V at 30°C/86°F, ambient temp.

Acc. to DIN VDE 0110, pollution degree 1.

## Technical Data

**Center to Center Spacing:** 3.5mm/.138in.

**Nominal Cross Section:** 1.0mm<sup>2</sup>/1550 mils<sup>2</sup>

**Clamping Range:**

26-16AWG solid Cu wire

26-18 AWG stranded Cu wire

**Wire stripping Length:** 6.0mm/0.25in.

**Recommended Hole Ø in PC Board:** 1.2mm/0.05in.

## Material

**Moulding:** Polyamide, self-extinguishing to UL94 V-0, grey colour.

**Temperature Limits:**

short-time: 140°C/284°F

continuous: 80°C/176°F

cold-resistant: -40°C/-40°F

# MINI PLUG-IN SCREW CONNECTOR SYSTEM FOR PRINTED CIRCUIT BOARDS SERIES 93-FL 3.5MM CENTER TO CENTER SPACING

## Description

Series 93-FL plug-in screw connector system with its various available pin combinations represents a cost effective and high quality means to connect to circuit boards. Single pins of varying lengths, in addition to type 931-SLS pinstrips are offered for maximum flexibility of design.

The 3.5mm/0.138in pin spacing corresponds to existing industrial standards, which makes this product an excellent candidate for cost effective substitutions. Types with 7mm/0.176in center to center spacing are also available.

The plug moulding is made of polyamide, a self extinguishing material. The tin plated brass screw connector with optional wire protector ensures secure, low resistance connections under the most adverse operating conditions.

A specially shaped contact spring ensures an excellent electrical connection with relatively small insertion and removal forces.

The plug inserts flush with the circuit board to a low silhouette.

Although a generally applicable device, this type of plug-pin combination is used in computer-machine interfaces where low level signal processing meets power levels under industrial conditions.

It helps the service technician to exchange a board with minimum down time, and provides the ruggedness and reliability for an industrial environment.

## Material

**Moulding:** Polyamide, self extinguishing to UL94 V-0, colour grey

**Temperature Limits:**

short time: 140°C/284°F

continuous: 80°C/176°F

cold resistant: -40°C/-40°F

**Comparative Tracking Index:** CTI >600

**Terminal Body:** Nickel plated brass

**Wire Protector:** Nickel silver

**Contact Spring:** Tin plated copper alloy

**Screw:** M2 zinc plated steel, yellow chromated. Maximum torque 0.4Nm/3.5 lb/in.

**Pinstrip 931-SLS:**

**Moulding:** PBTP GF to UL94 V-0, colour black

**Temperature Limits:**

short time: 200°C/392°F

continuous: 100°C/212°F

cold resistant: -40°C/-40°F

**Pin:** Ø1mm/0.04in. Tin plated brass

## Technical Data:

**Center to center spacing:**

3.5mm/0.138in

**Clamping range:** 30-18AWG, up to 0.75mm<sup>2</sup> (1mm<sup>2</sup> without DS)

**Wire stripping length:** 5mm/0.20in.

**Recommended Hole Ø in PC Board:**

1.3mm/0.05in.

Types 2-DIN-46284, 3-DIN-46284,

300V, 20A, 18-12AWG

Type 560:

300V, 25A, 20-12AWG

600V, 5A, 20-12AWG

File No. LR24322

#### Material

Type 560 K4DF:

Mount: Steatite, KER 220 DIN 40685

Screw Terminal: nickel plated brass

Screw: M4 zinc plated steel

Binding Clip: zinc plated steel

Type 560-K4DF-V2A:

All metal parts (terminal, binding screw,

binding clip and spring washer B4 DIN

127) are made of stainless steel for

extreme temperatures up to 500°C/

940°F

Types 2-DIN-46284, 3-DIN-46284,

4010-B, 4011-B:

Moulding: Glazed porcelain KER 111

DIN 40685

Terminal Body: nickel plated brass

Screw: M3; 4010-B, 4011-B: M4 zinc

plated steel

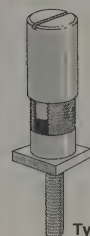

#### Available Options

V2A: Stainless steel inserts for  
940°F/500°C (type 560 K4DF  
only)

HDS: Wire protector (types 2-DIN-  
46284, 3-DIN-46284, 4010-B,  
4011-B only)

|      |         |

#### Description

Grounding Terminals are suitable for installation in apparatus, machinery and installation equipment of all types. They are used mainly in applications requiring a locked screw connection. WECO grounding terminals provide maximum operational reliability and meet the requirements of the corresponding VDE regulations.

The DF type mantle terminals consist of an upper cylindrical nut, and a lower, tapered and slotted bolt. A pressure pad travels up or down within that slot, depending on the direction of rotation. A small spring, situated between pressure pad and cylindrical nut, transmits contact pressure to the wire and thereby insures the integrity of the electrical connection despite vibration or temperature cycling effects. In addition, the spring and pressure pad provide a very effective friction lock to assure a durable and stable connection.

#### Notes on installation:

The above specified terminals can be used for equipment of temperature classes T1 to T6 at ambient temperatures up to 40°C/104°F resulting from self-heating at the specified current. If the terminals are to be fitted as live parts in a terminal compartment — at least of enclosure IP 54 — the requirements in accordance with EN 50014-1977/VDE 0171, Part 1/5.78, Sections 14.2 to 14.4, must also be observed. In addition, the terminals must be locked at the base of the slotted bolt to prevent twisting.

#### Material

Slotted bolt, mantle nut and clamping member: nickel plated brass

Spiral Spring: spring steel, blue annealed (types DFG, DFB, DFD), zinc plated steel (type GSB)

#### Test Certificates

##### Type DFG

Part certificate of the German National Standards Laboratory (PTB), Braunschweig PTB No. Ex-81/3122 U dated 7.7.1981, Dimension sheet No. 200006

The locked mantle terminals DF are approved in accordance with European Standard DIN EN 50014/VDE 0171, Part 1/5.78 and DIN EN 50019/VDE 0171, Part 6/5.78.

##### Type DFB

Part certificate of the German National Standards Laboratory (PTB), Braunschweig PTB No. Ex-81/3122 U dated 7.7.1981, Dimension sheet No. 200006.

The locked mantle terminals DF are approved in accordance with European Standard DIN EN 50014/VDE 0171, Part 1/5.78 and DIN EN 50019/VDE 0171, Part 6/5.78.

##### Type DFD

Part certificate of the German National Standards Laboratory (PTB), Braunschweig PTB No. Ex-81/3132 U dated 23.10.1981, Dimension sheet No. 220003.

TERMINAL STRIPS FOR PANEL / CHASSIS MOUNTING

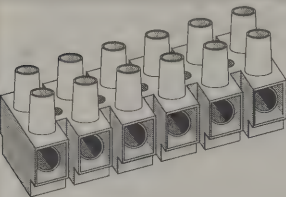

Series 300

These screw terminal strips are used for connecting stripped, unterminated, stranded or solid copper wires, ranging from 26-6 AWG depending on product type selected. Each strip has 12 circuits and can easily be field cut to the required number of poles. They can also be ordered factory-cut in any requested pole number.

\*600 volts with insulating base.

Type 810

These quick connect strips have 4 terminal points which can be operated independently. The stripped conductor is inserted and clamped by the steel spring. To release the conductor from the clamp, insert a screwdriver through the appropriate opening and depress the spring clip.

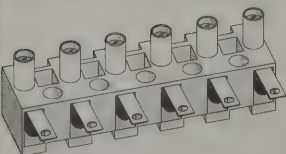

| Type | UL   |       |       | CSA  |       |       | Height       | Width         |

Type 820-DS

Terminal strip Type 820-DS is provided with a double push-in connection similar to Type 810. The opposite side is equipped with a sturdy screw-type connection. A wire protector (DS-Types) prevents damage to the wire from the turning screw.

\*600 volts with insulating base.

Description

All types are available from 1 to 12 poles. A mounting hole is provided between every circuit. The screws are captive and are backed-out and ready for wiring. Each circuit of the terminal strips has a wire protector to prevent damage to the wire from the turning screw. The wire protector is a thin steel or copper alloy plate placed between screw and wire. All metal parts of this terminal are completely recessed in the flexible polyamide moulding. This dead-front design ensures safety and prevents short circuiting. Its flexible construction allows use on uneven surfaces.

# PLUG-IN TERMINAL STRIPS FOR PANEL / CHASSIS MOUNTING

## SERIES 300-S

**WECO**®

### Description

Plug and socket connectors are particularly suitable for installations where simple circuit connection and disconnection is required. By pre-wiring various equipment sections, it is possible to use plug and socket connectors to provide a quick and reliable connection at final assembly.

The screws are captive; each screw connection can be equipped with a wire protector which avoids damage to the conductor from the turning screw.

Standard strips have 12 poles and can easily be field cut to required number of poles or ordered as required. A mounting hole is provided between each circuit. The terminal screws are backed out and ready for wiring. The dead front design is for safety and avoids short circuiting.

### Technical data

#### Center to Center Spacing:

Series 302: 8mm/.315in  
Series 322: 10mm/.394in  
Series 323: 10mm/.394in  
Series 324: 11.5mm/.453in

#### Nominal Cross-Section:

Series 302: 2.5mm<sup>2</sup>/3874mils<sup>2</sup>  
Series 322: 4mm<sup>2</sup>/6199mils<sup>2</sup>  
Series 323: 4mm<sup>2</sup>/6199mils<sup>2</sup>  
Series 324: 6mm<sup>2</sup>/9298mils<sup>2</sup>

#### Breakdown Voltage: >4000V

#### Wire Stripping Length:

Series 302: 5mm/0.2in  
Series 322: 7mm/0.275in  
Series 323: 7mm/0.275in  
Series 324: 7mm/0.275in

### International Approvals

UL CSA   
See table See table

In accordance with VDE 0110

### Material

**Moulding:** Polyamide, self-extinguishing to UL 94, V-2, white colour

#### Temperature Limits:

short-time 140°C/284°F  
continuous 80°C/176°F  
cold-resistant -40°C/-40°F

#### Comparative Tracking Index: CTI > 600

**Terminal Body:** Nickel plated brass

**Spring Clip:** Stainless steel strip

**Wire Protector:** Copper alloy, tin plated

**Screw:** Zinc plated steel, yellow chromated

### Available Options

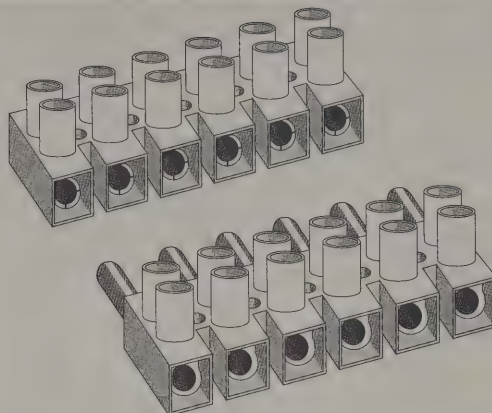

\*All versions are available without wire protectors (delete DS or HDS from type description)

# TAB CONNECTORS FOR PANEL / CHASSIS MOUNTING

## Description

Type 401 offers a tab connection and is available with 4.8mm/.187in or 6.3mm/.250in tabs.

Type 401LF combines a tab type connector on one side with a solder tab on the opposite side. Types 401 and 401-LF provide a mounting hole between each circuit and are available from 1 to 12 poles.

Types 406 and 407 are used as lead distributors equipped with 6.3mm/.250in tabs. Type 406 has a single connector on one side while the other side is equipped with a double connector. Both sides of type 407 have double connectors.

## Technical Data

### Center to Center Spacing:

401-4.8/-6.3: 12.3mm/0.48in  
401-LF (PA/PVC) 4.8/-6.3: 12mm/0.47in

### Nominal Cross Section:

Tab: 4.8mm/0.187in:  
2.5mm<sup>2</sup>/3874 mils<sup>2</sup>  
Tab: 6.3mm/0.250in:  
6.0mm<sup>2</sup>/9300 mils<sup>2</sup>

## Material

### 401-LFPA-4.8/-6.3

**Moulding:** Polyamide, self-extinguishing to UL94 V-2, white colour.

The polyamide material used for this connector passed the Spherical Pressure Test in compliance with VDE 0470 at 125°C/258°F; this test is required for insulation material in several CEE and VDE regulations.

## Temperature Limits:

short-time: 140°C/284°F  
continuous: 80°C/176°F  
cold-resistant: -40°C/-40°F

**Comparative Tracking Index:** CTI>600

**401-4.8/-6.3 and 401-LFPVC-4.8/-6.3**

**Moulding:** Transparent plasticised PVC

## Upper Temperature Limits:

# MULTI-POINT TAB CONNECTORS FOR PANEL / CHASSIS MOUNTING

## Description

Multi-point tab connectors are equipped with tab terminals of various sizes and combined assemblies on one strip or even on one contact.

Distributors and space-saving multi-tier designs increase the connection density. Tab connectors combined with either screw terminals or solder terminals on the other side provide an immediate solution to most connection problems thanks to the countless possible combinations.

## Technical Data

# RAIL MOUNTED TERMINAL BLOCKS

## FOR DIN EN 50022, 50035 AND 50045 MOUNTING RAILS

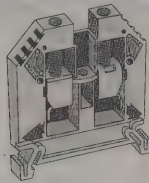

### Feed-Through

For DIN EN 50022 or 50035 Mounting Rails:

| Type       | Width       | Height      | Length      | Amps | Volts | AWG    | Colours                  |
|------------|-------------|-------------|-------------|------|-------|--------|--------------------------|
| Euro 4     | 6mm/.24in   | 36mm/1.42in | 44mm/1.73in | 20   | 600   | 18-12  | Grey, blue, yellow/green |
| Euro 6     | 7mm/.28in   | 36mm/1.42in | 50mm/1.97in | 20   | 600   | 18-8   | Grey, blue, yellow/green |
| Euro 10    | 9mm/.35in   | 44mm/1.73in | 50mm/1.97in | 65   | 600   | 18-6   | Grey, blue, yellow/green |
| Euro 18-25 | 12mm/.47in  | 49mm/1.93in | 56mm/2.20in | 85   | 600   | 14-4   | Grey, blue, yellow/green |
| Euro 35-50 | 16mm/.63in  | 61mm/2.40in | 62mm/2.44in | 140  | 600   | 14-10  | Grey, blue, yellow/green |
| Euro 70    | 26mm/1.02in | 75mm/2.95in | 74mm/2.91in | 175  | 600   | 14-3/0 | Grey, blue, yellow/green |

For DIN EN 50045 Mini Rail:

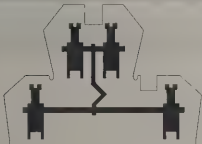

| Type   | Width     | Height      | Length      | Amps | Volts | AWG   | Colours |
|--------|-----------|-------------|-------------|------|-------|-------|---------|
| Euro 4 | 6mm/.24in | 28mm/1.10in | 32mm/1.26in | 20   | 300   | 18-12 | Grey    |

### Two Stage

For DIN EN 50022 or 50035 Mounting Rails

| Type      | Width     | Height      | Length      | Amps | Volts | AWG   | Colours                  |
|-----------|-----------|-------------|-------------|------|-------|-------|--------------------------|
| Euro D4-2 | 6mm/.24in | 55mm/2.17in | 68mm/2.60in | 20   | 600   | 18-12 | Grey, blue, yellow/green |

### Two Stage Cross Connect

For DIN EN 50022 or 50035 Mounting Rails

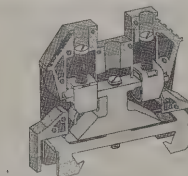

| Type      | Width     | Height      | Length      | Amps | Volts | AWG   | Colours                  |
|-----------|-----------|-------------|-------------|------|-------|-------|--------------------------|
| Euro D4/1 | 6mm/.24in | 55mm/2.17in | 68mm/2.60in | 20   | 600   | 18-12 | Grey, blue, yellow/green |

### Ground

For DIN EN 50022 or 50035 Mounting Rails

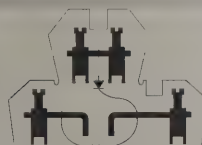

| Type     | Width      | Height      | Length      | Amps | Volts | AWG   | Colours      |
|----------|------------|-------------|-------------|------|-------|-------|--------------|

| Euro E6  | 8mm/.31in  | 44mm/1.73in | 50mm/1.97in | -    | -     | 18-8  | yellow/green |
| Euro E16 | 12mm/.47in | 49mm/1.93in | 56mm/2.20in | -    | -     | 14-4  | yellow/green |

### Fuse

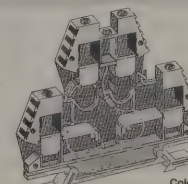

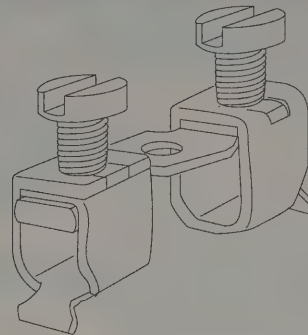

For DIN EN 50022 or 50035 Mounting Rails

| Type       | Fuse Holder    | Width      | Height      | Length      | Amp | Volts | AWG   | Colours | Fuse Size  |
|------------|----------------|------------|-------------|-------------|-----|-------|-------|---------|------------|
| Euro S4    | Plug-in        | 8mm/.31in  | 36mm/1.42in | 60mm/2.60in | 8   | 600   | 18-12 | grey    | 5x20, 5x25 |
| Euro S10   | Lever operated | 10mm/.39in | 50mm/1.97in | 82mm/3.23in | 8   | 600   | 18-6  | grey    | 25in       |
| Euro S10-5 | Lever operated | 10mm/.39in | 50mm/1.97in | 82mm/3.23in | 8   | 600   | 18-6  | grey    | 5x20, 5x25 |

### Diode

Please contact WECO for a list of available versions.  
Notes: May also be supplied without diodes for special component requirements

Colours  
Grey, blue,  
yellow/green

### Description

WECO offers a line of modular rail mounted terminal blocks designed for DIN standard mounting rails. These space saving terminals feature captive screws and polyamide 6.6 UL94 V-2 mouldings.

In addition to the standard feed-through blocks, the line also includes 2 stage, ground, fuse and diode blocks. Jumper combs, covers and marker tags are also available. These terminal blocks may also be used in conjunction with our rail mounted electronic modules for specific interface or component requirements.

### Materials

Moulding: Polyamide 6.6 UL94 V-2

### Tracking Resistance:

IEC Publication 112: CTI>600  
VDE 0303: KB-600

Clamp: Hardened steel, electroplated with zinc, chromated

Internal bus: High grade copper alloy, electro-plated with nickel

Screws: steel, zinc plated and chromated

Jumper comb: Electrolytic copper

# ELECTRONIC MODULES FOR MOUNTING RAILS

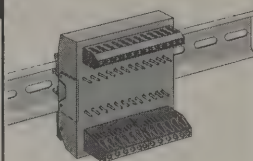

## TO DIN EN 50022, 50035 AND 50045

### Component Modules MBCA 8 and 12 poles

#### How To ORDER

| TYPE | NUMBER OF POLES |
|------|-----------------|
|      | 08<br>12        |
| MBCB | -PPZ            |

#### Description

MBCA component modules are available in 8 and 12 pole versions and are designed as "Do it yourself" modules. The units provide input and output terminal blocks, as well as solder posts (Y shaped) for connecting components (resistors, diodes, LEDs, etc.) and may also be used for prototyping and circuit testing. Mounting feet are suitable for DIN EN 50022, 50035 and 50045 mounting rails.

#### Technical Data

Rated Voltage: 250V\*

Rated current: 5A\*

\* depending on attached components, rated voltage and current may vary.

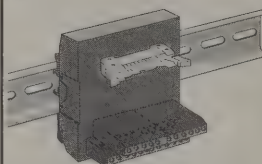

#### Dimensions:

Length: 8 pole version: 47mm/1.85in  
12 pole version: 69mm/2.72in  
Width: 76mm/3.00in  
Height: 51mm/2.01in

### Ribbon Cable Interface Modules MTB 10 - 64 poles

| MTB  | -PZ                                                                                                                                          |

#### Description

The MTB interface modules make it easy to change from ribbon cable systems to screw connectors. The standard models are available from 10 to 64 poles with DIN 41 651 plug strips and ejectors for spring strips with strain relief clamps; there are also modules with two flat cable connections for 22x16, 2x20 or 2x26 poles. When plugged, the ejectors lock the plug in place. The flat cable connection is made with DIN 41651 female connector strips with strain relief. Single wire connection is made via a sturdy screw connector accepting up to 12 AWG discrete wires.

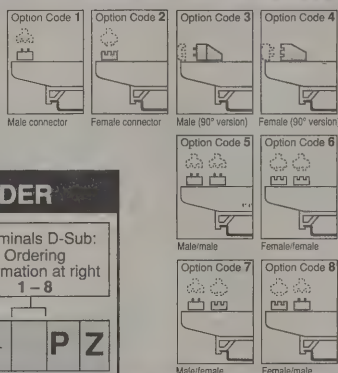

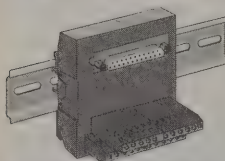

#### Technical Data

Dielectric strength: >500V DC  
Rated voltage: 60 VAC  
to DIN VDE 0110, pollution degree 2  
Rated current: 1A

#### Dimensions:

Height: 54mm/2.56in  
Length: 47mm/1.85in  
with 10, 14 poles  
with 16, 20 poles  
with 26, 2x16 poles

with 60, 64 poles  
Width: 76mm/3.00in

### D-Subminiature Interface Modules MTD 9 - 50 poles

#### How To ORDER

| TYPE | NUMBER OF POLES           | Terminals D-Sub: Ordering information at right |
|------|---------------------------|------------------------------------------------|
|      | 009, 015<br>025, 037, 050 | 1 - 8                                          |
| MTD  | -PZ                       |                                                |

#### Description

##### Benefits

- Easy connections between the process/field equipment and the computer system.
- Interface D plug or receptacle equipped cable with up to 12 AWG discrete wires.
- Quick snap-on to DIN mounting rails.
- Saves time on system design.

##### Typical Applications:

- Computer communication links from measurement sensors/transmitters to industrial process controls, including programmable controllers, racks and panels.
- Flight and process simulators.
- CAD/CAM, Robotics and Machine Vision.

- Commercial and industrial heating environmental and security control systems.
- Power generation and distribution control circuits.

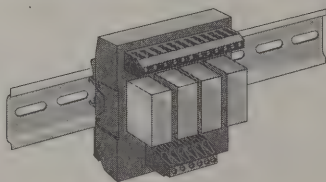

#### Technical Data

Rated voltage: 125V  
Rated current: 1.5A

#### Dimensions:

Height: 32mm/1.26in  
Length: 47mm/1.85in  
with 9 poles  
with 15 poles  
with 25 poles  
with 37 poles  
with 50 poles  
Width: 76mm/3.00in

### Relay Modules MRPA One change-over contact - SPDT - per relay

#### How To ORDER

| TYPE | With SPDT Relays A | Relay Mount: soldered = L plugged-in = S | Input Voltage: AC = A DC+ = P DC- = M | Number of relays: 1, 4, 8 | Input Voltage: 024 (DC or AC) 048 (DC only) 060 (DC only) 110 (AC only) 220 (AC only) |
|------|--------------------|------------------------------------------|---------------------------------------|---------------------------|---------------------------------------------------------------------------------------|
| MRPA | -                  | -                                        | -                                     | -                         | -MMZ                                                                                  |

#### Description

The relay modules MRPA are equipped with one, four or eight relays having a single change-over contact each. The relays can be supplied either soldered or as plug-in versions.

In order to prevent incorrect triggering, a reverse polarity protection diode is installed at the common minus terminal (plus terminal). An LED indicates the control status while one recovery diode per coil protects the circuitry against reverse voltage. For + switching relay modules, connect a positive control voltage to the input terminals. All relay coils are connected to the - coil via the input terminals. For the - switching versions, the coils have a common positive terminal. The relay is triggered by a negative signal. To obtain optimum switching characteristics, the relay modules should be mounted with the input side either down or in a horizontal direction.

\* Other relay versions are available on request

#### Technical Data

##### Control Circuit:

Input voltage: optional, see HOW TO ORDER

Rated power: 0.7W

##### Contact Circuit:

Contact material: AgCdO

## MODULE HOUSINGS AND ACCESSORIES

### M-512 AND M-513

#### Empty Module Housing M-512

#### Description

Series 512 is a complete system of module housings for an extremely wide variety of P.C. Board sizes. Many accessories are available to satisfy special design requirements.

#### Side Elements and Intermediate Elements

These elements are available in four widths:

- 01: 76mm/3.00in
- 02: 90mm/3.55in
- 03: 104mm/4.10in
- 04: 118mm/4.65in

The P.C. board width must be 4mm/0.16in less than the width of the module housing. The smallest usable P.C. board length is 20mm/0.79in. The length of the board is extendable in step with dimensions of the intermediate elements.

Or simply: P.C. board length = total module length minus 3mm/0.12in.

#### Mounting Feet

The mounting feet slide into the housing of module elements and can be snapped onto all mounting rails according to DIN EN 50 022/035/045. All individual elements interlock and provide a mechanical integrity which can withstand vibrational stress.

#### Material

**Moulding:** Polyamide, self-extinguishing to UL94 V-2, grey colour.

#### Upper Temperature Limits:

- Short time 140°C/284°F
- Continuous 80°C/176°F
- Cold resistant -40°C/-40°F

M - 5 1 2 -

#### Empty Module Housing M-513

#### Description

Series M-513 module housings feature single unit construction as opposed to the modular design of Series M-512. The housing width is 76mm (3in) and will accommodate a P.C. board width of 72mm (2.83in). The standard extrusion length is 1 meter (39.4in) which can be cut to desired lengths. End plates are secured to either end of the

intermediate element with mounting screws. Two screws are required per endplate. M-513 housings are designed for use with M-512 accessories and mounting feet, and will mount to all DIN EN 50022, 50035 and 50045 mounting rails.

#### Material

**Moulding:** Hard PVC, grey colour.

#### How To ORDER

M - 5 1 3 - 0 1

#### Mounting Foot

M - 5 1 2 - 0 1 0 0

#### Module Housing Accessories M-512

#### Description

**Marker Carriers (Option code 90)** (for modules without cover and side panels).

These carriers are clipped into the side elements which otherwise could hold the side panels. They provide a name plate area of 25 x 6mm / 0.98in x 0.24in. Marking tags are not provided.

#### Side Panels and Covers (Option codes 91 and 95)

The side panels provide a name plate area of 18 x 8mm / 0.71 x 0.32in. This area is placed at the top of the side panels and later protected by the cover.

Two side panels and one cover are required for one complete module unit. Covers and side panels code-width should preferably be assigned to the same code-width of the module housings. It is, however, possible to

employ less wide or wider panels and covers if necessary, provided that neither exceeds the module housing-width minus 8mm (0.32in). The inner height of both cover and side panel is always 50mm (0.197in) above the printed circuit board.

#### Material

**Side Panels and Marker Carriers:** Polyamide, self extinguishing to UL94 V-2, grey colour

#### Upper Temperature Limits:

- Short time: 140°C/284°F
- Continuous 80°C/175°F
- Cold resistant: -50°C/-40°F

#### Covers:

PVC, transparent

#### Temperature Limits:

Continuous -20°C to 70°C/-4°F to 158°F

MATERIALS OF CONSTRUCTION

PLASTIC - Cyclocac. (Polycarbonate available upon special request.)  
BUSHINGS - Plated to withstand salt-spray. (Method 101, test condition B, of Mil. Std. 202)  
SET SCREWS - Each Knob to have two socket head set screws, Type III Style 4 of Specification FF-S-103.

Knobs are supplied with either 4-40 or 8-32 set screws.

SET SCREW SPECIFICATIONS EACH KNOB FURNISHED WITH (2) SET SCREWS

| Series | Diam. Size | 1/8" Shaft Hole | 1/4" Shaft Hole |
|--------|------------|-----------------|-----------------|

## HI-VOLTAGE INSULATED COUPLINGS

U.S. PATENT NO. 2,681,387

MEETS MILITARY SPECIFICATIONS-TEMPERATURE-HUMIDITY - SHOCK - VIBRATION - FUNGUS

15 KV Breakdown—10 lb/in. torque

Series No. AK-5079 and No. AK-5164

Stainless steel shaft and screwdriver tip molded-integrally with Diallyl Phthalate per Mil Specs. Shock, vibration and fungus proof, they operate with ease over an ambient temperature range of -75°C to +175°C. Supplied with mounting hardware.

Screwdriver tip fits standard slotted shafts (potentiometer, etc.) without further machining. Suited to adjust high voltage controls protecting operating personnel. Also used to reduce ground capacitance on other types of instrument controls.

For Commercial Instrument Applications...

Available in general purpose Bakelite.

## BUSHING EXTENDERS AK-5075-1 thru AK-5075-11

Permit staggered mounting of  
components having 1/4" shafts,  
behind a panel.  
Nickel plated brass.

AK-5075 ( )

## MICRO ADJUSTMENT KNOBS

- Integral assembly
- Zero Backlash
- Infinite resolution with absolute shaft registration
- Driving torque-10 oz./in.
- Saves space behind the panel
- Installation in seconds, without special tools
- Knobs and Component Shaft rotate in same direction

Dials can be  
supplied as  
an integral  
part of any  
assembly

## RATIO DRIVES

### RIGHT ANGLE RATIO DRIVES — VERSATILE, MINIATURIZED, RIGHT ANGLE ROTARY CONTROLS

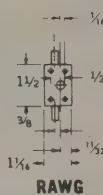

Dual output stainless steel shafts at right angles to input, provide ideal type instrument control. With matched bevel, worm gears cover wide range of ratios.

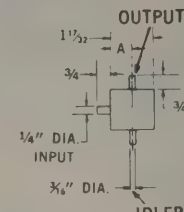

Especially useful for handling spring or gravity-loaded components. Output shaft automatically locks in any desired position yet remains free for smooth adjustment by input shaft. Assembled in dust-proof housings, gears are permanently pinned in place mounted in oilite bearings, and held under constant pressure.

RABG

RAWG

RAWG

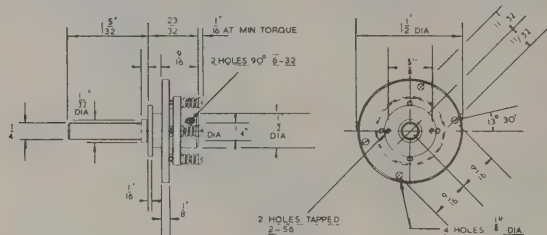

#### BEVEL GEAR RIGHT ANGLE DRIVES

| Cat. No. | Ratio | "A" |
|----------|-------|-----|
| RABG-1   | 1:1   | 7/8 |
| RABG-2   | 2:1   | 7/8 |
| RABG-3   | 3:1   | 7/8 |

#### WORM GEAR RIGHT ANGLE DRIVES

| Cat. No. | Ratio | "A" |
|----------|-------|-----|
| RAWG-1   | 5:1   | 3/4 |
| RAWG-2   | 10:1  | 3/4 |
| RAWG-3   | 20:1  | 3/4 |

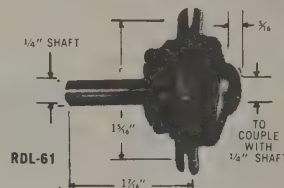

### ADJUSTABLE TORQUE BALL-DRIVE - RDLA-601 6-1 ratio.

Output torque range 20 to 60 oz./inches (Standard: 25 oz./in.)

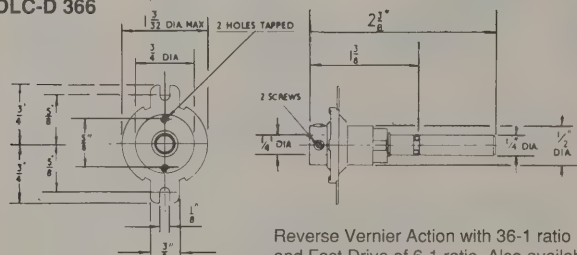

### IN-LINE RATIO DRIVE-6.3:1

For smooth rotary control of components requiring Vernier adjustments. Suitable for use where panel space is at a premium. Durable, ruggedized ball bearing mechanisms.

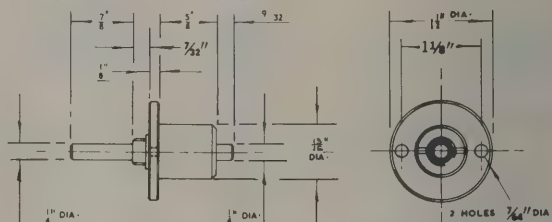

### DUAL RATIO DRIVE

RDL-C-366

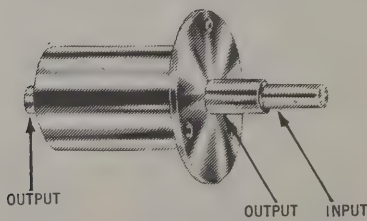

Reverse Vernier Action with 36-1 ratio and Fast Drive of 6-1 ratio. Also available with flange bushing P/N RDL-C-366-F

### RDL-C-101 10-1 ratio.

### REDUCTION DRIVES — BALL BEARING TYPE

For Fine Instrument and Machine Control

| Cat. No. | Ratio   |
|----------|---------|
| RDL-1    | 2.6:1   |
| RDL-2    | 7.0:1   |
| RDL-3    | 17.0:1  |
| RDL-4    | 45.0:1  |
| RDL-5    | 120.0:1 |
| RDL-6    | 300.0:1 |

All Ratios are  $\pm 10\%$ .

Employs precision ball bearings. For rotary control of components. Smooth motion. Ruggedly built, permanently sealed and lubricated.

Input and output shafts operate in SAME DIRECTION. Type "RDL" provides "in-line" input-output shafts. Type "RDL-C" is supplied with concentric shafts whereby the output envelops the input shaft. An added feature of Type "RDLCC" is the output shaft in the rear.

### DIRECT DRIVE, REVERSE VERNIER (RDS-R51) and CONTINUOUS DRIVE RDS-51 also available (5:1)

### SHAFT LOCKS

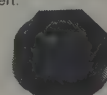

One-piece; fits standard 1/4" and 3/8"-32 thread of shaft bushing. Friction grip holds shaft to prevent accidental or vibrational disturbance of control settings. Adjustment for semi-permanent locking, provided. Note: Part No's. 1046, 1047, 1048, 1049 maximum tightening torque—5 lb.-in.

AK-1046 5/16" Hex OD. Metal w/plastic insert.

AK-1047 3/16" Hex OD. All Plastic.

AK-1048 7/16" Hex OD. Metal w/plastic insert.

AK-1049 7/16" Hex OD. All Plastic.

Ordering Data:

Nominal Shaft Dia.  
2 = 1/8"  
4 = 1/4"

Bushing Thd. Size  
4 = 1/4-32  
6 = 3/8-32

### SHAFT KNOB LOCK

Prevents movement of controls due to shock, vibration, or accidental contact. Available matte or glossy finish.

Cat. No.  
AK-1057-2 (\*) (1/8" shaft)  
AK-1057-4 (\*) (1/4" shaft)  
(Used with 71 Series Knob)  
AK-1059-4 (\*) (1/4" shaft)

(Used with 91 Series Knob)  
AK-1061-4 (\*) (1/4" shaft)  
(Used with 121 Series Knob)  
\* Specify "M" or "G" for matte or glossy finish.

Typical Part Numbers:  
AK-1057-2MA = For 1/8" Shaft/  
matte finish/Black  
AK-1059-4GA = For 1/4" Shaft/  
glossy finish/Black

## RELAY SOCKETS with Fixed or Removable Contacts!

### 1000 SERIES

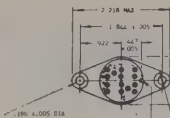

Jan's relay sockets are specifically designed for use with plug-in relays... in electronic circuit applications which demand quick and easy assembly and maintenance.

Available with dip-solder pin terminals for printed circuit assembly, or solder cup and turret terminals for direct wiring. For applications requiring removable contacts, solderless wire crimp terminations are available for #16, 20, 22, or 24 AWG wire sizes.

## JACK COVERS (TRIMMER COVERS)

Fit jack or panel bushings used to keep out dust and moisture and prevent inadvertent disturbance of control. Outer surfaces finished in standard colors of baked enamel.

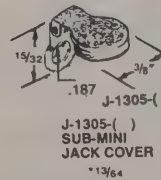

### To Order Colors Specify:

- (-1) Black Texture, (-2) Smooth Gray;
- (-3) Smooth Olive, (-4) Smooth Black,
- (-5) Bright Nickel Plate, (-6) Red (Top section only); (-7) White (Top section only).

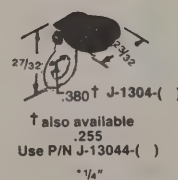

Example: Jack cover, color black texture, order as J-1301(-1)

J-1303(-) WATERPROOF JACK COVER GASKET & NUT  
\*13/32"

J-1305(-) SUB-MINI JACK COVER  
\*13/64"

J-1304(-) \*also available .255 Use P/N J-13044(-)  
\*1/4"

\*Overall height in closed position when mounted on panel

## JANSET<sup>®</sup> FUNCTIONAL KNOBS "PUSH-TO-SET OR "PUSH-TO-TURN"

- SLIP CLUTCH
- BRAKE KNOB
- PULL-TO-TURN
- PUSH-TO-ENGAGE
- PRESS-TO-TURN
- LIFT-TO-TURN

### INCREMENTAL KNOBS

Repositions to the exact point, with zero backlash. Easily provides precise setting to pre-determined positions. Can be repeated with finite exactness to as many as 32 or as few as a single position.

## Safety Knobs

### Modular Design

The modular design and the wide assortment of **ELMA** collet safety knobs offer countless possible combinations. The standard and wing knobs are of contemporary design, available in 7 sizes and various colors. A broad selection of accessory components is also available, including knobs, caps and pointers in no less than 7 colors, various printed dials, stators, sockets and nut covers are available in gloss or matte finish.

### Material

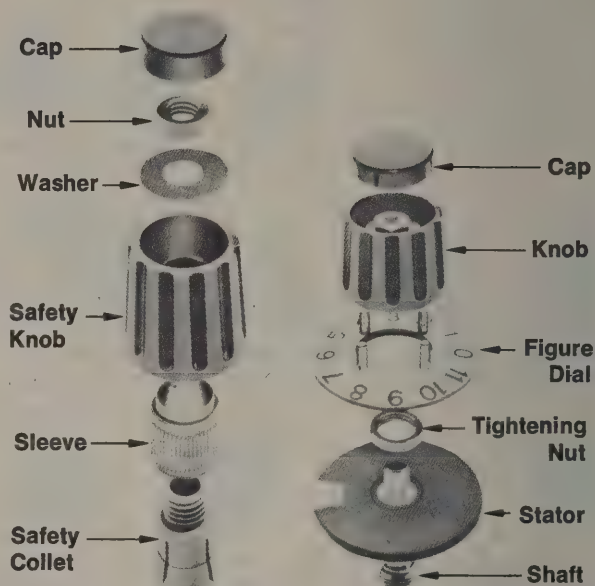

With the exception of the transparent figure dials all of the **ELMA** collet safety knobs and accessories are made of Polyamide.

### Safety

With the knob installed and the cap in place there is no possibility of shock hazard as there are no exposed metal parts, thus satisfying both O.S.H.A. and U.L. requirements.

### Colors

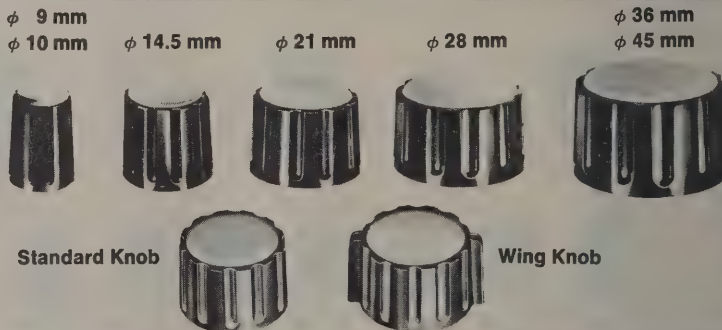

**ELMA** collet safety knobs offer a very wide choice of standard colors and color combinations in both glossy and matte finish. Collet knobs are available in light gray, black and red. Caps and pointers are available in light gray, black, red, blue, yellow, and green. In addition **ELMA** offers custom colors to meet your exacting requirements.

## Collet Knob Sizes/Designs

**ELMA** collet safety knobs are available in diameters of 9 mm, 10 mm, 14.5 mm, 21 mm, 28 mm, 36 mm and 45 mm.

Every **ELMA** knob is available from stock in both conventional and wing versions, each with or without setting line.

## Wide Range of Handles and Front Panel Components

### General Description

- Fixed handles for front panels, plastic and aluminum
- Injector/ejector handles for front panels
- Fixed handles for enclosures
- Strap handles for enclosures
- Tilt and bail handles for enclosures
- Fixed and tilt feet for enclosures
- LED arrays, Coded Switches, Test Sockets
- Huge array of other front panel products

See Section 1400 (Cabinet Enclosures), see Section 5100 (Switches),  
see Section 5150 (Keyboards & Keypads) for additional products.

Technical Products, Inc.

# STANDARD AND CUSTOM DIGITAL DISPLAY BEZELS

## DIE CAST SERIES

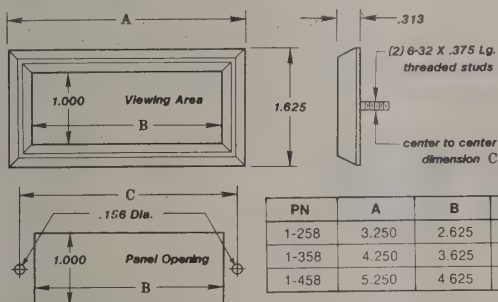

### FEATURES

#### DIE CAST METAL FRAME

- Nonreflective black finish
- Durable — heat resistant
- Integral 6-32 mounting studs
- No exposed hardware
- Mounts in panels up to 3/16" thick
- Includes mounting hardware
- Available in three sizes
- Filters available in 10 colors and clear

### DESCRIPTION

The DIE CAST SERIES of bezels consist of a special plastic screen and a die cast metal frame. Mounting is accomplished by two 6-32 studs which can also be used to mount PC boards or other components behind the panel. The high quality of the screen and frame, combined with the universal sizes and mounting flexibility, make the bezels usable for a wide range of applications.

## PLASTIC SERIES

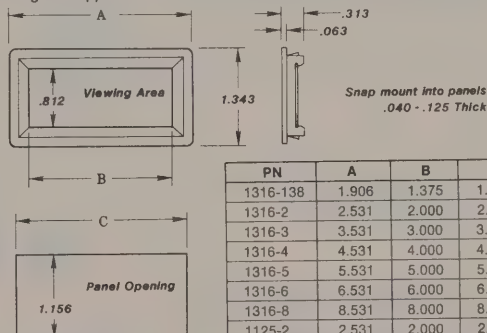

### FEATURES

#### INJECTION MOLDED PLASTIC FRAME

- Nonreflective black finish
- Impact resistant ABS
- Snaps into front panels
- No exposed hardware
- Mounts in panels up to .125" thick
- Available in eight sizes
- Filters available in 10 colors and clear

### DESCRIPTION

The PLASTIC SERIES of bezels consist of a special plastic screen and an injection molded ABS frame. Mounting is accomplished by a snap-fit into rectangular cut-outs from the outside. The combination of a high quality filter and an inexpensive, easy to mount bezel make this series ideal for a wide range of applications.

## LOW COST CUSTOM BEZELS

Our new fabricating facility is totally dedicated to the production of non-standard bezels. Using specially designed machines, we can now offer made-to-order sizes in proto-type or production quantities, without costly tooling or extended lead times.

### TYPICAL BEZEL MATERIALS

- Aluminum
- Stainless Steel
- Plastic

### VARIETY OF FILTER MATERIALS

- Anti-Reflective Coatings
- Polycarbonate
- Large Selection of Colors
- High Scratch Resistance

### DESIGN FLEXIBILITY

- Panel Seals
- Welded Studs
- Any Size Viewing Area
- Multi-Opening Bezels

### VARIETY OF FINISHING PROCESSES

- Anodizing
- Painting
- Screening

(EXCEPT MODEL MPKG40B1/8 HAS 4-40 SET SCREW)

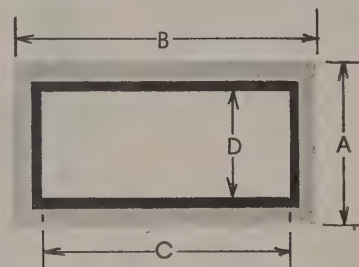

# RMF MODEL 140 SERIES BEZEL & FILTER ASSEMBLY

Whatever your application may be, these low-cost bezel and filter assemblies will improve the front panel appearance and make the display itself more readable.

Attractive ABS plastic bezels are available in many sizes to match the most popular types of displays.

The colored acrylic filters have a special non-glare surface to make viewing easier. Standard colors are red and clear for LED and LCD displays although any color is available on special order.

**INSTALLATION** is fast and simple... merely insert the filter into the slots on the rear of the bezel, then push the entire assembly into the panel cutout. A quick and easy operation without the use of any tools, adhesive or hardware. Recommended panel thickness is from .040 to .125 in.

| MODEL | DIMENSIONS |       |       |       | PANEL OPENING |       | FILTER* |       |
|-------|------------|-------|-------|-------|---------------|-------|---------|-------|
|       | A          | B     | C     | D     | HEIGHT        | WIDTH | HEIGHT  | WIDTH |
| 140-1 | 1.343      | 1.906 | 1.375 | .812  | 1.156         | 1.750 | .875    | 1.437 |
| 140-2 | 1.343      | 2.531 | 2.0   | .812  | 1.156         | 2.375 | .875    | 2.087 |
| 140-3 | 1.343      | 3.531 | 3.0   | .812  | 1.156         | 3.375 | .875    | 3.040 |
| 140-4 | 1.343      | 4.531 | 4.0   | .812  | 1.156         | 4.375 | .875    | 4.078 |
| 140-5 | 1.343      | 5.531 | 5.0   | .812  | 1.156         | 5.375 | .875    | 5.078 |
| 140-6 | 1.343      | 6.531 | 6.0   | .812  | 1.156         | 6.375 | .875    | 6.078 |
| 140-8 | 1.343      | 8.531 | 8.0   | .812  | 1.156         | 8.375 | .875    | 8.078 |
| 141-2 | 1.656      | 2.531 | 2.0   | 1.125 | 1.469         | 2.375 | 1.187   | 2.087 |

\*Filter Material is .030 thick

| 950         | 1.38                | 6.50 | 1.86        | 6.98 | 0.06 |

COLORS: FRAMES ARE BLACK

LENSES ARE AVAILABLE IN ASSORTED COLORS

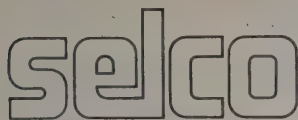

## Series 900 - Digibezels®

The patented bezel assembly features an attractive thermoplastic frame and a variety of lens materials and colors. Installation is easy and provides a secure panel fit with no mounting hardware externally visible. The available Polaroid® lenses improve read-out legibility by providing maximum visual contrast under high ambient light conditions.

COLLET KNOBS

Function, styling, handling and simplicity of assembly were the designers' main criteria in the development of the Selco range of collet knobs. The various accessories (caps, pointers, figure dials and nut covers) push-fit into the basic knob to give added versatility. Caps are available in over 20 different colors.

MATERIALS

All knobs, caps, pointers and nut covers are made from Nylon and have a matte finish. The transparent figure dials are made from polycarbonate and the colored dials are of Nylon.

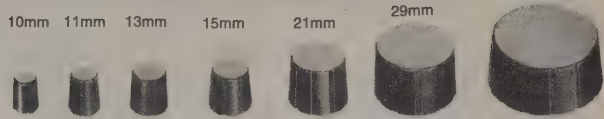

Collets, sleeves and nuts, installed into the knobs during manufacture, are of brass. They will accommodate a wide range of shaft lengths and bush lengths. All molded parts are stable in the temperature range -20°C to +70°C.

TURNING TORQUE

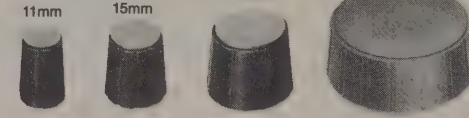

The torque that can be transmitted by knobs without slipping, assuming the knob has been adequately tightened on the shaft, is as follows:

| Knob Type                                                                                  | Torque                                  |          |                        |          |
|--------------------------------------------------------------------------------------------|-----------------------------------------|----------|------------------------|----------|
|                                                                                            | Shafts<br>2mm, 3mm, 4mm, 1/8" and 3/16" |          | Shafts<br>6mm and 1/4" |          |
|                                                                                            | In/Pds.                                 | Ft./Pds. | In/Pds.                | Ft./Pds. |
| S10, S11, SP11, K11                                                                        | 2.17                                    | .18      | —                      | —        |

TYPE S (Short) KNOB BASE DIAMETER

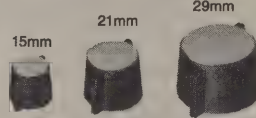

TYPE K (Tall)

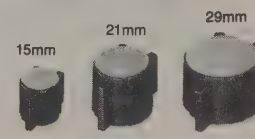

TYPE SP (Pointer)

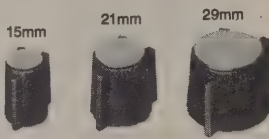

TYPE SB (2 Wings)

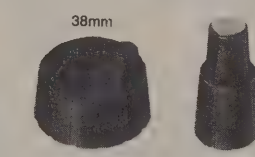

TYPE SW (3 Wings)

TYPE W (Tall 3 Wings)

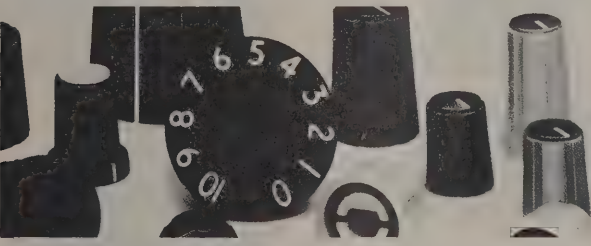

TYPE SC — CRANKED KNOB

**DUAL CONCENTRIC ASSEMBLIES**  
This table shows the knob combinations suitable for dual-concentric assemblies. Please contact sales office for details of special through-hole collets, if required.

|      |      |      |      |      |
|------|------|------|------|------|
| TOP  | 10mm | 11mm | 15mm | 21mm |
| BASE | 13mm | 15mm | 21mm | 29mm |

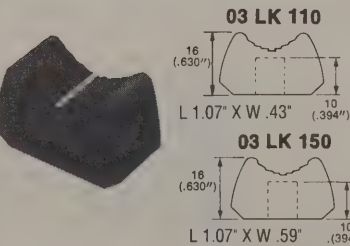

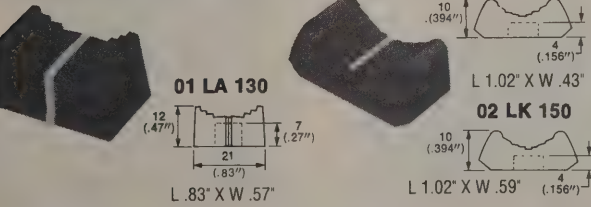

PUSH-ON KNOBS

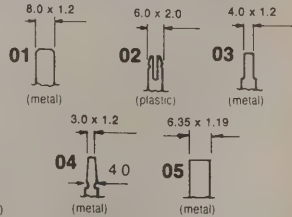

Selco push-on knobs provide a fast, secure method of shaft attachment. The internal molding is designed to grip the shaft securely with the option of a built-in metal compression ring. The knobs, molded from Nylon, are available in black and gray and have a matte finish. Colored caps are available in plain, with-line and with spot versions in over 20 different colors.

Selco also offers a full range of push-buttons for 3.33mm and 2.8mm switch shafts. (For use on ITT, Alps and other switches).

SLIDER KNOBS

TYPICAL TANG DETAILS

TWO PIECE/DOUBLE INJECTED/SOFT TOUCH PUSH-ON KNOBS

Most are available in 11mm and 13mm diameters. Contact SELCO for more details.

# COMMONLY USED ELECTRICAL/ELECTRONIC ABBREVIATIONS AND ACRONYMS

## A

**A/D** acrylonitrile butadiene-styrene  
**A/D** analog to digital  
**ADC** analog to digital converter  
**ADP** automatic data processing  
**AFC** audio frequency control  
**AFT** automatic filter test  
**ALGOL** algorithmic language  
**AM** a logical operator  
**AQL** acceptable quality level  
**ASCII** American national standard code for information interchange  
**ASIC** application specific IC  
**ATE** automatic test equipment  
**ATG** automatic test generation  
**AWG** American wire gauge

## B

**BALUN** balanced to unbalanced  
**BASIC** beginners' all-purpose symbolic instruction  
**BCD** binary-coded decimal  
**BNC** baby "N" connector  
**BUS** basic utility syste

## C

**CAD** computer-aided design  
**CAE** computer-aided engineering  
**CAM** computer-aided manufacture  
**CAMAC** computer-automated measurement and control  
**CAPP** computer-aided process planning  
**CAT** computer-aided test  
**CATV** cable television or community antenna television  
**CCC** (leaded) ceramic chip carriers  
**CCD** computer-controlled display  
**CERMET** ceramic metal element  
**CIE** computer-integrated engineering  
**CIM** computer-integrated manufacturing  
**CLCC** ceramic leadless chip carriers  
**CMOS** complementary metal-oxide semiconductor  
**Comm.** communications  
**CPS** characters per second  
**CPU** central processing unit

## D

**D/A** digital to analog  
**DAC** digital to analog converter  
**DBMS** data base management system  
**DC** direct current  
**DFT** design for testability  
**DIAC** bidirectional trigger diode  
**DIL** dual in-line  
**DIN** Deutsche Industrie Normenausschuss  
**DIP** dual in-line package  
**DPM** digital panel meter  
**DRAM** dynamic RAM  
**DTL** diode transistor logic

## E

**EDA** electronic design automation  
**EDP** electronic data processing  
**EBCDIC** extended binary coded decimal interchange code  
**EEPROM** electrically erasable PROM

**EIA** Electronic Industries Association

**EMC** electromagnetic compatibility  
**EMI** electromagnetic interference  
**EMP** electromagnetic pulse  
**EPROM** erasable programmable ROM  
**ESR** equivalent series resistance

## F

**FEP** fluorinated ethylene propylene Copolymer, 200° Teflon  
**FET** field-effect transistor  
**FM** frequency modulation  
**FORTTRAN** formula translator

## G

**GaAsFET** gallium arsenide FET  
**CMIP** commn management information protocol  
**GPIO** general purpose interface bus  
**GPS** global positioning system

## H

**HF** high frequency (3 to 30 MHz)  
**HIPOT** test, measurement, and diagnostic equipment  
**HLL** high level language  
**HV** high voltage  
**Hz** Hertz

## I

**IAB** Internet Activities Board  
**IC** integrated circuit  
**IDC** insulation displacement contact  
**IF** intermediate frequency  
**IO** input/output (devices)  
**IR** insulation resistance (or) infrared  
**ISDN** integrated services digital network  
**ISO** International Standards Organization

## J

**JEDEC** Joint Electronic Device Engineering Council  
**JFET** junction FET  
**JMOS** junction MOS

## K

**kHz** kilohertz ( $10^3$  hertz)  
**KSR** keyboard send /receive

## L

**LAN** local area network  
**LC (filters)** inductance/capacitance  
**LCC** leaded chip carrier  
**LCD** liquid crystal display  
**LED** light-emitting diode  
**LF** low frequency (30 to 300 kHz)  
**LIF** low insertion force  
**LNA** low noise amplifier  
**LNB** low noise band  
**LSI** large scale integration  
**LVD** linear velocity displacement transformer

## M

**MASER** microwave amplification by stimulated emission of radiation  
**MATV** master antenna television

$\mu$ F microfarad

**MHz** megahertz  
**MIC** microwave IC  
**MIPS** million instructions per second  
**MIB** microcomputer interface board  
**MOS** metal oxide semiconductor  
**MOSFET** metal oxide semiconductor FET  
**MOSIGT** metal oxide semiconductor insulated-gate transistor  
**MOV** metal oxide varistor  
**MPU** microprocessor unit  
**MSI** medium scale integration

## N

**NBS** National Bureau of Standards  
**NEMP** nuclear electromagnetic pulse  
**NIM** national instrumentation module  
**NOR** not OR  
**NTC** negative temperature coefficient

## O

**OCR** optical character reader  
**OEM** original equipment manufacturer  
**OR** a logical operator  
**OSI** open systems interconnection

## P

**PAL** programmable array logic  
**PC** printed circuit  
**PCB** printed circuit board  
**PCM** pulse code modulation  
**PCS** plastic clad silica  
**pF** picofarad  
**PGA** pin grid array  
**PIN** positive-intrinsic-negative (transistor)  
**PLA** programmable logic array  
**PLCC** plastic leaded chip carrier  
**PLL** phased lock loop  
**PPI** plan position indicator  
**PROM** programmable ROM  
**PTC** positive temperature coefficient  
**PUT** programmable unijunction transistor

## Q

**QAM** quadrature amplitude modulation  
**Q (meter)** quality-factor meter

## R

**RAM** random access memory  
**RC** resistance-capacitance  
**RFI** radio frequency interference  
**RMS** root mean square  
**ROM** read only memory  
**RF** radio frequency  
**RFC** radio-frequency choke  
**RFI** radio-frequency interference  
**RTD** resistance-temperature detector  
**RTL** resistor transistor logic  
**RTV** room temperature vulcanizing  
**RW** read/write

## S

**SAS** silicon asymmetrical switch  
**SBC** single board (micro) computer

**SBS** silicon bilateral switch  
**SCR** silicon-controlled rectifier  
**SCS** silicon-controlled switch  
**SDA** source & detector assemblies  
**SGMP** simple gateway monitoring protocol  
**SIDAC** bidirectional voltage-triggered switch  
**SIMM** single in-line memory module  
**SIP** single in-line package  
**SMD** surface mount device  
**SMT** surface mount technology  
**SNMP** simpole network management protocol  
**SO** small outline  
**SOIC** small outline IC  
**SOT** small outline transistor  
**SSI** small scale integration  
**SSR** solid-state relay  
**STL** Schottky transistor logic  
**SUS** silicon unilateral switch

## T

**TC** temperature coefficient  
**TCE** thermal coefficient of expansion  
**TXCO** temperature compensated crystal oscillator  
**TFE** tetrafluoride ethylene propylene Copolymer, 250° Teflon  
**TRIAC** bidirectional AC switch  
**TTL** transistor-transistor logic  
**TTY** teletypewriter

## U

**UHF** ultra high frequency (300 MHz to 3 GHz)  
**UJT** silicon unijunction transistor  
**UL** Underwriters Laboratory  
**UPS** uninterruptible power supply

## V

**VAC** volts (of) alternating current  
**VAN** value-added network  
**VAR** volt-ampere reactive  
**VCR** video cassette recorder  
**VDC** volts (of) direct current  
**VHF** very high frequency (30 kHz to 300 MHz)  
**VHSIC** very high speed integrated circuit  
**VLF** very low frequency (3 to 30 kHz)  
**VLSI** very large scale integration  
**VME** virtual machine environment  
**VRM** voice recognition module  
**VTVM** vacuum tube volt meter  
**VU** volume unit  
**VSWR** voltage standing wave ratio

## W

**WPS** word processing software

## Y

**YIG** yttrium iron garnet

## Z

# Unique Problem Solvers For Printed Circuit Board Component Assembly & Packaging

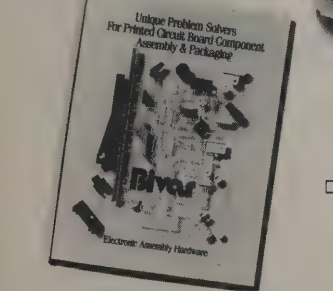

INDUSTRY'S LARGEST  
SELECTION OF LOW-COST  
STANDARD PRODUCTS  
AVAILABLE FROM STOCK  
THROUGH YOUR AUTHORIZED  
BIVAR DISTRIBUTOR

More than 8,000...  
unique yet simple, time saving and low-cost products include a growing selection of mounts, spacers and printed circuit board packaging hardware. In addition, an all-new selection of LED holders, PCB card stops, and manufacturing and assembly products are now available from stock. You can eliminate costly rejects and rework in assembly, while adding quality and uniformity to your product.

MIL-M-38527 & DESC Types

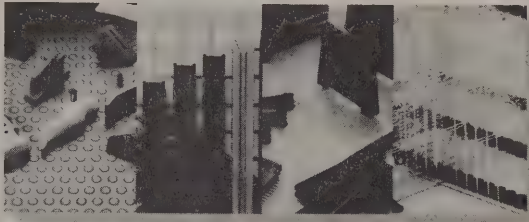

**90° LED Holders For Single & Bi-Level Displays**  
Choose between individual and interlocking styles for rigid arrays. Use any combination of LED colors and intensities. 16 styles available from stock.

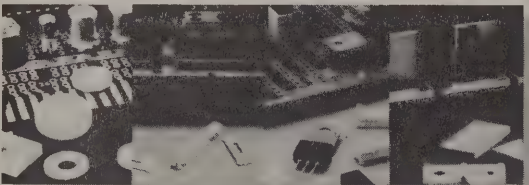

ASK FOR YOUR FREE COPY OF  
BIVAR'S ALL-NEW, 56-PAGE  
CATALOG, INCLUDING ALL  
SPECIFICATIONS AND PRICES.

Electronic Assembly Hardware

Inserters/Extractors & Ejectors with pre-assembled pins  
Interchangeable card guides in 39 styles & sizes  
Vertical card guides in 3 versatile styles  
Circular card guides reduce inventory, snap-in anywhere

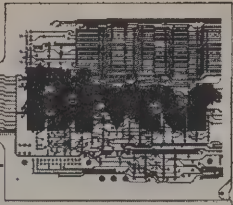

Permanent mounts and spacers molded from 94 V-2 & 94 V-O Nylon  
Discrete component and capacitor mounts  
TO-202/TO-220 power transistor mounts  
Crystal mounts and insulators

**Nylon L.E.D. Mounts**  
• T-1 & T-1 3/4 LED strip mounts in 60 different elevations and sizes  
• T-1, T-1 3/4 and 90° LED mounts

**Wash-away Spacers**  
Over 500 versatile styles and sizes to improve positioning, protect leads during assembly, and reduce rework & rejects

PCB hole plugs prevent solder from flowing onto top of board  
Self-retaining nylon screw spacers simplify assembly  
Connector cutout covers for "D" subminiature, microribbon & "D" hole cutouts

## PCB Packaging & Assembly

SNAP-IN CARD GUIDES  
DEEP CHANNEL GUIDES  
FLAME RETARDANT GUIDES  
VERTICAL CARD GUIDES  
INTERCHANGEABLE CARD GUIDES  
CIRCULAR CARD GUIDES  
NARROW & ANTI-STATIC GUIDES  
INSERTER/EXTRACTORS  
CARD EJECTORS & HANDLES  
CARD STOPS

## Component Mounts, Spacers & Holders

DISCRETE CAPACITOR MOUNTS  
POWER TRANSISTOR MOUNTS  
SIP & DIP MOUNTS  
VERTICAL MOUNTS  
UNIVERSAL MOUNTS  
TO-18, TO-5 MOUNTS  
TO-18 SPREADERS  
IC MOUNTS & SPREADERS  
IC CONVERTERS  
DIP SPREADERS  
CRYSTAL MOUNTS & INSULATORS

**LED MOUNTS**  
EXTRUDED LED MOUNTS  
T-1 & T-1 3/4 LED MOUNTS  
T-1 & T-1 3/4 LED STRIP MOUNTS  
90° LED MOUNTS  
MOLDED TUBULAR LED MOUNTS  
LED HOLDERS  
LED CLIPS & RINGS

**WASH-AWAY SPACERS**  
TO-5 & TO-18 SPACERS  
GENERAL PURPOSE  
SLOTTED SPACERS  
DIP SPACERS  
RECTANGULAR SPACERS  
TUBULAR SPACERS  
AXIAL & DISCRETE SPACERS

To arrive at the desired Catamount part number, simply insert the appropriate 3 digit number from the chart above.

for NATURAL SPACERS: SPNY- \_\_\_\_ - 9      for BLACK SPACERS: SPNY- \_\_\_\_ - 0

Hex Spacer

Hex Tapped Spacer

Round Tapped Spacer

- Molded in 6/6 Nylon per ASTM D-4066.
- Item Numbers shown are for thru-hole spacers. Tapped Spacers are available in a variety of lengths and threads in Hex and Round styles.
- Consult your Catamount Distributor for availability in special materials, or contact your Catamount Customer Service Representative at the toll-free number listed below.
- Catamount products are sold through stocking Catamount Distributors.

### MOLDED NYLON MACHINE SCREWS

Catamount Machine Screws are molded of 6/6 nylon and available in a variety of head styles and lengths. A complete line of nylon Hex Nuts compliments our full selection of screws. Hex Cap and Slotted Hex Cap Head Screws are also available.

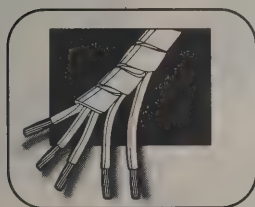

### MOLDED NYLON WASHERS

Catamount Washers are stocked in many sizes and styles including; flat, shoulder, bevel head shoulder, finishing and flat stamped. Washers are molded in natural nylon and are also available dyed black. Contact your Catamount Distributor for details when you require custom sizes or colors. An assortment of 45 standard screw insulators complete a full line.

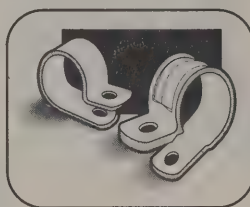

### SERRATED GROMMETING

Catamount Grommet edging is available in 2 styles, either molded or extruded. Molded grommeting is to MS21266 (1-4N) and available in nylon, flame retardant nylon and DuPont Tefzel. Molded grommeting protects panel edges from .015" to .192". Extruded grommeting is supplied in 100 foot rolls and will protect panel edges from .030" to .250" in nylon, polyethylene and flame retardant polyethylene.

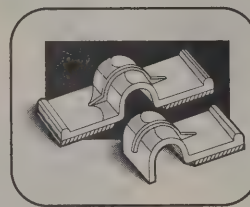

### EXTRUDED CABLE WRAP

Catamount Spiral Wrap is extruded by Catamount in Polyethylene, UV Polyethylene, Flame Retardant Polyethylene, and Nylon. Warm-cut for smoother edges, Spiral Wrap is ideal for wiring harnesses where break-outs are frequent and flexibility is required. The tubing may be butted when protection from abrasion is a concern or gapped for greater flexibility.

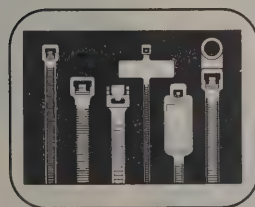

### MOLDED NYLON CABLE CLAMPS

Cable Clamps are molded in 2 styles, 2 widths, 19 diameters and with 2 standard mounting holes. Self-aligning clamps have a molded-in saddle washer for extra strength and are ideal for assembly applications. Plain edge clamps are molded in natural white or black nylon. Self-aligning clamps are stocked in nylon, flame retardant nylon and DuPont Tefzel.

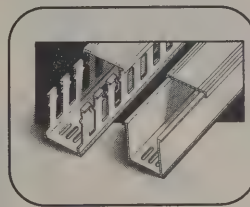

### ADHESIVE BACK PRESS CLIPS

Catamount Press Clips are molded in 6/6 nylon in two styles and 8 sizes. Bundle ranges are from .125" to .500" diameter. Press clips are mounted "2-up" on a synthetic polymer closed-cell foam adhesive. Overall length ranges from .493" to 1.590". Press Clips and Half Press Clips should be applied to clean dry surfaces, are moisture resistant once applied, and are non-conductive/non-corrosive.

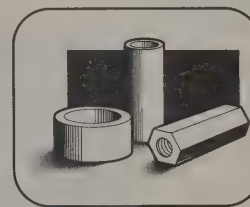

### CABLE TIES

Cable Ties are stocked in standard lengths from 4" to our exclusive 48" ties. Standard materials include 6/6 Nylon, UV Nylon, Heat Stabilized Nylon and a variety of colors — including fluorescents. Our Cable Ties are available from stock in bulk or standard 100 pack quantities. Catamount Cable Ties are sold only through stocking Catamount Distributors. Ask for a sample today. Styles include Miniature, Light, Standard, Heavy Duty, Extra Heavy Duty, Restricted Bundle, Identification, Releasable and Mounting Hole. A complete line of accessories and installation tools is also available.

### PANEL CHANNEL WIRING DUCT

Catamount's Panel Channel Wiring Duct is available in 2 styles, 2 stock colors and 20 sizes. Sizes range from 1 x 1" to 4 x 4" diameters and come supplied with matching covers. Duct is stocked in standard 6 foot lengths in non-flammable rigid PVC. Catamount Wiring Duct has attained a UL flammability rating of 94V-0 with a maximum continuous temperature of 122°F (50°C). UL Recognized and CSA Approved.

### MOLDED NYLON SPACERS

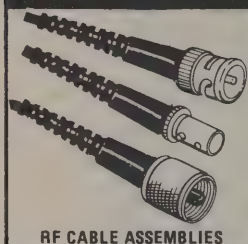

Round and Hex Spacers are available in over 300 standard sizes. Round O.D.'s range from 3/16" to 1/2" and stock lengths run from 1/8" to 1". Spacers in custom sizes and materials may also be quoted. Round and Hex Spacers are available tapped in a variety of stock sizes.

## CATCHES • HANDLES • HARDWARE

*Nielsen Hardware...Manufacturing the world's largest selection of Pull Down Catches, Lifting Handles and Peripheral Hardware.*

*A world leader in manufactured components since 1912.*

*A supplier you can rely on for quality hardware, on time.*

ALL NIELSEN HARDWARE  
PRODUCTS ARE MANUFACTURED  
IN THE UNITED STATES  
OF AMERICA.

### CATCHES

#### 83314-42 Series

83314 Catches Compact, Economical with internal compression springs for controlled, dependable tension.

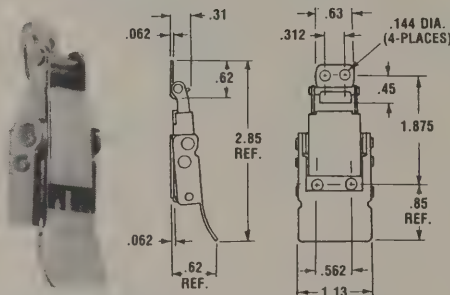

**Material:** Steel, Stainless Steel

**Finishes:** Plain, Cadmium, Zinc

**Mounting:** Rivet, Bolt, Weld

**Strike:** HS 83314

available with straight or down swept lever

#### Example Part Numbers:

HC 83314-42SS = Catch w/Holes,  
Upswept lever, Stainless  
HS 83314SS = Strike for above  
w/holes, Stainless

- Ship Wt/100: 12 lb. steel

#### 83314-42LK Series

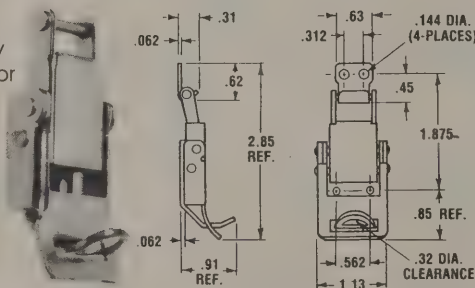

83314-42LK Catches with secondary padlock hasp and internal springs for controlled, dependable tension.

**Material:** Stainless Steel

**Finishes:** Plain

**Mounting:** Rivet, Bolt, Weld

**Strike:** HS 83314

#### Example Part Numbers:

HC 83314-42LKSS = Catch w/Holes,  
Stainless  
HS 83314SS = Strike for above  
w/holes, Stainless

- Ship Wt/100: 12.3 lb.

#### 204 Series

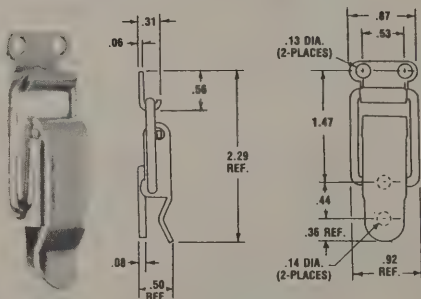

204 Catches Compact, Economical with straight loop. Strong and dependable.

**Material:** Steel, Stainless Steel

**Finishes:** Plain, Zinc

**Mounting:** Rivet, Bolt, Weld,  
Projection Weld

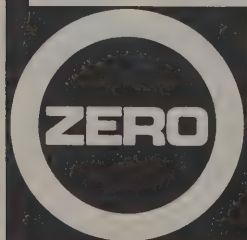

**Strike:** HS 200

#### Example Part Numbers:

HC 204 ZE = 204 Catch w/Holes, Zinc  
Plated  
HS 200 ZE = Strike for above w/holes,  
Zinc Plated

- For increased tension, increase  
catch/strike separation.
- Ship wt/100: 6.5 lb. steel  
6.7 lb. stainless steel

Other finishes and material combinations are available. Give us a call to discuss your requirements.

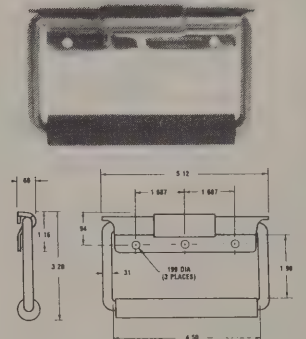

#### 990 Series

##### 90° Stop With Return Spring

Our newest handle incorporates reduced surface mounting area while maintaining the durability of our heavy duty handle design. A jam proof 90° stop, an oversized stainless steel return spring, and full coverage plating prior to assembly make the 990 Series the most durable half plate handle available.

| Part Number     | Material                             |
|-----------------|--------------------------------------|
| H990LS2RG75ZE   | Zinc Plated with 3/4" Grip           |
| H990LS2RG75ZEBK | Zinc and Black Plated with 3/4" Grip |

#### Custom Work

Backing up our catalog products Nielsen Hardware commands a vast store of knowledge gained from over 75 years of manufacturing and design experience. Slight modifications to our standard products or totally custom designs are welcome here at Nielsen Hardware.

## ZERO

# ALL NEW with this edition of EEM **GET ORGANIZED!**

Are your catalog files organized? Can you find any given catalog in a matter of seconds? If your answer is "Yes," you probably already have the EEM File System. But, if you said "No," you really ought to look into this simple system. It will save hours of time and tons of aggravation.

The EEM File System was invented over twenty-five years ago to help people who specify, buy, or work with electronic products and equipment. It is upgraded on a constant basis to reflect the current state of the art. It's easy to use and easy to customize to your particular needs.

You say you want to file catalogs by type of product? That's easy to do with the System. But, what are you going to do when there are multiple products in one catalog? Take Mallory for example. There are all kinds of products in the Mallory Short Form Catalog. With the EEM File System all you do is file the catalog under "M"

for Mallory and refer to it on all of the cross reference cards that apply.

There are thousands of EEM File Systems in everyday use in engineering and procurement offices all over the world. Shouldn't you be using this proven system?

The EEM File System is shipped in one neat package. The package contains everything you need to set up your very own filing system. Best of all, it's easy to get and very affordable. Send a check or money order for \$25.00 and EEM will pay the postage and sales tax. If you must use a purchase order, please add \$5.00 for postage and handling. An invoice will be mailed to you under separate cover.

Don't waste any more time. Get organized now!

## SOCKET STRIPS SL, SDL, SS, SD & HSS SERIES

### Mates with:

TS-1, TD-1, HTS,  
BBS, BBD, BBL, BDL,  
BHS, LBS, HLT, TSB

### Specifications: SS, SD, SL, SDL

#### Insulator Material:

Black Glass Filled

Polyester

#### Flammability Rating:

UL 94V-O

#### Insulation Resistance:

5000 MΩ min

#### Operating Temp Range:

-65°C to +125°C

#### Dielectric Withstanding Voltage:

1000 VRMS

#### Contact: BeCu

#### Shell: Brass

#### Plating:

Au or Sn over 50μ" (1,27μm) Ni

#### Current Rating: 1A

#### Contact Resistance:

10 mΩ max

#### Socket Retention in Body:

5 lbs (22,25N) against barb

#### Lead Size Range:

.015" to .022" (0,38mm to 0,56mm) DIA and most IC leads

#### Insertion Force:

Standard=

9 oz (2,50N) avg,

16 oz (4,45N) max

(.017" (0,43mm) DIA probe)

#### Low Insertion Force=

2.5 oz (0,70N) avg,

5.5 oz (1,53N) max

(.018" (0,46mm) DIA probe)

#### Withdrawal Force:

Standard=

2.5 oz (0,70N) avg,

1.5 oz (0,42N) min (after

12 insertions with .017" (0,43mm) DIA probe);

#### Low Insertion Force=

2.0 oz (0,56N) avg,

0.35 oz (0,10N) min (after

12 insertions with .018" (0,46mm) DIA probe)

### Specifications: HSS HI-TEMP

Same as SS-1 except:

#### Insulator Material:

Black Liquid Crystal Polymer

#### Max Processing Temp:

230°C for 30 to 60 sec.

#### Note:

Non-standard strip lengths are non-returnable.

| TYPE STRIP                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | 1            | NO. INTERCONNECT STRIPS

BBS, BBL, BHS,  
BBD, BDL & LBS

Mates with:  
SS, SD, HSS, SL, SDL,  
ESS, ESD, HLS, SSF

Features:

- Low profile design achieves .153" (3.89mm) board spacings when mated with SL series
- Choice of precision machined (BXX Series) or coined (LBS Series) terminals
- Approach the reliability of a permanent connection with the flexibility of a separable connection

Specifications:  
BBS, BBD,  
BBL, BDL

Insulator Material:  
Black Glass Filled Polyester  
Flammability Rating:  
UL 94V-O  
Insulation Resistance:  
5000 MΩ min  
Temperature Range:  
-65°C to +125°C  
Withstanding Voltage:  
1000 VRMS  
Terminal Material:  
Phosphor Bronze or Brass  
Plating:  
Au or Sn over  
50μ" (1.27μm) Ni  
Current Rating:  
1A

Specifications:  
BHS HI-TEMP

Same as BBS except:  
Insulator Material:  
Black Liquid Crystal Polymer  
Max Processing Temp:  
230°C for 30 to 60 seconds

Specifications:  
LBS  
HI-TEMP

Same as BBS except:  
Insulator Material:  
Black High Temperature  
Thermoplastic  
Temperature Range:  
-65°C to +140°C  
Heat Deflection Tem:  
207°C @ 264 psi (1.8MPa)

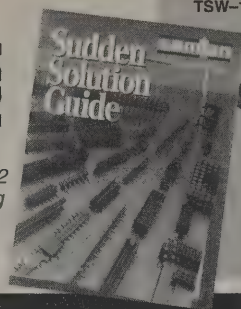

Note:  
Non-standard strip lengths  
are non-returnable.

TSW-116-11-G-S

TSW-218-09-T-S-RE

## .025"sq TERMINAL STRIPS TSW SERIES

### Mates with:

SSW, SSQ, ESW, ESQ,  
BCS, BSW, IDSD, IDSS,  
CES, SLW

### Precision Drawn Terminal Strips

Samtec terminal strips are precision drawn Phosphor Bronze wire for a high quality low cost .025" square post. The basic interconnect and many of the available options are shown on this page. Additional styles are shown on the following pages. Samtec prides itself on being a full line supplier of square post products. If you don't see what you need in this catalog please give us a call and we'll help you locate it.

### Note:

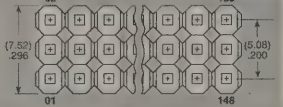

Non-standard strip lengths are non-returnable.

### Specifications: TSW

**Insulator Material:**   
Black Glass Filled Polyester  
**Flammability Rating:**   
UL 94V-O  
**Insulation Resistance:**  
5000 MW @ 500 VDC  
**Operating Temp Range:**  
-65°C to +125°C with Gold  
-65°C to +105°C with Tin  
**Withstanding Voltage:**  
1000 VRMS @ 60 Hz  
**Terminal Material:**  
Phosphor Bronze  
**Plating:**  
Au or Sn over 50µ" (1.27µm) Ni  
**Current Rating:**  
3 amp continuous  
**Terminal Retention in Body:**  
3 lb (13,35N)

### Specifications: HTSW

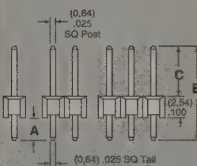

Same as TSW except:   
**Insulator Material:**  
Natural Liquid Crystal Polymer  
**Max Processing Temp:**  
260°C for 10 seconds and  
230°C for 30 to 60 seconds

## BOX CONNECTOR STRIPS BCS SERIES

Mates with:  
TSW, MTSW, LCW, TST,  
TSS, ZST, ZSS, DW,  
EW, ZW, TLW

### High Quality Box Connector Strips

Low profile Samtec box connector strips are available with top entry, dual entry horizontal entry, and a new pass through entry for use with plated-through holes.

BCS Strips feature a double beam contact with selective plating for highest reliability at lowest cost.

### Specifications: BCS

Insulator Material:   
Black Liquid Crystal Polymer  
Flammability Rating:  
UL 94V-O

Insulation Resistance:  
5000 MΩ min

Operating Temp Range:  
-65°C to +125°C

Max Processing Temp:  
260°C for 10 seconds and  
230°C for 30 to 60 seconds

Withstanding Voltage:  
1000 VRMS @ 60 Hz

Contact Material:  
Phosphor Bronze

Plating:  
Au, PdNi or Sn over  
50μ" (1,27μm) Ni

Current Rating:  
1 A

Contact Resistance:  
10 mΩ max

Lead Size Range:  
.024" (0,61mm) SQ to .026"  
(0,66mm) SQ

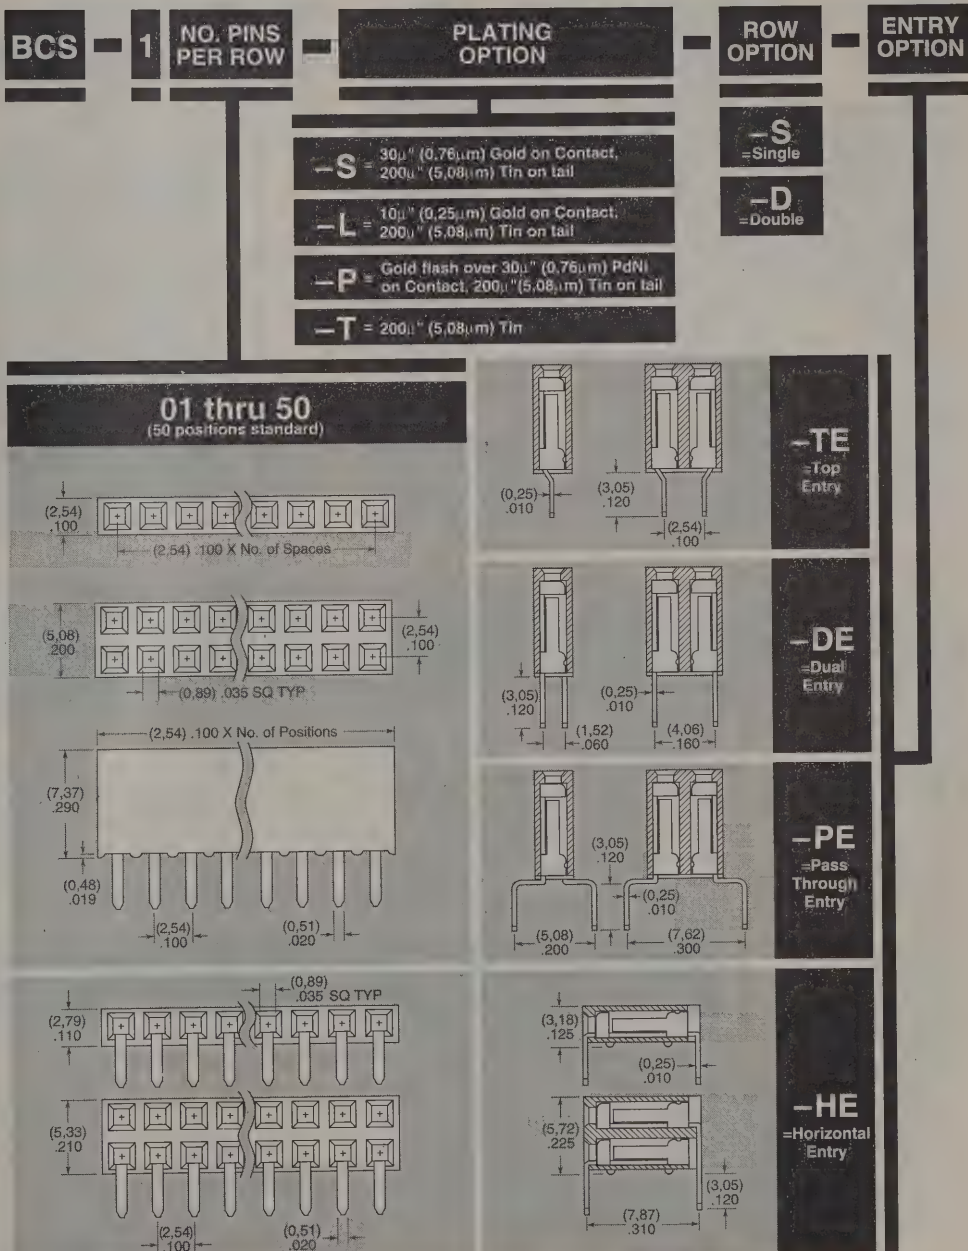

Insertion Depth:  
.180" (4,57mm) to .290"  
(7,37mm) except -HE is  
.180" (4,57mm) to .250"  
(6,35mm)

Insertion Force:  
5 oz (1,39N) avg (.025"  
(0,64mm) SQ pin)

Withdrawal Force:  
3 oz (0,83N) avg (.025"  
(0,64mm) SQ pin)

Note:  
Non-standard strip lengths  
are non-returnable.

**IMPORTANT NOTE:**  
-DE Style connectors cannot  
be used with plated-through  
holes for bottom entry.

= Locking Socket

### Specifications:

#### ICO

Insulator Material: **RG**  
Black Glass Filled Polyester

Flammability Rating:  
UL 94V-0

Insulation Resistance:  
5000 MΩ min

Temperature Range:  
-65°C to +125°C

Withstanding Voltage:  
1000 VRMS @ 60 Hz

Contact: BeCu

Shell: Brass except style K  
Phosphor Bronze

Plating: Au or Sn over 50μ"

(1,27μm) Ni

Current Rating: 1A

Contact Resistance:  
10 mΩ max

Lead Size Range:  
.015" to .022" (0,38mm to  
0,56mm) DIA and most IC  
leads except C, L, M, and N

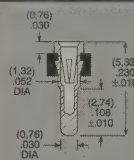

Insertion Force:  
Standard = 9 oz avg, 16 oz  
max (.017" DIA probe); Low  
Insertion Force = 2.5 oz avg,  
5.5 oz max (.018" DIA probe,  
except styles ZM and ZN  
.017" DIA probe)

Withdrawal Force: Standard  
= 2.5 oz avg, 1.5 oz min (after  
12 insertions with .017" DIA  
probe); Low Insertion Force =  
2.0 oz avg, 0.35 oz min (after  
12 insertions with .018" DIA  
probe) except Styles ZM and  
ZN = 2.0 oz avg, 0.5 oz min (with  
.017" DIA probe)

Low Insertion Force (LIF) Contacts Available.

#### -L

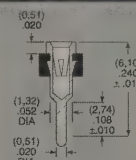

= Low Profile  
For LIF Specify -ZL

Lead DIA Accepted  
= .015" to .020"  
(0,38mm to 0,51mm)

#### -M

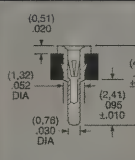

= Low Profile  
For LIF Specify -ZM

Lead DIA Accepted  
= .016" to .021"  
(0,41mm to 0,53mm)

#### -N

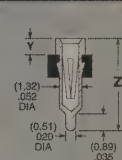

= Micro Socket  
For LIF Specify -ZN

Lead DIA Accepted  
= .016" to .020"  
(0,41mm to 0,51mm)

#### -P or -T

= Short Tail  
For LIF Specify -ZP or -ZT

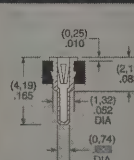

| LEAD<br>STYLE | Z              | Y              |
|---------------|----------------|----------------|
| -P or<br>-ZP  | (5,20)<br>.205 | (0,76)<br>.030 |
| -T or<br>-ZT  | (4,24)<br>.167 | (0,51)<br>.020 |

Locking  
lead (-L)  
available.  
See  
OPTION.

#### -C

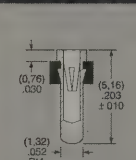

= Micro Socket  
For LIF Specify -ZC

Lead DIA Accepted  
= .016" to .020"  
(0,41mm to 0,51mm)

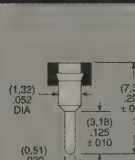

#### -B

= Body Only  
For LIF Specify -ZB

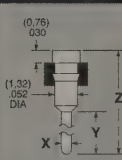

#### -F

= Flush Top

#### -S\*, -A\*, -J, or -K

= Printed Circuit  
For LIF Specify -ZS or -ZA

| LEAD<br>STYLE | X<br>DIA       | Y<br>TAIL       | Z               |
|---------------|----------------|-----------------|-----------------|
| -S or -ZS     | (0,51)<br>.020 | (3,18)<br>.125  | (7,62)<br>.300  |
| -A or -ZA     | (0,51)<br>.020 | (4,57)<br>.180  | (8,89)<br>.350  |
| -J            | (0,64)<br>.025 | (10,41)<br>.410 | (15,24)<br>.600 |
| -K            | (0,89)<br>.035 | (12,95)<br>.510 | (17,86)<br>.703 |

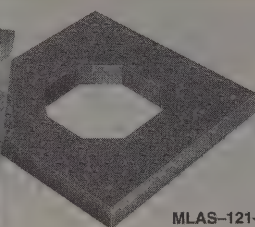

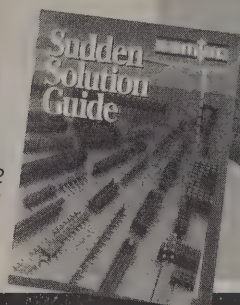

Locking lead (-L) available.  
See OPTION.

MLAS-121-S-13C

PLCC-068-T-A

# LIF PGA & PLCC SOCKETS

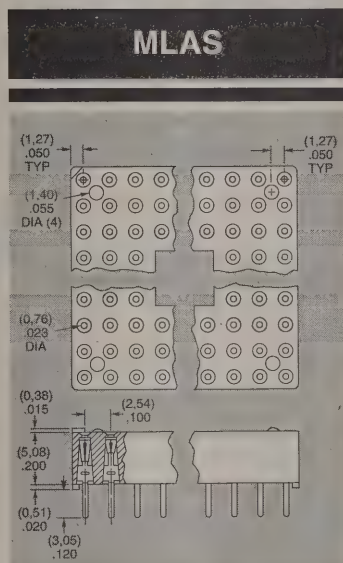

## Specifications:

### MLAS

**Insulator Material:**  
Glass Filled Polyester  
**Flammability Rating:**  
UL 94V-O  
**Insulation Resistance:**  
5000 MΩ min  
**Operating Temp Range:**  
-65 to +125°C  
**Withstanding Voltage:**  
1000 VAC  
**Plating:** Au, PdNi or Sn over  
50μm (1.27μm) Ni  
**Current Rating:** 1A  
**Contact Material:** BeCu  
**Contact Resistance:**  
10mΩ max  
**Lead Size Range:** 015" to  
.022" DIA and most IC leads  
**Normal Force:**  
45g (0.44N) avg  
**Insertion Force:**  
1 oz (0.28N) avg  
**Withdrawal Force:**  
0.5 oz (0.14N) avg

**IMPORTANT NOTE:**

**IMPORTANT NOTE:**  
Specifications are based on preliminary test data. Please call for current report before specifying.

## Specifications

### PLCC

**Insulator Material:** \*  
**Black Liquid Crystal Polymer**  
**Flammability Rating:**  
UL94 V-0  
**Insulation Resistance:**  
5000MΩ min  
**Voltage Withstanding**  
Voltage: 600 VAC  
**Max Processing Temp:**  
230°C for 30 to 60 seconds.  
**Operating Temp Range:**  
-65°C to +105°C  
**Contact Material:** BeCu  
**Plating:** Sn over 50μ" (1,27μm) Ni  
**Current Rating:** 1A  
**Contact Resistance:**  
10mΩ max  
**Lead Coplanarity:**  
Less than 52 leads = .006" (0,15mm) max; 52 leads and more = .008" (0,20 mm) max

## STIMPSON HAS PRODUCED QUALITY METAL FASTENERS SINCE 1852

Stimpson has long been recognized as one of the world's leading manufacturers of metal fasteners whose experience and facilities can offer you prompt service and quality products that meet **Government specifications**.

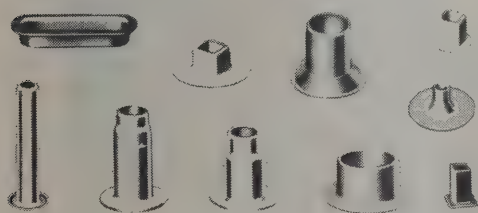

Illustrated below are only a sampling of the many electrical/electronic parts we make. Why not send your product or components to our Assembly Service experts for free analysis, and assembly? We will promptly submit samples and attractive prices.

### TERMINALS, CONTACTS, CONNECTORS

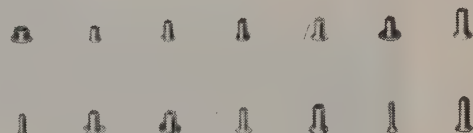

### EYELETS

ANY SHAPE, ANY SIZE, ANY STYLE

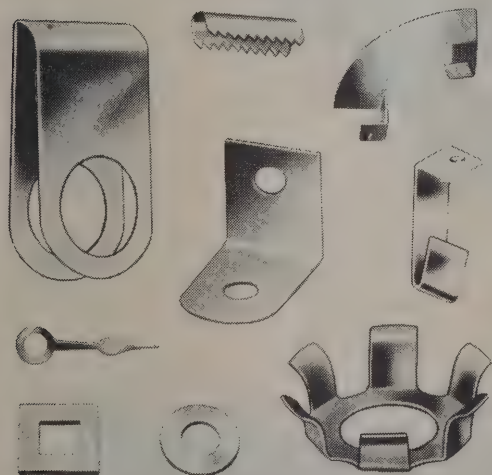

If your eyeletting requirements can't be filled from our standard line of eyelets with its large variety of sizes, styles, shapes and finishes, STIMPSON can design and produce a new eyelet for you, quickly and economically.

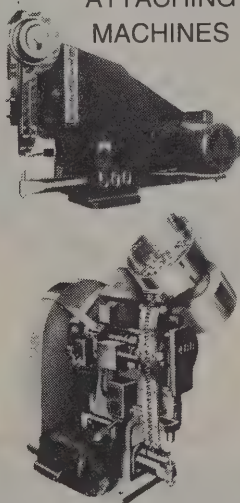

ELECTRONIC MINIATURES

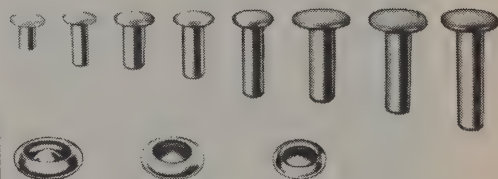

STAMPINGS

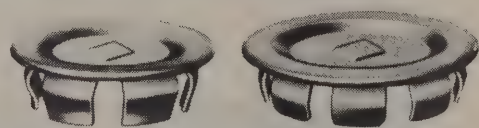

ATTACHING  
MACHINES

C-E® RIVETS

HOLE PLUGS

For more complete information, send today for your free copy of Stimpson Designer's catalog, showing over 1,000 Standard Fasteners and stampings along with our full line of automatic attaching machines.

MICRONEL's lines of ultra-efficient, ultra-slim, ultra-quiet, and ultra-smart fans are available in both standard and custom DC/AC versions. MICRONEL's broad experience and technical expertise in development and design of high performance precision motors and fan assemblies has been utilized to develop the products shown above.

Our appreciation of the customer's system performance requirements, thermal constraints, mechanical interface, and cost factors allows MICRONEL U.S. to offer unique solutions to your problems. TRY US:

# World's largest selection of extruded and stamped heat sinks and other THERMAL MANAGEMENT SOLUTIONS

## 112-PAGE FULL LINE CATALOG

### Design and technical capabilities

Aavid can apply any thermal management discipline to meet your design requirements. No one else has our depth of experience in providing innovative, cost-effective solutions to complex thermal management problems. Our extensive thermal and mechanical CAD abilities are available to help satisfy your specific needs. Ask for application support.

### Hundreds of standard heat sinks for PCBs

- For TO-3, TO-8, TO-18, TO-66, TO-92, TO-126, TO-127, TO-202, TO-218, TO-220, TO-247, TO-251 devices, etc.
- For pin grid array (PGA) packages: Intel 80486, Motorola 68040, etc.
- For leadless chip carrier sockets.
- For DIPs (plastic and ceramic), SIPs, and multiwatts.

### Labor-saving options

- **New Shur-Lock™ tabs** ensure stability during wave soldering.
- **Spring clips** for mounting plastic power devices to heat sinks without bolts.
- **Interface pads**, grease free.
- **Tabs and standoffs**. Hot tin solder dipped for mounting heat sinks to PCBs.

### Over 3000 standard extrusion profiles

Aavid offers the most complete selection of extruded heat sinks in the world. Some of the most unusual and complex extruded heat sinks are available. They are designed to cool all kinds of semiconductors—from power transistors to high-current SCRs, rectifiers, solid state relays and power modules.

### Standard fabricated extrusions

Many standard fabricated extrusions are available for cooling press packs (hockey pucks), stud-mount devices, power modules, DC-DC converters, TO-3s and other high-power JEDEC packages.

### Forced convection coolers

Optimum thermal performance and low air flow resistance. Maximum heat transfer per ounce at minimum cost.

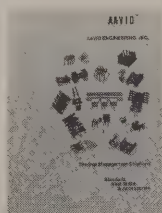

### High power cooling products

- **Bonded-fin** heat sinks. 2-4 times more cooling per unit volume, lighter weight, and more design flexibility than extrusions.
- **Folded-fin** heat sinks. Lightest weight product for heavy-duty cooling.
- **Epoxy isolation** systems. Isolated heat spreaders and multi-piece isolation assemblies. High thermal conductivity.
- **Liquid-cooled** cold plates and bus bars. 10-30 times more cooling than air.
- **Clamps** for press pack semiconductors.
- **Heat pipe** assemblies.

### Total manufacturing, fabricating, bonding, finishing

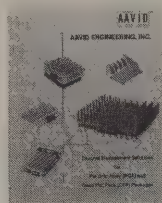

Aavid's capabilities go far beyond the usual stamping, extruding, casting and machining technologies, such as:

- Metallurgical, adhesive and mechanical bonding.
- Surface coating of all kinds.
- EDM machining, lapping, vibratory tumbling.

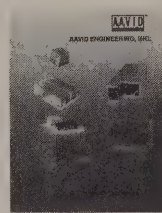

### BOARD-LEVEL SELECTOR GUIDE

Board-level heat sinks and other cooling devices. Focuses on quick attachment products that reduce assembly costs.

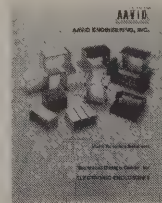

### HEAT SINKS FOR PGAs

For Intel 80486 and Motorola 68040 PGAs. Mount quickly with PGA-Klips™, double-face tape, socket-based clips, etc.

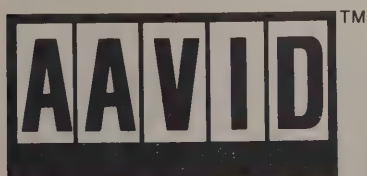

### BONDED FIN HEAT SINKS

With standard base plates, you get fast prototypes. 2-4 times more cooling per unit volume, and lighter weight.

### EXTRUDED ELECTRONIC ENCLOSURES

Extruded aluminum enclosures in many sizes and shapes. Improve product appearance at lower packaging cost.

**NOTE:** THE BEARING TYPE IS NOTED AT THE EIGHTH PLACE IN THE PART NUMBER. "S"—FOR SLEEVE AND "B"—FOR BALL. BOTH TYPES ARE AVAILABLE.

**LIFE EXPECTANCY:** BALL BEARINGS 50K/HRS AT 25°C, 65%RH. SLEEVE BEARINGS 20K/HRS AT 25°C, 65%RH.

**WARRANTY:** FAN MOTORS ARE WARRANTED TO BE FREE FROM DEFECTS IN MATERIAL AND WORKMANSHIP FOR ONE YEAR FROM DATE OF DELIVERY.

**SAFETY APPROVALS** UL E132139 CSA LR85488 \* APPLIED UL

**NOTE:** THE BEARING TYPE IS NOTED AT THE EIGHTH PLACE IN THE PART NUMBER. "S"—FOR SLEEVE AND "B"—FOR BALL. BOTH TYPES ARE AVAILABLE.

**LIFE EXPECTANCY:** BALL BEARINGS 50K/HRS AT 25°C, 65%RH. SLEEVE BEARINGS 20K/HRS AT 25°C, 65%RH.

**WARRANTY:** FAN MOTORS ARE WARRANTED TO BE FREE FROM DEFECTS IN MATERIAL AND WORKMANSHIP FOR ONE YEAR FROM DATE OF DELIVERY.

**SAFETY APPROVALS** UL E132139 CSA LR85488 \* APPLIED UL

## CROSS FLOW FAN

### APPLICATIONS

- Air Movers
- Rack Cooling
- Main Frames
- Copy Machines
- Electronic Cabinets

All Advanced Technology Cross Flow Fans are custom assembled from standard subassemblies. Rotor speeds, CFM, noise levels and motor voltages can be varied to meet our customer special requirements.

## UFO FAN SERIES

UF-240

UF-260

UF-280

The new series of UFO Fans utilize a high efficiency - forward curved centrifugal impeller directly driven by two-phase capacitor run motors operating on 115/220 - 50/60 Hz power.

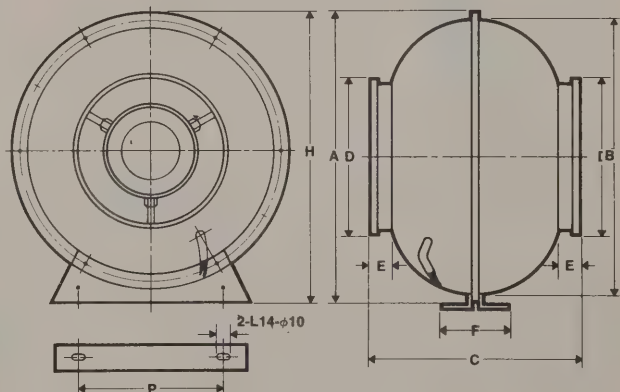

The unique design impeller-housing assembly results in high pressure capability over-wide range of flow values. (See pressure flow curves below.) Variable speed controls available.

**I**n applications where temperature control is essential, AMCO-engineered cooling devices have been the components-of-choice for generations of design engineers. Why? For the very same reasons AMCO enclosures are specified—quality design, precise manufacturing, performance and service that give you peace-of-mind.

- AMCO motorized impellers give you air flow up to 540 SCFM at lower cost than comparable capacity centrifugal blowers. And they last longer, take less space, run quieter, and can be mounted in virtually any plane!
- AMCO dual scroll centrifugal blowers are known for exceptional performance and design flexibility.
- AMCO tube axial fans maximize air movement while minimizing space requirements. They're ideal for applications with minimal air flow restrictions.

## Call and ask for Catalog 850

This 26 page catalog features our full line of cooling devices and accessories. Four color illustrations detail air flow, life expectancies, performance parameters, etc. A must for any design engineer concerned with ambient temperature control.

# COOLING

# Optimize Your Cooling System with SmartFan® Speed Controllers and Alarms

### Reduce Noise

SmartFan causes air movers to run at lower speeds under normal conditions, reducing acoustical noise levels by 15 dB(A) or more.

### Regulate Temperature

SmartFan's exclusive closed-loop, high gain control principle closely regulates air temperature and holds critical component temperatures nearly constant.

### How SmartFan Works

Designers of electronic equipment, constrained to use fixed speed cooling fans or blowers, often face a dilemma. If air flow is set high enough for worst-case thermal conditions, the system may be excessively noisy. If flow is set low enough for acceptable noise, reliability may be compromised. SmartFan solves this dilemma by automatically adapting cooling air flow to the need of the moment and, under typical conditions, reducing noise by 15 dB(A) or more.

SmartFan senses temperature inside fan- or blower-cooled equipment and controls the speed of air movers to hold temperature constant against changes in inlet air temperature, equipment power, flow resistance, and altitude. The sensor is often placed in the exhaust air stream as shown in Figure 1. However, it can be mounted at any downstream location or mounted on a surface to regulate surface temperature.

### AC SmartFan Speed Controllers

AC Controllers operate at 115 or 230 volts AC with up to 6.0 amp current ratings. Safety features including temperature alarms are available. AC controllers use a triac phase control operating principle and have UL, CSA, and TUV approvals.

### DC SmartFan Speed Controllers

DC Controllers operate at 12, 24, and 48 volts DC with up to 7.0 amp power ratings. Safety features including temperature alarms are available. DC Controllers use either a linear or switching operating principle depending on power requirements.

### SmartFan Alarms

Failure of a cooling system in electronic equipment can be disastrous. Without the necessary air flow, component temperatures increase causing operational failure and even permanent damage.

Methods of detecting failure include sensing air, or component temperature, fan speed, or fan current. SmartFan alarms are available separately or in combination with SmartFan Speed Controllers. Alarms can warn an operator, automatically switch equipment to idle mode or completely shut it down.

### SmartFan for HVAC Applications

SmartFan can also be used in many HVAC applications. The basic principle remains the same. Fan speed is proportionally controlled to maintain nearly constant temperature. Under normal thermal load conditions, fan noise and energy usage is reduced and the thermal shock, discomfort, and inconvenience associated with fans that switch on and off, is avoided.

### Custom SmartFan Products

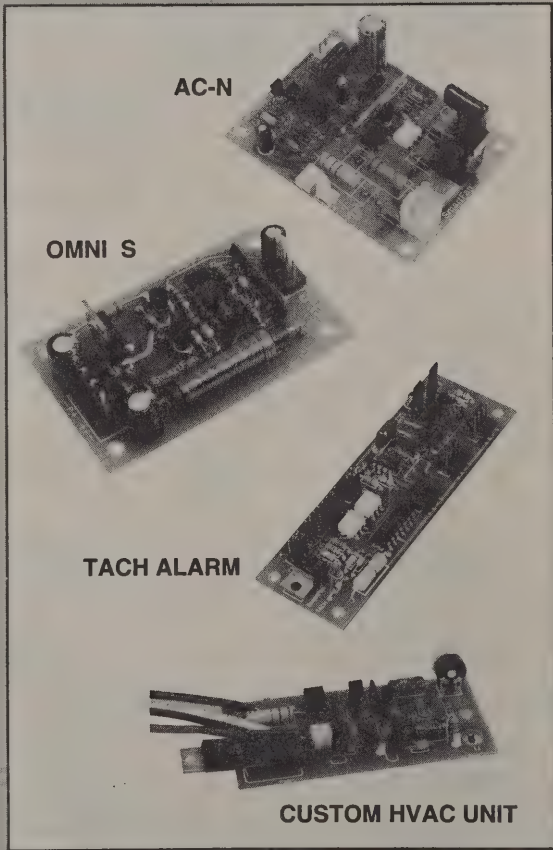

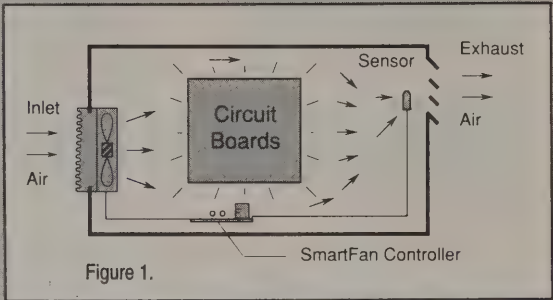

In addition to our line of standard SmartFan Speed Controllers and Alarms, Control Resources, Inc. offers complete custom design, engineering, and testing services. Contact our Engineering Department to discuss any custom applications.

### Increase Safety

SmartFan alarms monitor temperature, fan speed (tach), or fan current. Alarm outputs can drive logic circuitry, LEDs, audible alarms, or circuit breakers.

### Improve Reliability

SmartFan enhances system reliability through temperature control, extended air mover service life, reduced dust intrusion, and energy savings.

# Crouzet® Axial Fans

## General information

### Warranty

Every Crouzet fan carries an unconditional 3 year warranty. If the fan should fail for any reason during the first three years of operation, by the end user, we will replace the fan free of charge. Fans must be returned to Crouzet Corp. freight prepaid. This warranty is for the replacement of the fan only.

### Overload

All Crouzet fans have integral protection against locked rotor condition so that there will be no damage on windings and electronic component. Restart is automatic as soon as any constraint to running has been released.

### Noise data

Acoustical measurements made at distance 1.0 meter from the surface of fan (inner side) and 45° radially off axis of fan.

### Air flow performance data

The performance data has been determined in accordance with AMCA standard 210-74 on a double chamber test set up with measurement on suction side.

### Operation voltage

AC: 115 VAC : 85 V - 125 V  
220 VAC : 185 V - 245 V  
DC: 12 VDC : 10.2 V - 13.8 V  
24 VDC : 20.4 V - 27.6 V

### Dielectric strength

AC : 1500 VAC at one minute  
DC : 500 VDC at one minute

### Safety

All fans are designed and manufactured in conformance with the requirements of UL, CSA and VDE.

### Bearing systems

All Crouzet fans have specially designed and precision lubricated sleeve bearings for long, maintenance free performance at low noise level.

Ball bearings are available on request.

### Operation temperature

AC : -10°C to +70°C  
DC : -10°C to +65°C

### Storage temperature

AC : -30°C to +75°C  
DC : -30°C to +70°C

D.C. Brushless fan

Material MD range  
- Frame: PBT UL 94-VO  
- Fan: PBT UL 94-VO  
Insulation class: class E  
  
Tab terminals and ball bearings available on 120 x 38 mm.

Weight (g)  
■ 120 x 38 mm = 340 g  
92 x 25 mm = 110 g  
80 x 38 mm = 100 g  
80 x 25 mm = 60 g

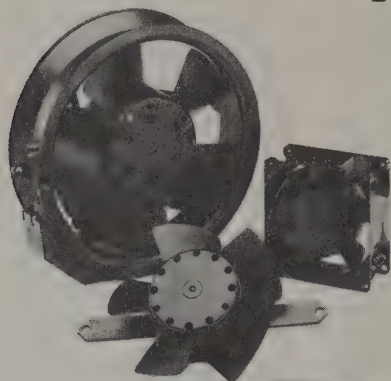

To order  
specify DC fan & part number

# Fans, Impellers, Blowers

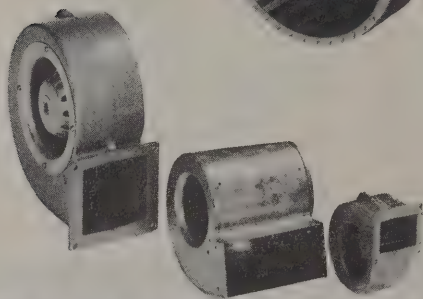

## TUBEAXIAL FANS

- Brushless DC or AC voltages
- Air performance to 265 CFM
- Quiet, long-life, high quality
- All kinds of options & accessories

## AXIAL FANS

- Compact, shallow, high performance design
- Air Performance to 8,000 CFM
- Speed controllable Brushless DC or AC

## MOTORIZED IMPELLERS

- Open blade design with 360° cooling
- Brushless DC or AC with speed control
- Operate efficiently without a housing
- Air performance from 75 to 10,870 CFM

## CENTRIFUGAL BLOWERS

- High pressure performance
- Impeller sizes from 4" to 16"
- Dual inlet or single inlet models
- Brushless DC or AC external rotor motors

**CALL for Catalogs 203-674-1515**

## DESIGN & APPLICATION ENGINEERING HELP

- Experienced Thermal Engineers always available
- Choose from the industry's most complete product line
- Custom solutions to your specific problems with standard products
- Comprehensive solutions which consider form-factor, air movement, static pressure, acoustic, electrical and mechanical requirements
- Complete air testing, acoustic and CAD Laboratory to assist you

110 Hyde Road, Farmington, CT 06034  
Tel: 203-674-1515 • Fax: 203-674-8536

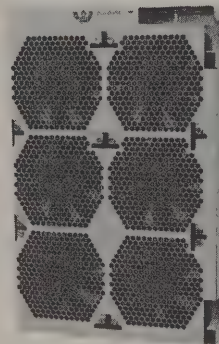

# Air Moving Packages

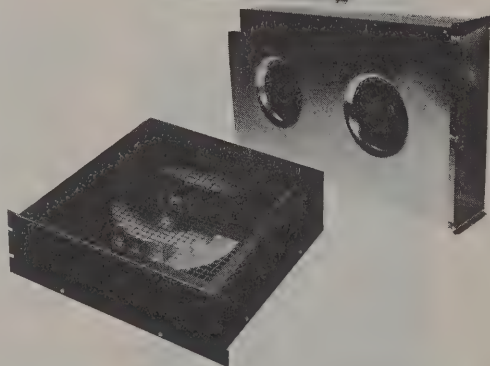

## FAN TRAYS

- Compact, self-contained air moving packages
- Choice of fans and tray sizes
- Custom units available to meet your needs
- Cost-effective solutions for World-Class products

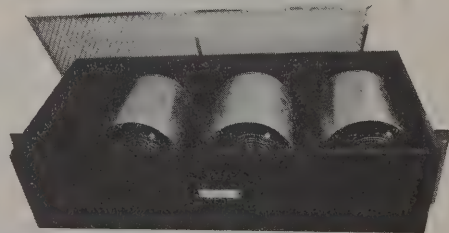

## FLO-THRU MODULES

- Quiet, efficient air moving packages
- Standard models for rack enclosures
- Custom-engineered to user specifications
- Higher CFM per U than competitive units
- Adaptable to your pressure, flow, acoustic and dimensional parameters

## BLOWER PACKAGES

- Custom engineered air moving packages
- Excellent for high static pressure applications
- High quality units built to your specifications
- Available with filters and EMI protection
- Compact single or dual inlet blowers assembled into multi-unit high velocity blower packages

**FAX for Catalogs 203-674-8536**

## ISO 9001 QUALITY, RELIABLE PERFORMANCE

- Proven superior quality, SPC documentation, PPM and 6-sigma programs
- Service for Just-in-Time deliveries, Continuous Flow Manufacturing
- Knowledgeable people help you with ordering, expediting, questions
- Every product is manufactured by ebm as an integral assembly and tested for trouble-free, long-life performance
- Call today for help, assistance or just to request literature

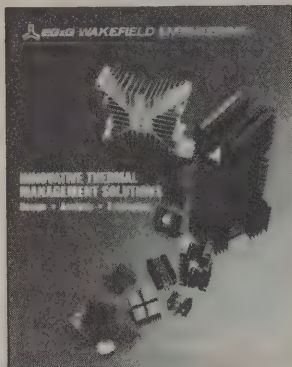

110 Hyde Road, Farmington, CT 06034  
Tel: 203-674-1515 • Fax: 203-674-8536

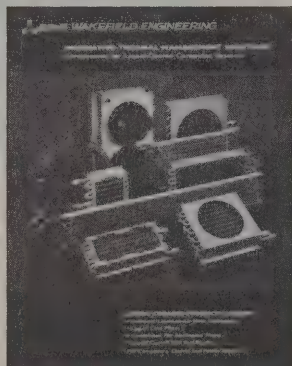

## THERMAL MANAGEMENT SOLUTIONS

EG&G Wakefield Engineering's design, manufacture, and fabrication expertise offers a wide range of standard and custom heat dissipation products and accessories providing innovative thermal management solutions for a diverse range of commercial, industrial, and military applications.

### HEAT DISSIPATION COMPONENTS CATALOG

- Power Semiconductor Heat Sinks
- Extrusions for Power Modules, IGBTs, SCR's, Cabinets
- High Fin Density Heat Sinks
- Liquid-to-Air Heat Exchangers
- Liquid Cold Plates
- SCR Mounting Clamps and Bus Blocks
- Thermally Conductive Adhesives, Pads, Joint Compounds
- Heat Sinks for 14- to 64-Pin DIPs
- Custom Designed and Manufactured Heat Sinks and Fabrications

### ACTIVE COOLING PRODUCTS CATALOG

- Compact Liquid-to-Air Heat Exchangers
- Liquid Cold Plates
- Convolute Fin Air-Cooled Plates and Heat Sinks
- Forced-Air Copper Coolers
- Liquid-Cooled SCR Bus Blocks
- Forced Convection Assemblies
- Special Fabrications

### HEAT SINKS FOR MICROPROCESSORS, ASICs, AND INTEGRATED CIRCUITS

- Standard Pin Fin Heat Sinks to 25 Watts
- Heat Sinks for 10x10 to 21x21 PGAs
- Heat Sinks for 44-Lead to 304-Lead PQFPs, CQFPs
- Omnidirectional Pin Fin Heat Sinks
- Unidirectional Fin Heat Sinks
- Omnidirectional Radial Fin Heat Sinks
- Heat Sink/Clip Assemblies for Intel, AMD, and Motorola Microprocessors
- Engineering Evaluation Kits
- Custom Design Capabilities for Multichip Module Heat Sinks
- Thermally Conductive Adhesives, Pads, Joint Compounds

# SpiderClip™ HEAT SINK AND CLIP ASSEMBLIES FOR MICROPROCESSORS, ASICs, and GATE ARRAYS

## 669 SERIES HEAT SINK SpiderClip™ ASSEMBLY FOR 17x17 PGAs

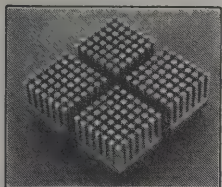

For Application to:

- Intel® 486™ Microprocessors: 80486DX, 80486SX, 80486DX2™
- Intel® OverDrive™ Processor and i860XR RISC Processor
- Intel® i960CA and i960CF™ Embedded Controller
- Intel® 82495 Cache RAM Controller
- AMD® Am29000, Am29050 Microprocessors
- AMD® Am486 Microprocessor
- Weitek Math Co-processors
- Direct attachment to 17x17 PGAs for gate arrays, ASICs

### 669 SERIES SpiderClip™ ASSEMBLY PART NUMBERS

- 669-32AG 1.70 in.-sq. 0.315 in. height, gold iridized heat sink with coated clip
- 669-33AB 1.70 in.-sq. 0.315 in. height, black anodized heat sink with coated clip
- 669-40AB 1.70 in.-sq. 0.400 in. height, black anodized heat sink with coated clip
- 669-52AB 1.70 in.-sq. 0.520 in. height, black anodized heat sink with coated clip
- 162-IT Volume Installation Tool (for rapid, high-volume assembly)
- 163-IT Manual Installation Tool (for R&D, lab, and low-volume assembly)

(Order one 163-IT Tool with any of the SpiderClip™ assemblies.)

## 649 SERIES HEAT SINK SpiderClip™ ASSEMBLY FOR 18x18 PGAs

For Application to:

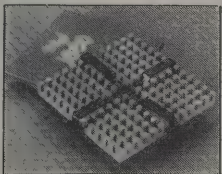

- Motorola 68040 Microprocessor (179PGA)
- Direct attachment to 18x18 PGAs for gate arrays, ASICs

The 649 Series SpiderClip™ Heat Sink/Clip Assembly (patent pending) designed for 1.86 in.-sq ceramic 18x18 PGAs provides rapid and secure mechanical heat sink attachment to the Motorola 68040 and other high-performance ICs.

### 649 SERIES SpiderClip™ ASSEMBLY PART NUMBERS

- 649-51AB 1.86 in.-sq. 0.510 in. height, black anodized heat sink with coated clip
- 163-IT Manual Installation Tool (for R&D, lab, and low-volume assembly)
- 165-IT Volume Installation Tool (for rapid, high-volume assembly)

(Order one 163-IT Tool with any of the SpiderClip™ assemblies.)

## 679 SERIES HEAT SINK SpiderClip™ ASSEMBLY FOR 19x19 PGAs

For Application to:

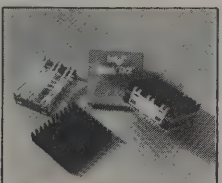

- Intel® i860XP™ RISC Processor (262PGA)
- Intel® 82496 Cache RAM Controller
- Intel 80486DX2™ OverDrive™
- Direct attachment to 19x19 PGAs for gate arrays, ASICs

The 679 Series SpiderClip™ Heat Sink/Clip Assembly (patent pending) designed for 1.95 in.-sq ceramic 19x19 PGAs provides rapid and secure mechanical heat sink attachment of the pin fin heat sink to the i860XP and other high-performance ICs.

### 679 SERIES SpiderClip™ ASSEMBLY PART NUMBERS

- 679-25AG 1.94 in.-sq. 0.250 in. height, gold iridized heat sink with coated clip
- 679-51AB 1.86 in.-sq. 0.510 in. height, black anodized heat sink with coated clip
- 163-IT Manual Installation Tool (for R&D, lab, and low-volume assembly)
- 164-IT Volume Installation Tool (for rapid, high-volume assembly)

(Order one 163-IT Tool with any of the SpiderClip™ assemblies.)

## 629 SERIES HEAT SINK SocketClip™ ASSEMBLY FOR AMP 17x17 PGA LIF SOCKETS

For Application to:

- Intel 80486DX2™, Microprocessor
- Intel 80486SX, 80486DX, 80487SX
- Intel i960CA, CF Embedded Controller
- Intel 80486SX OverDrive™ Microprocessor

The 629 Series SocketClip™ Heat Sink/Clip Assembly attaches directly to AMP Inc. 17x17 PGA LIF Sockets [P/N 382624-1 (169 PGA) or P/N 382624-2 (168 PGA)]. Each SocketClip™ assembly includes

both the clip and the heat sink, providing rapid and secure heat sink retention and proper heat transfer. The heat sink pin spacing and density are optimized for power, airflow, and spacing requirements typical of PC, workstation, and server applications.

### 629 SERIES ASSEMBLY PART NUMBERS

- 629-25AB 1.70 in.-sq. 0.250 in. height, black anodized heat sink with clip
- 629-40AB 1.70 in.-sq. 0.400 in. height, black anodized heat sink with clip
- 629-65AB 1.70 in.-sq. 0.650 in. height, black anodized heat sink with clip
- Three heat sink heights available for different power, airflow, and spacing requirements
- Eliminates adhesives for heat sink attachment; minimizes assembly time
- Excellent clip loading for reliable heat sink retention and heat transfer
- No thermal compound required

## THERMAL MANAGEMENT SOLUTIONS FOR ASICs, MICROPROCESSORS, GATE ARRAYS, CACHE RAM

### 698 SERIES PIN FIN HEAT SINKS FOR INTEL PENTIUM™ AND 21X21 PGAs

#### For Application to:

- Intel Pentium™ Processors
- Hewlett-Packard PA RISC
- Siemens SH100E Gate Arrays
- MIPS R4000

The 698 Series Pin Fin Heat Sinks are designed for Intel Pentium™ processors, and other 21x21 PGAs requiring enhanced heat dissipation and cooling to 18 watts. An optional pre-attached pressure sensitive adhesive is available for ease of installation and reduced assembly time and cost while eliminating the need for thermal compounds.

#### 698 SERIES ASSEMBLY PART NUMBERS

- 698-40AB 2.10 in.-sq. 0.400 in. height, black anodized heat sink
- 698-80AB 2.10 in.-sq. 0.800 in. height, black anodized heat sink
- 698-65AB 2.10 in.-sq. 0.650 in. height, black anodized heat sink
- 698-100AB 2.10 in.-sq. 1.000 in. height, black anodized heat sink

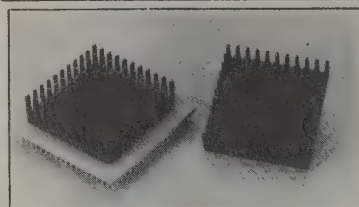

For applications utilizing Intel Pentium Cache Chip Sets, specify these EG&G Wakefield Penguin™ Coolers:

#### INTEL 82496 ADVANCED CACHE CONTROLLER (280-PIN PGA)

- 679-25AG SpiderClip™ Heat Sink/Clip Assembly
- 679-51AB SpiderClip™ Heat Sink/Clip Assembly

#### INTEL 82491 CACHE SRAM (84-LD PQFP)

- DELTEM™ D10650-40 Pin Fin Heat Sink

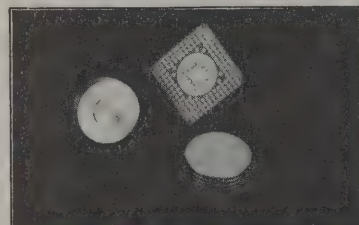

### HEAT SINKS FOR ADHESIVE ATTACHMENT TO 17x17 AND LARGER PGAs

#### For Application to:

- Intel® Microprocessors: 80486DX, 80486SX, 80486DX2™, OverDrive™
- Motorola 68040 Microprocessors
- AMD® Microprocessors: Am29000, Am29030, Am29050, Am486
- Intel® i860XR RISC Processor, i960CA Controller, 82495 Cache RAM Controller, 487SX™
- Weitek and other Math Co-Processors
- Gate Arrays, ASICs, Microprocessors, DVI, DSPs, and Controllers

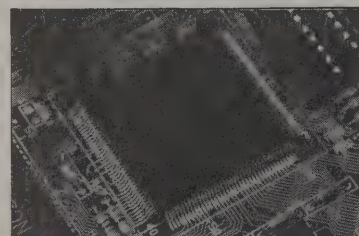

#### PIN FIN HEAT SINK PART NUMBERS FOR ADHESIVE ATTACHMENT TO 17x17 AND LARGER PGAs

- 628-65AB 1.70 in.-sq. 0.650 in. height, black anodized finish
- 655-26AB 1.60 in.-sq. 0.260 in. height, black anodized finish
- 663-35AB 1.53 in.-sq. 0.350 in. height, black anodized finish (Described in Intel® 80486 Product Family Data Books)
- 655-53B 1.60 in.-sq. 0.530 in. height, black anodized finish
- 662-15AG 1.71 in.-sq. 0.150 in. height, gold iridized finish

### HEAT SINKS FOR ASICs, GATE ARRAYS, MICROPROCESSORS FOR 16x16 AND SMALLER PGAs AND 128 TO 208-LD CQFPs

- 658-25AB 1.10 in.-sq. 0.250 in. H Pin Fin
- 658-45AB 1.10 in.-sq. 0.450 in. H Pin Fin
- 658-60AB 1.10 in.-sq. 0.600 in. H Pin Fin
- 660-29AB 1.53 in.-sq. 0.285 in. H, Unidirectional Fin
- 840-1081 1.45 in.-sq. 0.380 in. H Pin Fin
- 840-20B1 1.45 in.-sq. H Pin Fin
- 850-39AG 1.25 in.-dia. H Radial Fin
- 659-40AB 1.45 in.-sq. 0.650 in. H Straight Fin
- 851-36AG 1.00 in. dia. 0.0360 in. H Radial Fin
- 852-39AG 1.25 in. dia. 0.390 in. H Radial Fin

### DELTEM™ PLASTIC HEAT SINKS FOR PQFPs, PLCCs, AND CQFPs

#### For Application to:

- Intel® 80486SX™ Microprocessor (196-ld PQFP; Specify EG&G Wakefield P/N D10850-40)
- Intel® 82490 Cache RAM (100-ld PQFP; Specify EG&G Wakefield P/N D10650-40)
- Analog Devices ADSP2100A (Specify EG&G Wakefield P/N D10650-40)
- ASICs, Gate Arrays, Microprocessors, Embedded Controllers (PQFPs, PLCCs, CQFPs)

The DELTEM™ Plastic Heat Sinks are an innovative, cost-effective solution for heat dissipation from plastic IC packages. These are the only commercially available heat sinks designed

specifically to provide solutions for plastic package material compatibility, TCE mismatch, cost, and weight requirements.

#### DELTEM™ PART NUMBERS

- D10650-40 DELTEM™ 0.650 in.-sq. 0.400 in. H Pin Fin Heat Sink for 100 to 128-ld PQFPs, 44 to 52-ld PLCCs, 100 to 128-ld CQFPs
- D10850-40 DELTEM™ 0.850 in.-sq. 0.400 in. H Pin Fin Heat Sink for 128 to 208-ld PQFPs, 68 and 84-ld PLCCs, 128 to 208-ld CQFPs

# THERMAL MANAGEMENT SOLUTIONS FOR ELECTRONICS

## HEAT SINKS AND ACCESSORIES FOR POWER SEMICONDUCTORS

EG&G Wakefield Engineering offers a complete line of cost-effective heat sinks for TO-3 through TO-247, DO-4, DO-5, and other industry-standard package power semiconductors. The **HEAT DISSIPATION COMPONENTS CATALOG** includes heat sinks, interface pads, and thermal compounds for use with these devices for direct PCB mounting.

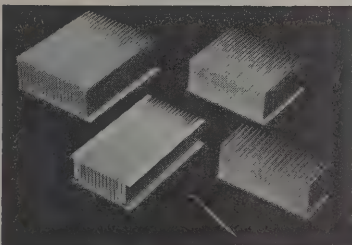

- **637-15ABP** Wavesolderable Heat Sink for TO-220 (1.50 in. H)
- **647-10ABP** Wavesolderable Heat Sink for TO-220 (1.00 in. H)
- **657-25ABP** Wavesolderable Heat Sink for TO-218 (2.50 in. H)
- **667-25ABSP** Wavesolderable Heat Sink for TO-220 (2.50 in. H), to be used with **330SC SpeedClip®** for rapid assembly. Stand-off pins
- **175 Series** Kapton® Thermally Conductive Dielectric Interface Pads

## HEAT SINKS FOR ISOLATED POWER MODULES

Our standard power module heat sinks for Isolated Power Modules have become the industry standard for efficient heat dissipation and multiple module mounting. These heat sinks and others in our **HEAT DISSIPATION COMPONENTS CATALOG** are available for standard mounting center patterns. Our new 394, 395, and 396 heat sinks offer cost-effective answers for high power needs.

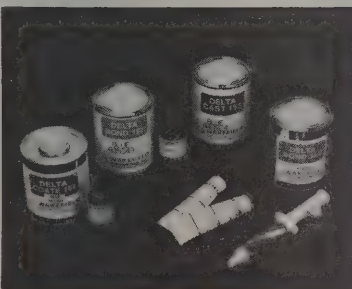

- **392-120AG** Heat Sink for 1-2 Power Modules (80mm mounting centers; 7.09 in. Long)
- **392-300AG** Heat Sink for 1-4 Power Modules (80mm mounting centers; 11.81 in. Long)
- **394-2AB** Heat Sink for 1-4 Power Modules (Flat Base, 5.50 in. Long, Mounting Legs)
- **395-2AB** Heat Sink, Double Fin Surface, for 1-4 Power Modules (5.50 in. Long)
- **396-1AB** Heat Sink for 1-2 Power Modules (Flat Back, 3.00 in. Long, Black Anodized)
- **396-2AB** Heat Sink for 1-4 Power Modules (Flat Back, 5.50 in. Long, Black Anodized)

## HIGH FIN DENSITY HEAT SINKS, HEAT SINKS FOR SCRs

EG&G Wakefield's High Fin Density 510 Series Heat Sinks for mounting and cooling power components offer the highest fin aspect ratio available in the industry. These 510 Series heat sinks are the answer for minimum weight, space, and cost. EG&G Wakefield is the leading manufacturer of SCR compression-pack heat sinks and clamp assemblies. Consult our **HEAT DISSIPATION COMPONENTS CATALOG** for all heat sink types and extrusion profiles available for cooling SCRs and other power devices.

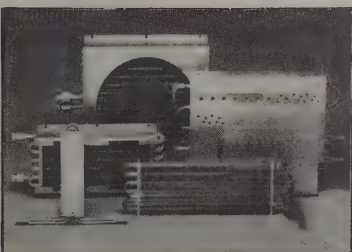

- **510-12U** High Fin Density Heat Sink (Flat Base, 3.136 in. H, 12 in. Long)
- **132-4.5B** Compression-Pack SCR Heat Sink (Used with **Type 139** Clamp)
- **133-10B** Compression-Pack SCR Heat Sink (Used with **Type 139** Clamp)
- **403A** Industry-Standard Double Surface Heat Sink for TO-3 Power Transistors

## THERMAL COMPOUNDS, THERMALLY CONDUCTIVE ADHESIVES, INSULATING PADS

Combine all your heat sink, heat sink extrusion, and accessory needs in one reliable source with EG&G Wakefield Engineering. Our thirty years of designing and manufacturing standard and custom heat sinks have provided a wealth of technical experience for selecting heat sinks and accessories. Call for information about these heat sink accessory materials:

- **126 Type** Silicone-Free Thermal Compound—Eliminates silicon "creep" with an ester base which meets AT&T Technologies Specification KS21343
- **120 Type** Silicone Thermal Compound (available in containers from 2 oz to 20 lbs)
- **156 DeltaBond™** Thermally Conductive Two-Part Acrylic Adhesive. Fixtures at room temperature in less than five minutes
- **175 Series** Kapton® Thermally Conductive Dielectric Interface Pads (available in a variety of shapes for standard TO-, DO-types)

## HEAT EXCHANGERS, COLD PLATES FOR SYSTEM COOLING

- **180 Series** Liquid Cold Plates for efficient, reliable liquid cooling of power transistor arrays, optical and laser components, power modules—in standard configurations available from factory stock
- **720 Series** Liquid-to-Air Heat Exchangers with copper tubing and copper fins for computer system cooling, power supply cooling, instruments—in standard configurations available from factory stock
- **730 Series** Liquid-to-Air Heat Exchangers with stainless steel tubing and copper fins for use in laser systems, instruments, and other applications requiring the use of deionized water

**REQUEST OUR ACTIVE COOLING PRODUCTS CATALOG FOR INFORMATION ABOUT STANDARD LIQUID COLD PLATES AND HEAT EXCHANGERS AND FOR CUSTOM DESIGNS.**

# AC and DC Brushless Fans

## FEATURES

- AC fans, 110/220/DV VAC
- DC fans, 5/12/24/48 VDC
- Ball bearing construction.
- Reduced noise design.
- Locked rotor and reverse polarity protection.
- Low power consumption design.
- Speed sensing option available.
- All models designed to meet UL, CSA, and VDE standards.
- Low, medium and high speeds available, all options

E89061

# There's no better place to turn than ETRI.

Whether you're building computers, peripherals, medical instrumentation, or other electronic equipment, ETRI gives you the two things you need most. Reliable first-rate air moving devices. And a commitment to work with you in partnership. Our selection includes dozens of models from 40 mm to 150 mm designed to meet a large range of performance, acoustical and voltage requirements for AC and DC applications. For a brochure or more

information, just call us at 704/289-5423, Fax 704/283-7170 or write 1503 Rocky River Road North, Monroe, NC 28110. For local help contact your ETRI representative or ETRI distributor. There's no better place to turn.

## ETRI®

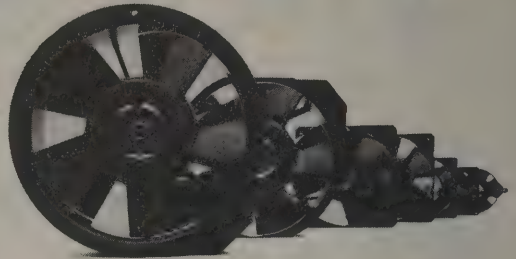

Quality fans for electronics.

**Note:** All 115 volt and 220 volt values are at 60 Hz; consult factory for 50 Hz performance. Noise is listed for sleeve bearing versions; ball bearing may be slightly higher. Most AC fans are UL, CSA and VDE approved. Most DC fans are UL and CSA approved with other approvals pending. Other voltages and terminal/lead configurations available upon request (consult factory). Specifications subject to change without notice. For full catalog or if more information is required, ask your local representative or call ETRI at 704/289-5423.

# ETRI AC Fans size & airflow

ETRI has long been a leader in the design of air-moving devices, from large mine ventilators to miniature flat axial fans. Today, ETRI air movers are cooling and protecting the most sophisticated of electronic packages, and our basic commitment to uncompromising quality and high performance standards have not changed.

ETRI quality accessory items, including finger guards, filters and cords, are also available.

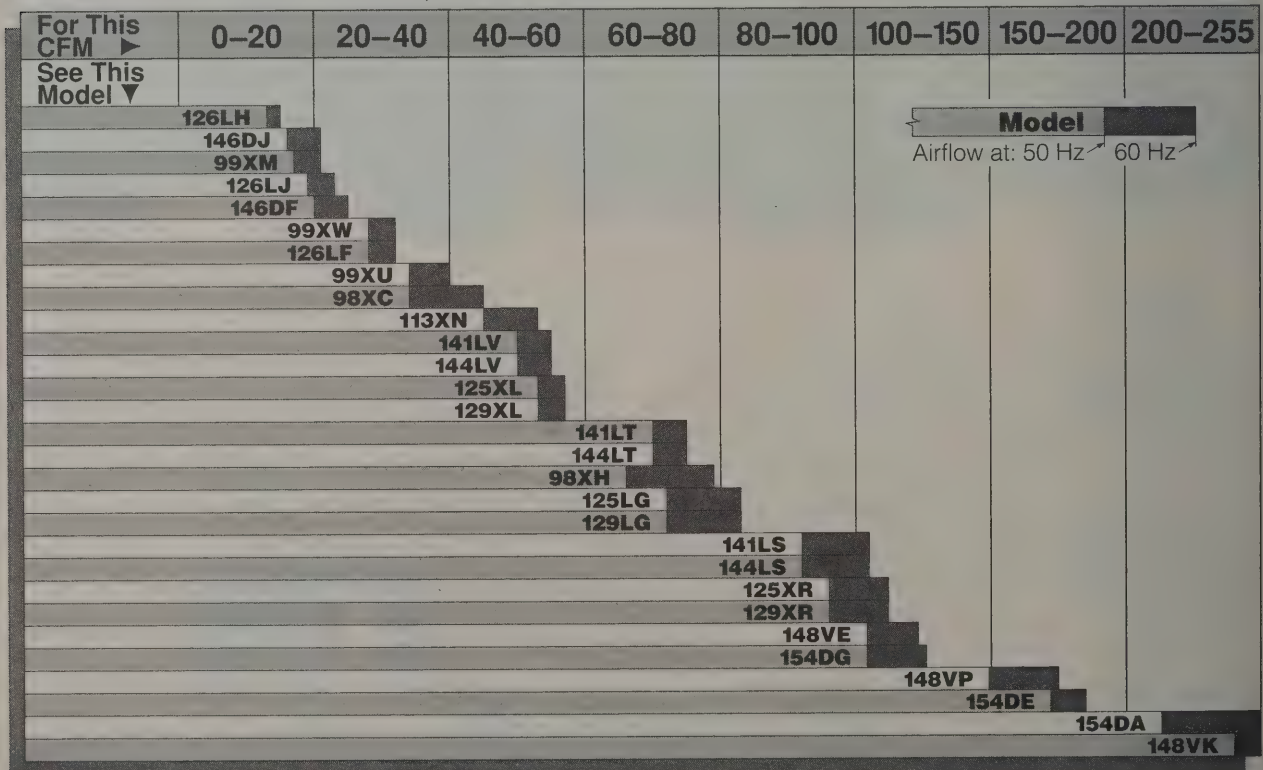

## Size

# ETRI DC Fans size & airflow

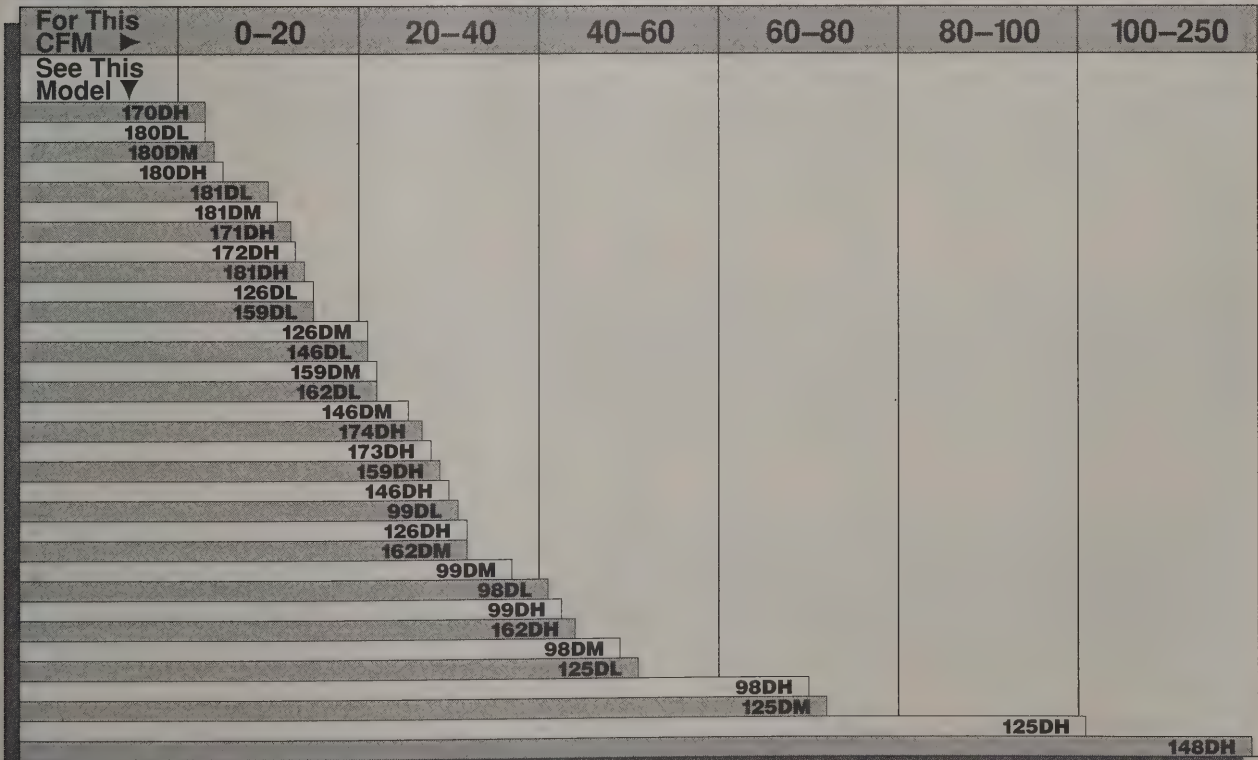

ETRI's line of DC fans offers the design engineer a wide range of product. Options in various voltages, speeds, bearing systems and termination configurations allow the engineer to precisely select the performance for his particular application.

# **IERC - THE EXPERTS IN THE THERMAL MANAGEMENT OF ELECTRONICS**

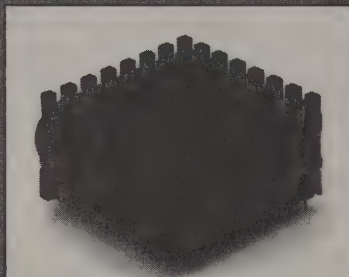

## **HEAT DISSIPATOR PRODUCTS**

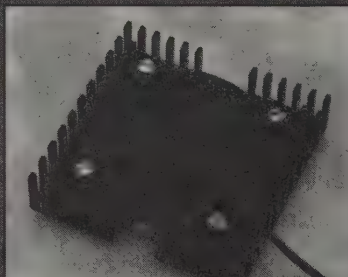

**LOW COST  $\mu$ P HEAT  
DISSIPATOR FOR  
INTEL 486 COMPUTER**

**HEAT DISSIPATOR CLIPS  
DIRECTLY ON INTEL'S  
PENTIUM™  $\mu$ P**

**HIGH SPEED  $\mu$ P HEAT  
DISSIPATOR FOR THE  
MOTOROLA 68040**

**ACTIVE COOLING SYSTEM  
HEAT SINK ASSEMBLY**

### **STANDARD and CUSTOM HEAT DISSIPATORS**

- high speed  $\mu$ P
- stamped
- extruded
- thermal links
- solderable studs
- pin grid arrays
- multi-watt packages

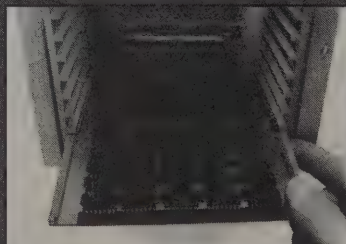

### **ACTIVE COOLING MODULE**

IERC's engineering staff has extensive experience in thermal management design for both standard and custom applications. We can design any custom, cost-saving heat dissipator to meet your specific need. For more than forty years, IERC has been a leader in thermal management technology. We welcome the opportunity to provide you with the assistance necessary to solve all of your thermal management problems.

## **MILITARY PACKAGING PRODUCTS**

The performance specifications of military programs have repeatedly been met by IERC products. Serviceability and reliability are key features that these products provide for effective field operation. IERC's military packaging products include:

- machined ZIF enclosures
- ZIF circuit board retainers
- tool-free modules • custom coldwalls • SEM card cages

**ZIF III CIRCUIT BOARD  
RETAINERS**

**CUSTOM MACHINED ZIF  
ENCLOSURES**

# Thermoelectrics From ITI

## "Cooling For The Future"

Summarized in the following table are specifications for many of the standard cooling modules normally available for prompt delivery in moderate quantities. We are regularly adding new TE devices to the "standard" product category and we suggest that you consult the factory for information on unlisted cooling modules. In addition to standard items, ITI FerroTec specializes in the design and manufacture of custom devices that will meet your exact needs. Please contact our engineering staff regarding your custom product requirements. Note that most thermoelectric modules are available with two different maximum temperature ratings. Devices rated for continuous operation at up to +150°C have a part number prefix of 63 and devices rated at up to +200°C have a 95 prefix.

Type 1 Module Configuration

Type 2 Module Configuration

Suffix code for height tolerance and face-plate configuration.

A = ± 0.3mm (± 0.01") Height tolerance and plain ceramic external surfaces

B = ± 0.03mm (± 0.001") Height tolerance and plain ceramic external surfaces

M = ± 0.3mm (± 0.01") Height tolerance and solderable metallized ceramic external surfaces

### STANDARD THERMOELECTRIC COOLING MODULES

The Quietest and Longest Life Fan.

## Thermal Control Fans

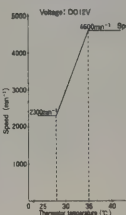

NEW

**Air flow curve**  
(according to Sanyo  
Double Chamber)

### Thermistor Detected Temperature vs Speed

Note: Available

1. Control range from low to high speed
2. Other temperature ranges

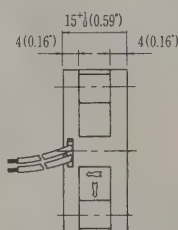

Note 1: The higher values are at a thermistor temperature of 40°C while the lower ones are at 30°C. Note 3: Noise was measured at 30 cm from the fans and converted to that at 1 m away.

Insulation resistance: 10M ohms min. on DC500V megger (between input leads and housing)

Dielectric strength: for 1 minute on 500VAC, 50/60 Hz (input lead between housing)

Operating amb. temp: -10 deg. C ~ +60 deg. C

Motor protection: wrong pole connection, locked rotor condition

## THERMOELECTRIC COOLERS

### WHAT IS A THERMOELECTRIC COOLER?

Thermoelectric coolers (TECs) are solid-state, vibration-free, noise-free heat pumps. They are modular devices and are simple to install and operate. Since they consist primarily of thermoelectric material sandwiched between ceramic plates with no moving parts, they are inherently reliable.

A single-stage thermoelectric cooler is composed of a matrix of thermoelectric couples, connected electrically in series and thermally in parallel. The thermoelectric couple consists of a p- and n-type semiconductor material.

A TEC can be fabricated with as few as one couple to as many as several hundred couples sandwiched between two ceramic plates. These plates form the top and base of the cooler and provide structural integrity as well as electrical insulation from, and thermal conduction to, the heat sink and the device being cooled.

### HOW IT WORKS

Regulating the direction and amount of current—with the use of a feedback loop and temperature controller—allows TECs to cool, heat, or stabilize temperature. Reversing the direction of the current reverses the direction of heat pumping. The figure opposite illustrates the operation of a thermoelectric couple in the cooling mode.

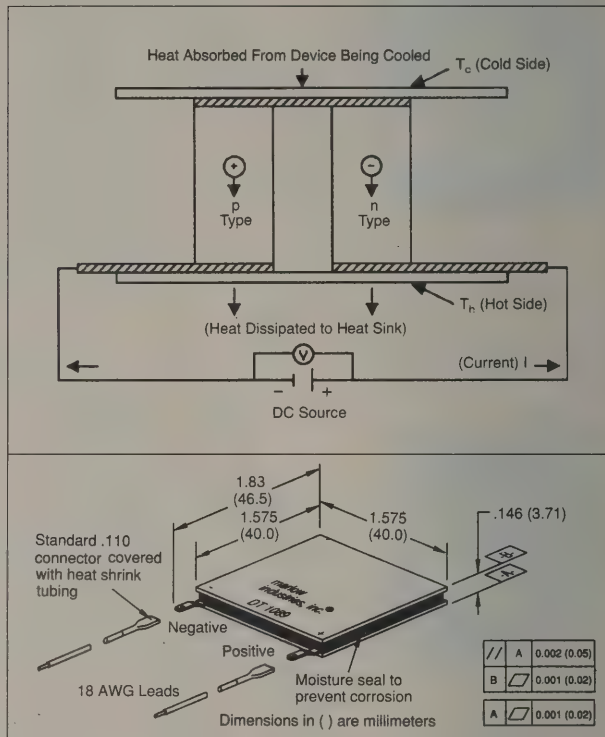

### TYPICAL APPLICATIONS

Thermoelectric coolers are ideally suited to a wide variety of applications due to their small size, wide operating temperature range, low power requirements, and high reliability. Applications can be found in military, aerospace, and commercial products, laboratory and scientific equipment, medical instruments, and test equipment.

**Electro-optic cooling** applications include stabilizing the temperature of solid-state lasers, and cooling infrared detectors and charge coupled devices (CCDs).

**Volume cooling** includes small volumes of air or liquid, and cold plates.

**Miscellaneous Electronic Components** such as high speed integrated circuits, parametric amplifiers, avalanche photo diodes, and vidicon tubes can be spot cooled using thermoelectric coolers.

### SELECTED STANDARD THERMOELECTRIC COOLERS\*

Introducing Marlow Industries' new line of competitively priced DuraTEC™ thermoelectric coolers for high heat pumping applications. The DuraTEC™ line features: sealing to improve reliability in condensing environments, high efficiency thermoelectric material, connectorized lead wires for quick and reliable connections, dual Nickel diffusion barriers for improved operational life, and inventory for quick delivery.

## Thermoelectric Innovation Through Research

10451 VISTA PARK ROAD, DALLAS, TEXAS 75238-1645 / TEL: 214-340-4900 / FAX: 214-341-5212

### ADVANTAGES OF USING THERMOELECTRIC COOLING

- ☐ Localized Cooling
- ☐ Solid State Reliability
- ☐ Temperature Control Above or Below Ambient
- ☐ DC Powered
- ☐ No Gases or Refrigerant Required
- ☐ Small, Lightweight Package
- ☐ Operation in Any Orientation
- ☐ High Resistance to Shock and Vibration
- ☐ Operation in Zero Gravity
- ☐ No Moving Parts
- ☐ Operation in High-G Levels
- ☐ No Acoustical Noise
- ☐ Heating or Cooling—Depending on Current Direction
- ☐ No Electrical Noise
- ☐ Precision Temperature Control to less than .05°C
- ☐ Maintenance Free

### TEMPERATURE CONTROLLER/POWER SUPPLIES

MI's new SE5000 Series of three Temperature Controller/Power Supplies (TC/PS) is designed for temperature control of TECs used with laser diodes, infrared detectors, charge-coupled devices, high-gain amplifiers, and cold plates. This full-featured, linear bipolar power supply offers one of the widest precision temperature control ranges on the market—from -99.9°C to 150°C. Features include: Adjustable bipolar DC output current; programmable PID control/ramp-to-setpoint control; high, low, and deviation limit alarms; digital readout of output voltage and current; simultaneous display of temperature and setpoint; availability with four thermistor types or thermocouple; automatic and manual operating modes; 115/230 VAC at 60/50 Hz for worldwide use; bench/rack model. For applications requiring lower capacity cooling only, Marlow Industries, Inc., offers the bench-rack model SE1032 Temperature Controller/Power Supply.

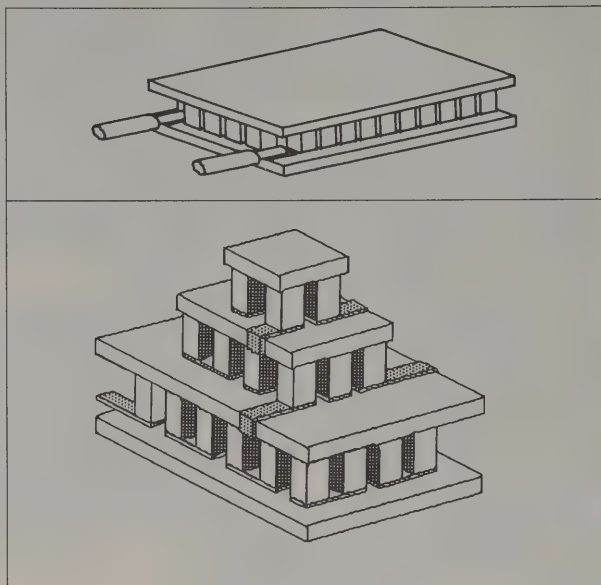

- SE5000** Output: 9 volts @ 2 amps to 12 volts @ 1 amp  
**SE5010** Output: 16 volts @ 6 amps to 21 volts @ 1 amp  
**SE5020** Output: 16 volts @ 12 amps to 21 volts @ 1 amp  
**SE1032** Output: 3.5 volts @ 2 amps to 4 volts @ .14 amps

### ORDERING INFORMATION

Our Customer Service Department will be pleased to provide our full catalog as well as product data sheets on the TECs which best meet your needs. Please direct your call to our Customer Service department at 214-340-4900, or send a FAX to 214-341-5212. Marlow Industries can also provide support through local representatives in most international locations.

### HOW TO SPECIFY THERMOELECTRIC COOLERS

The standard TECs on the previous page are a representative sample of our product line and are grouped according to the number of stages indicated by the first digit following the "MI." They are listed in increasing order according to heat pumping capacity (Qmax); the net heat load to completely suppress  $\Delta T$  at the maximum applied power (Imax @ Vmax). For example, the MI3026T is a three-stage TEC which produces 109°C  $\Delta T$  in a vacuum at 1.3 amps @ 3.4 volts. It will take .62 watts to completely suppress that  $\Delta T$  to zero. This suppression is linear, so that 10% of Qmax (0.072 watts) applied to the cold plate would suppress  $\Delta T$  10%, thereby producing 98.1°C  $\Delta T$  for that heat load condition. Because of the non-linear behavior of TECs and the number of variables involved in analyzing them, they can be designed and modeled more accurately by our experienced engineers using Marlow Industries' proprietary computer software.

### ASSEMBLIES AND RELATED PRODUCTS

#### COLD PLATES

**Liquid Cooled. ST2018.**  $\Delta T_{max} = 49^\circ\text{C}$ ; Vmax = 12.4 volts; Imax = 9.5 amps; Qmax = 70 watts; 3.5" x 4.25" (89 x 109) Cold Plate

**Fan Cooled. ST2033.**  $\Delta T_{max} = 38^\circ\text{C}$ ; Vmax = 12.5 volts; Imax = 8.5 amps; Qmax = 60 watts; 3.25" x 3.25" (83 x 83) Cold Plate

**VACUUM ENCLOSURE. ST1018.** 3.6" (91) ID; 1.5" (38) dia. Quartz window; O-Ring seal; 42 Feed-throughs

#### HEAT SINKS

**Fan Cooled. ST2032.** Fan power required: 115 VAC, 60HZ; Heat sink resistance = 0.15°C/watt

**Liquid Cooled. ST1050.** Water inlet required; Heat sink resistance = 0.05°C/watt @ 0.4 Gal/min.

For selection of TECs with more than two stages, or if more precision is required, please consult one of our applications engineers.

### ORDERING TECs

After you have chosen the TEC which meets your performance requirements, you will need to specify the complete model number. This consists of the base model number followed by the type of metallization (which varies depending on method of installation) and type of ceramic (following model number in table at left).

—01 = both sides are metallized • AC = aluminum oxide ceramics

—02 = hot side only is metallized • BC = beryllium oxide ceramics

—03 = no metallization • AB = combination of AB & BC

Options include:

- Pretinning with 96°C or 117°C solder
- Thermistor mounting (calibration available)
- Lapping to 0.001" (0.025 mm)
- Thermal screening

DuraTEC™ options are as follows:

- |                             |                                   |
|-----------------------------|-----------------------------------|
| Lead wires:                 | Ceramic surface:                  |
| —0X No lead wires           | —X3 Lapped $\pm 0.005"$ (.125 mm) |
| —1X 4" (10.2 cm) lead wires | —X4 Lapped $\pm 0.001"$ (.025 mm) |
| —2X 8" (20.3 cm) lead wires |                                   |

# EnviroCool™ Air Conditioners

## Features

- Below ambient cooling without CFCs or HCFCs
- Heat pumping capabilities in excess of 1,000 BTU/hr (312 W)
- Highly reliable; the fan is the only moving part
- Operates in any orientation
- Built-in thermostatic temperature control (programmable temperature controller optional)
- Power supply available for 115 VAC applications
- Maintenance free

## Applications

Marlow Industries' EnviroCool™ line of solid-state air conditioners are rated from 96 Watts to over 312 Watts and offer below ambient cooling in either indoor or outdoor applications. The EnviroCool™ products are environmentally safe, highly reliable and maintenance free.

In addition to our standard EnviroCool™ products, we offer special design services to OEM manufacturers for air-to-air, liquid-to-air or cold plate assemblies. If you feel a special design might be needed, please contact one of our application engineers for assistance.

**marlow industries, inc.**  
20 YEARS OF THERMOELECTRIC EXCELLENCE

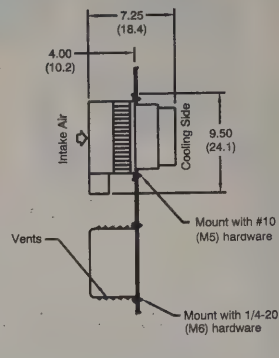

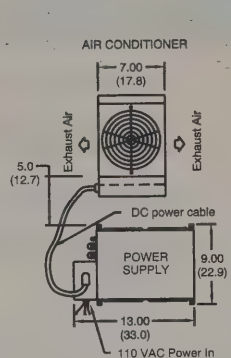

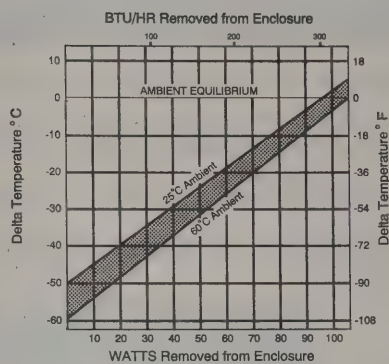

## Performance and Mechanical Characteristics

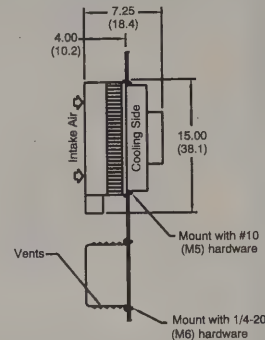

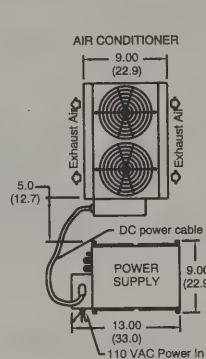

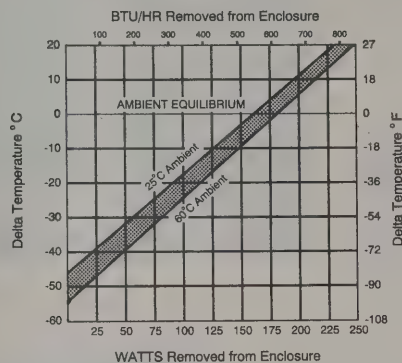

### AC-2000

- 328 BTU/hr cooling or 96 Watts min.
- Operates on 24 VDC or 115 VAC, 50 - 60Hz with optional power supply
- Weights 12 lbs
- PS-2110 weights 16 lbs

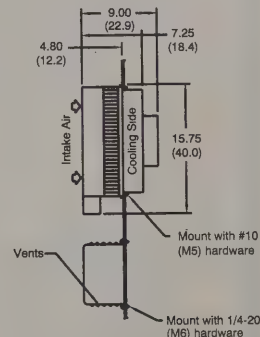

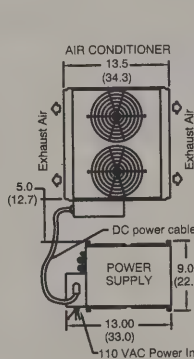

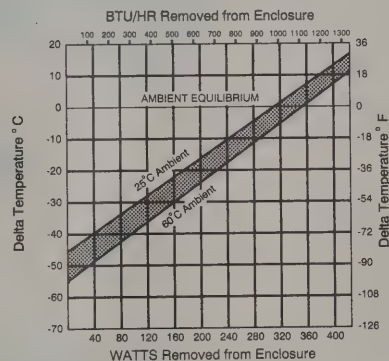

### AC-4000

- 546 BTU/hr cooling or 160 Watts min.
- Operates on 48 VDC or 115 VAC, 50 - 60Hz with optional power supply
- Weights 23 lbs
- PS-4110 weights 21 lbs

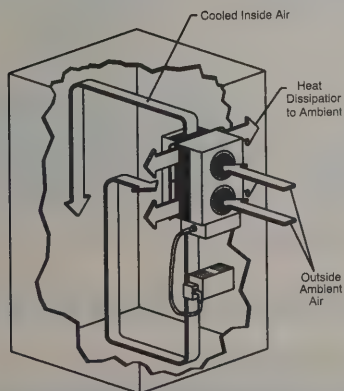

### AC-8000

- 1065 BTU/hr cooling or 312 Watts min.
- Operates on 96 VDC or 115 VAC, 50 - 60Hz with optional power supply
- Weights 37 lbs
- PS-8110 weights 25 lbs

### Typical Cooling System Configuration

Air conditioners and power supplies are available with a painted or stainless steel exterior.

#### NEMA Rating

|                          |           |
|--------------------------|-----------|
| Painted exterior         | 12        |
| Stainless Steel exterior | 12, 4, 4X |

Please contact one of our Customer Service Representatives or Application Engineers for assistance in identifying or ordering the cooling solution that best meets your requirements.

## UNLIMITED COOLING SOLUTIONS! Standard, Modified, and Custom Cooling Capabilities From the Industry's Pioneer...

### McLEAN CARD COOLERS

– *Single and Variable Speed Cooling for  
VME Multi-Bus II Card Cages*

- Cooling on Demand
- Performance Monitoring
- 150 to 1300 CFM, 0-1.4" Static Pressure

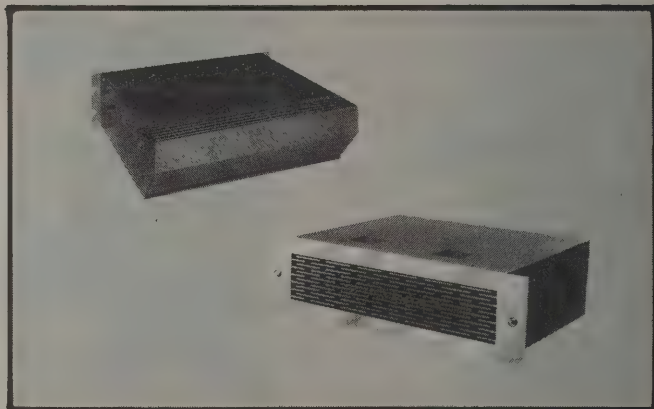

McLean's new "smart" CARD COOLERS combine maximum efficiency with maximum reliability, resulting in reduced downtime for your entire system. The CARD COOLERS' ability to sense heat levels and match motor speeds to cooling requirements means ultra quiet operation with lower power usage and less wear and tear on the system components. Available in fan tray, packaged fan and packaged blower versions, single or variable speeds.

### McLEAN PACKAGED BLOWERS

- Broad Range of Models
- Designed-In Dependability
- 60-2,500 CFM, 0.0" to 9.0" Static Pressure
- 115-230VAC, 12, 24, 48VDC

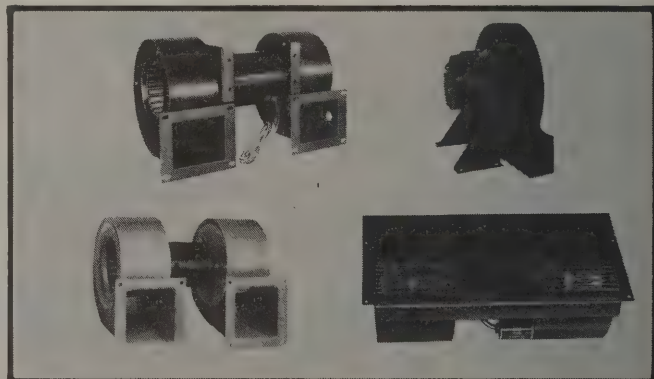

McLean was the pioneer in developing compact, high performance forced-air cooling units designed to protect heat-sensitive rack-mounted electronics. We're still the leaders, and can offer a wide range of configurations, CFMs, static pressures, shielding, and more. And, our vertically-integrated manufacturing processes mean that you can off-load much of your subassembly work to McLean for lower cost, and faster delivery of units that are ready to "plug and play".

### McLEAN CENTRIFUGAL BLOWERS

- Single, Dual, Radial
- Thousands of Configurations
- 0-2,500 CFM, 0.0" to 9.0" Static Pressure
- 115-230VAC, 12, 24, 48VDC

Applications limited only by your imagination! These McLean centrifugals are working full time worldwide cooling a full spectrum of electronic systems. Units are available with a range of wheel diameters, available with AC or DC power, and highly reliable heavy duty motors UL recognized and CSA approved. Standard, modified and custom housings, and mounting make short work of your cooling design problems.

## UNLIMITED COOLING SOLUTIONS!

### McLEAN FANS

- Filter Box, Orifice, Panel
- Rugged, Adaptable, Economical
- 275 to 1,200 CFM, 0.0" to 1.8" Static Pressure

Our range of prefiltered sizes, performance and configurations were designed with flexibility in mind. Units can pressurize or evacuate any enclosure, with vertical or horizontal mounting. Narrow depth dimensions allow flush, close-wall mounting where space is limited. Units are precisely balanced for quiet, vibration-free operation.

### McLEAN MOTORIZED IMPELLERS

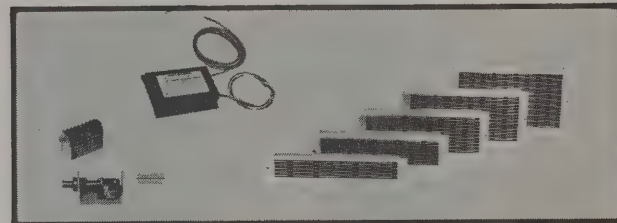

- Quiet, Compact, High Static Pressure–
- Custom Packaging
- 160-1,200 CFM
- AC & Brushless DC

External rotor motorized impellers — low profiles, wide airflow ranges, numerous wheel sizes, fast delivery. And, McLean now offers you custom tailored blower enclosures!

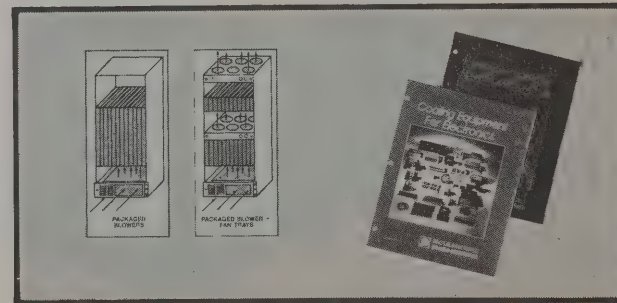

### McLEAN ACCESSORIES

McLean offers a wide range of cooling product accessories, ranging from Filter Grille Panels, Inlet or exhaust guards, airflow switches and controllers, and more. Accessories can be supplied mounted on order, or retrofitted to existing applications. Custom accessories, too.

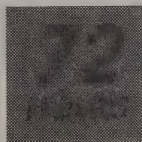

### DESIGN ASSISTANCE

McLean's design engineers have been winning the battle against electronically-generated heat for decades, and are ready and willing to apply that expertise to your cooling project. For custom and modified applications, our computer-aided design systems and testing laboratories are the industry's best. For standard applications, our print files contain thousands of proven cooling solutions ready to go to work for you right now. Call or write for our comprehensive literature!

### 72 HOUR SHIPMENT

Just three days—that's all it takes to put one of the McLean 72 hour units on the dock ready to ship to you, with overnight delivery if necessary. McLean has hundreds of units ready to manufacture from inventoried parts that can keep your supply surprises from turning into downtime.

### AND MORE...

- Over 5,000 active designs including MIL-SPEC
- Shielded Cooling
- Heat Exchangers
- McLean Motors

**COOLING for electronic control panels**

*We offer the broadest line of some of our most popular in-stock climate control products through distributors nationwide.*

McLean Midwest, the market leader in industrial cooling, carries the broadest and most extensive product range available for cooling your electronic/electrical controls.

- Closed-loop air conditioners range in capacity from 800-19,000 BTU/Hr.
- Closed-loop heat exchangers have efficiency ratings up to 93W/°F (167W/°C).
- New filter fan packages have air flow ratings from 30 CFM to 350 CFM.

McLean Midwest climate controllers pay for themselves by preventing a single shut-down, extending the life of sensitive electronic controls, and reducing the frequency of shutdowns for cleaning.

Call today to discuss your cooling needs with one of our experienced applications engineers. Make sure to request our free catalog, *Cooling for Electronic Control Panels*.

**MECHATRONICS****FULL LINE DC FANS**

- 5, 12, 24, 48 VDC
- All frame sizes - 40mm x 12mm thru 120mm x 38mm
- UL / CSA / IEC 950 Certified
- Low Noise Designs
- Thermistor/speed control fans
- Locked Rotor/Tachometer Output Signals
- Large Inventory - J.I.T. Service

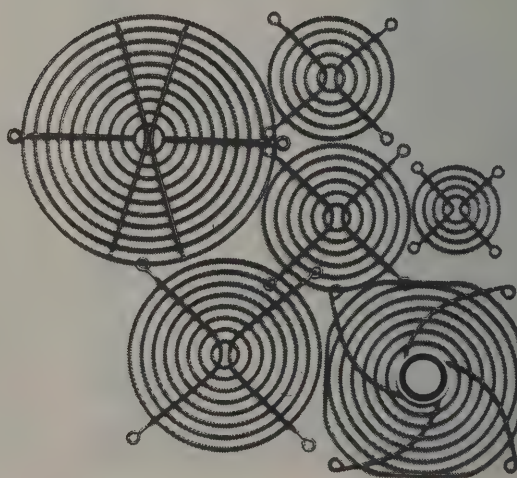

**Value Added Assembly Capability**

- UL Listed # E139199
- CSA File # LR - 98754
- Custom Wire Harness Manufacturing and Installation
- Installation of Special Connectors
- Custom Sheet Metal Bracket Manufacturing and Installation
- Build to print
- QC System Conforms To : MIL-I-45208A

# INSTRUMENT FAN FILTERS

## INSTRUMENT FAN FILTER INJECTION MOLDED CASING

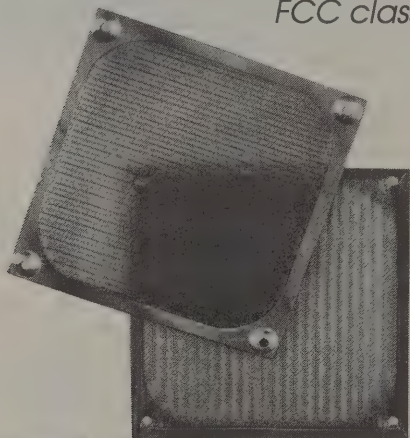

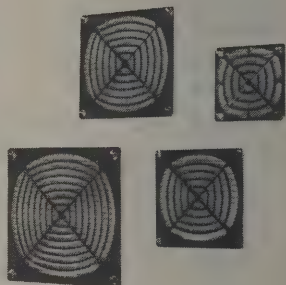

### applications:

- optical instrumentation
- aerospace
- tape drives
- industrial electronics
- office equipment
- power supplies

## RFI/EMI FAN FILTERS

Tested by an independent electromagnetic compatibility consulting firm. Provides attenuation levels to help your equipment meet FCC class A and FCC class B (part 15 subpart B).

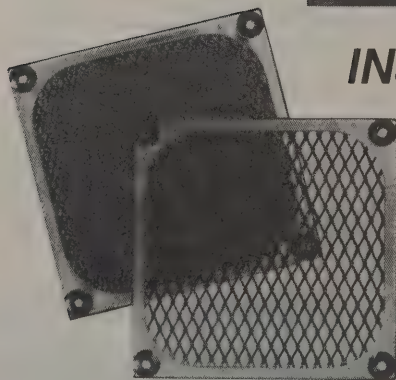

## ALL ALUMINUM INSTRUMENT FAN FILTER

### applications:

- data processing equipment
- medical equipment
- office equipment
- subsystems

## INSTRUMENT FAN GUARD

**New inexpensive finger guard of all aluminum frame with expanded aluminum media.**

Available in irridite and anodize finishes. Foam and synthetic media can be sandwiched between expanded aluminum for a dust filter on special order.

**AIR FILTRATION PRODUCTS, INC.**  
707 N. Main Avenue • Tucson, Arizona 85705

# Thermoelectric Cooling from MELCOR ...versatile, reliable, cost-effective.

If your design criteria for temperature control include high reliability and versatility, small size, low weight and intrinsic safety, you owe it to yourself to investigate Frigichip™—the miniaturized heat pump from MELCOR.

Frigichips are solid state, thermoelectric heat pumps that utilize the Peltier effect to perform the same cooling functions as freon-based compression or absorption refrigerators...but in miniature!! Use them for space cooling of cabinet enclosures, cooling of special shapes, plates, castings or spot cooling of small individual devices. Use for precise temperature control by cycling from cooling to heating.

## Broad Spectrum of Applications

MELCOR Frigichips have been proven for three decades in a wide range of thermal management applications, including:

- Fiber optic & other electro-optic cooling applications
- Food service refrigeration & other commercial/institutional applications
- Appliances: portable 12 volt refrigerators, water & beverage coolers, etc.
- Instruments for physical, chemical, optical & electronic analysis
- Laboratory & scientific instruments, computers, cameras
- Medical & pharmaceutical equipment
- Military/aerospace applications
- And countless others

## Only Frigichip Combines All These Benefits

- Quick cooling to below ambient—economically
- Reduced space/size/weight
- Reliable solid state operation—no sound or vibration (lifetimes of > 200,000 hours!)
- Precision temperature control capability
- Minimum, if any, electrical noise

- DC operation
- Electrical power generation from waste heat
- More than 100 standard single stage types available, from sub-miniature, low capacity to compact, high-capacity
- Multi-stage cascades to  $-95^{\circ}\text{C}$ , designed to specifications

## Wide Choice of Standard and Custom Modules

MELCOR offers you more than 100 standard Frigichip modules ranging in size from 2 x 3 mm to 62 x 62 mm and cooling capacities from 0.2 to 125 watts. The tables and graphs on the following three pages provide module specifications and a method for choosing the module that's ideal for your application. In addition, MELCOR can provide custom assemblies and multi-stage cascades, with or without heat exchangers.

## From the World Leader in Thermoelectrics

More than 30 years ago, MELCOR was the first to provide industry with practical thermoelectric devices. Today, we continue to advance this remarkable technology...and provide most of the world's thermoelectric modules! For more details or immediate assistance, just call our applications group.

**FC SERIES - OPTION TWO**

**Notes:**

- (1) Q<sub>MAX</sub> rated value at ΔT = 0°, I<sub>MAX</sub> and V<sub>MAX</sub>, T<sub>H</sub> = 25°C
- (2) Thickness (D) for type L only.

**Interfacing:**

Both hot and cold faces lapped flat, TYPE L. Both faces metallized and tinned, TYPE TT. Hybrid, hot face tinned, cold face lapped, TYPE TL. Hot face lapped, cold face tinned, TYPE LT.

**Wire Standards:**

| Module Type | Wire Gauge (AWG) |
|-------------|------------------|
| FC 0.45-ALL | 32               |
| FC 0.6-ALL  | 30               |
| FC 0.65-ALL | 30               |

For all FC Series modules, wire is solid, uninsulated and 50 mm (2.0 in.) long.

## CP SERIES

## CP --254--

\*These modules have four leads and can be wired in series or parallel. The Specifications table indicates maximum values for V and I when "Wired in Series"/"Wired in Parallel."

### Notes:

- (1) Q<sub>MAX</sub> rated value at ΔT = 0°, I<sub>MAX</sub> and V<sub>MAX</sub>, T<sub>H</sub> = 25°C
- (2) Thickness (D) for Type L only.

### Interfacing:

Both hot and cold faces lapped flat, TYPE L. Both faces metallized and tinned, TYPE TT. Hybrid, hot face tinned, cold face lapped, TYPE TL. Hot face lapped, cold face tinned, TYPE LT. Two face soldering (Type TT) in sizes larger than 12 x 12 mm is not recommended. Consult MELCOR for details.

### Wire Standards:

| Module Type | Wire Gauge (AWG) | Module Type | Wire Gauge (AWG) |
|-------------|------------------|-------------|------------------|
| CP 0.8-ALL  | 26               | CP 5--10    | 14               |
| CP 1.0-ALL  | 24               | CP 5--06    | 12               |
| CP 1.4-ALL  | 18               | CP --254--  | Contact MELCOR   |
| CP 2-ALL    | 18               | Multistage  | Contact MELCOR   |
| CP 2.8-ALL  | 16               |             |                  |

For all CP Series modules, wire is stranded, 114 mm (4.5 in.) long and PVC insulated.

# How to Use TEC Selection/Performance Graphs

## TEC SELECTION (Use the Thermo section of S/P Graph)

Before beginning the TEC selection process, three application parameters must be known:  $T_H$ ,  $T_C$  and  $Q_C$ . **For this example,  $T_H = 37^\circ\text{C}$ ,  $T_C = 5^\circ\text{C}$  and  $Q_C = 30\text{ W}$ .**

1. Calculate  $\Delta T = T_H - T_C$ .  $\Delta T = 37 - 5 = 32^\circ\text{C}$
2. Choose the S/P Graph with  $T_H \leq T_H$  of the application; read  $\Delta T_{MAX}$ . (If the application's  $\Delta T \geq \Delta T_{MAX}$ , a multistage TEC is required. Contact a MELCOR application engineer for assistance.) **Select S/P Graph with  $T_H = 35^\circ\text{C}$ ;  $\Delta T_{MAX} = 70^\circ\text{C}$ .**
3. Locate  $\Delta T$  at the top or bottom of the selected graph. At  $\Delta T$ , draw a vertical line through the entire graph. **Draw vertical line at  $\Delta T = 32^\circ\text{C}$ .**
4. Locate intersection of  $\Delta T$  and  $I_{OPT}$  curve. Read  $I_{OPT}$ . **At  $\Delta T = 32^\circ\text{C}$ ,  $I_{OPT} = 0.4\text{ I}_{MAX}$ .**
5. Select an operating current ( $I_{SELECT}$ ) between  $I_{OPT}$  and  $I_{MAX}$ . When there are no special design constraints, a practical choice would be midway between  $I_{OPT}$  and  $I_{MAX}$  where  $I_{SELECT} = (I_{OPT} + I_{MAX}) / 2$ .  **$I_{SELECT} = (0.4\text{ I}_{MAX} + 1.0\text{ I}_{MAX}) / 2 = 0.7\text{ I}_{MAX}$ .**
6. At intersection of  $\Delta T$  and  $1.0\text{ I}_{MAX}$ , draw a horizontal line through the graph and determine  $Q_C/Q_{MAX}$  for  $I_{MAX}$ . **Draw horizontal line through ( $\Delta T = 32^\circ\text{C}$ ,  $1.0\text{ I}_{MAX}$ ). Line intersects vertical axis at  $Q_C/Q_{MAX} = 0.58$ .**
7. Repeat Step 6 for  $I_{OPT}$ . **Draw horizontal line through ( $\Delta T = 32^\circ\text{C}$ ,  $I_{OPT}$ ). Line intersects vertical axis at  $Q_C/Q_{MAX} = 0.23$ .**
8. Repeat Step 6 for  $I_{SELECT}$ . **Draw horizontal line through ( $\Delta T = 32^\circ\text{C}$ ,  $0.7\text{ I}_{MAX}$ ). Line intersects vertical axis at  $Q_C/Q_{MAX} = 0.46$ .**
9. Knowing  $Q_C$ , solve for  $Q_{MAX}$  corresponding to  $I_{MAX}$ ,  $I_{OPT}$  and  $I_{SELECT}$ .  $Q_{MAX} = Q_C / [Q_C/Q_{MAX}]$ . **At  $I_{MAX}$ ,  $Q_{MAX} = 30/0.58 = 51.7\text{ W}$ . At  $I_{OPT}$ ,  $Q_{MAX} = 30/0.23 = 130.4\text{ W}$ . At  $I_{SELECT}$ ,  $Q_{MAX} = 30/0.46 = 65.2\text{ W}$ .**

10. Refer to the Specification Tables and select the TEC(s) having a  $Q_{MAX}$  near the  $Q_{MAX}$  for  $I_{SELECT}$ . Any TEC with values falling between the  $I_{OPT}$  and  $I_{MAX}$  selection boundaries will suffice. The  $I_{MAX}$  boundary represents a lower TEC unit cost, highest input power design. The  $I_{OPT}$  boundary represents a higher TEC unit cost, lowest input power design. **Select the CP 1.0-254-05L, CP 1.4-127-045L or CP 2-71-06L. The  $Q_{MAX}$  value for each is close to  $65.2\text{ W}$ , and between  $51.7$  and  $130.4\text{ W}$ .**

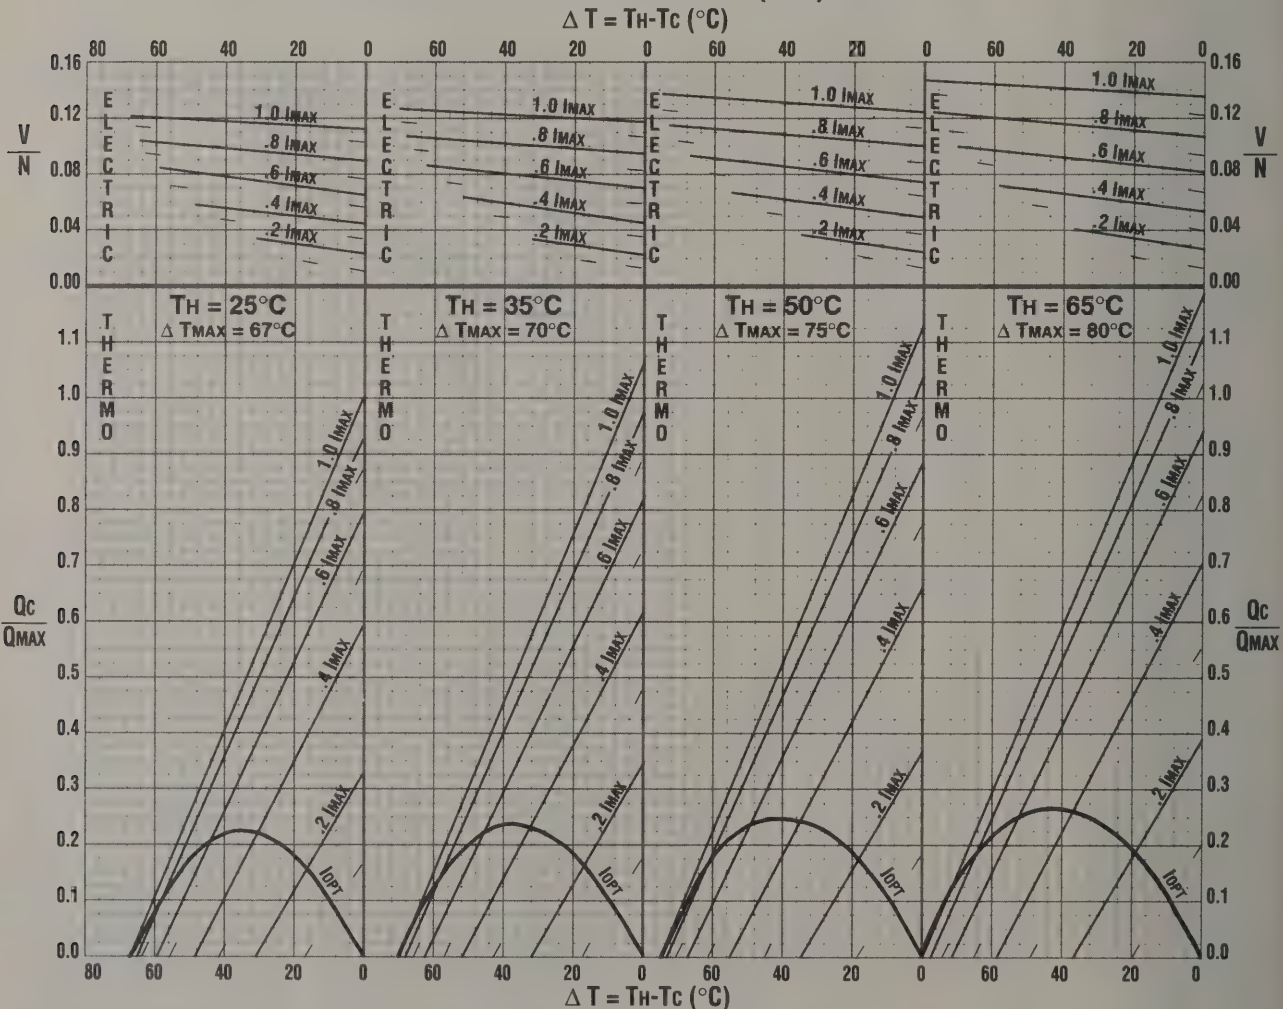

## TEC PERFORMANCE (Use the Thermo and Electric sections of S/P Graph)

To evaluate performance of a chosen single-stage TEC, convert the universal S/P Graph scale values to those of a specific TEC. (The  $\Delta T$  values stay the same.)

1. From the Specification Tables, read the values of  $Q_{MAX}$ ,  $I_{MAX}$  and  $N$  for the selected TEC. **For the CP 2-71-06L:  $Q_{MAX} = 67.0\text{ W}$ ,  $I_{MAX} = 14.0\text{ A}$  and  $N = 71$ .**
2. For both the Thermo and Electric sections of the graph, use the selected TEC's  $I_{MAX}$  to calculate current values.  **$0.2\text{ I}_{MAX} = 0.2 \times 14.0 = 2.8\text{ A}$ ;  $0.4\text{ I}_{MAX} = 0.4 \times 14.0 = 5.6\text{ A}$  . . .**
3. For the vertical axis of the Thermo section, multiple all  $Q_C/Q_{MAX}$  values by the selected TEC's  $Q_{MAX}$ .  **$0.1 \times 67 = 6.7\text{ W}$ ,  $0.2 \times 67 = 13.4\text{ W}$  . . .**
4. For the vertical axis of the Electric section, multiple all  $V/N$  values by the selected TEC's  $N$  value.  **$0.04 \times 71 = 2.84\text{ V}$ ,  $0.08 \times 71 = 5.68\text{ V}$  . . .**
5. The graph is now normalized. Use the Thermo section to examine the relationships of  $\Delta T$ ,  $I$  and  $Q_C$ . Use the Electric section to examine the relationships of  $\Delta T$ ,  $I$  and  $V$ . **The graph is now normalized for the CP 2-71-06L.**

For further details, request our Engineering Catalog where TEC Selection and Performance is explained in full and illustrated with several detailed examples.

## SELECTION/PERFORMANCE (S/P) GRAPHS

$I$  Input current [Amps]  
 $I_{OPT}$  Optimum (most efficient) input current required for a given  $\Delta T$  [Amps]  
 $I_{MAX}$  Input current resulting in greatest  $\Delta T$  ( $\Delta T_{MAX}$ ) [Amps]  
 $N$  Number of thermocouples (p- and n-type pairs)  
 $Q_C$  Amount of heat absorbed at cold face of TEC [Watts]  
 $Q_{MAX}$  Maximum amount of heat that can be absorbed at cold face (occurs at  $I = I_{MAX}$ ,  $\Delta T = 0$ ) [Watts]

$T_C$  Temperature of the TEC cold face during operation [ $^\circ\text{C}$ ]  
 $T_H$  Temperature of the TEC hot face during operation [ $^\circ\text{C}$ ]  
 $\Delta T$  Temperature difference between TEC faces,  $T_H - T_C$  [ $^\circ\text{C}$ ]  
 $\Delta T_{MAX}$  Maximum temperature difference a TEC can achieve (occurs at  $I = I_{MAX}$ ,  $Q_C = 0$ ) [ $^\circ\text{C}$ ]  
 $V$  Input Voltage [Volts]  
 $V_{MAX}$  Voltage at  $\Delta T_{MAX}$

## Brushless DC Fans

### DC FAN WITH MINIMUM NOISE INTRODUCTION

- Every model undergoes rigorous aerodynamic analysis and anechoic chamber test to achieve minimum noise under high airflow and air pressure conditions.
- High precision maintenance-free ball bearing system provides super reliability.
- Frame and fan blade meet UL 94V-0 for flammability.
- Every model features locked rotor protection and polarity protection and offers auto-restarting and optional frequency generator or rotation detector function.
- Dynamic balancing is 100% tested to guarantee low vibration and excellent durability.
- Automatic multi-axes winding, surface-mount machine and highly automated assembly lines enable mass production and consistent quality.
- UL, CSA, VDE are available.

## A.C. ULTRA-MINIATURE FANS A.C. ULTRA-EFFICIENT FANS A.C. BRUSHLESS-ULTRA SLIM FANS

### RANGE OF PERFORMANCE

Micronel's line of high efficiency two phase AC fans are U.L. and CSA approved. Size range from 1.2 inches to 3.15 inches in diameter. **Fan lengths** range from .71 to 1.5 inches. **Air delivery**, at zero back pressure, range from 2.3 CFM to 36

CFM. **AC operational voltages** of 12, 24, and 115 volts, 50/60 hertz are standard. Non-standard voltages are available on special order.

## ULTRA-QUIET BRUSHLESS FANS ULTRA SLIM BRUSHLESS FANS

### SERIES F 41 AIRFLOW PERFORMANCE GRAPH

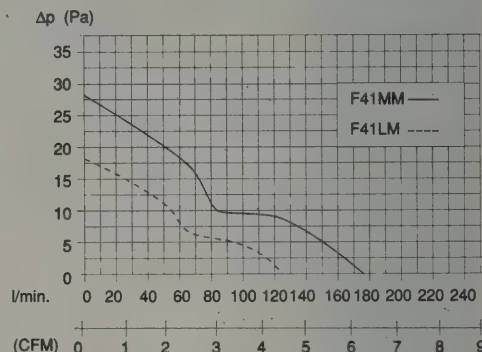

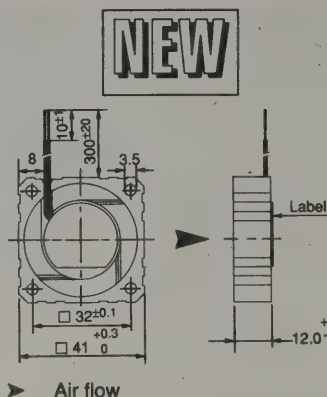

Nearly, noiseless, due to a new applied Air-FlowTechnic, which causes almost a laminar airflow. This is at minimum nominal power.

- Housing and impeller of black glass-fibre reinforced plastic
- Mounting with M3 screws or self adhesive gasket
- Mounting possible in any orientation
- Electrical connection with red and black leads AWG26 (0.13 mm<sup>2</sup>), min. 300 mm long.
- Use of UL/CSA listed material

**Dimensions: 12 x 41 x 41 mm**

**Types: F41LM (low)**

**F41MM (medium)**

### SERIES F 62 AIRFLOW PERFORMANCE GRAPH

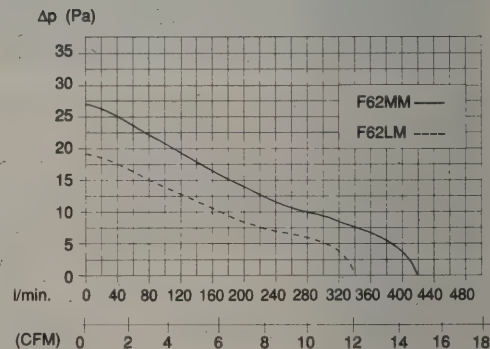

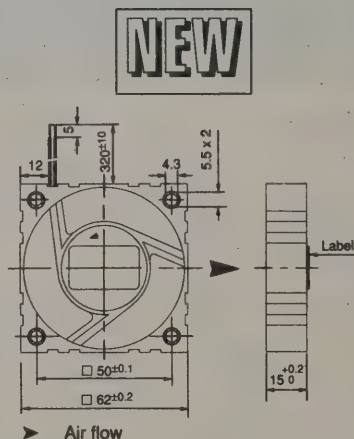

Nearly, noiseless, due to a new applied Air-FlowTechnic, which causes almost a laminar airflow. This is at minimum nominal power.

- Housing of black glass-fibre reinforced plastic
- Impeller of black glass fibre reinforced plastic
- Mounting with screws to M4 and nuts M3 or self adhesive gasket
- Mounting possible in any orientation
- Electrical connection with red and black leads AWG24 (0.21 mm<sup>2</sup>), min. 300 mm long. Flat tabs connection on request.
- Use of UL/CSA listed material

**Dimensions: 15 x 62 x 62 mm**

**Types: F62LM (low)**

**F62MM (medium)**

### SERIES F 70 / 75 / 80 AIRFLOW PERFORMANCE GRAPH

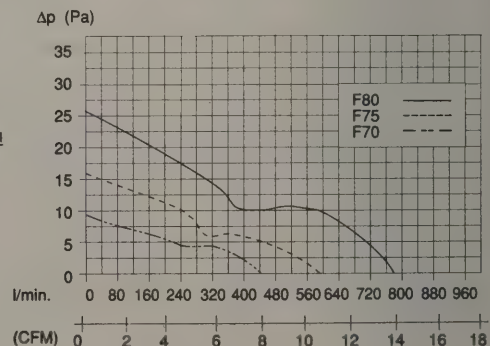

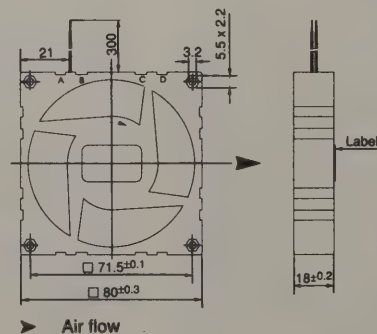

- Housing of black glass-fibre reinforced plastic
- Impeller of black glass-fibre reinforced plastic
- Mounting with M3 screws or self adhesive plastic
- Mounting possible in any orientation
- Electrical connection with red and black leads AWG24 (0.21 mm<sup>2</sup>), min. 300 mm long. Flat tabs connection on request.
- F70, F75 and F80, 12V and 24V are suitable for AC or DC operation
- Use of UL/CSA listed material

**Dimensions: 18 x 80 x 80 mm**

**Types: F70EM (low)**

**F75EM (medium)**

**F80EM (high)**

 $\varnothing$  17.0 x 34.0 mm 6 parallel

MICRONEL's lines of ultra-efficient, ultra-slim, ultra-quiet, and ultra-smart fans are available in both standard and custom DC/AC versions. MICRONEL's broad experience and technical expertise in development and design of high performance precision motors and fan assemblies has been utilized to develop the products shown above.

Our appreciation of the customer's system performance requirements, thermal constraints, mechanical interface, and cost factors allows MICRONEL U.S. to offer unique solutions to your problems. TRY US:

### RELATIVE QUANTITY SYMBOLS

|              |                            |
|--------------|----------------------------|
| $\neq$       | not equal to               |
| $\approx$    | approximately equal to     |
| $\propto$    | proportional to            |
| $<$          | smaller than               |
| $\leq$       | smaller than or equal to   |
| $\ll$        | much smaller than          |
| $>$          | larger than                |
| $\geq$       | larger than or equal to    |
| $\gg$        | much larger than           |
| $\equiv$     | identical to or equivalent |
| $\uparrow$   | increases                  |
| $\downarrow$ | decreases                  |

### PREFIXES FOR SI UNITS

| Multiple   | Prefix | Symbol |
|------------|--------|--------|
| $10^{12}$  | tera   | T      |
| $10^9$     | giga   | G      |
| $10^6$     | mega   | M      |
| $10^3$     | kilo   | k      |
| $10^{-3}$  | milli  | m      |
| $10^{-6}$  | micro  | $\mu$  |
| $10^{-9}$  | nano   | n      |
| $10^{-12}$ | pico   | p      |

| Quantity                    | Symbol                       | SI Unit                           | Symbol              | Derivation                      |
|-----------------------------|------------------------------|-----------------------------------|---------------------|---------------------------------|
| acceleration                | $a$                          | $\text{m s}^{-2}$                 | —                   | velocity/time                   |
| acceleration due to gravity | $g$                          | $\text{m s}^{-2}$                 | —                   | velocity/time                   |
| amount of substance         | $n$                          | mole                              | mol                 | mole fraction (n) used          |
| amplification factor        | $\mu$                        | <i>a ratio</i>                    | —                   | —                               |
| angle                       | $\theta_1, \phi_1, \alpha_1$ | —                                 | —                   | —                               |
| angle of incidence          | $i$                          | degree or radian                  | $^\circ$            | —                               |
| angle of refraction         | $r$                          | degree or radian                  | $^\circ$            | —                               |
| angle, Bragg                | $\theta$                     | number                            | —                   | —                               |
| angle, critical             | $c$                          | degree or radian                  | $^\circ$            | —                               |
| anode slope resistance      | $R_A$                        | ohm                               | $\Omega$            | $\Delta V_a / \Delta I_a$       |
| area                        | $A$                          | metres squared                    | $\text{m}^2$        | $l \times b$                    |
| atomic number               | $Z$                          | a number                          | —                   | number of protons               |
| Avogadro constant           | $L, N_A$                     | number                            | —                   | —                               |
| breadth                     | $b$                          | metre                             | m                   | fundamental unit                |
| capacitance                 | $C$                          | farad                             | F                   | charge/p.d.                     |
| charge, electric            | $Q$                          | coulomb                           | C                   | current $\times$ time           |
| charge on electron          | $e$                          | coulomb                           | C                   | $1.6 \times 10^{-19} \text{ C}$ |
| conductance                 | $G$                          | $\text{ohm}^{-1}$                 | $\Omega^{-1}$       | reciprocal of resistance        |
| current, electric           | $I$                          | ampere                            | A                   | fundamental unit                |
| decay constant              | $\lambda$                    | <i>a ratio</i>                    | —                   | —                               |
| density                     | $\rho$                       | $\text{kg m}^{-3}$                | —                   | $m/V$                           |
| distance along path         | $s$                          | metre                             | m                   | fundamental unit                |
| efficiency                  | $\eta$                       | <i>a ratio</i>                    | —                   | work output/work input          |
| electrochemical equiv.      | $z$                          | $\text{g C}^{-1}$                 | —                   | mass/charge                     |
| electromotive force         | $E$                          | volt                              | V                   | energy/charge                   |
| electron                    | $e$                          | —                                 | —                   | —                               |
| energy                      | $E$                          | joule                             | J                   | N m                             |
| energy, kinetic             | $E_k$                        | joule                             | J                   | N m. $E_k = 1/2 mv^2$           |
| energy, potential           | $E_p$                        | joule                             | J                   | N m. $E_p = mgh$                |
| Faraday constant            | $F$                          | coulomb $\text{mol}^{-1}$         | $\text{C mol}^{-1}$ | $96,500 \text{ C mol}^{-1}$     |
| field strength, electric    | $E$                          | $\text{V m}^{-1}$                 | —                   | potential gradient: p.d./dist.  |
| field-strength magnetic     | $H$                          | ampere-turns                      | —                   | current $\times$ no. of turns   |
| flux, magnetic              | $\Phi$                       | weber                             | Wb                  | e.m.f./rate of change of flux   |
| flux density                | $B$                          | tesla                             | T                   | flux/area                       |
| focal length                | $f$                          | metre                             | m                   | —                               |
| force                       | $F$                          | newton                            | N                   | $\text{kg m s}^{-2}$            |
| free energy                 | $\Delta G$                   | joule                             | J                   | —                               |
| frequency                   | $f$                          | hertz                             | Hz                  | oscillations/time               |
| gas constant                | $r$                          | joule                             | J                   | energy                          |
| half-life, radioactivity    | $t_{1/2}$                    | second                            | s                   | fundamental unit                |
| heat capacity               | $C$                          | $\text{J K}^{-1}$                 | —                   | quantity of heat/temp. rise     |
| heat of reaction            | $\Delta H$                   | joule                             | J                   | heat energy                     |
| heat capacity, specific     | $c$                          | $\text{J K}^{-1} \text{ kg}^{-1}$ | —                   | heat capacity/mass              |
| heat, quantity of           | $q$                          | joule                             | J                   | energy                          |

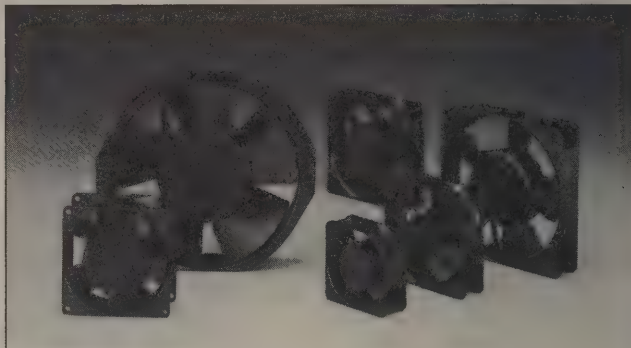

| Quantity                | Symbol             | SI Unit                 | Symbol             | Derivation                                 |
|-------------------------|--------------------|-------------------------|--------------------|--------------------------------------------|
| height                  | $h$                | metre                   | m                  | fundamental unit                           |
| image distance          | $v$                | metre                   | m                  | fundamental unit                           |

# NMB TECHNOLOGIES INC.

## BOXER™ AXIAL COOLING FANS

### FEATURES

Boxer cooling fans feature aluminum alloy or plastic frames, UL 94 V-O flammable rated impellers, Class A insulation, precision ball bearings, -40° to +70°C temperature range and a complete line of accessories. Low power and current consumption.

### BENEFITS

- Reliable Quality – All components made in-house
- More than 100 Models – All popular sizes, 10 to 220 CFM
- Low Noise, Light Weight – Ideal for power supplies, copiers, computers and medical equipment
- 50,000 hour life (min.) utilizing NMB precision ball bearings
- All units designed to meet UL, CSA, TUV and VDE requirements
- Modern Automated Factories – High volume production capabilities

#### NOTES:

- Standard voltages for AC fans are 115 or 230 VAC.
- Models are available with either terminals or lead wires.

# NMB TECHNOLOGIES INC.

# LOW NOISE BOXER™ COOLING FANS

## FEATURES

Low noise DC cooling fans feature lightweight engineered plastic frames, aerodynamically designed seven-bladed impellers, brushless DC motors, precision ball bearings, -40° to +70°C temperature range, Class A insulation and a complete line of accessories.

## BENEFITS

- Frame Sizes – 1.6 to 6.8 inches
- Air Flow – 6 to 230 CFM
- Low Noise, Light Weight – Ideal for computers, copiers, word processors, facsimile machines, printers and power supplies
- All units designed to meet UL, CSA, TUV and VDE requirements
- Auto-restart and lock rotor protection feature is standard
- NMB precision ball bearings used for long life
- High volume production – competitive pricing

## DC FANS

### OPTIONS:

- All DC fans available at either 12 VDC (±15%) or 24 VDC (±15%). 36 and 48 volt versions available on most series.
- Most models are available with either terminals or lead wires.
- Speed Sensor, Locked Rotor Alarm, Temperature Sensor and 2-speed options available.
- SmartFan® DC version available, built-in temperature/speed controller. See SmartFan® series.

# Fans and Blowers

# PAPST

PAPST MECHATRONIC CORPORATION

PAPST MECHATRONIC CORPORATION, Aquidneck Industrial Park, Newport, Rhode Island 02840 • Tel. (401) 849-8810 • Fax (401) 849-4640

With PAPST's new DC VARIOFAN, you can use the exact power/speed needed to achieve your specified cooling conditions. Less power/speed means you use less energy. Less power/speed means less noise. Less power/speed means less wear and tear and longer life performance.

## NOW YOU CAN SPECIFY AN INCH WITHOUT GIVING AN INCH

You can now specify a PAPST MULTIFAN with an installation depth of just one inch.

Now you can specify the world's best quality fan even in your tightest design. Because PAPST's high performance brushless DC MULTIFAN now comes with an installation depth as narrow as one inch.

**It's thinner. It's quieter. It uses less power.**

This narrowest-of-all MULTIFAN positively coasts through the toughest noise test with whisper-quiet ease. It needs very little power, operating on a super-efficient DC brushless motor that provides exceptionally soft commutation. And like all PAPST MULTIFANS, it lets you customize your application: you'll be able to control speed by varying voltage to get the absolute optimum airflow with minimum noise.

**It will even cause Purchasing to smile!**

Despite its high efficiency quality, you'll find this fan fits your budget. So specifying it means you win two ways. You'll keep component costs down. And at the same time, you won't compromise on your design's engineering integrity. Not even an inch.

PAPST's new DC VARIOFAN never makes more noise than necessary to maintain your specified cooling requirements. It succeeds where other fans fail by using a proprietary ASIC technology to vary its speed with changes in temperature.

The trouble with most fans is that they operate constantly at full speed to compensate for the "Worst Case Condition." But such conditions occur only 5% of the time or less. This means excess power (read: noise) occurs 95% of the time!

## Equipment Fans for DC Operation

## PAPST SOLID STATE BRUSHLESS DC FANS

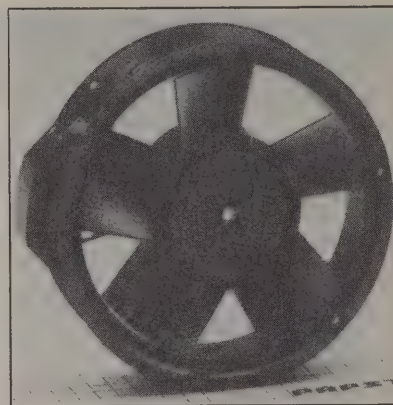

The only company offering you a full family of Solid State, Brushless DC fans in popular frame sizes, voltages & prices.

PAPST has a full line of self-contained, solid state, brushless DC fans for you to choose from. Through their design, these fans have been engineered to tackle those specialized applications which require highly reliable DC performance. Common uses include mobile radio equipment, medical electronics, ship-board computers, airborne applications, communications systems, automotive applications, marine use and telecommunications; wherever DC voltage is normally available. They are also finding wide acceptance for use in power stand-by modes to prevent memory loss in the event of AC power failure.

These fans are especially efficient and will out-perform similar sized fans at normal operating back pressure. Typically they offer greater air volume (cfm), reduced noise levels and

reduced power drain. For example, the power drain at maximum back pressure is approximately 25% of that required in conventional AC units. These fans also achieve a new low in magnetic radiation and RF noise, thereby assuring the pure signals necessary for critical airborne or shipboard use.

These fans work well at all rated voltages, and are extremely quiet. They can be adjusted for performance and noise level by altering the voltage within the voltage range for your particular application. They feature a brushless motor with all electronics mounted on a PC card within the motor frame. Drive amplifiers for the motor are controlled by a patented Hall-effect generator circuit which is coupled by small pole pieces to the motor's field magnet (Patent No. 3-873-897). Available voltages

include 5 VDC nominal, 12 VDC nominal, 24 VDC nominal and 48 VDC nominal.

These fans do not require an external voltage inverter. This means that you save valuable mounting space and weight because the only consideration in mounting is the fan itself.

### Equipment Fans for DC Operation (continued)

# Fans and Blowers

# PAPST

PAPST MECHATRONIC CORPORATION

PAPST MECHATRONIC CORPORATION, Aquidneck Industrial Park, Newport, Rhode Island 02840 • Tel. (401) 849-8810 • Fax (401) 849-4640

PAPST offers a wide variety of fans for your selection. Each model combines the features of extended life with high airflow delivery at low noise levels. All PAPST fans are UL recognized and have their Yellow Card Component Recognition Number E41168. Most are CSA certified and VDE approved.

## PAPST AC FANS

Field proven, quality products you can rely upon for all of your cooling requirements.

Lightweight all-metal construction is typical of PAPST AC fans. This all-metal construction eliminates breakage and warping often found in conventional plastic fans. This all-metal feature also permits the entire fan to function as a natural heat sink, assuring cooler operation by effectively transferring heat from the rotor into the air stream via the impeller blades. Potential injurious heat is also transferred from the stator to the die-cast venturi by way of the metal struts. Life expectancy: (1) AC fans with sleeve bearings—20,000 hours at maximum permissible ambient temperatures. (2) AC fans with ball bearings—20,000 hours at 72°C or at the maximum permissible temperature if this is less than 72°C. Note: If the ambient temperature at which the fan operates is at 20°C below the above levels, the life expectancy increases by 10,000 hours.

The PAPST exclusive bearing lubrication system incorporates hand-fitted broached sintered iron sleeve bearings on most fans, with precision high-tempered ball bearing versions also available. The dual sleeve bearings are separated by a large oil felt reservoir, which provides continuous fault free circulation.

An efficient, powerful inside-out motor, housed entirely within the impeller hub to conserve axial depth, has higher torque capabilities and a lower internal heat rise than the contemporary fixed shaft designs.

The impeller shafts are computer designed and impulse welded to the precision hub and dynamically balanced to within .0001 inches in each end plane to minimize acoustical and mechanical vibrations.

## ACCESSORIES

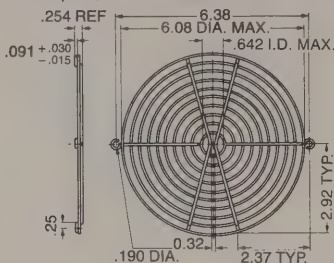

### LZ 22 N FINGER GUARD

Welded, nickel chrome-plated steel wire, .062 in. (1.6 mm) diameter. For series 8000.

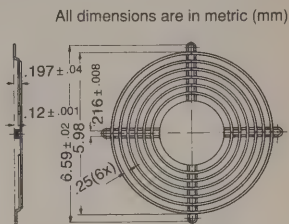

### LZ 23 FINGER GUARD

Welded, nickel chrome-plated steel wire, .062 in. (1.6 mm) diameter. For series 3000.

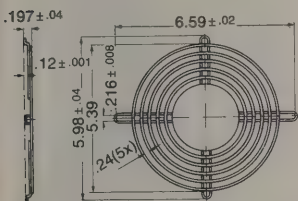

### LZ 24 FINGER GUARD

Welded, nickel-plated steel wire, 1.5 mm (.06 in.) diameter. For series 8000.

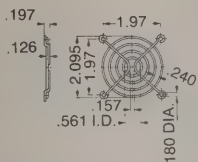

### LZ 26 FINGER GUARD

Welded, zinc-plated steel wire, .055 in. (1.4 mm) diameter. For series 6000.

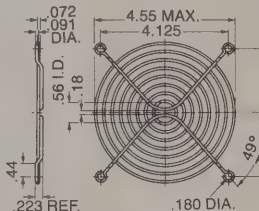

### LZ 27 FINGER GUARD

Welded, nickel-plated steel wire, .055 in. (1.4 mm) diameter. For series 7000.

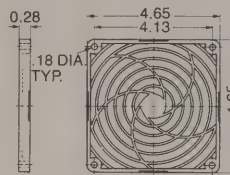

### LZ 28 FINGER GUARD

Welded, chrome-plated steel wire, 1.6 mm (.063 in.) diameter. For 800 MULTIFAN.

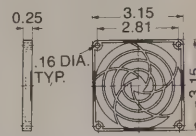

### LZ 30 FINGER GUARD

Welded, nickel chrome-plated steel wire, .072 in. (1.8 mm) diameter. For series 2500 S and 4000.

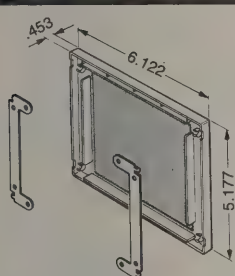

### LZ 30 P FINGER GUARD

Fiberglass reinforced plastic (PPO). For series 2500 S and 4000.

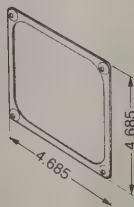

### LZ 32 P FINGER GUARD

Fiberglass reinforced plastic (PPO). For series 8000.

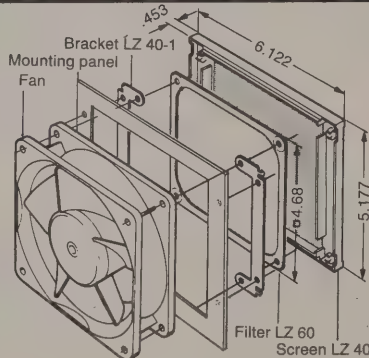

### LZ 40 N SCREEN

Frame of black fiberglass reinforced plastic (PPO), fitted with stainless steel wire mesh. LZ 40-1 included for mounting. For series 2500 S and 4000.

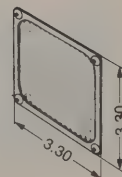

### LZ 60 FILTER

Light metal frame with crimped-on aluminum mesh. Mesh size .003 in. (0.7 mm), wire dia. .012 in. (0.3 mm). For series 2500 S and 4000.

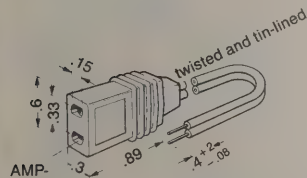

### LZ 40/60 SCREEN

For series 2500 S and 4000.

### LZ 60-8 FILTER

Light metal frame with crimped-on aluminum mesh. Mesh size .003 in. (0.7 mm), wire dia. .012 in. (0.3 mm). For series 8000.

### PLUG AND CORD SET

LZ 120: 24 in. (610 mm) long  
LZ 126: 39 in. (1000 mm) long  
LZ 130-1: 24 in. (610 mm) long, UL-approved. Connecting cable with moulded plug. PVC, black. For series 3000, 4000, 6000.

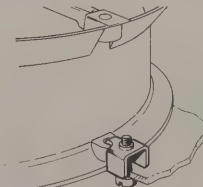

### LZ 210 SCREW CLIP

For mounting fans with self-tapping screw 6-32 UNC or 3.5 DIN 7970. Made of hardened and tempered steel, deburred; surface slightly oiled. For series 2500 S, 4000 and 7000. (Not for MULTIFAN series 4300 and 4400!)

### LZ 212 SCREW CLIP

For mounting MULTIFAN series 8300, 3300 and 4300 with self-tapping screw 3.5 DIN 7970. Spring steel, rust resistant.

### LZ 215 MOUNTING CLIP

For mounting series 6000 fans to circular panel cutouts. Zinc-plated sheet steel with M 4 screw thread.

### LZ 260 SPACER BUSHING

For fans of the MULTIFAN series 8300, 3300 and 4300. Fiberglass reinforced plastic (FBTP). For screw mounting over both fan mounting flanges.

## FAN ACCESSORIES

## Plastic Fan Filter Assemblies

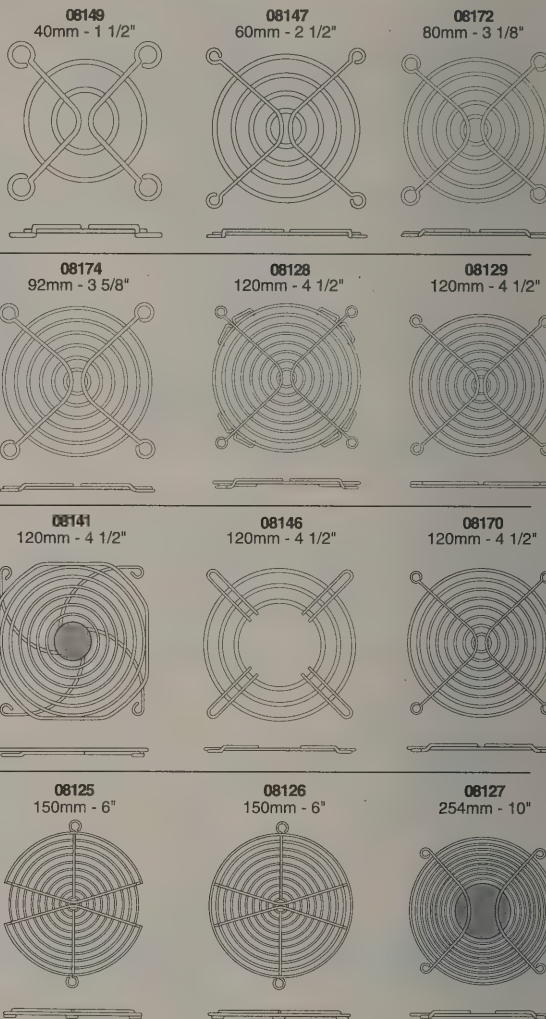

**General Description:** Fan-S offers a unique fan filter package consisting of a guard, foam filter media and media retainer, manufactured with UL listed 94-VO material for (60, 80, 92, 120mm) tubeaxial fans for the removal of dust and contaminating particles. Installation is quick and simple: four mounting screws secure the guard portion, then snap on the retainer and filter media with no extra hardware or brackets required. Guard is offered as a separate item.

## Wire Form Fan Guards

**General Description:** The 08 series wire form fan guards are designed for use with tubeaxial fan sizes 40, 60, 80, 92, 120, 150, & 254mm. Our 1/4" maximum ring spacing designs were developed to assist our customers in complying with domestic and international safety agency requirements that are in effect today or that may develop in the future. We maintain the highest level of quality control by insuring that we use only the highest grade of materials that must pass a very stringent level of incoming inspection prior to being accepted to our manufacturing inventory.

## Aluminum Fan Filters

**General Description:** These tested and proven filters provide maximum airflow with effective filtering. Mill and irridite finishes are offered to enhance EMI/RFI shielding as well as an anodized finish for esthetic purposes. The tightly woven aluminum corrugated mesh screen is encased in a formed aluminum frame built for ruggedness and durability. The units are easily washed in a solvent or degreaser and can be mounted directly to the fan or to a panel.

# PRODUCT PROFILE

## Fan Accessories

"FAN-S" offers a complete line of accessories for tubeaxial fans consisting of wire form fan guards, plastic fan guards, plastic fan filter assemblies, aluminum fan filters, and fan power cords with excellent quality and competitive prices. "FAN-S" accessories are designed to comply with international safety agency regulations to assure a safe and durable product. Custom designs are available upon request.

Request Product Guide Brochure #1FA

## North American Power Cords

"PPC" has available a comprehensive selection of power cords and cordsets in 2 and 3 conductor styles with various insulations, voltage ratings, colors, lengths, plugs, connectors, and shielding. "PPC" has one of the largest selections of male plugs and female connectors in the industry plus offers a full line of hospital grade power cords. Special power cord and strain relief configurations are available upon request.

Request Product Guide Brochure #1C

## International Power Cords

"PPC/EURELECTRIC" International Power Cords come in a wide range of plugs, connectors, cordage, and colors. All power cords and cordsets have been tested and approved by the major international safety agencies and each power cord is tested during final inspection. An extensive inventory is maintained to assure on-time delivery. Custom designs are available upon request.

Request Product Guide Brochure #1D

## RFI Power Line Filters

"PPC" offers a complete range of RFI power line filters designed to meet most international safety agency requirements. These filters help customers meet FCC and VDE emission standards. Our line consists of many standard configurations such as block type, filter with power line connector, and various filters with multi-function modules. Custom designs are available upon request.

Request Product Guide Brochure #1PLF

## AC Receptacles

The "PPC" line of inlets, outlets, and multi-function modules has all the major international approval marks thus assuring high safety standards. These AC receptacles help customers comply with international safety regulations. Modern production methods enable us to manufacture cost-effective and reliable components. A full range of products are maintained in inventory for quick, on-time deliveries. Custom designs are available upon request.

| D12M12LWS | Sleeve  | 10.2-13.8       | 12            | 84             | 250          | 3         | 2300        | 0.18                               | 36          |

Notes : 1. 120 x 120 x 38 is available with terminal connections instead of wire leads.

2. 120 mm, 92 mm and 80mm are available with ball bearings.

3. 24 VDC and 5 VDC fans available.

## NEW! Miniature Fan with Heat Sink

Model: M0410M-P

### FEATURES

- Suitable for 486 DX/DX2 CPU.
- Upgrade CPU Operation Speed
- Epoxy or Tape Not Required

### SPECIFICATIONS

Operating Voltage Range: 10.2-13.8

Rated Voltage: 12 VDC

Rated Current: 0.06 A

Fan Speed: 5500 RPM

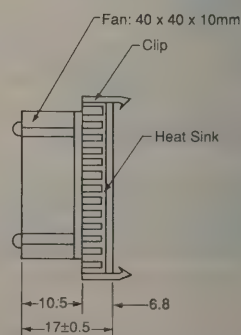

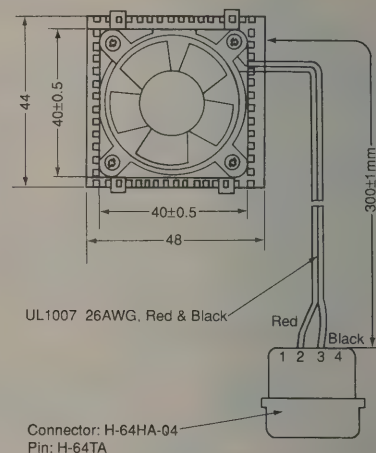

Heat Sink Material: Anodized Aluminum Alloy

Clip Material: Ultraform (POM)

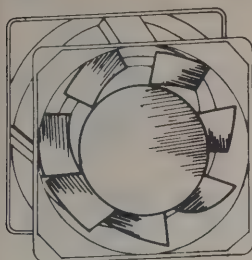

Clip Heat Distortion Temp.: 160 Deg C

Dimension: 48 x 44 x 17mm (L x W x H)

Weight: 45g

577 Main Street, Islip, New York 11751

## ac axial-tube fans

### SPECIAL FEATURES FOR ALL MODELS

- ☐ Aluminum die cast frame
- ☐ Thermoplastic impeller-UL rated 94VO
- ☐ Impedance protection
- ☐ Lubricated sleeve or ball bearing construction
- ☐ 12" 24AWG or terminal
- ☐ UL Recognized
- ☐ CSA Certified
- ☐ VDE Pending
- ☐ Low speed is available on request

Notes: 1. 120mm and 92mm AC fans available with wire leads or terminals.  
2. 120 x 120 x 38mm available in skeleton model.

## Also available...fan accessories

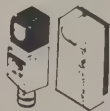

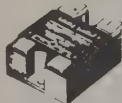

### FINGER GUARDS-

Wireformed nickel chrome plated guards to fit 40mm to 120mm sizes. All guards are designed

to ensure safe operation and comply with UL, CSA and VDE requirements.

# R-THETA INC.

## The Future of Thermal Management

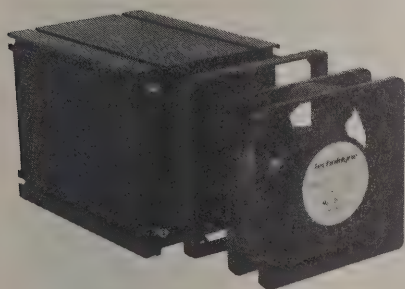

R-Theta's vertical integration ensures production to the highest professional standards based on the most sophisticated customer-driven engineering techniques.

### EXTRUDED HEATSINKS

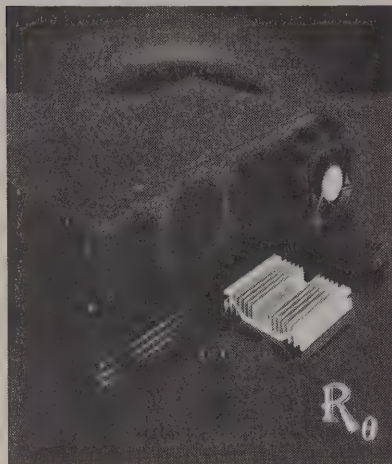

Because you require prompt delivery, R-Theta stocks a broad range of standard heatsink profiles. Employing state-of-the-art manufacturing technology, R-Theta has the capacity to handle any of your extruded heatsink requirements and to suggest cost-effective/thermally efficient solutions for the most complex of thermal management applications.

### STANDARD HEATSINKS for ISO-BASE SEMICONDUCTORS

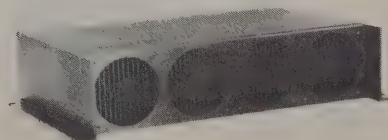

In order to maximize performance in the high density environment of high power hybrid semiconductors circuits commonly dubbed "ISO-Base", R-Theta can provide customized assemblies which permit the use of one heatsink to cool many devices.

R-Theta's latest heatsink and electronics thermal management catalog details one of North America's most innovative and comprehensive product ranges of heatsinks and related products. Unique to R-Theta, this catalog contains an in-depth guide that provides all the methodology and data needed to effectively specify the right heatsinks for every application.

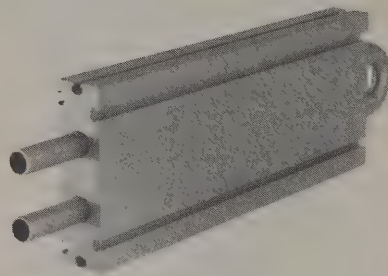

### FABFIN™

FABFIN is a registered trademark of R-Theta Inc.

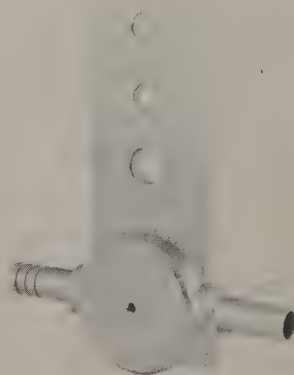

Ultra-high-efficiency fabricated heatsinks using a proprietary metal-to-metal swaging process have been developed by R-Theta. Used to remove heat from power semiconductor devices in forced convection applications, FABFIN overcomes limitations imposed on conventional heatsinks by the extrusion process. R-Theta's FABFIN achieves ratios in excess of 20:1 to dramatically increase heat removal efficiency.

### LIQUID COOLERS

R-Theta's range of liquid coolers combines both the popular 80mm and 93mm mounting centers in a single assembly. Simplified mounting in the cabinet or enclosure is possible by using either the side "T" slots or the "T" slots on the opposite side to the semiconductors mounting surface.

### HOCKEY PUK COOLERS

Highly efficient "Hockey Puk" Liquid Coolers with high conductivity copper bodies meet the most demanding thermal dissipation requirements. These liquid coolers are one hundred times more effective than the standard air-cooled heatsink.

# AIR CONDITIONERS

## Temperature Control...

## Solid State Cooling For Electronic Enclosures

### • Environmentally Safe (No CFC's!)

- Designed to excel in high ambients
- New European Models 230 VAC, 50 Hz

Thermoelectric Air Conditioners are a solid state method of refrigeration, which eliminates the need for a compressor, refrigerant fluids or piping. The only moving parts are highly reliable fans used to dissipate output heat to the ambient air. These air conditioners can be applied in computers, machine tool controls, instrumentation & electronics for hostile environment protection. They offer design flexibility in a wide range of industrial and consumer applications where compactness and reliability are key.

#### Features:

- No load cooling to  $-5^{\circ}\text{F}$  ( $-20^{\circ}\text{C}$ ) at room temperature
- Lightweight, compact designs
- No compressor, no fluids, no coils
- Closed system protection from dust, chips, & moisture
- No moving parts except fans, means high reliability
- Low vibration, noise & maintenance
- Metal finishes resist corrosion
- Operates in any orientation - horizontal, vertical, etc.
- All models available from stock

#### Other Products:

- Liquid cooled air conditioners rated to 5000 BTUH
- Thermoelectric cooling modules
- Temperature controllers
- Standard DC power supplies
- Solid State Liquid Chillers

**One Year Warranty on Parts and Labor**  
**24 Hour Shipment on In-Stock Items**

# New Cooling Products...

Designed and Built for NEMA 12, 13 & 4X

**Compact,  
Reliable  
Solid State  
Air Conditioner**

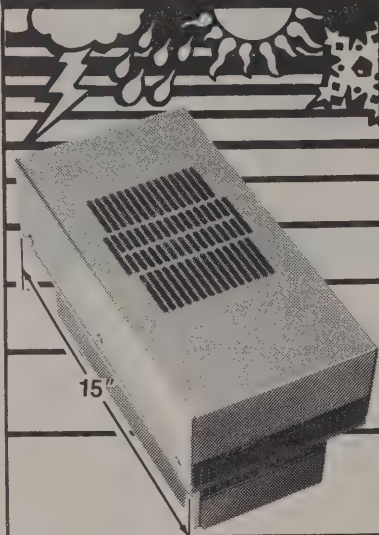

**AHP-1700**

Designed and built for effective, dependable cooling in NEMA 12 applications where size limitation is a problem. It contains no compressor, refrigerant, or piping; the highly reliable fans are its only moving parts.

- For computers, machine tools, electronics, instrumentation
- No load cooling to  $-5^{\circ}\text{C}$  at room temperature; 1100 BTU/HR
- Closed system protects from dust, metal chips, moisture
- Operates in any position—horizontal, vertical, etc.
- Low vibration and noise; minimal maintenance
- Weighs less than 50 pounds; mounts on standard 19" rack
- Requires only 110 VAC, 6 amp power

**AIR CONDITIONER  
INDUSTRIALLY  
HARDENED  
NEMA 4X**

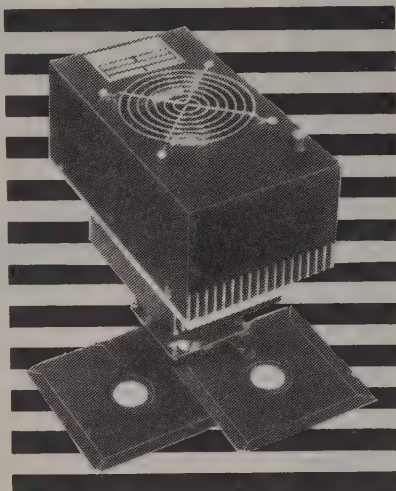

**AHP-1200X**

**SOLID STATE AIR CONDITIONER  
PROVIDES TOTAL PROTECTION  
FROM HEAT BUILD-UP IN  
ELECTRONIC ENCLOSURES**

AHP-1200X is the most rugged fractional ton air conditioner for electronic enclosure cooling. Ideal in NEMA-4X environments. Withstands high temperature and humidity, harsh factory environments, shock and vibration. Weather resistant from corrosive salt, water and ice. Entirely sealed and gasketed. Anodized aluminum cabinet is lightweight and durable. Highly reliable fans are the only moving parts. The AHP-1200X thrives in temperatures of  $-20^{\circ}\text{F}$  to  $+175^{\circ}\text{F}$ .

- Nominal heat removal 500 BTUH. (Enclosure air temperature equal to ambient)
- Requires only 115 VAC, 2.5 amp
- No fluorocarbons, compressor, or piping
- Compact—Only 15.0" x 7.4" x 8.0"
- No moving parts except fans (Military grade (MIL-901) fan on exterior side)
- Unloaded enclosure air cooling to  $60^{\circ}\text{F}$  below ambient
- Neoprene gasket included for pressurized seal

**COOLING  
PROTECTION  
FOR SMALL  
ENCLOSURES**

**AHP-301FF**

**Solid State Air Conditioner  
Dependable Cooling  
To Prevent Overheating**

Built to provide powerful, reliable cooling for computers, instrumentation and sensitive electronic systems. Electronics will stay cool and clean, free from dust, dirt and moisture. Ideal in NEMA 12 environments. Maintains efficient operating temperatures and clean air within the electronic enclosure.

- Either 115 VAC or 230 VAC, 50/60Hz Input
- Nominal heat removal 200 BTUH.
- Compact - Only 10.0"x5.63"x8.47"
- No moving parts except highly reliable fans
- Mounting hardware included
- Gasket for dust tight seal included
- Operates in any orientation — horizontal, vertical, etc.
- Cools below ambient

# Thermalloy

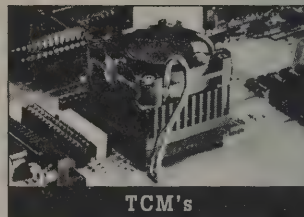

The Innovator in semiconductor accessories

**Heat Sinks**

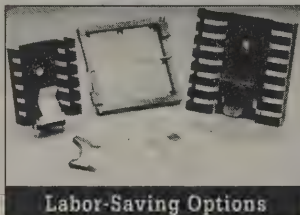

**Extrusions**

**TCM's**

**Insulators**

**Labor-Saving Options**

**Plastics/Accessories**

## HEAT SINKS

Extensive stocked selection of:

- Extruded
- Stamped
- Radial Fin

Custom design—excellent engineering support available

## EXTRUSIONS

- Over 600 extrusion shapes tooled, many normally stocked

## INSULATORS

- Aluminum Nitride
- Thermalsil™ (silicone rubber)
- Thermalfilm™ (polyimide plastic film)
- Mica
- Aluminum Oxide Ceramic
- Beryllium Oxide Ceramic
- Hard Anodized Aluminum
- Insul-Cote™ (packaged, pre-coated insulators for easy installation)

## TCM's™

(Thermalloy Cooling Modules)

- Pin fin heat sink with attached DC fan. Cools PGA's at near recirculated liquid efficiency.

## LABOR-SAVING OPTIONS

- PGA E-Z Mount™
- Thermalclips
- Solderable: Mounting tabs, alignment pads, nuts, studs, and roll pins
- Clinch nuts

## PLASTICS/ACCESSORIES

- Card guides, snap-on ejectors and pullers
- Mounting pads & Stanchion pads
- Transistor sockets
- Shoulder washers
- Bushings
- TO-3 insulating covers
- Mounting kits
- Thermal compounds

## TCM™: THERMALLOY COOLING MODULES FOR MICROPROCESSORS

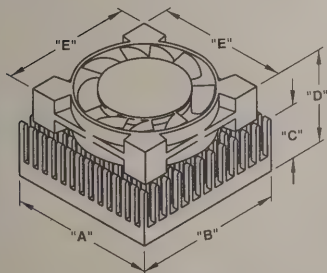

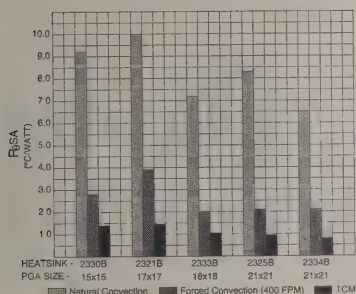

### Innovative TCM: High performance pin fin heat sink with DC fan attached

- Significant volumetric space reduction with direct impingement down airflow compared to natural convection.
- Thermal performance approaching recirculated liquid.
- High performance with relatively low cost.
- Fans available in 5 or 12 volts.
- Typical DC brushless, ball-bearing fans have life expectancies of 50,000 hours.
- TCM assembly may be used with Thermalloy's innovative PGA E-Z Mount\* or epoxy bonded to pin grid arrays. May also be special ordered with Chomerics Thermattach™ \*\* 405 thermally conductive adhesive tapes.
- May be used in conjunction with PGA sockets, such as AMP 382624-1 and -2.

\* Please request brochure #GA2-DS5-9302 or Thermalloy's full-line catalog for information on the PGA E-Z Mount™ attachment method.

\*\* "Thermattach" is a trademark of the Chomerics company.

Note: Fan placement may be asymmetrical on heat sink.

### FAN DATA

| Fan Voltage | Rated Current (A) | Air Volume cfm (m³/min) | Static Pressure In. H₂O (mm/H₂O) | Noise (dBA @ 1m) | Weight Lbs. (grams) |
|-------------|-------------------|-------------------------|----------------------------------|------------------|---------------------|
| 12 volt     | 0.09              | 4.2 (0.12)              | 0.126 (3.2)                      | 26               | 0.046 (21)          |
| 5 volt      | 0.18              | 3.5 (0.10)              | 0.091 (2.3)                      | 30               | 0.040 (18)          |

Note: The TCM thermal performance shown is for the 12 volt fan. TCM performance using the 5 volt fan is 5-10% lower as verified by test data. The fan cfm varies directly as a cube root of the input horsepower. (Test data is available from the factory.) For further information on basic TCM performance, please request EIR #91-1002.

\*\* Cools Motorola 68040

\*\*\* Cools Intel Pentium™ Processor  
(Pentium is a trademark of Intel Corporation)

### ORDERING INFORMATION

**To Order:** Add the following suffixes to the base TCM number in the order given below;

Suffix 1: "4" (fan size 40mm x 40mm x 10mm)

Suffix 2: "2" for 12 volt fan; "5" for 5 volt fan

Suffix 3: "S" (indicates specific fan-all current TCM's use "S")

Suffix 4: "-FS" for frame and spring PGA E-Z Mount; "-SS" for shoe and spring

**Example:** 2321B-TCM42S-FS

**Notes:** For sample quantities, please contact your local Thermalloy distributor. TCM's ordered with the PGA E-Z Mount assembly are supplied with the spring permanently mounted between the heat sink and fan.

## USTF 120 SERIES - AC

Models USTF 12038 & USTF 12025

### Sizes:

USTF 12038 - 4.69" sq. x 1.50" thk.  
(119 mm x 38 mm)

USTF 12025 - 4.69" sq. x 1.0" thk.  
(119 mm x 25 mm)

### Airflow:

USTF 12038 - 54 to 112 CFM (4 speeds)  
USTF 12025 - 56 to 77 CFM (4 speeds)

### Acoustical Noise:

USTF 12038 - 28 to 41dB(A)  
USTF 12025 - 30 to 38dB(A)

**Voltage:** 115 or 230 VAC

**Termination:** Terminals (standard)  
Lead Wires (special)

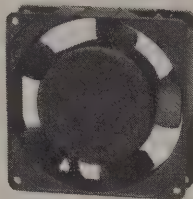

**Materials:** Frame - Aluminum  
Bearings - Sealed Ball

**Safety:** Impedance Protected

**Approvals:** UL No. E106227  
CSA No. 073720

## USTF92 SERIES - AC

Model USTF9225

**Size:** 3.62" sq. x 1.0" thk.  
(92 mm x 25 mm)

**Airflow:** 30 to 35 CFM (2 speeds)

**Acoustical Noise:** 35 to 39 dB(A)

**Voltage:** 115 or 230 VAC

**Termination:** Terminals (standard)  
Lead Wires (special)

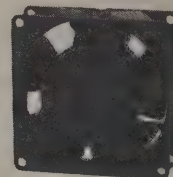

**Materials:** Frame - Aluminum  
Bearings - Sealed Ball

**Safety:** Impedance Protected

**Approvals:** UL No. E106227  
CSA No. 073720

## USTF80 SERIES - AC

Models USTF8038 & USTF8025

### Sizes:

USTF8038 - 3.15" sq. x 1.5" thk.  
(80 mm x 38 mm)

USTF8025 - 3.15" sq. x 1.0" thk.  
(80 mm x 25 mm)

### Airflow:

USTF8038 - 34 CFM  
USTF8025 - 20 CFM

### Acoustical Noise:

USTF8038 - 38 dB(A)  
USTF8025 - 33 dB(A)

**Voltage:** 115 or 230 VAC

**Termination:** Terminals (standard)  
Lead Wires (special)

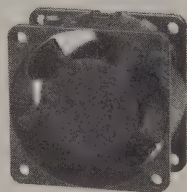

**Materials:** Frame - Aluminum  
Bearings - Sealed Ball

**Safety:** Impedance Protected

**Approvals:** UL No. E106227  
CSA No. 073720

## USTF60 SERIES - AC

Model USTF6030

**Size:** 2.36" sq. x 1.18" thk.  
(60 mm x 30 mm)

**Airflow:** 11 CFM

**Acoustical Noise:** 29 dB(A)

**Voltage:** 115 VAC (only)

**Termination:** Lead Wires (only)

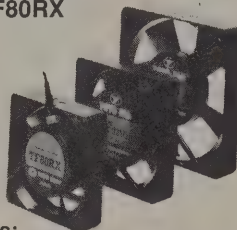

**Materials:** Frame - Aluminum  
Bearings - Sealed Ball

**Safety:** Impedance Protected

**Approvals:** UL No. E106227  
CSA No. 073720

## TF RX SERIES - AC

Models TF120RX, TF92RX & TF80RX

### Sizes:

TF120RX - 4.70" sq. x .78" thk.  
(119 mm x 20 mm)

TF92RX - 3.62" sq. x .78" thk.  
(92 mm x 20 mm)

TF80RX - 3.15" sq. x .78" thk.  
(80 mm x 20 mm)

**Airflow:** TF120RX - 64 CFM  
TF92RX - 30 CFM  
TF80RX - 18 CFM

### Acoustical Noise:

TF120RX - 43.5 dB(A)

TF92RX - 38.5 dB(A)

TF80RX - 35.5 dB(A)

**Voltage:** 115 or 230 VAC

**Termination:** Lead Wires (only)

**Materials:** Frame - Aluminum  
Bearings - Sealed Ball

**Safety:** Impedance Protected

**Approvals:** UL No. E106227  
CSA No. 073720

## TF 345 SERIES - AC

DUAL VOLTAGE

Models TF120345, TF92345 & TF80345

### Sizes:

TF120345 - 4.70" sq. x 1.50" thk.  
(119 mm x 38 mm)

TF92345 - 3.62" sq. x .98" thk.  
(92 mm x 25 mm)

TF80345 - 3.15" sq. x 1.50" thk.  
(80 mm x 38 mm)

### Airflow:

TF120345 - 81 - 109 CFM (3 speeds)  
TF92345 - 27 - 34 CFM (2 speeds)

TF80345 - 32 CFM

### Acoustical Noise:

TF120345 - 40 to 50 dB(A)

TF92345 - 36 to 41.5 dB(A)

TF80345 - 39.5 dB(A)

**Voltage:** 115 & 230 VAC dual

**Termination:** Lead Wires (4)

**Materials:** Frame - Aluminum  
Bearings - Sealed Ball

**Safety:** Impedance Protected

**Approvals:** UL No. E106227  
CSA No. 073720

### ADDED VALUE OPTIONS ON REQUEST:

Connector termination • special wire leads & harnessing • captive mounting hardware • finger guards & air filters • in addition to many other options • available on all models

## USTF120 SERIES - DC

Models USTF12038 & USTF12025

### Sizes:

USTF12038 - 4.69" sq. x 1.50" thk.  
(119 mm x 38 mm)

USTF12025 - 4.69" sq. x 1.0" thk.  
(119 mm x 25 mm)

### Airflow:

USTF12038 - 85 to 108 CFM (3 speeds)  
USTF12025 - 64 to 74 CFM (3 speeds)

### Acoustical Noise:

USTF12038 - 34 to 41 dB(A)  
USTF12025 - 36 to 41 dB(A)

**Voltage:** 12 or 24 VDC

**Termination:** Lead Wires (only)

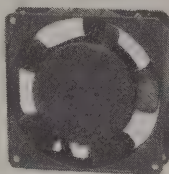

**Materials:** Frame - PBT  
Bearings - Sealed Ball

**Safety:** Impedance Protected

**Approvals:** UL No. E106227  
CSA No. 074205  
VDE 16599-2611

## USTF92 SERIES - DC

Model USTF9225

**Size:** 3.62" sq. x 1.0" thk.  
(92 mm x 25 mm)

**Airflow:** 37 to 50 CFM (2 speeds)

**Acoustical Noise:** 26 to 35 dB(A)

**Voltage:** 12 or 24 VDC

**Termination:** Lead Wires (only)

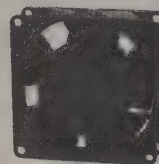

**Materials:** Frame - PBT  
Bearings - Sealed Ball

**Safety:** Impedance Protected

**Approvals:** UL No. E106227  
CSA No. 074205  
VDE 16599-2611

## USTF80 SERIES - DC

Model USTF8025

**Size:** 3.15" sq. x 1.0" thk.  
(80 mm x 25 mm)

**Airflow:** 30 to 38 CFM (2 speeds)

**Acoustical Noise:** 27 to 32 dB(A)

**Voltage:** 12 or 24 VDC

**Termination:** Lead Wires (only)

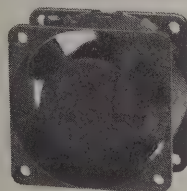

**Materials:** Frame - PBT  
Bearings - Sealed Ball

**Safety:** Impedance Protected

**Approvals:** UL No. E106227  
CSA No. 074205  
VDE 16599-2611

## USTF60 SERIES - DC

Model USTF6020

**Size:** 2.36" sq. x .79" thk.  
(60 mm x 20 mm)

**Airflow:** 15 to 18 CFM (2 speeds)

**Acoustical Noise:** 26 to 30 dB(A)

**Voltage:** 12 or 24 VDC

**Termination:** Lead Wires (only)

**Materials:** Frame - PBT  
Bearings - Sealed Ball

**Safety:** Impedance Protected

**Approvals:** UL No. E106227  
CSA No. 074205  
VDE 16599-2611

## USTF4020 SERIES - DC

Model USTF4020

**Size:** 1.58" sq. x .79" thk.  
(40 mm x 20 mm)

**Airflow:** 7.3 CFM

**Acoustical Noise:** 28 dB(A)

**Voltage:** 12 VDC (only)

**Termination:** Lead Wires (only)

**Materials:** Frame - PBT

Bearings - Sealed Ball

**Safety:** Impedance Protected

**Approvals:** UL No. E106227  
CSA No. 074205  
VDE 16599-2611

## USTFS4010 SERIES-DC

**Size:** 1.58" sq. x .394" thk.  
(40mm x 10mm)

**Airflow:** 5.3 to 7 CFM (2 speeds)

**Acoustical Noise:** 31 to 37 dB(A)

**Voltage:** 12 VDC (only)

**Termination:** Lead Wires (only)

**Materials:** Frame - PBT

Bearings - Sleeve

**Safety:** Impedance Protected

**Approvals:** UL & CSA pending

## TFDD41 SERIES - DC

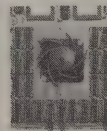

Model TFDD41RX

1.57" (40 mm) sq. x .39 (10 mm) thk.  
12 VDC - 4.6 CFM - 32 dB(A)

## TFDD50 SERIES - DC

Model TFDD50BM PCB Mountable

1.97" (50 mm) sq. x .47" (12 mm) thk.  
5, 12 & 24VDC - 4.2CFM - 27.5dB(A)

## SMF1836 SERIES - DC

Model SMF1836MA or MB

1.42" (36 mm) dia. x 1.77" (45 mm) lg.  
12 VDC - 16 CFM - 50 dB(A)

### ADDED VALUE OPTIONS ON REQUEST:

Connector termination • special wire leads & harnessing • captive mounting hardware • finger guards & air filters • in addition to many other options • available on all models

# SIL-PAD® THERMALLY CONDUCTIVE INSULATORS

The Bergquist Company established the standard for elastomeric thermally conductive insulation materials with the development of Sil-Pads over 20 years ago. *Sil-Pads were developed as a clean grease-free alternative to mica and grease.* Now, a complete family of materials are available to meet the diverse and changing requirements of today's design engineer.

Sil-Pads replace a variety of materials used for thermally conductive insulation including mica insulators. Mica and grease have been in use for over 30 years and are still commonly used as insulators. Mica and grease have good thermal and electrical properties but mica is easily cracked or broken and grease is messy to work with and contaminates assemblies.

Sil-Pads also replace ceramic insulators in high performance applications. These ceramic wafers are expensive and crack easily. Polyimide films are also used as insulators and are usually combined with wax or grease to achieve a low thermal impedance.

## CONSTRUCTION

Most Sil-Pad thermally conductive insulators are constructed with a silicone rubber binder and a woven fiberglass carrier or Kapton® substrate. The fiberglass carrier provides reinforcement and contributes to dielectric strength. Silicone rubber has a low dielectric constant, high dielectric strength, good chemical resistance and high thermal stability.

## THERMAL PROPERTIES

Discrete semiconductors under normal operating conditions, dissipate waste power which raises the junction temperature of the device. Unless sufficient heat is conducted out of the device, its electrical performance and

parameters are changed. A 10° C rise in junction temperature reduces the mean-time-to-failure of a device by a factor of two. Also, above 25° C, the semiconductors total power handling capability will be reduced by a derating factor inherent to the device.

## SUMMARY OF THERMAL PROPERTIES OF SIL-PADS®

| Interface Material | Thermal Conductivity W/m-K | Thickness (mils) | Thermal Impedance (°C-in <sup>2</sup> /w) | TO-3 w/spacer °C/w | TO-220 °C/w* |
|--------------------|----------------------------|------------------|-------------------------------------------|--------------------|--------------|
| SP400              | 0.9                        | 7                | 0.4                                       | 0.4                | 4 - 6        |
| SP600              | 1.0                        | 7                | 0.3                                       | 0.3                | 3 - 5        |
| SP1000             | 1.2                        | 9                | 0.3                                       | 0.3                | 3 - 5        |
| SP2000             | 3.5                        | 15               | 0.2                                       | 0.2                | 2 - 3        |
| Q-Pad 3            | 2.2                        | 6                | 0.1                                       | 0.1                | 1 - 3        |
| K-4                | 0.9                        | 6                | 0.3                                       | 0.4                | 3-5          |
| K-6                | 1.1                        | 6                | 0.25                                      | 0.3                | 2-4          |
| K-10               | 1.3                        | 6                | 0.2                                       | 0.2                | 1-3          |

\* Variation due to mounting method and pressure

## SIL-PAD 400®

Thermal Resistance .40 °C/watt in<sup>2</sup>  
Breakdown Voltage, 5000 Volts min.

Sil-Pad 400 is the original Sil-Pad material. Sil-Pad 400 is a composite of silicone rubber and fiberglass. It is flame retardant and specially formulated for use as a thermally conductive insulator. Primary use is to electrically isolate power sources from heat sinks. Sil-Pad 400 is non-toxic and resists damage from cleaning agents.

Sil-Pad 400 has excellent mechanical and physical characteristics. Surfaces are pliable and allow complete surface contact with excellent heat dissipation. It will not chip or fracture under high compressive stress and actually improves its thermal resistance with age. The reinforcing fiberglass gives excellent cut-through resistance. Expect immediate delivery of all standard configurations.

## SIL-PAD 1000®

Thermal Resistance .3 °C/watt in<sup>2</sup>  
Breakdown Voltage, 4500 Volts min.

Sil-Pad 1000 is a composite of silicone rubber and fiberglass. It is boron nitride filled and offers low thermal resistance. Sil-Pad 1000 is non-toxic and resists damage from cleaning agents. It is flame retardant and specially formulated for use as a thermally conductive insulator.

Sil-Pad 1000 has the same excellent mechanical and physical

characteristics of our Sil-Pad 400 material while offering a 35% reduction in thermal resistance.

## SIL-PAD 2000®

Thermal Resistance, 0.2 °C/watt in<sup>2</sup>  
Breakdown Voltage, 4000 Volts min.

Sil-Pad 2000 is Bergquist's high performance, high reliability thermally conductive insulator. Sil-Pad 2000 is designed for demanding military/aerospace and commercial applications. In these applications Sil-Pad 2000 complies with military standards.

## SIL-PAD 1750 and 1950®

Thermal Resistance (SP 1750), 0.2 °C/watt in<sup>2</sup>  
TR (SP 1950), 0.23 °C/watt in<sup>2</sup>  
SP1750 B.V. 6000 VAC min. SP1950, 4000V

Sil-Pad 1750 and Sil-Pad 1950 combine high thermal conductivity and excellent dielectric strength retention after humidity exposure. Exposure to humid environments during assembly, or over long term operating conditions, will not severely affect the ability of the material to perform.

# BERGQUIST THERMAL MANAGEMENT PRODUCTS

## Q-PAD 3®

Thermal Resistance, 1.3 °C/watt in<sup>2</sup>

Q-Pad 3 thermally conductive pad consists of graphite embedded in a polymer matrix that is elastomeric on one side, with a pressure sensitive adhesive on the opposite side. It is designed for those applications where maximum heat transfer is needed and electrical insulation is not required. Q-Pad 3 eliminates problems associated with grease such as contamination of reflow solder or cleaning operations.

## SIL-PAD K-4®

Thermal Resistance, .40 °C/watt in<sup>2</sup>  
Breakdown Voltage, 5000 Volts min.

Sil-Pad K-4 combines the thermal transfer properties of well-known Sil-Pad rubber with high dielectric, physically tough DuPont Kapton MT® film. The result is a durable insulator that withstands high voltages, requires no thermal grease to transfer heat, is available in customized shapes and sizes, and saves time and costs while increasing productivity.

## SIL-PAD K-6®

Thermal Resistance, .3 °C/Watt in<sup>2</sup>  
Breakdown Voltage, 5000 Volts min.

Sil-Pad® K-6 is a medium performance Kapton based thermally conductive insulator. Thermally conductive Kapton® MT film is coated with an aluminum oxide/boron nitride filled silicone elastomer to deliver "boron nitride" performance.

## SIL-PAD K-10®

Thermal Resistance, 0.2 °C/watt in<sup>2</sup>  
Breakdown Voltage, 5000 Volts min.

Bergquist Sil-Pad K-10 is the new high performance insulator developed in conjunction with DuPont. K-10 combines special Kapton® MT Polyimide film with boron nitride filled silicone rubber. The result is a product with good cut-through properties and excellent thermal performance. K-10 is designed to replace ceramic insulators such as Beryllium Oxide, Boron Nitride and Alumina.

## CPU PAD™

Thermal Resistance, 0.3 °C/watt in<sup>2</sup>

CPU Pad is a thermally conductive, electrically insulating, double coated tape. This tape consists of a high performance acrylic, pressure sensitive adhesive, on both sides of a Kapton film. CPU Pad is typically used to adhere a heatsink to the top of a CPU or other heat generating component on the PC board.

## IC-PAD®

Thermal Resistance, 0.2 °C/watt in<sup>2</sup>  
Breakdown Voltage, 7000 VAC, 3500V (air)

IC-Pad eliminates the problems associated with clamping power transistors

to heat sinks. The material will form a structural bond that attaches the device to the heat sink. IC-Pad is a pressure sensitive epoxy adhesive that cures to a strong bond between a device and a heat sink. The material consists of a thermally conductive epoxy impregnated glass cloth electrical insulator. IC-Pad is sandwiched between two release liners.

## POLY-PAD....FOR SILICONE SENSITIVE APPLICATIONS

Polyester based, thermally conductive insulators from Bergquist provide a complete family of materials for silicone-sensitive applications. Poly-Pads are ideally suited for applications requiring conformal coatings or applications where silicone outgassing is a concern (telecommunications and certain aerospace applications.) Poly-Pads are constructed with ceramic filled polyester resins coating either side of a fiberglass carrier or a Kapton® carrier. The Poly-Pad family offers a complete range of performance characteristics to match individual applications.

## POLY-PAD 400®

Thermal resistance, 0.4 °C/Watt in<sup>2</sup>  
Breakdown Voltage, 4500 Volts min.

Poly-Pad 400 is a fiberglass based insulator coated with an alumina-filled polyester resin. Poly-Pad 400 is economical and designed for most standard applications.

## POLY-PAD 1000®

Thermal Resistance, 0.3 °C/Watt in<sup>2</sup>  
Breakdown Voltage, 2500 Volts min.

Poly-Pad 1000 is also a fiberglass based insulator coated with a boron nitride-filled polyester resin. Poly-Pad 1000 offers superior thermal resistance for high performance applications.

## POLY-PAD K4®

Thermal Resistance, 0.4 °C/Watt in<sup>2</sup>  
Breakdown Voltage, 6000 Volts min.

Poly-Pad K4 is a composite of DuPont Kapton® film coated with an alumina-filled polyester resin. PPK4 is an economical insulator and the Kapton carrier provides excellent dielectric and physical strength.

## POLY-PAD K10®

Thermal Resistance, 0.2 °C/Watt in<sup>2</sup>  
Breakdown Voltage, 6000 Volts min.

Poly-Pad K10 is a composite of DuPont Kapton® film coated with a boron nitride-filled polyester resin. PPK10 offers superior thermal performance for your most critical applications with thermal resistance of 0.2 °C/Watt as well as excellent dielectric strength.

## ORDERING INFORMATION

See the standard configurations for common part numbers. Contact the factory for additional standard configurations.

### Ordering Procedure:

The last two digits define the part number selected.

For example: to order K-10 material; use K10-(part number)

SAMPLE PART NUMBER

K10 -02

Represents K10 mat.

Represents the part #

(see standard configurations)

## SPECIAL SHAPES:

We produce thousands of specials. Tooling charges are about \$100 to \$150 for simple parts. Increased complexity or tighter tolerances increase tooling charges.

## TOLERANCES:

.015 inches are held on width, length and hole location.

## SHEETS:

6" x 6", 6" x 12", 8" x 8", 10" x 10", or 12" x 12" sheets in stock.

## ROLLS:

All Sil-Pad materials are available in roll form. Contact the factory.

Kapton® is a registered trademark of DuPont for its polyimide film.

Sil-Pad 400, Sil-Pad 1000 and Sil-Pad 2000 are covered by Mil spec. numbers:

Mil-M-38527/8A

Mil-I-49456

Mil-M-87111

## MINIGLOSSARY ENCAPSULATION

### MATERIALS/HANDLING

**Catalyst:** A substance which changes the *rate* of chemical reaction. Very small quantities can cause fast change.

**Conformal coating** Sprayed or dipped. A thin conformal jacket which protects an assembly from moisture or other degrading environments.

**Curing agent:** See catalyst.

**Hardener:** See catalyst.

**Hermetic:** A permanent gas-tight seal.

**RTV:** Room Temperature Vulcanizing. Associated with silicone rubber sealants which vulcanize at room temperature.

**Thermoplastic:** Plastic materials which can be made to flow *repeatedly* with the application of heat.

**Thermosetting:** Plastics which once cured cannot be made to flow again.

**Thixotropy:** The property of a coating compound which has low viscosity when agitated, but which thickens when the agitation ceases.

**Viscosity:** Measured in units of *poise* or *centipoise*. The property of a liquid which resists internal flow. Low viscosity equates with thin and vice-versa.

### PROCESSING

**Casting:** Parts or assemblies are placed in a mold. Encapsulating material is added and cured. Part is then removed from the mold.

**Dip coating:** Part or assembly is dipped into the encapsulating material. Final thickness is determined by number of dips, viscosity, rate of withdrawal, and temperature.

**Embedding:** Wherein an encapsulant substantially fills all voids in and about an assembly.

**Impregnation:** A process of encapsulation involving evacuating all air and then allowing the encapsulating material to flow in and fill all voids.

**Molding:** Similar to casting except this process usually implies multicavity molds and costly machines.

**Potting:** Wherein the part or assembly is immersed in an encapsulating material contained in a shell which becomes a permanent outer surface after curing.

### DIELECTRIC

**Arc resistance:** An encapsulant's resistance to the formation of a conductive path or track. Measured in time.

**Breakdown voltage:** The voltage at which an encapsulant fails electrically.

**Capacitance:** The property of conductors and dielectrics which allows the storage of an electrical charge when the voltage is applied.

**Corona:** A luminous discharge of electricity due to air ionization when a cer-

tain voltage is reached. Can be internal or external. The formation of ozone can cause rapid deterioration of certain materials.

**Dielectric:** Insulator (Nonconductor.)

**Dielectric constant:** The property of a material that determines its ability to store electrostatic energy.

**Dielectric strength:** The ratio of dielectric breakdown to the thickness of insulating material.

**Dissipation factor:** The ratio of a dielectric material's energy losses.

**Flashover:** Point at which an electric discharge occurs around an edge or across a surface. Can result in a carbon track and permanent degradation.

**Insulation resistance:** (IR) An insulating material's total DC leakage.

**Surface resistivity:** The resistance of the surface of an insulating material to the flow of direct current.

**Voltage endurance:** Sometimes called corona resistance. The ability of a material to withstand the application of sustained high voltage.

**Volume resistivity:** The resistance of a material to direct current flow as a measure of volume. Expressed as ohm-centimeters.

# Chomerics® Thermal Management Materials

## Products for Every Need

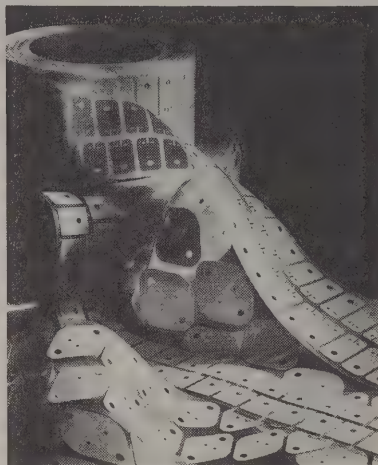

### CHO-THERM® Insulators for Power Semiconductor Devices

CHO-THERM fiberglass re-inforced silicones are effective over a wide temperature range. Glass cloth reinforcement makes them resistant to tear and cut-through.

CHO-THERM boron nitride-filled silicones provide the highest thermal and electrical performance available in one-component interface materials. They are particularly suited for aerospace and other high reliability applications.

Aluminum oxide-filled CHO-THERM 400 and 1674 silicones give exceptionally cost-effective thermal and electrical performance in commercial power supplies.

Call or fax us for a copy of our "Guide to Thermal Transfer" featuring complete technical information on Chomerics CHO-THERM thermal interface materials.

#### 1671

##### HI-REL, HIGHEST PERFORMANCE

CHO-THERM 1671 interface products have demonstrated years of high reliability and performance on programs such as the AWACS surveillance aircraft, NASA space shuttle, and Patriot missile. The elastomer meets NASA's demanding outgassing requirements. Dielectric breakdown voltage rating is 4,000 VAC.

#### T500 HIGH PERFORMANCE

One component CHO-THERM T500 insulators combine a silicone binder with a boron nitride filler to deliver thermal impedance of just .19°C-in<sup>2</sup>/Watt. Minimum breakdown voltage is 4,000 VAC. This elastomer is designed for use in temperatures ranging from -60°C to 200°C.

#### 1678

##### INTERMEDIATE PERFORMANCE

CHO-THERM 1678 elastomer possesses thermal properties approaching those of CHO-THERM 1671, at a lower price. This interface material is recommended for cost-sensitive electronics systems and applications in which excellent heat transfer is required, together with moderate electrical isolation (2,500 VAC). Typical applications include computers, automotive electronics, power supplies and a broad range of business equipment.

| Typical Properties                                                                                                          | 1671                  | T500                  | 1678                  | 1674                 | Test Method  |

## CHO-THERM® Insulators for Power Semiconductor Devices continued

### 1674 COST-EFFECTIVE COMMERCIAL GRADE

CHO-THERM 1674 elastomer is a low-cost, aluminum oxide-filled silicone interface product designed for applications which require moderate thermal and electrical performance. It provides the same high reliability as all other products in the CHO-THERM family of fiberglass reinforced silicone elastomers.

### 400 LOW COST, ALUMINUM OXIDE-FILLED INSULATOR

CHO-THERM 400 grade fiberglass reinforced silicone insulators are standard components in many power supplies requiring moderate thermal conductivity with good physical properties and high dielectric strength.

| Typical Properties                                                                                                        | 400                                                       |                                              | Test Method  |

**Note:** Pressure sensitive adhesive may increase thermal impedance by as much as  $0.05^{\circ}\text{C-in}^2/\text{W}$  ( $.32^{\circ}\text{C-cm}^2/\text{W}$ ). Contact Chomerics for further information.

### CHO-THERM® Film Reinforced Urethane Insulator

### 1684 RELIABLE PERFORMANCE, POLYIMIDE REINFORCED

The urethane binder of CHO-THERM 1684 material allows conformal coating without the dewetting problems (e.g., migration and bubbling) common when applying a conformal coat over silicone. Its magnesium oxide filler provides good thermal conductivity and promotes longer tool life than does more abrasive aluminum oxide. Excellent dielectric strength and exceptional durability are provided by a polyimide film carrier which also gives superior resistance to tear and cut-through from burrs on heat sinks. Polyimide film prevents dielectric voltage breakdown up to 6,000 VAC.

| Typical Properties                                                                                                        | 1684                            | Test Method  |

| Elongation (%)                                                                                                            | 10                              | ASTM D412    |
| Hardness (Shore A)                                                                                                        | 90                              | ASTM D2240   |
| Specific Gravity                                                                                                          | 2.20                            | ASTM D792    |
| Maximum Use Temperature (°C)                                                                                              | -60 to 150                      | —            |
| UL Flammability Rating                                                                                                    | 94V-0                           | UL94         |
| Volume Resistivity (ohm-cm)                                                                                               | $1 \times 10^{14}$              | ASTM D257    |

**Note:** Pressure sensitive adhesive may increase thermal impedance by as much as  $0.05^{\circ}\text{C-in}^2/\text{W}$  ( $.32^{\circ}\text{C-cm}^2/\text{W}$ ). Contact Chomerics for further information.

### CHO-THERM® Non-Insulating Interface Material

### 1646 OUTSTANDING THERMAL PERFORMANCE

CHO-THERM 1646 pads offer the best available thermal performance, without the use of grease, in applications where electrical isolation is not required. The low thermal impedance of CHO-THERM 1646 material ( $.20^{\circ}\text{C-in}^2/\text{watt}$ ) approximates that of thermal grease.

CHO-THERM 1646 material consists of a boron nitride-filled silicone coated on one side to .002 in (.051 mm) aluminum foil. Acrylic pressure sensitive adhesive is on the other side of the foil.

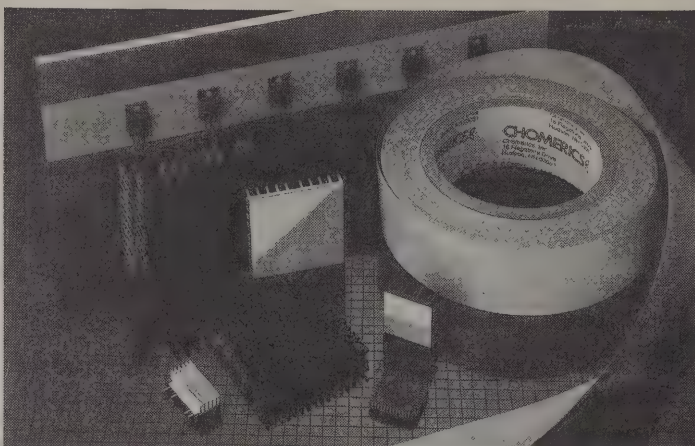

## THERMATTACH® Double-Sided Adhesive Tapes

THERMATTACH 404 and 405 tapes bond heat sinks to mounted components and attach components to vertical chassis walls. They are superior replacements for mechanical fasteners and thermal epoxies. THERMATTACH tapes offer added thermal performance with an easy peel and stick installation. Unlike epoxies, thermal tapes don't require curing time.

Both tapes are embossed with a cross-hatch pattern that provides maximum surface wetting and conformability with minimum air pockets.

Call or fax us for Technical Bulletin #72.

### 404 EXCELLENT THERMAL PERFORMANCE AND ELECTRICAL ISOLATION

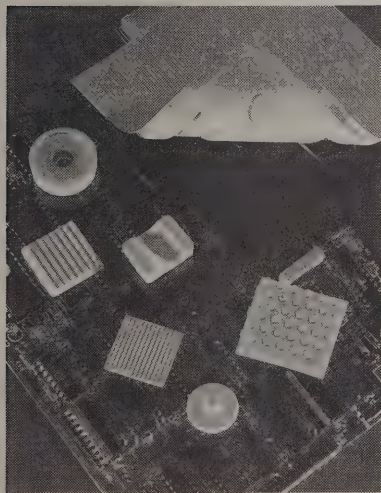

THERMATTACH 404 thermal tape consists of a high bond strength, pressure sensitive acrylic adhesive, loaded with aluminum oxide particles and coated onto .001 in (.025 mm) Kapton\* MT thermally-filled polyimide film.

\* Tradename of DuPont

### 405 SUPERIOR THERMAL PERFORMANCE WITHOUT ELECTRICAL ISOLATION

THERMATTACH 405 thermal tape consists of a high bond strength, pressure sensitive acrylic adhesive, loaded with aluminum oxide particles and coated onto a .002 in (.051 mm) aluminum carrier. The aluminum foil provides added thermal conductivity for applications where electrical isolation is not required.

## CHO-THERM® Highly Conformable Gap Fillers

These "super-soft" materials fill air gaps between hot components and heat sinks or metal chassis. Their flexible, elastic nature allows them to blanket highly uneven surfaces. Heat is conducted away from separate components or entire PCBs into metal covers, frames or spreader plates. Unlike liquid-filled plastic bags, there is no danger of puncture and resultant problems. CHO-THERM T274 and A274 can be custom molded into practically any shape. Ribbed profile forms provide added deflection characteristics.

### T274 EFFECTIVE THERMAL MANAGEMENT WITH ELECTRICAL ISOLATION

CHO-THERM T274 consists of an extremely soft silicone elastomer loaded with aluminum oxide particles laminated to a thermally conductive, reinforced material. The durable layer resists puncture and eases handling. The material is available in six standard thicknesses from .040 in (1.02 mm) to .200 in (5.1 mm) as well as custom thicknesses.

### A274 EXCEPTIONAL HEAT SPREADING CAPABILITIES

This low durometer silicone elastomer is laminated to .002 in (.051 mm) aluminum foil. The foil acts as a heat spreader to eliminate hot spots over high heat dissipating circuit board components. This extremely pliant material comes in sheets and tape form as thin as .020 in (.51 mm).

Call or fax us for Technical Bulletin #70.

# SARCON® THERMAL-CONDUCTIVE AND FLAME RETARDANT SILICONE RUBBER

## SARCON® Products are Vital Electronic Components

A unique new product range developed on the basis of our proprietary technology—SARCON is a completely novel type of silicone rubber combining high thermal conductivity and superior flame-retardancy with the inherent properties of silicone rubber such as heat resistance and electrical insulating properties.

In recent years, the fast rate at which electronics and computer technology have spread through day-to-day life, has led to the need for more powerful semiconductor devices and more compact and lightweight products. Our Fujipoly silicone rubber, developed to meet these needs, has already earned itself a high reputation among many users, praising it as a revolutionary rubber-type electrical insulant.

Its applications span a constantly growing range as thermal conductive insulators for semiconductor devices, compression jointing materials for thermistors and temperature sensors, and as a thermal conductive material for all types of heaters.

SARCON is the most outstanding product from our state-of-the-art production facilities, with micro-unit accuracy standards and a molding technology of the highest level that has taken us years to perfect. Apart from sheet, SARCON is also available in tape, tube and cap form and can be supplied with an adhesive. To let the user choose the best suited product for his purpose, application, and conditions, it comes in two grades with or without adhesive, and in four types: TR, HR, GTR, and GHR.

## Tailor-Made for a Perfect Fit with Users' Needs

### • General Type—SARCON TR

Press and extrusion molding permit the manufacture of any type of intricate shape, whether cap, sheet, tape, or tube-shaped, to precisely meet practical needs.

### • High-Heat Conductive Type—SARCON HR

Thanks to the inclusion of a special fine ceramic ingredient, this high-grade type of SARCON offers remarkably improved thermal conductivity.

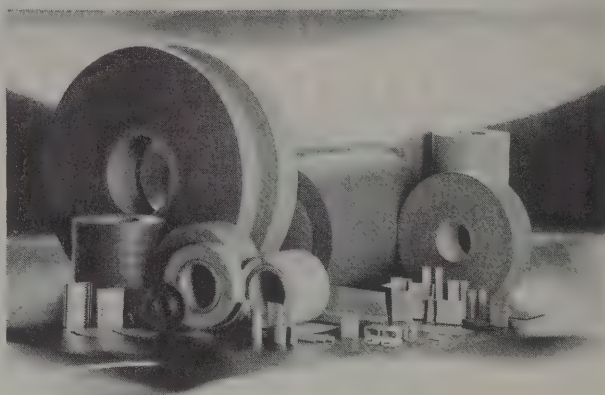

### • Reinforced type—SARCON GTR • SARCON GHR

These particular reinforced grades have a 0.05mm thick glass cloth layer laminated onto TR and HR to provide a dramatic increase in physical strength characteristics such as tensile and tear strength.

For improved ease of handling, we also offer our SARCON AD series which corresponds to the SARCON GTR and GHR but with the application of an adhesive coating.

## Wide Range of Applications

- Especially for use as electrically insulating heat-dissipating spacers in power transistors and semiconductors such as ICs and LSIs
- For use as electrically insulating heat-dissipating spacers in thermistors and posistors.
- Ideal for electronic jars, panel heaters, etc.
- For use as an electrical insulator in temperature fuses and temperature sensors, or as a high/low temperature heat transfer medium.
- Ideal for microwave ovens, panel heaters, ceramic heaters, etc.
- As a replacement for molded silicone-rubber parts in applications with a heat gradient. Ideal for insulating plates around microwave ovens and magnetrons, transformers, etc.
- Ideal for TV, video, stereo, Compact-Disc players, stabilized power supplies, computers, brushless motors, etc.

## SARCON® Offers Superior Properties with a Host of User Benefits

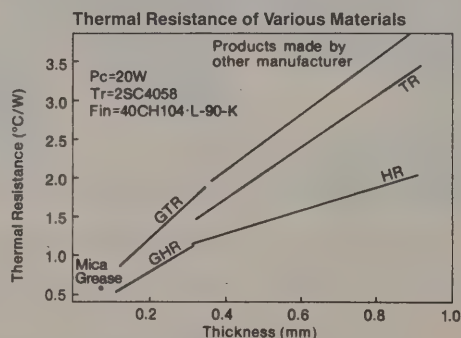

### • High Heat Conductivity

SARCON has a thermal conductivity eight times that of conventional silicone rubber, three times that of mica, and twelve times that of polyester.

| Product Description                                   | Thermal Conductivity<br>( $\times 10^{-4}$ cal/cm $\cdot$ Sec $\cdot$ °C) |
|-------------------------------------------------------|---------------------------------------------------------------------------|
| SARCON HR                                             | 41                                                                        |
| SARCON TR                                             | 29                                                                        |
| SARCON GHR                                            | 34                                                                        |
| SARCON GTR                                            | 22                                                                        |
| General silicone rubber<br>(manufactured by Fujipoly) | 3.7 ~ 5.4                                                                 |
| Mica                                                  | 14                                                                        |
| Polyester                                             | 3.4                                                                       |
| Polyethylene                                          | 6.0                                                                       |

### • Low Thermal Resistance and Stable Thermal Resistance Variation

SARCON is elastic, providing a perfect tight fit on uneven surfaces. Therefore, there is no need to use conventional gap-sealing and filling agents such as grease to bring out the superb high heat conductivity and outstandingly low thermal resistance and stable thermal resistance variation that are the hallmark of our SARCON.

### • Usable over a Wide Temperature Range (–60°C ~ 180°C)

Thanks to its superior resistance to heat and cold, SARCON is ideal for use in a wide temperature range, throughout which it maintains its outstanding electrical properties, such as the excellent electrical insulating properties characteristic of silicone. Nor does it present any significant variation in its physical properties. SARCON is distinguished by a whole range of other outstanding properties, such as excellent resistance to weather, arc, corona discharge, ozone and chemicals.

## VERTICALLY INTEGRATED MANUFACTURING

Pre-tested, ready-to-install components reduce your assembly costs.

- Custom designs with and without graphics
- Color filter windows
- Multiple hard coat finishes
- 100% functionally tested
- Installation-ready
- Many stock materials

## PROCESS-CONTROLLED PRODUCTION

- Computerized quotation, order entry and production tracking through final shipment
- CAD Engineering
- On-site Tool & Die facility - Steel rule, Class A
- Spectrophotometer color analysis and match
- Class 1000 Clean Room stations
- 100% testing for continuity, resistance, dielectric strength and as required
- Documented QA to MIL-I-45208A
- Prototype service—laser or cutter-plotter CNC fabricated thus no initial tool cost

## PRODUCT SUPPORT SYSTEM

- Trained, nationwide sales force
- Experienced design/manufacturing team
- Follow up assistance after product delivery
- One account manager tracks each job from quote through shipment, coordinating manufacture to meet your production schedule.

## ELECTRONIC DATA INTERCHANGE

- 24 hour bulletin board for graphic and drafting files
- Business documents

## HEAT SHRINKABLE TUBING

### PO-135

- Class B thermally stable crosslinked polyolefin tubing with a 2:1 shrink ratio.
- Designed for continuous use at 125°C.
- Extremely tough, smooth insulator.
- Excellent dielectric strength, chemical and oil resistance.
- UL VW-1 and CSA OFT 125°C; MIL-I-23053/5;
- Standard colors-black, white and clear (not VW-1).
- Produced in expanded I.D. from 3/64" to 2".
- Shrink temperature 200°C.
- Also available in commercial grade.
- Used as insulation on lead terminations, wire harnesses and components.

### LM-145

- Extremely flexible modified polyolefin tubing with a 2:1 shrink ratio.
- Excellent mechanical strength, abrasion and cut-through resistance.
- Solvent and fungus resistant.
- Low water absorption.
- High dielectric strength.
- UL VW-1 125°C; MIL-I-23053/5.
- Standard colors- black, white.
- Produced in expanded I.D. from 3/64" to 2".
- Shrink temperature 150°C, shrinks fast.
- Maximum flexibility.

### HM-140

- Semi-rigid modified polyolefin tubing with a 2:1 shrink ratio.
- Available in cut pieces (HM-140CP) for use on automatic termination machines.
- Exceptional mechanical strength and toughness - abrasion, tearing and cut-through resistant.
- Acid, alkali, hydrocarbon solvent, hydraulic fluid and fungus resistant.
- High dielectric strength.
- Flame retardant.
- UL 125°C; MIL-I-23053/6.
- Standard color-black.
- Shrink temperature 200°C.
- Excellent for strain relief applications.

### AL-PO

- Dual wall adhesive lined polyolefin tubing with a 2:1 shrink ratio.
- Excellent resistance to abrasion, fuel, oil, solvents, acids and alkalis.
- Inner wall melts and flows sealing components inside.
- Standard color-black.
- Produced in expanded I.D. from 1/8" to 1".
- Shrink temperature 120°C.
- MIL-I-23053/4, class 2.

### HT-105

- Class A flexible vinyl tubing with a 2:1 shrink ratio.
- Designed for continuous use at 105°C.
- Outstanding dielectric properties, abrasion and cut-through resistance, oil and chemical resistance.
- UL VW-1 and CSA OFT 105°C; MIL-I-23053/2.
- Standard colors-black, white and clear.
- Produced in expanded I.D. from 3/64" to 2".
- Shrink temperature 150°C.
- Also available in heavy wall and commercial grade.
- Covers and insulates cables, components and terminals.

### HA-150

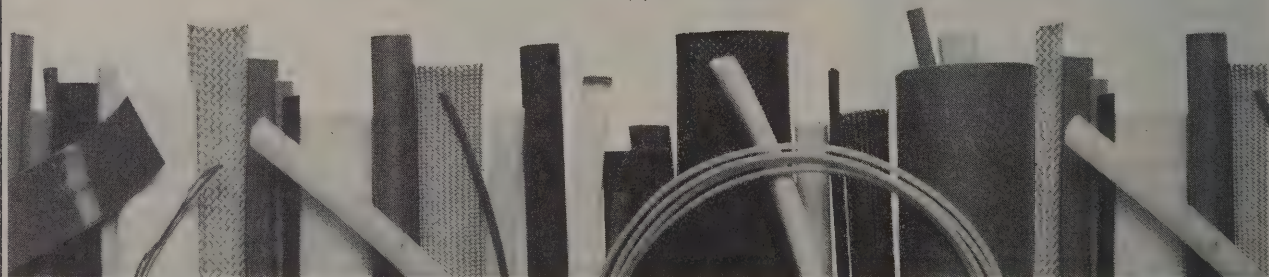

- Clear, semi-rigid polyvinylidene fluoride tubing with a 2:1 shrink ratio.
- Extremely tough, excellent abrasion and cut-through resistance.
- Chemical and solvent resistant.
- High dielectric strength.
- Wide temperature operating range -55°C to +175°C.
- Flame retardant.
- UL VW-1 150°C; MIL-I-23053/9.
- Standard color-clear.
- Produced in expanded I.D. from 3/64" to 1".
- Shrink temperature 200°C.
- Good protection for delicate components.

### TE-250

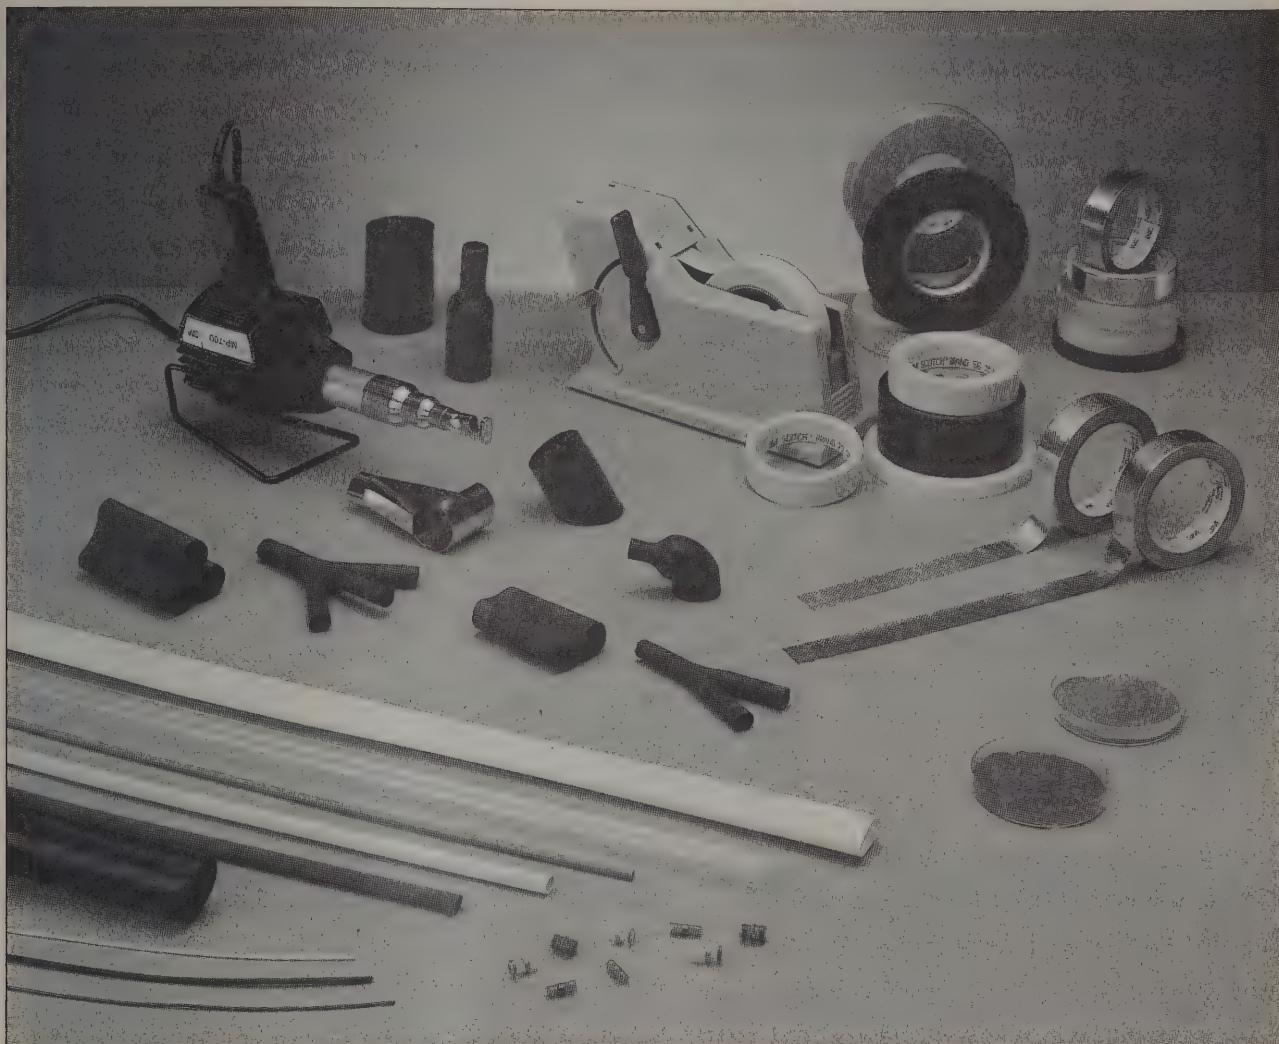

- Polytetrafluoroethylene (P.T.F.E.) shrink tubing with up to a 2:1 shrink ratio.
- Designed for continuous use up to 250°C.
- Used in extreme electrical, thermal and chemical environments.
- Available in thin, standard and extra thin walls.
- MIL-I-23053D/12.
- Standard color-natural.
- Produced in expanded I.D. from .055 to .500".
- Shrink temperature 350°C.

### TUFFSHRINK<sup>2</sup>™

- Heavy wall polyolefin tubing with a 3:1 shrink ratio.
- Internally applied adhesive sealant provides corrosion resistance, strain relief and waterproofing.
- UL 486 B/D, CSA, MIL-I-23053/15.
- Shrink temperature 200°C.
- Produced in expanded I.D. of .400", .750", 1.10", 1.50", 2.0" and 3.0".
- Standard color-black.
- Used in protection of electrical splices above grade, under ground or under water.
- Outstanding abrasion resistance.
- Available in commercial or flame retardant versions with or without adhesive liners.

*Committed To Excellence Through Dedication To Quality*

## Outstanding Performance

Today's high tech products and components require sophisticated die cut parts to match. Thrust Industries is recognized as a leading producer of high quality die cut materials for the electronics, automotive, telecommunications, and appliance industries. At Thrust, we're dedicated to helping our customers achieve maximum efficiency and productivity by offering a wide range of customized materials and services.

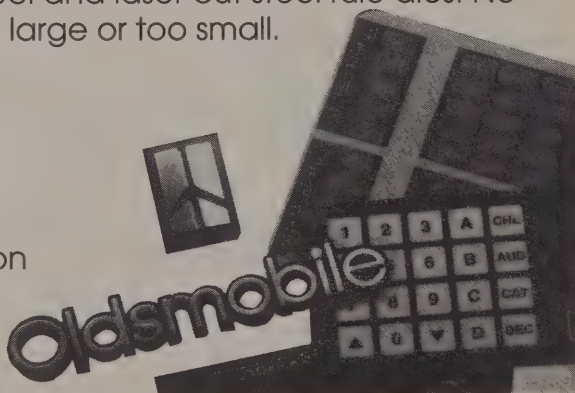

## Superior Accuracy

Our quality standards are among the highest in the industry. Using statistical process control to ensure accuracy, we consistently achieve minimum tolerances on critical dimensions. Each part is produced according to your exact specifications. In addition, we offer both matched metal hard tool and laser cut steel rule dies. No request is too large or too small.

## Exceptional Delivery

Performance and accuracy count only if you receive your parts on time. You can depend on Thrust Industries for prompt turn-around and delivery. After prototype approval, orders are typically shipped in 10 working days or less.

*Precision That's A Cut Above*

# ATLEE BUS BARS

**ATLEE** is a full line manufacturer of busbars serving the following industries:

- Aerospace
- Telecommunications
- Transportation
- Business Systems
- Medical
- Computers
- Defense

We have available design and engineering services as well as a prototype department. We also pride ourselves in taking your "initial" design and providing quick turnaround and low-cost prototypes to aid in "your" engineering.

## ATLEE'S TYPES OF BUSBARS INCLUDE:

- Laminated Busbars
- Machined Busbars
- Powder Coated Busbars
- Epoxy Coated Busbars
- Printed Circuit Board Busbars
- Shields
- Printed Circuit Board Stiffeners

## TO SPECIFY A CUSTOM BUS BAR

When calling the factory or sending even a sketch, be sure to include the following information:

- 1) Applications
- 2) Space available
- 3) Number, location and type of terminations
- 4) Current requirements
- 5) Voltage drop requirements
- 6) Type of mounting Dielectric strength
- 7) Type of mounting
- 8) Environmental requirements
- 9) Type finish on conductors

## ATLEE BUSBARS OFFER YOU:

- **Lowered production costs**, because assembly is simple and fast.
- **Reduced volume** which permits higher density packaging than possible with wire harnesses.
- **Reduced noise** with ideally distributed capacitance and isolation of conductors.
- **High current-carrying capacity.**
- **Low impedance and inductance.**

## CONTACT ATLEE IF YOU REQUIRE:

- **Experience**
- **Quality**
- **"Testing, Proving or Building" of your design**
- **Manufacture of prototypes to High Volume production**
- **"Quick" prototype delivery**
- **On-Time Delivery**

**EMS****AUTOMATED WIRING AND PACKAGING SYSTEMS****WIRE WRAPPING AND STITCH WIRING SERVICES**

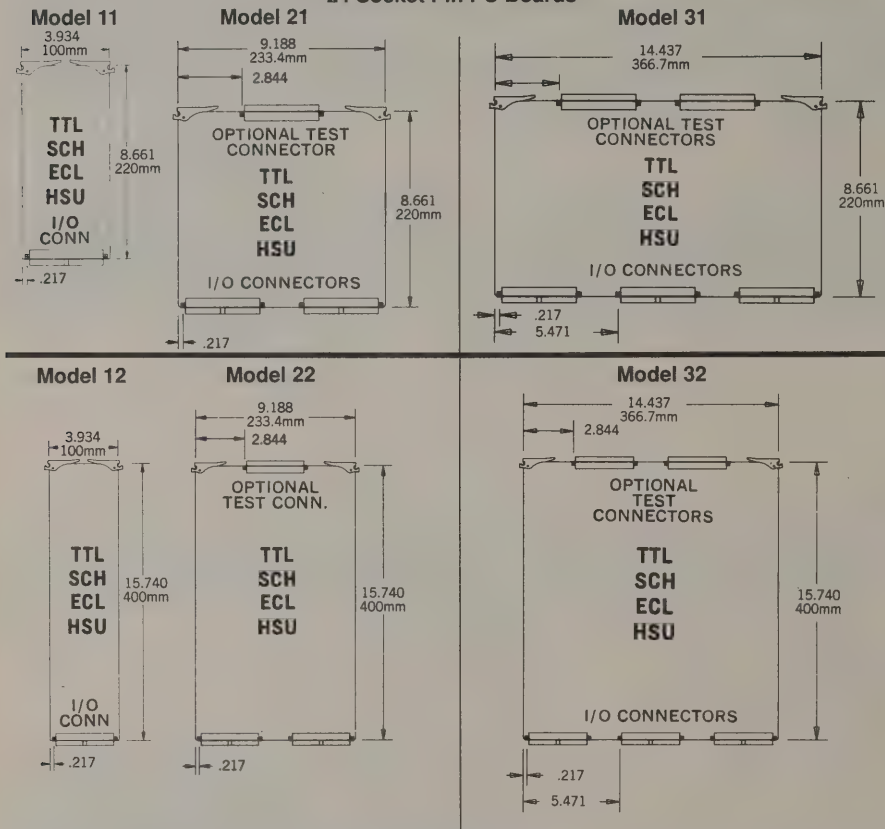

Wire wrapping is 100% inspected to MIL-STD-1130 and EIA STD RS-280-A. Zero wiring error guarantee on tested panels. Stitch wiring is an excellent discrete wiring system for use with high speed circuits and low-profile applications. Bonds are tested to U.S. Navy Specification WS14783.

**Two Pin Technologies****Stitch-Wire**

MIL-approved wiring technique providing optimum performance for ECL and fast Schottky devices. Fast, easy and low cost changeability with the highest reliability of diffusion bonding.

**Wire-Wrap**

Tin or gold plated 1 to 3 level wrap pins. Suitable for TTL and some Schottky applications.

**24 Socket Pin PC Boards****24 Extender Cards**

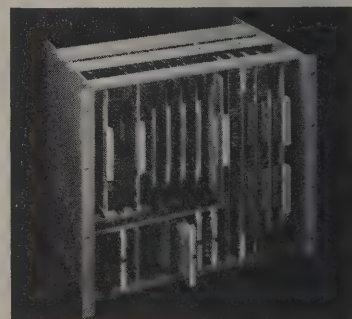

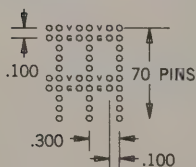

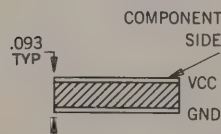

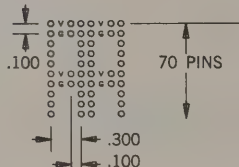

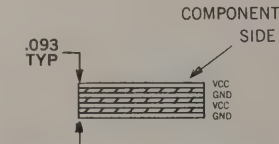

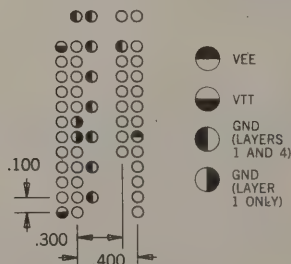

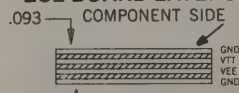

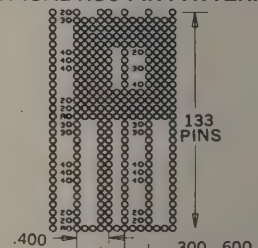

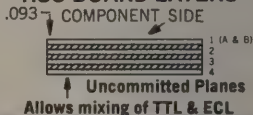

Ruggedly framed and supported extender card with 96 pin Reverse DIN connectors, 5-layers, 96 patched test points for each board size and logic option.

**12 Backplanes**

For .800" or 1.200" card centers. 96 pin Reverse DIN connectors, press-fit V&G wrap-pins. Massive power and ground planes. Wire wrap interconnections. TTL, Schottky, ECL and High-Speed Universal.

**16 Card Racks**

6 free standing and 6 Retma mount vertical racks for each size board .800" and 1.200" card spacing. 2 horizontal (free standing or Retma mount) racks for Model 32 boards, and mixer racks for different board sizes.

## "SERVICE IS OUR SPECIALTY"

Product Technology supplies the highest quality products consistent with our customers' workmanship standards and cost requirements.

## SERVICES AVAILABLE

- "BUILD-TO-PRINT" ASSEMBLY
- PACKAGING & COMPLETE PRODUCT ASSEMBLY
- HARNESS & CABLE PREPARATION
- DISCRETE WIRING
- FULL TURN-KEY SERVICE
- OFF-SHORE ASSEMBLY & WIRING
- REPAIR & UPGRADE EXISTING EQUIPMENT
- ENGINEERING & TESTING
- HIGH & LOW VOLUME PRODUCTION RUNS
- PROTOTYPE DEVELOPMENT

Product Technology would welcome the opportunity to conduct you on a tour of our facilities to demonstrate that our equipment, controls and capabilities are second to none.

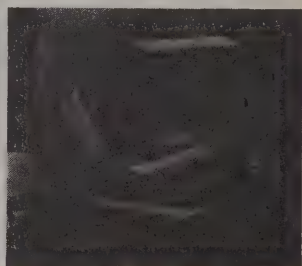

## TESTING SERVICES

Low and high voltage testing.  
Bare board and in-circuit fixtures.

## ENGINEERING SERVICES

PC board design (CAD), digitizing, photoplotting, data conversion, design analysis and documentation packages. PC boards, cables, harnesses and complete electronic systems.

## DISCRETE WIRING SERVICES

Automatic and semiautomatic wire wrapping — point-to-point, XY and special routing.

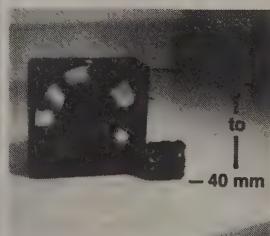

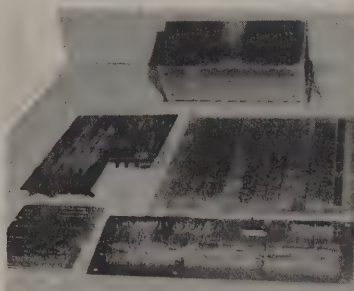

## Automated Wiring Machines

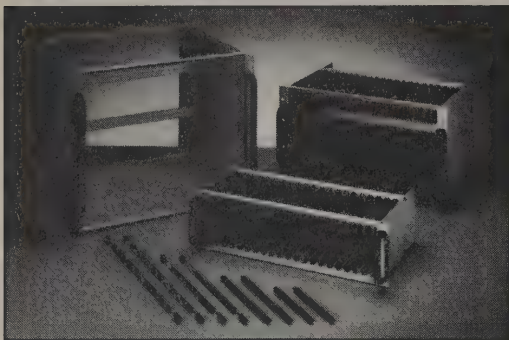

## ELECTRONIC PACKAGING PRODUCTS

Logic cards, backplanes, wire wrapped extender cards, racks — DIN/EUROCARD, VME, Multibus, custom PC boards, hardware and wire (cut and stripped).

# Vector-Pak®

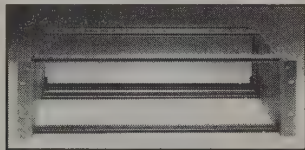

## Vector-Pak® Euro Card Cages - VME - MBI

- All side panels deeper than 160MM include mounting holes for positioning front extrusions at 60MM increments
- Brushed aluminum finish
- Subrack assemblies and kits can be configured to custom specifications - call factory for information
- DIN connectors, dress panels, cage handles, and decorative enclosures available separately ( please consult factory)
- For assembled versions, substitute (A) for the (K) below

\* Kit, all others are assembled.

\*\*Zinc riveted card guides. All others are snap-in noryl.

\*\*\* Accepts Extended Front Panel (EFP) Modules.

## Handles For Subracks - HA19 & HA12

Black anodized aluminum handles, add to the appearance and function of card cages or subracks. Mounting hardware included. For 3U, 6U or 9U versions. HA12: Used for Retma versions

## Handle Kit For Modules HA11/2

Aluminum handle with unique, finger-hugging design adds function and style to Extended Front Panel (EFP) module subracks on CMA series cages. Mounting hardware included.

## Front Panels: 4HP & 6HP

Aluminum panels in 3U, 6U, and 9U sizes. Used to cover empty card slots or house PC board LEDs and switches.

## Side Hinged - HP52

Easy to assemble kit includes the hinged panel with latch, striker plate, and 2 filler panels. Also includes mounting hardware and instructions.

## Bottom Hinged - HFP52, HFP69, HFP87

Designed for "drop down" assembly. Includes lanyard, mounting hardware and instructions.

## Side Filler Panels

### FP52, FP87

Side filler panels are 3" wide, slotted to fit sidewall mounting flanges. Can be cut to size as needed. 0.080" aluminum, brushed anodized finish.

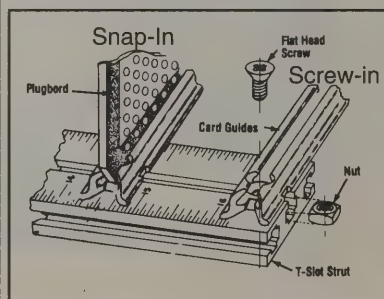

## Top/Bottom Panels

### CAC1, CAC2

Panels (packages of 2) are designed to provide protective cover and still allow subrack to be mounted into equipment rack or cabinet. Aluminum construction, mounting screws and instructions included.

## Card Guides For Subracks

Snap-in or screw-in models available.

Note: Guides are packaged 12 pieces per pack

High quality card guides with tapered slots for easy insertion. Screw-mounted models provide variable positioning along entire length of strut. Snap-in nylon models provide easy installation and removal - without tools - and can be positioned at 0.25" increments when used with Vector-Pak® T-struts.

Press-fit models avail.

# Backplanes

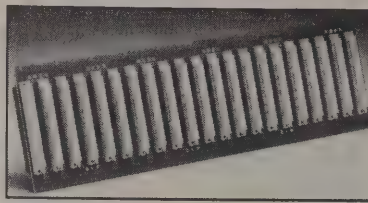

**Monolithic 6U VME J1/J2 Backplanes**  
**Eight-Layer Construction**

- On-board termination
- Auto Bus Grant connectors available
- Hot swap versions available
- Two-slot to 21-slot models available
- Large current carrying capacity through power bugs and bus bars

|                |          |
|----------------|----------|
| <b>Layer 1</b> | - Power  |

**J2 VME Backplane - 3U, on or off board termination models available**

- Perpendicular and parallel passive terminators avail.
- VSB modules, 4-slot & 8-slot models available
- VMX modules, 4-slot & 6-slot models available
- Custom wrapping service available

|                |              |

**VXI Backplanes**

- Available in "C" and "D" sizes
- 12-layer
- Stripline construction
- 8 continuous voltage and ground planes
- Separate TTL and ECL layers
- 5 and 13 slots available
- Auto Bus Grant connectors available
- Inboard mounted passive termination

|                 |                  |
|-----------------|------------------|
| <b>Layer 1</b>  | - Ground         |
| <b>Layer 2</b>  | - TTL Signal     |
| <b>Layer 3</b>  | - +5V, -12V/-24V |
| <b>Layer 4</b>  | - GND +12V/+24V  |
| <b>Layer 5</b>  | - -5.2V          |
| <b>Layer 6</b>  | - TTL Signal     |
| <b>Layer 7</b>  | - +5V            |
| <b>Layer 8</b>  | - GND            |
| <b>Layer 9</b>  | - ECL Sig.       |
| <b>Layer 10</b> | - -2V            |
| <b>Layer 11</b> | - ECL Sig.       |
| <b>Layer 12</b> | - GND            |

| Model #  | Type | No Of Slots |
|----------|------|-------------|
| VXIBP05C | VXI  | 5 -"C" size |
| VXIBP05D | VXI  | 5 -"D" size |
| VXIBP13C | VXI  | 13-"C" size |
| VXIBP13D | VXI  | 13-"D" size |

**PC Bus Backplanes**

**EISA**

**Both Models:**

- Assembled & tested
- SIP termination sockets provided
- Multilayer: ISA - 4 EISA - 8
- PC/AT power connectors - PC/AT standard

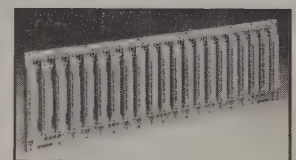

**ISA:**

- 16-bit connectors all positions

**EISA:**

- 2 Bus Master slots
- PCXI and TMC compliant

| Model #   | Type | No Of Slots |
|-----------|------|-------------|
| 4617-6-8  | ISA  | 8           |
| 4617-6-12 | ISA  | 12          |
| 4617-6-14 | ISA  | 14          |
| 4619-6-14 | EISA | 14          |

**General Purpose, Uncommitted Backplanes - 3U and 6U versions**

|                |           |
|----------------|-----------|
| <b>Layer 1</b> | - Ground  |
| <b>Layer 2</b> | - Aux Pwr |
| <b>Layer 3</b> | - Power   |
| <b>Layer 4</b> | - Ground  |

- 96-pin wire wrap connectors, .8" or 1.2" spacing
- Custom configurable in power, ground, and signal
- Up to 4 voltages
- Accessories available for most applications E.G.: bus bars, shrouds, jumpers, special wiring

| Part #     | No. of Slots             |
|------------|--------------------------|
| UM21A3U-21 | 2 slots through 21 slots |
| UM21A6U-21 | 2 slots through 21 slots |
| UM13B3U-13 | 2 slots through 13 slots |
| UM13B6U-13 | 2 slots through 13 slots |

### DIRECT ETCH™ RESIST PRODUCTS

These products let you design and etch one-of-a-kind circuit boards by rubbing down resist transfer patterns and traces RIGHT ON A BLANK COPPER BOARD. Transfers resist all popular etchants.

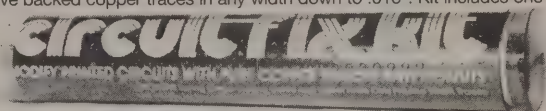

|       |                                                                                                                     |         |
|-------|---------------------------------------------------------------------------------------------------------------------|---------|
| ER-1  | Direct Etch Circuit Kit. Has boards, patterns, tapes, etchant .....                                                 | \$11.95 |
| ER-2  | Refill 8 sheets 1X resist patterns, tapes .....                                                                     | 8.50    |
| ER-13 | Refill 4 sizes of donuts, 4 sheets .....                                                                            | 4.25    |
| ER-14 | Refill continuous DIP patterns, 4 sheets .....                                                                      | 4.25    |
| DE973 | 69 sheets 1X resist patterns. Conventional & SMD patterns, .014" to .125" lines, 14 different sizes of donuts ..... | 34.95   |
| ER-15 | Resist Ink Pen. Draw or touch up resist patterns on your board .....                                                | 1.95    |
| ER-3  | Refill 1/4 lb dry Ferric Chloride. Makes 1 pint .....                                                               | 3.50    |
| ER-11 | 2 One side copper PC boards, 5"x6", 3"x4.5" .....                                                                   | 4.95    |
| ER-12 | Air Bubble Etch Pump with hose, air distributor speeds etch .....                                                   | 10.15   |
| ER-18 | TINNIT™ Electroless Bright Tin Plate, makes 1 pint .....                                                            | 4.95    |
| ER181 | TINNIT Large size makes 0.5 gallon .....                                                                            | 18.00   |

### ADHESIVE COPPER FOIL & PADS FOR PC REPAIR, MODIFICATION

The **Circuit-Fix™ circuit repair kit** has a patented clamp-cutter that lets you cut adhesive backed copper traces in any width down to .016". Kit includes one sheet of plain foil and one sheet of die cut copper donuts.

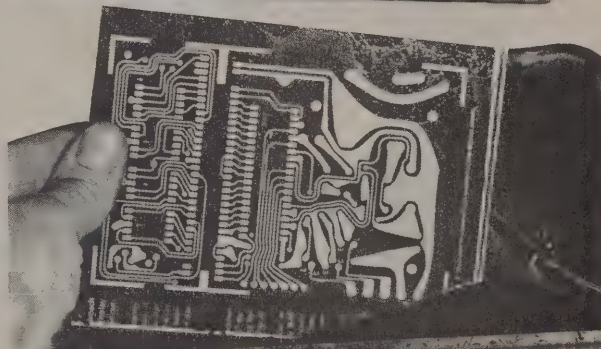

|      |                                                               |         |
|------|---------------------------------------------------------------|---------|
| CF-1 | Complete Circuit-Fix repair kit .....                         | \$22.95 |
| CF-2 | Refill adhesive-backed copper foil donuts, 308 assorted ..... | 4.25    |
| CF-3 | Refill adhesive-backed copper foil 2 sheets, 3.25"x10" .....  | 4.25    |

### PHOTO ETCH™ RESIST PRODUCTS

These kits use a patented photo process that lets you copy 1X circuit patterns from a magazine, dot matrix or laser printer or your own 1X hand-done artwork. All necessary materials except exposure bulbs are included in the ER-4 kit. Makes circuits up to 5"x6". Use ER-9 film, ER-10 print frame for circuit boards to 8.5"x11".

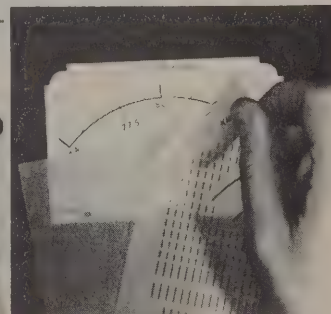

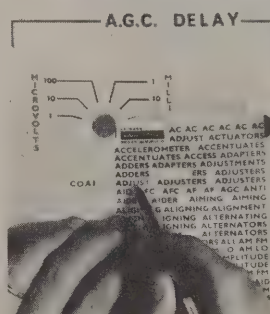

|       |                                                                      |         |
|-------|----------------------------------------------------------------------|---------|
| ER-4  | PHOTO ETCH Complete Kit less bulbs .....                             | \$40.00 |
| ER-19 | Bulb Set. Contains 3200°K and long wave UV incandescent bulbs .....  | 16.45   |
| ER-5  | Refill Pos-Neg™ Film, 6 sheets 5"x6" .....                           | 7.90    |
| ER-9  | Pos-Neg film, 2 sheets 8"x11" .....                                  | 7.90    |
| ER-6  | Developer, Fixer for Pos-Neg film. Makes 1 pint each .....           | 4.75    |
| ER-71 | Liquid Photo Resist, Negative Acting 4 ounce pump spray bottle ..... | 8.00    |
| ER-8  | Photo Resist Developer, 1 pint can .....                             | 4.95    |
| ER-10 | 9"x12" Print Frame, yellow filter, instructions .....                | 14.95   |
| ER-16 | Instruction Manual. Included with ER-4, ER-10 .....                  | 2.25    |
| ER-17 | Yellow Filter. Included with ER-4, ER-10 .....                       | 3.00    |

### DRY TRANSFER PRODUCTS FOR MARKING PANELS, CIRCUIT BOARDS

These sets are an industry standard. Letters and numbers are widely used in production for marking terminals and circuit boards. Preset titles make prototype control panels look professional. Also good for marking components, circuit boards, meter dials. Available in .105" and .125" heights. Black or white. Use DATAKOAT™ brush-on or spray coat to protect transferred letters.

|       |                                                                                   |         |
|-------|-----------------------------------------------------------------------------------|---------|
| 948   | Black (949 White). .105" Preset Electronic Titles, 24 pages .....                 | \$13.50 |
| 950   | Black (951 White). .105" Refill Letters, 12 pages .....                           | 8.75    |
| 952   | Black (953 White). .105" Refill Numbers, 12 pages .....                           | 8.75    |
| 954   | Black (955 White). .105" Refill Light Face Letters, 12 pages .....                | 8.75    |
| 956   | Black (957 White). .105" Refill Light Face Numbers, 12 pages .....                | 8.75    |
| 9581  | Black (9591 White). .125" Preset Electronic Titles, 24 pages .....                | 13.50   |
| 9601  | Black (9611 White). .125" Refill Letters, 12 pages .....                          | 8.75    |
| 9621  | Black (9631 White). .125" Refill Numbers, 12 pages .....                          | 8.75    |
| 9661  | Black (9671 White). .125" Alphanumeric Component Designations .....               | 13.50   |
| 968   | Meter Dial, Switch Patterns, Letters, Numbers, 12 sheets, black, white, red ..... | 13.50   |
| 04176 | DATAKOAT Brush-on Coating Kit, 1 oz coating, 1 oz thinner .....                   | 3.75    |
| 04177 | DATAKOAT Clear Spray, 12 oz aerosol .....                                         | 6.45    |
| 04178 | DATAKOAT Matte Spray, 12 oz aerosol .....                                         | 6.45    |

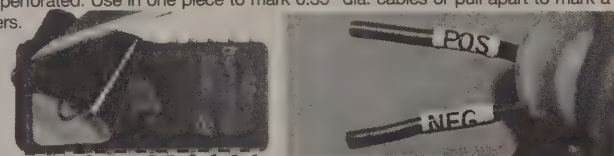

### EPROM LABELS, DIP & SMD PIN MARKERS, WIRE MARKERS

**UV opaque PROM labels** use a patented adhesive system that sticks firmly, yet can be removed without leaving a residue. The flexible vinyl body fits neatly on a 24 pin wide DIP package. The write-on surface accepts typewriter ribbon, including lift-off correctable, laser printing, ball point or felt tip pen and pencil.

Forget counting pin numbers! **DIP markers are ideal for design work** and troubleshooting. These labels are numbered for both component and circuit sides. They cover 14 pin to 64 pin DIP's. SMD's are handled with a .050" spaced universal label strip.

**Wire markers are ultra thin**, stick beautifully to vinyl insulated wire. Each marker is perforated. Use in one piece to mark 0.35" dia. cables or pull apart to mark a terminal and both ends of a #18 or smaller wire. See our full catalog for write-on markers.

|        |                                                                         |        |
|--------|-------------------------------------------------------------------------|--------|
| EP-1   | Labels, 1.1"x.46", 147 labels .....                                     | \$4.00 |
| 974    | DIP and SMD Terminal Marker Set, 389 assorted marker labels .....       | 8.95   |
| F1S22  | Consecutive wire markers, 48 sets of 1 to 22, .....                     | 8.95   |
| F1S104 | Consecutive wire markers, 24 sets of 1 to 22, 6 sets of 23 to 104 ..... | 8.95   |
| FALPHA | Alphabet wire markers, 48 sets of A to Z .....                          | 8.95   |

## VECTORBORD® PUNCHBOARDS

Pattern P

Pattern G

Pattern H

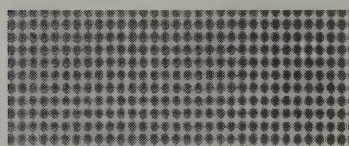

Precision drilled or prepunched, Vectorbord® Prototyping Boards are convenient economical design tools and alternatives to custom designs. Available in several hole patterns, many are copper clad. Sockets and pins, terminals, tools, and accessories are available separately to facilitate construction of your prototype boards.

| Mfr. No.    | Pattern | W x L (In.) | Thickness (In.) | Hole (In.) | Material                    |

## CIRCBORD® PRINTED CIRCUIT PROTOTYPING BOARDS

### GROUND PLANE

106P180-4

### 3-HOLE SOLDER PAD

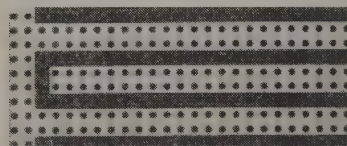

8001

### PAD-PER-HOLE

8003

### BUS PATTERNS (INTERLEAVED BUS)

8002

Circbord® prototyping boards with printed circuitry cover a wide range of design requirements. All boards have provisions for I/O connectors. Several circuit patterns are available. All bus and pad surfaces are solder coated for user convenience. Holes are 0.042" diameter, hole patterns are based on 0.1" grids.

| Mfr. No.  | W x L (In.)  | Thickness (In.) | Hole (In.) | 16-Pin | Material | Circuit Pattern                         |

General purpose and bus specific extenders for in-system testing of functioning circuits. Constructed of FR4 epoxy glass or epoxy glass composite with nickel/gold plated edge contacts and gold plated socket contacts. Connectors install and attach to 2 oz. etched circuit line on the board. Connector tabs on most models are designed to accept test clips or probes.

## Wire Wrap & Solder Tail Edge Card Connectors

Designed for low insertion force, minimum wear on circuit board edge contacts. Edge Card Connectors are supplied with between-contact polarizing keys. Part No. R644 supplied with in-contact polarizing keys.

### Solder Type

Insulator Material: Phenolic, UL-94V-0 or Glass filled Diallylphthalate UL-94V 1 or Ryton R10.

### Wire Wrap Type

Insulator Material: Phenolic, UL-94V-0 or Glass filled Diallylphthalate UL-94V-1 or Polyester (VALOX) UL-94V-0.

Contact Material: Phosphor bronze QQ-B-750 or Beryllium copper. .000010" gold over .000050" nickel.

Test Voltage: 650 VAC.

Rated Current: 3 AMPS.

Contact Res. Drop: 30 MV Max. @ rated current.

Insulation Resistance: 5000 Megohms, nom. @ 500 VDC

R644

| Part No. | No. Of Contacts | Termination Type | Row Spacing | Mounting Ears |

| R644-3   | 44              | Wire Wrap        | .200        | Center        |

## T42 - Push-In Terminals

for .042" diameter holes

- Wiring terminals for mounting leads or wires horizontally or vertically (through board hole)
- Connectors require no staking for most applications
- Horizontal slot holds up to seven wires, depending upon thickness of wire

Part No. T28 For .062"

diameter holes also features:

- Vertical slot holes .025" diameter leads or .22 gauge wires
- .0018" diameter tab holes can be used to hold additional wires
- Material: Phos. bronze, tin plating

Package quantities of 100 or 1000 Consult factory for applicable hand tools

## T46 - Press-In Terminals

for .042" diameter holes

- Single and double-tailed (accessible from both sides)
- Wire Wrap terminals
- .0025 square posts
- Provides secure contact without soldering or staking
- Rectangular base with stepped shank presses into plain or plated-thru holes and is retained without etching or soldering

Package quantities of 100 or 1000

Use P158 or P133B insertion

tools, sold separately

## T44, T68, Terminals

for .042" diameter holes

- Wire Wrap tail with two-pronged receptacle for wires or leads
- .0025 square posts
- Rectangular terminal with stepped shank presses securely into plated or unplated holes, requires no staking or soldering
- Bifurcated end holds soldered leads securely
- For 3 level wire-wraps

## T49 Klipwrap Terminal

for .042" diameter holes

- Wire wrap tail (.0025" square) with 3-pronged clip for up to 22 gauge wires
- Up to 3 Wires may be pressfit, crimped, or soldered into clip
- Tail for 3 level wire-wraps

Package quantities of 100 or 1000

Use P158 or A13, A13-1, P156

insertion tools, sold separately

## K32 - J Pin Terminal

for .042" diameter holes

- Wire Wrap pin (.0025" sq.) fits and connects two adjacent holes (.042"D) on a .1" grid
- Short leg can be bent to secure pin
- Shorting pin allows wire wrap connection to wiring side pads or circuits

Package quantities of 100 or 1000

Use P158 insertion tool, sold separately

## R32 - Socket Pins

for .042" diameter holes

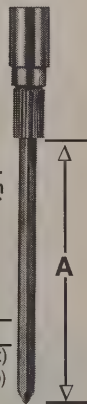

- Low profile Wire Wrap socket pins
- Pressfit mounting
- 4-finger contacts, tapered sockets for easy insertion

| Part # | Qty  | Dim A | Male Pin Depth |
|--------|------|-------|----------------|
| R32C   | 100  | .5    | .13            |
| R32M   | 1000 | .5    | .13            |

## Socket Pins

for .0055" diameter holes

| Part # | Dim A | Male Pin Depth                   |
|--------|-------|----------------------------------|
| R30    | .286  | .15 (Low Profile, Pressfit)      |
| R31    | .703  | .17 (Low Profile, Wire Wrap)     |
| R50    | .560  | .17 (2-level Wire Wrap)          |
| R51    | .560  | .17 (6-finger contacts)          |
| R52    | .700  | .17 (3-level, 4-finger contacts) |
| R53    | .700  | .17 (3-level, 6-finger contacts) |

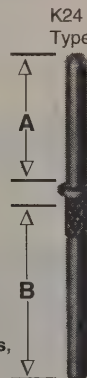

## Inbord Pins - K24

- Press-in pins provide excellent solder points (tin or gold PL.)
- Phos bronze material

| Part # | Hole Size | Dimensions A | Dimensions B |
|--------|-----------|--------------|--------------|
| K24*   | .042      | .255         | .375         |
| K26    | .042      | .160         | .195         |
| K30    | .042      | .225         | .305         |
| K31    | .042      | .160         | .195         |
| K36    | .025      | .283         | .400         |

\*Use in G-10 epoxy glass board only (.062" thick typical)

(Package quantities of 100 or 1000 Use P158 or P133A insertion tools, sold separately)

# amuneal

## MANUFACTURING CORP.

*For over 27 years, Amuneal has provided magnetic interference solutions for medical, scientific, industrial, military and commercial applications.*

Amuneal has designed

and fabricated hundreds

of different magnetic

shielding enclosures,

ranging from small

research components to

full sized magnetically

shielded rooms.

The top enclosure shows our VDT magnetic shield

which is custom built to fit your specific monitor.

Amuneal VDT shields eliminate distortions caused by

magnetic fields emanating from AC or DC sources,

as well as restoring color integrity which is often

affected in very strong fields.

The bottom enclosure was designed for a water-

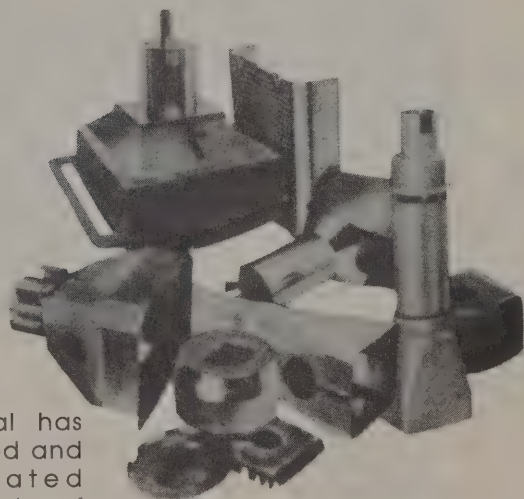

jacketed incubator used in biomagnetic research. It

is constructed of two layers of .062" thick Amumetal

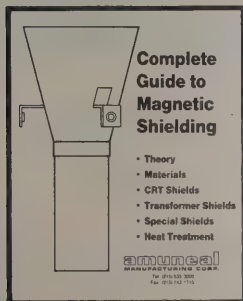

and provides attenuation of 1059:1 (60.5 db).

**Amuneal can meet all your magnetic needs, including:**

- Complete fabrication, from specialized components to complex assemblies
- Shielded rooms and enclosures for MRI, Biomagnetics, Medical and Research applications
- Shielded enclosures for Video Display Terminals
- In-house engineering, design, heat treat and test facilities
- Site survey and consulting services for both shield design and area shielding
- Sheet and Foil materials from stock

Amuneal has designed and fabricated thousands of custom shields to meet its customers' shielding needs. Our experienced team of scientists and engineers are involved in every phase of development, from concept to final assembly.

**Call today for your free Complete Guide to Magnetic Shielding**

***Whatever your application, call today. We will show you why Amuneal should be your source for magnetic shielding.***

## MINIGLOSSARY ENCAPSULATION

### MATERIALS/HANDLING

**Catalyst:** A substance which changes the *rate* of chemical reaction. Very small quantities can cause fast change.

**Conformal coating** Sprayed or dipped. A thin conformal jacket which protects an assembly from moisture or other degrading environments.

**Curing agent:** See catalyst.

**Hardener:** See catalyst.

**Hermetic:** A permanent gas-tight seal.

**RTV:** Room Temperature Vulcanizing. Associated with silicone rubber sealants which vulcanize at room temperature.

**Thermoplastic:** Plastic materials which can be made to flow *repeatedly* with the application of heat.

**Thermosetting:** Plastics which once cured cannot be made to flow again.

**Thixotropy:** The property of a coating compound which has low viscosity when agitated, but which thickens when the agitation ceases.

**Viscosity:** Measured in units of *poise* or *centipoise*. The property of a liquid which resists internal flow. Low viscosity equates with thin and vice-versa.

### PROCESSING

**Casting:** Parts or assemblies are placed in a mold. Encapsulating material is added and cured. Part is then removed from the mold.

**Dip coating:** Part or assembly is dipped into the encapsulating material. Final thickness is determined by number of dips, viscosity, rate of withdrawal, and temperature.

**Embedding:** Wherein an encapsulant substantially fills all voids in and about an assembly.

**Impregnation:** A process of encapsulation involving evacuating all air and then allowing the encapsulating material to flow in and fill all voids.

**Molding:** Similar to casting except this process usually implies multicavity molds and costly machines.

**Potting:** Wherein the part or assembly is immersed in an encapsulating material contained in a shell which becomes a permanent outer surface after curing.

### DIELECTRIC

**Arc resistance:** An encapsulant's resistance to the formation of a conductive path or track. Measured in time.

**Breakdown voltage:** The voltage at which an encapsulant fails electrically.

**Capacitance:** The property of conductors and dielectrics which allows the storage of an electrical charge when the voltage is applied.

**Corona:** A luminous discharge of electricity due to air ionization when a cer-

tain voltage is reached. Can be internal or external. The formation of ozone can cause rapid deterioration of certain materials.

**Dielectric:** Insulator (Nonconductor.)

**Dielectric constant:** The property of a material that determines its ability to store electrostatic energy.

**Dielectric strength:** The ratio of dielectric breakdown to the thickness of insulating material.

**Dissipation factor:** The ratio of a dielectric material's energy losses.

**Flashover:** Point at which an electric discharge occurs around an edge or across a surface. Can result in a carbon track and permanent degradation.

**Insulation resistance:** (IR) An insulating material's total DC leakage.

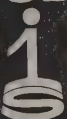

**Surface resistivity:** The resistance of the surface of an insulating material to the flow of direct current.

**Voltage endurance:** Sometimes called corona resistance. The ability of a material to withstand the application of sustained high voltage.

**Volume resistivity:** The resistance of a material to direct current flow as a measure of volume. Expressed as ohm-centimeters.

# A Complete Selection of EMI Shielding Gaskets...

from  **Instrument Specialties.**

## Shielding

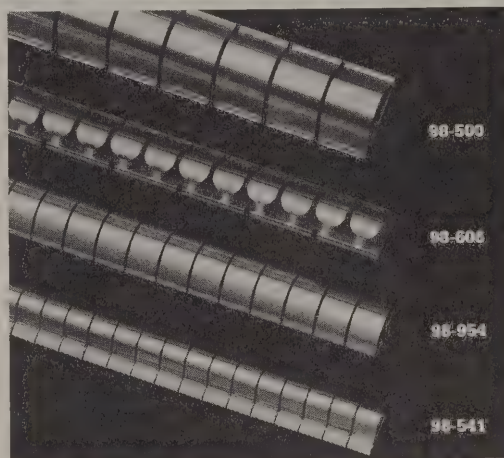

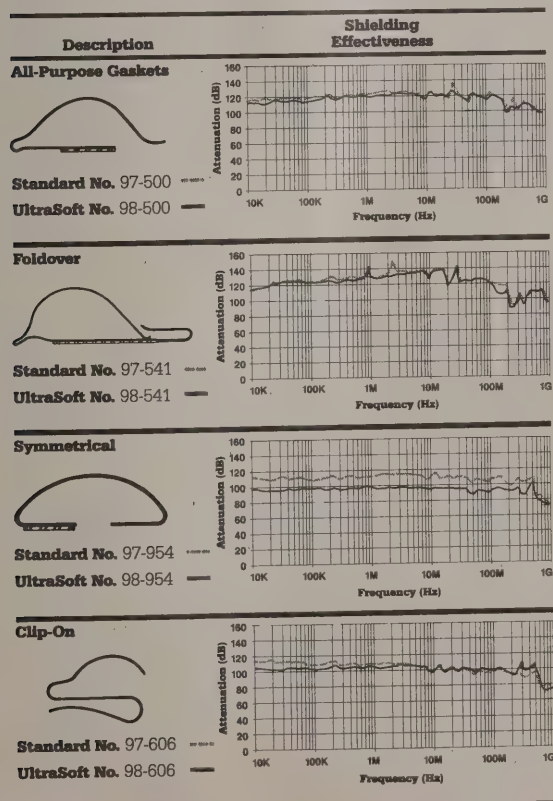

*UltraSoft™* fingers

### New low force shielding gaskets in a full range of standard configurations.

New UltraSoft™ fingers from Instrument Specialties offer the communications, computer, and electronics system designer concerned with lighter construction materials and FCC EMI compliance, greater flexibility and versatility than ever before. UltraSoft fingers permit wider use of lighter, thinner construction materials, to help cut costs and/or enhance system performance.

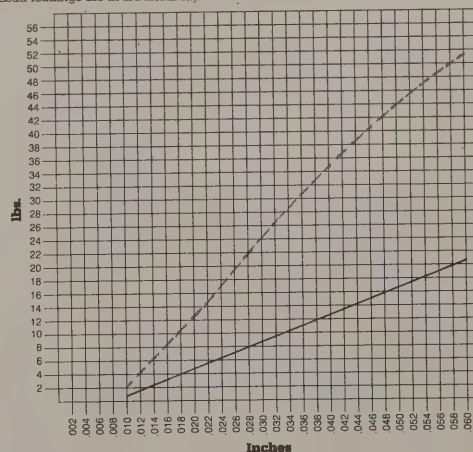

- Lowest compression forces in the industry
  - Increased cycle life
  - Shielding effectiveness comparable to standard shielding line
  - Wide selection of sizes and configurations.
- Low force version available for virtually every standard shielding product.

Following are several examples comparing Instrument Specialties' UltraSoft fingers to the Standard Shielding line.

### Compression Force Comparison

(Load readings are in lbs/linear ft.)

Compression force data on all other UltraSoft Series are available upon request.

For further information, or for product samples, please contact your Instrument Specialties representative.

## Shielding

## Ultra-Flex™ ElectroNit™

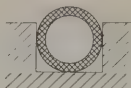

New Ultra-Flex™ ElectroNit™ combines the optimum mechanical properties of beryllium copper with shielding effectiveness as much as 20 dB higher than conventional materials. It offers superb resiliency for consistent, point-to-point contact requiring the lowest compression forces among all other shielding materials and configurations. A wide range of platings, sizes, configurations, and excellent flexibility create optimum design latitude.

### This Series Offers:

- Compression force 80% less than conventional knitted wire shielding with elastomer core
- 100% recovery of original height at up to 75% deflection preserving original shielding effectiveness values
- Optimum attenuating properties of beryllium copper, one of shielding's most effective materials
- Up to 75% lighter than conventional wire knit materials
- High cycle life for high traffic applications
- No moisture absorption

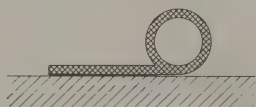

### How to Order

Ultra-Flex is supplied on spools by the foot in 50 to 500-foot units.

#### Groove Mounting

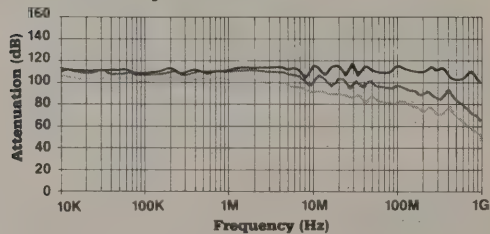

In groove mounting, gasket should have sufficient clearance to achieve optimum contact when compressed to desired tolerance.

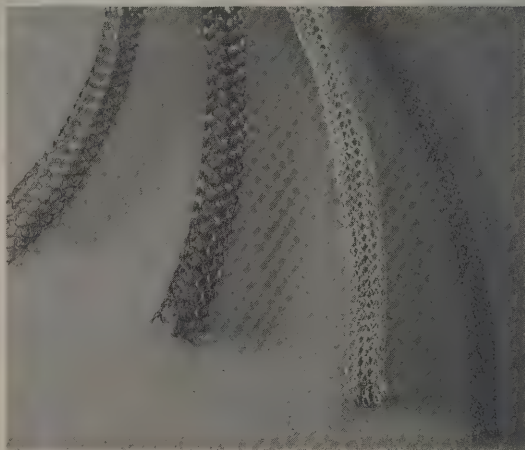

#### Adhesive Mounting

Adhesive strip is applied only beneath the fin area, allowing the conductive knitted mesh direct contact with the host material.

### Transfer Impedance Test—Part No. 8101-0106-40

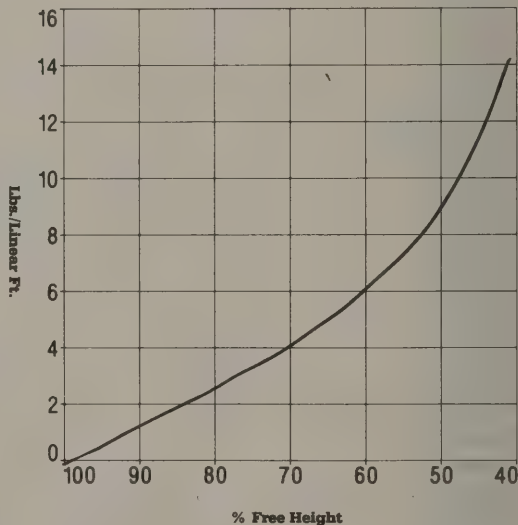

- Compressed at 75%
- Compressed at 50%
- Compressed at 20%

Hollow core UltraFlex is available in round, round with single fin, and double round configurations.

### Compression Performance

Part No. 8101-0106-40

Ultra-Flex™ ElectroNit™

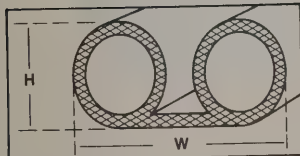

Size vs. Tolerance

| Size Range                 | Tolerance |                     |
|----------------------------|-----------|---------------------|
|                            | Diameter  |                     |
| To .12 (3.05)              |           | + .02-0 (+ .51-0)   |
| .13 - .38 (3.30 - 9.65)    |           | + .03-0 (+ .76-0)   |
| .39 - .50 (9.91 - 12.70)   |           | + .046-0 (+ 1.17-0) |
| .51 - 1.00 (12.95 - 25.40) |           | + .062-0 (+ 1.56-0) |

Size vs. Tolerance

| Size Range                 | Tolerance           |                         |
|----------------------------|---------------------|-------------------------|
|                            | Dim H               | Dim W                   |
| To .18 (4.57)              | + .02-0 (+ .51-0)   | NA                      |
| .19 - .38 (4.83 - 9.65)    | + .03-0 (+ .76-0)   | + .06-.03 (+ 1.52-.76)  |
| .39 - .50 (9.91 - 12.70)   | + .046-0 (+ 1.17-0) | ± .06 (± 1.52)          |
| .51 - 1.00 (12.95 - 25.40) | + .062-0 (+ 1.56-0) | + .09-.06 (+ 2.29-1.52) |

Size vs. Tolerance

| Size Range                 | Tolerance           |                         |
|----------------------------|---------------------|-------------------------|
|                            | Dim H               | Dim W                   |
| To .18 (4.57)              | + .02-0 (+ .51-0)   | NA                      |
| .19 - .38 (4.83 - 9.65)    | + .03-0 (+ .76-0)   | + .06-.03 (+ 1.52-.76)  |
| .39 - .50 (9.91 - 12.70)   | + .046-0 (+ 1.17-0) | ± .06 (± 1.52)          |
| .51 - 1.00 (12.95 - 25.40) | + .062-0 (+ 1.56-0) | + .09-.06 (+ 2.29-1.52) |

For Size vs. Tolerance charts, dimensions measured under 4 oz. load (11.34 Gms.) with .750 dia. (19.05 mm) anvil.

### Hollow Core Round

| Diameter     | Beryllium Copper Part Number |
|--------------|------------------------------|
| .062 (1.57)  | 8101-0101-40                 |
| .093 (2.36)  | 8101-0102-40                 |
| .125 (3.18)  | 8101-0103-40                 |
| .156 (3.96)  | 8101-0104-40                 |
| .187 (4.75)  | 8101-0105-40                 |
| .250 (6.35)  | 8101-0106-40                 |
| .312 (7.92)  | 8101-0107-40                 |
| .375 (9.53)  | 8101-0108-40                 |
| .500 (12.70) | 8101-0109-40                 |

For other platings, replace the suffix "40" as follows:  
41—Tin plate; 47—Nickel plate; 48—Cadmium plate.

### Hollow Core Round with Single Fin

| Height       | Width         | Beryllium Copper Part Number |
|--------------|---------------|------------------------------|
| .062 (1.57)  | .375 (9.53)   | 8103-0101-40                 |
| .062 (1.57)  | .500 (12.70)  | 8103-0102-40                 |
| .093 (2.36)  | .500 (12.70)  | 8103-0103-40                 |
| .125 (3.18)  | .375 (9.53)   | 8103-0104-40                 |
| .125 (3.18)  | .625 (15.88)  | 8103-0105-40                 |
| .125 (3.18)  | .750 (19.05)  | 8103-0106-40                 |
| .156 (3.96)  | .500 (12.70)  | 8103-0107-40                 |
| .187 (4.75)  | .625 (15.88)  | 8103-0108-40                 |
| .250 (6.35)  | .500 (12.70)  | 8103-0109-40                 |
| .250 (6.35)  | .750 (19.05)  | 8103-0110-40                 |
| .250 (6.35)  | 1.000 (25.40) | 8103-0111-40                 |
| .312 (7.92)  | .625 (15.88)  | 8103-0112-40                 |
| .312 (7.92)  | .875 (22.23)  | 8103-0113-40                 |
| .375 (9.53)  | 1.000 (25.40) | 8103-0114-40                 |
| .437 (11.10) | 1.000 (25.40) | 8103-0115-40                 |
| .500 (12.70) | 1.000 (25.40) | 8103-0116-40                 |

For other platings, replace the suffix "40" as follows: 41—Tin plate; 47—Nickel plate; 48—Cadmium plate.

### Hollow Core Double Round

| Height      | Width         | Beryllium Copper Part Number |
|-------------|---------------|------------------------------|
| .062 (1.57) | .500 (12.70)  | 8104-0101-40                 |
| .125 (3.18) | .500 (12.70)  | 8104-0102-40                 |
| .125 (3.18) | .750 (19.05)  | 8104-0103-40                 |
| .125 (3.18) | 1.000 (25.40) | 8104-0104-40                 |
| .187 (4.75) | .625 (15.88)  | 8104-0105-40                 |
| .187 (4.75) | 1.000 (25.40) | 8104-0106-40                 |
| .250 (6.35) | .750 (19.05)  | 8104-0107-40                 |
| .250 (6.35) | 1.000 (25.40) | 8104-0108-40                 |
| .375 (9.53) | 1.000 (25.40) | 8104-0109-40                 |

For other platings, replace the suffix "40" as follows: 41—Tin plate; 47—Nickel plate; 48—Cadmium plate.

Metric units are indicated in parentheses.

This Series from Instrument Specialties is designed for use where high temperature or other design considerations preclude the use of adhesive-mounted gasketing. Yet it provides the same shielding characteristics and effectiveness as our Sticky Fingers® mounted series. Clip-on gaskets offer shielding effectiveness > 100 dB at 100 MHz plane wave. All are available in standard 16" (406 mm) lengths, and in your choice of finishes.

### Snap-tite™, with "D" lance

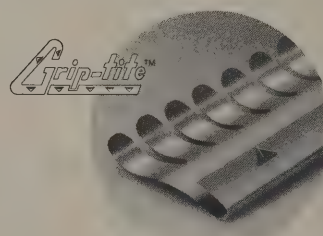

This configuration has been designed specifically to provide outstanding holding power. "D" lances snap into drilled or punched holes in the mounting surface to create a strong omnidirectional grip with excellent conductivity.

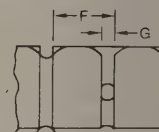

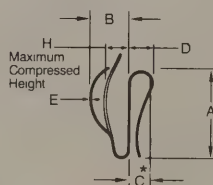

### Grip-tite™, with "T" lance

Ideal for use with softer materials, such as aluminum or plated plastic, sharp "T" lances bite into the mounting surface and preserve electrical conductivity.

Parts may be supplied with holes for cleaning and plating purposes. These holes will not affect the overall performance of the product.

### Clip-On Series 97-604/605, 606/607

## Shielding

## Clip-On Twist Series

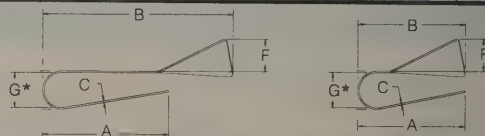

Ideal for general shielding applications where mounting space is at a premium, Clip-On Twist Series strips combine the performance advantages of scientific twist design with the strength of clip-on mounting.

Clip-On Twist Series gaskets are offered in four different widths, each available in either equal leg or offset leg configurations. In addition, each configuration is available with Poron rubber environmental gaskets for dust and moisture resistance, as well as with "D" lances that snap into .10" (2.5 mm) diameter holes to provide added mounted strength.

This Series offers shielding effectiveness > 115 dB at 100 MHz plane wave, and is provided in standard 16" (406 mm) lengths. All are available in your choice of finishes.

\*Variations in the clip-on area are available. Consult Customer Service.

## Shielding

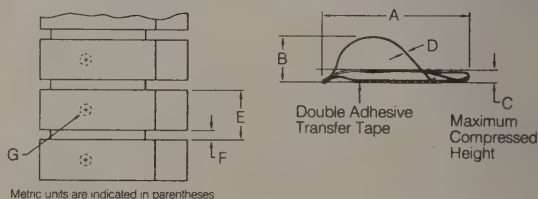

## Foldover Series

This version of Sticky Fingers® beryllium copper shielding gaskets features a special U-shaped end that permits the finger of the strip to slide when enclosure doors are closed. It also retains the strip's fingers when enclosure doors are open, thus preventing accidental damage to the strip's fingers. Shielding effectiveness is > 115 dB at 100 MHz plane wave.

Four models provide you a choice of widths to suit your application. They are available in standard 16" (406 mm) lengths, except 97-515 which is furnished in 24" (610 mm) lengths. Also, all styles are available in continuous 25-ft (7,6 m) coils, and in your choice of all finishes except tin lead and satin tin.

## Shielding

## Twist Series

Self-adhesive beryllium copper contact strips with scientific twist design offer narrow electronic gaskets for general shielding applications.

Four different widths are available to suit your specific application for single edge contact strips. Also available are two 90 degree versions (Series 97-551 and 97-558) to provide alternate mounting capability. Series 97-555, 97-558, and 97-559 provide shielding effectiveness > 100 dB at 100 MHz plane wave, ideal for all types of panel or electronic enclosures. Series 97-550, 97-551, and 97-560 provide shielding effectiveness > 115 dB at 100 MHz plane wave. Series 97-560 strips are especially suitable for cabinets with panel-divider bars. Their unique double-edge design permits panels to be removed easily and replaced without damage to the installed strip.

All Twist Series strips are furnished in 24" (610 mm) lengths. Strips except 97-551 and 97-558 are also available in standard 25-ft (7.6 m) coils. Right angle product configurations are not available in coils. All are available in your choice of finishes.

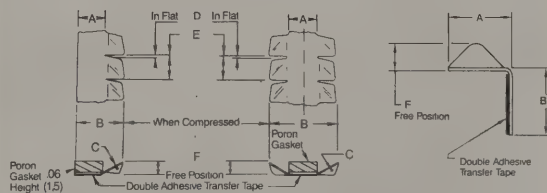

### Poron environmental rubber gasket

Series 97-556 and 97-561 are versions of 97-555 and 97-560, respectively, incorporating a Poron rubber gasket to act as an environmental shield, offering a high degree of protection against dust and moisture. All are available in your choice of finishes.

**Parts may be supplied with holes for cleaning and plating purposes. These holes will not affect the overall performance of the product.**

## Shielding

## Symmetrical Slotted Shielding (S<sup>3</sup>)

Strips with Sticky Fingers and rivet mounts exhibit typical attenuation >100 dB at 100 MHz.

Sticky Fingers is a registered trademark of Instrument Specialties Co., Inc.

### With Sticky Fingers®

Series 97-951/954/957 are low-compression, adhesive-mounted beryllium copper shielding strips. Designed as a continuous band, the strip is slotted to permit spring contact throughout its length. A wide radius profile creates the greatest contact for maximum conductivity with minimum compression requirements. As with all Sticky Fingers® shielding strips, a self-adhesive tape makes mounting easy and secure. All are available in your choice of finishes.

### With bi-directional rivet mount\*

Series 97-952/955/958 are as described above, but with the addition of an integral pierced track to provide plastic push rivet mounting in a .125" (3.2 mm) diameter hole.

Designed especially for slide applications, this configuration allows total symmetrical compression action with bi-directional engagement. It is recommended for high-temperature and/or extremely high side-load situations, such as PC board connections and electronic drawers. All are available in your choice of finishes.

# Magnetic Shielding Products

The items below are only examples of our capabilities. Please contact us for further information.

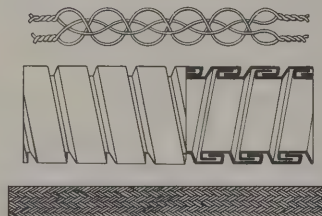

## Lab Kits & Probes

Lab Kit contains assorted CO-NETIC and NETIC shielding alloys, double-faced pressure sensitive tape for shield construction and 20 millivots/gauss A.C. magnetic pickup probe, LK-120 ..... \$129.00  
 AC Probe only, 20 mV/gauss, axial, EP-101A ..... \$49.50  
 AC Probe, 60 mV/gauss, axial or transverse, EP-102A or T ... \$79.50  
 AC/DC probe, HP-103 B ..... \$195.00  
 Request Lab Kit catalog LK-2, Probe catalogs EP-4, HP-2

## Component Shields

Full time engineering staff available for consultation on shielding problems. Magnetic Shield Corporation is also the preferred source for custom shields to your specifications. Extensive standard and special tooling provide fast shipment. Call for design assistance or send print for prompt quotation.

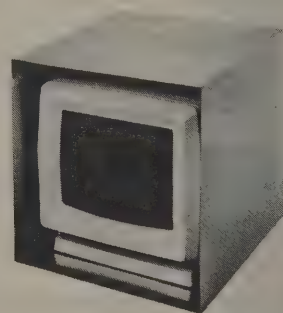

## Cable, Conduit & Sleeving

Our patented, Inter-8 Weave configuration of four #24 AWG wires provides superior attenuation over twisted pair. Insulation choice is PVC or ETFE. Available unshielded or with braided CO-NETIC for magnetic shielding. SPIRA-SHIELD Flexible Conduit stocked in 3/8" I.D., CO-NETIC Braided Sleeving stocked in 1/4" & 1/2" I.D., CO-NETIC wire stocked in #36 AWG. Request catalog WC-2

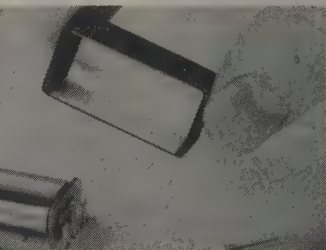

## Monitor Enclosures

CO-NETIC magnetic shield enclosures protect CRT monitors from magnetic fields (DC to 100 kHz) that cause shimmy or jitter of the display. Image distortions are often caused by high current industrial or electric power equipment, particularly in color and high resolution monitors. Engineering provided by specification guide CM-2.

## Photomultiplier Shields

CO-NETIC magnetic shields improve the amplification characteristics of photomultiplier tubes by providing significant attenuation of magnetic fields. Effective shielding is ensured over a wide range of field intensities. When grounded, the shields provide protection against electrostatic interference. Catalog lists all current photomultiplier tubes and recommended shields. Custom shields available. Request catalog PM-5

# CO-NETIC® & NETIC® Magnetic Shielding Alloys

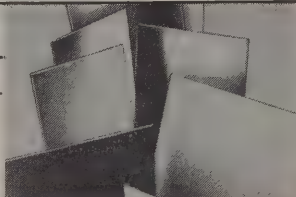

A complete stock of CO-NETIC (high permeability) and NETIC (high saturation) shielding alloys is available in sheet and foil form. Our engineering department will gladly assist you in the development of shield designs to meet your prototype or production requirements. Request catalog MG-5, material and fabrication guide for additional data and MIL specs.

**MAGNETIC SHIELD CORP.**

Perfection Mica Company  
750 North Thomas Drive  
Bensenville, Illinois 60106 U.S.A.  
FAX: 708-766-2813  
Telephone: 708-766-7800

**Sheet Stock:** standard 30" × 120" Shipped immediately from stock.

# Do you need magnetic shielding as good as M $\mu$ Shield®?

## Only if you need optimum attenuation.

Unless your design calls for magnetic shielding that meets the most stringent specs, you may not need to consider M $\mu$ Shield materials.

But, if you need custom shielding with maximum attenuation or tubing with totally uniform permeability, you do need M $\mu$ Shield. And you can get M $\mu$ Shield materials only from M $\mu$ Shield, a company with more than 35 years of experience.

The M $\mu$ Shield Company can satisfy the most demanding applications — aerospace, nuclear and electronic — with a wide variety of custom shields, materials, and services.

## M $\mu$ Shield cathode ray tube shields.

Assure high resolution. For use in special military applications. Also suitable for commercial, industrial, and laboratory applications.

## M $\mu$ Shield photomultiplier tube shields.

Ideal for electro-optical devices of all kinds, CAT- and PET-scan machines, and TV cameras.

## M $\mu$ Shield custom electronic components shields.

For use in computer-related technology such as disk drives, printed circuits, and PC terminals.

## M $\mu$ Shield special application shields.

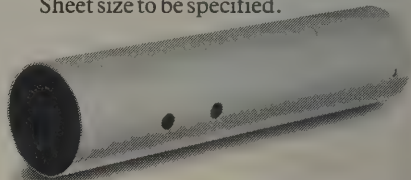

Nuclear Magnetic Resonance Imaging. Electron microscopes. X-ray spectrography. Wide area shielding in laboratories and sensitive areas.

## Coils, sheets and tubing in stock

- High saturation shielding. Permeability ranges from 200 to 50,000. Saturation point between 18,000 and 20,000 gauss.
- Medium permeability shielding. Permeability from 12,500 to 150,000. Saturation point approximately 15,000 gauss.
- High permeability shielding. Permeability from 80,000 (at B-40) to 350,000. Saturation point approximately 7,500 gauss.
- Dimensions:  
Coils — .004", .006", .010" thickness; 8" and 15" widths. Minimum order \$100.

Sheets — Cold rolled annealed, .015" to .060" thickness. Full sheet 30" × 10'. Minimum order 30" × 36'.

Hot rolled, .090" to .265" thickness. Sheet size to be specified.

**M $\mu$ Shield is the only supplier** of this seamless magnetic shield tubing. The unique manufacturing process eliminates the non-uniformity of permeability inherent in welded tubing.

Tubing — .10" to 2.00 ID. Wall thicknesses .010" to .060". Lengths to 20'.

## Heat treating service.

Gives magnetic materials optimum permeability with low shock-sensitivity. Permeability and uniformity of M $\mu$ Shield-fabricated parts are guaranteed.

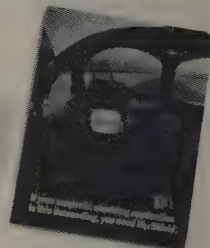

## Special consultation services.

We'll do more than just give you a quote. We'll do everything from on-site input meetings to prototyping, testing, and manufacturing. When your designs require optimum shielding, send us your specs and we'll be happy to review your application.

Now when you need magnetic shielding as good as M $\mu$ Shield, you don't need to worry.

Call or write The M $\mu$ Shield Company, 5 Springfield Road, P.O. Box 439, Goffstown, NH 03045. Phone 603/666-4433.

*Committed To Excellence Through Dedication To Quality*

## Outstanding Performance

Today's high tech products and components require sophisticated die cut parts to match. Thrust Industries is recognized as a leading producer of high quality die cut materials for the electronics, automotive, telecommunications, and appliance industries. At Thrust, we're dedicated to helping our customers achieve maximum efficiency and productivity by offering a wide range of customized materials and services.

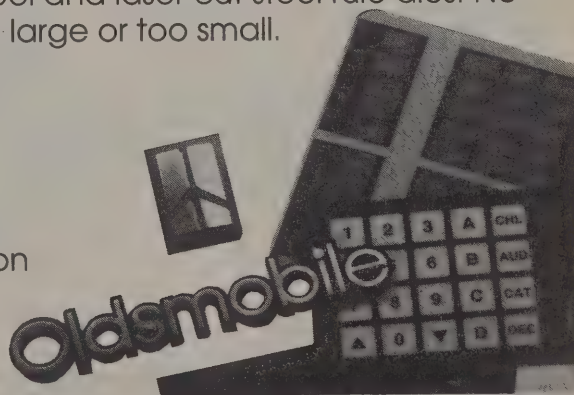

## Superior Accuracy

Our quality standards are among the highest in the industry. Using statistical process control to ensure accuracy, we consistently achieve minimum tolerances on critical dimensions. Each part is produced according to your exact specifications. In addition, we offer both matched metal hard tool and laser cut steel rule dies. No request is too large or too small.

## Exceptional Delivery

Performance and accuracy count only if you receive your parts on time. You can depend on Thrust Industries for prompt turn-around and delivery. After prototype approval, orders are typically shipped in 10 working days or less.

# ABLE RATED™

**Electronic Cable Hook Up Wire, Power Cords, Shrink and Flex Tubing, Cable Ties, Flat Ribbon Cable, Custom Assemblies, and Connectors, Coaxial Hi Temperature and Data Cable.**

## MULTI-SPEC WIRE

**PVC Insulation—Light Wall  
SPECIFICATIONS**

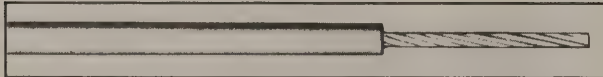

- **Conductor:** Solid, stranded or bonded tinned copper
- **Insulation:** Polyvinylchloride (PVC)
- **Insulation Thickness:** .010"
- **Stranding:** Smooth bunch
- **Colors:** White, black, red, green, yellow, light blue, brown, orange, gray, violet, pink, tan and dark blue
- **Stripes:** Any color over colors listed above (Maximum 3 stripes per wire)
- Wire printed with UL and CSA information

**ABLE RATED MULTI-SPEC HOOK-UP WIRE  
meets or exceeds the electrical  
characteristics of the following:**

|                    |      |       |
|--------------------|------|-------|
| UL Style 1061      | 300V | 80°C  |
| CSA Type SRPVC, T2 | 300V | 80°C  |
| MIL-W-76 Type LW   | 300V | 80°C  |
| M 16878/1 Type B   | 600V | 105°C |

**PVC Insulation—Medium Wall  
SPECIFICATIONS**

- **Conductor:** Solid, stranded or bonded tinned copper
- **Insulation:** Polyvinylchloride (PVC)
- **Insulation Thickness:** .016"
- **Stranding:** Smooth bunch
- **Colors:** White, black, red, green, yellow, light blue, brown, orange, gray, violet, pink, tan and dark blue
- **Stripes:** Any color over colors listed above (Maximum 3 stripes per wire)
- Wire printed with UL and CSA identification

**ABLE RATED MULTI-SPEC HOOK-UP WIRE  
meets or exceeds the electrical  
characteristics of the following:**

|                   |       |       |
|-------------------|-------|-------|
| UL Style 1007     | 300V  | 80°C  |
| UL Style 1569     | 300V  | 105°C |
| CSA Type TR64, T1 | 300V  | 90°C  |
| MIL-W-76 Type MW  | 1000V | 80°C  |
| M 16878/2 Type C  | 1000V | 105°C |

# ABLE RATED™

## 22 AWG UNSHIELDED PAIRED AND UNPAIRED CABLE

**APPLICATIONS:** Multi-purpose unshielded, PVC insulated, paired and unpaired cable for use in various electrical and electronic equipment, control circuits, computers, and other data transmission and signal applications.

UL Conductor Style 1061 VW-1 300V 80°C  
UL Cable Style 2464 VW-1 300V 80°C  
CSA Conductor Type SR-PVC 300V 80°C  
CSA Cable Type AWM 300V 80°C

**Conductor:** 22 AWG, 7×30 stranding, tinned copper  
**Insulation:** .010" Color coded PVC except \*\* .015  
**Construction:** Conductors Cabled or paired with fillers as required  
**Jacket:** Gray PVC

## COLOR CODE CHART UPON REQUEST

## ABLE TYPE SA221 HEAT SHRINKABLE FLEXIBLE POLYOLEFIN

**DESCRIPTION:** ABLE TYPE SA221 is flexible, cross-linked polyolefin heat shrinkable tubing available on spools or in cut lengths that will recover to half its original length when heated to temperatures of 250°F (121°C). During the shrinking operation the tubing will encapsulate any device inside of it and assume the contour of that device. Continuous operating range -55°C to +135°C. SA221 conforms to MIL-I-23053/5 Type 1 (all colors and Type 2 clear). Type 1 recognized by UL and CSA and meet SAE Aerospace Material Specification AMS 3636. Type 2 meets SAE AMS 3637.

2:1 shrink at 250°F (121°C)  
600V 125°C VW-1  
UL recognized  
CSA certified

MIL-I-23053/5  
Type 1 and 2  
Class I and II  
AMS 3636 and 3637

**STANDARD COLORS:** Natural, Black available at additional 15%

**OTHER COLORS:** Please call for quote

**NOTE 1:** Meets MS3367/4 except accommodates a larger bundle diameter

**NOTE 2:** Meets MS3367/5 except accommodates a larger bundle diameter

**NOTE 3:** Meets MS3367/3 except accommodates a larger bundle diameter

# ABLE RATED™

Electronic Cable, Hook Up Wire, Power Cords, Shrink and Flex Tubing, Cable Ties, Flat Ribbon Cable, Custom Assemblies, and Connectors, Coaxial, High Temperature and Data Cable.

## EX-FLEX MICRO MINIATURE INSULATED LEAD WIRE

### APPLICATIONS

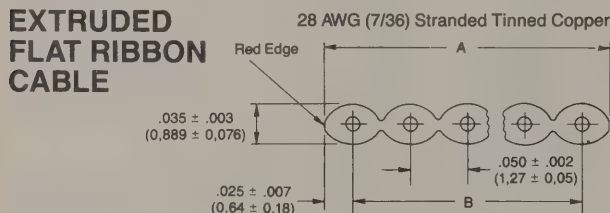

An instrument lead where ultra-flexibility is required in a micro-miniature size, for use in guidance control systems, gyroscopes, data processing equipment, biomedical instruments, or wherever continuous flexing is encountered.

### FEATURES

**Conductor:** Soft bare annealed copper  
**Insulation:** Special soft PVC compound formulated for superior flexibility, dielectric durability, and reliability  
**Temp Rating:** 90°C  
**UL:** On request

COLORS: White, black, red, green, yellow, blue, brown, orange, gray, and violet.

### FEATURES

Dimensions and characteristics subject to change without notice.

- Fast, mass termination to all standard 50 mil (IDC) connectors
- Up to 64 conductors, precisely spaced for controlled electrical characteristics
- Highly flexible
- Double contour allows termination from either side of cable, easy conductor separation for circuit routing
- UL listed Style 2651

### ELECTRICAL CHARACTERISTICS

**Voltage rating:** 300V  
**Temperature rating:** 105°C  
**Impedance:** 105 Ohms nominal  
**Capacitance:** 15 pF/ft (49.2 pF/m) nom.  
**Insulation resistance:** 10<sup>10</sup> Ohms/10 ft (3m) min.  
**UL style number:** Cable Style 2651

**PACKAGING**—100' lengths—also available in 300' lengths

## SHIELDING AND BONDING FLAT COPPER BRAID

### APPLICATIONS

Very flexible multi-strand tinned copper braid for use as ground strap or for shielding applications. Braid is supplied flat or available in a tubular configuration.

### TINNED COPPER FLAT BRAID

# ABLE RATED™

**Electronic Cable Hook Up Wire, Power Cords, Shrink and Flex Tubing, Cable Ties, Flat Ribbon Cable, Custom Assemblies, and Connectors, Coaxial Hi Temperature and Data Cable.**

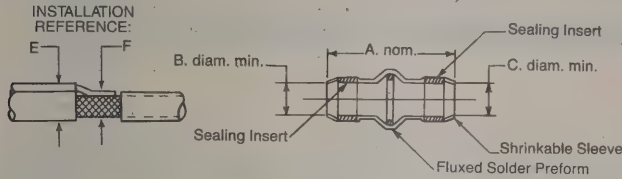

## SPECIAL TERMINATION SLEEVES

Designed for terminating wire & cable with tin coated or silver plated shields with either high temperature (125°C Series SSH) or low temperature insulations (105°C Series SSL).

Solder preforms with heat shrink irradiated polyvinylidene flouride tubing conforming to MIL-1-23053/8. Using prefluxed SN63RMA Per QQ-S-571 and thermoplastic melttable sealing inserts. Designed to be terminated with infrared heating tools.

### OPERATING TEMPERATURE

SSH SERIES (BLUE TINT) -55°C TO 15°C  
SSL SERIES (CLEAR) -55°C TO 105°C

## INSULATED GROUND STRAP

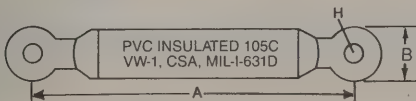

(UL APPROVED) PASSES ALL REQUIREMENTS OF UL SPEC 94VO

Flexible Ground Straps, Double insulated laminates of Copper (inside) and Mylar® outside. The Ends Tinned and Pre punched for a No. 10 Screw for ease of termination. These Straps provide a low impedance ground path at R.F. reducing EMI problems caused by wire grounds. These ground straps are recommended wherever board to chassis or chassis to cabinet grounding is required.

# BRIM WIRE — CABLE — TUBING — HARDWARE

ELECTRONICS, INC. FAIR LAWN, N.J. 201-796-2886

## BRIM CHV CORONA RESISTANT HIGH VOLTAGE TEFLON\* CABLE

BRIM CHV eliminates the need for bulky, thick insulation, as used with silicone rubber high voltage cables, and provides high temperature resistance not available with polyethylene insulated high voltage cables, plus the added benefit of retarding and deterring corona discharges. Even under severe stress, including mechanical strain, moisture, corona or chemical, or high temperature conditions, there is no cracking of the insulation. Cable construction meets and exceeds MIL-W-16878D.

**OPERATING VOLTAGE:** Voltage capabilities are based on the thickness of the jacket.

**OPERATING TEMPERATURE:** -90°C to +250°C

**DESCRIPTION:** Silver plated copper conductor, per QQ-W-343, special corona retarding insulation, TFE tape wrap insulation, & a color coded jacket overall.

**STD. COLORS:** Red, White, Black, Green, Blue, Yellow, Orange, Brown, Purple, Gray. Stripped colors are also available.

**STD. P-U:** 250', 500', 1000'.

CONSTRUCTION VARIATIONS AVAILABLE TO ORDER.

## BRIM HIGH TEMPERATURE LEAD WIRE

These small diameter high temperature lead wires allow unique constructions. The basic wire conforms to MIL-W-3861-stranded nickel plated copper; when shielded, nickel plated copper shielding is per MIL-N-46026A. Rated for 100 Volts RMS.\*

**Type 1: 800°F High Temperature Rating** — Suitable for aircraft, or missile lead wire, heaters, furnaces, ovens and kilns for operations between 500°F to 800°F. Cond. insulation: Fiberglass braid, impregnated with a silicone varnish, over a stranded nickel plated conductor.

**Type 2: 1500°F High Temperature Rating** — Suitable as a radiation resistant aircraft, or missile lead wire, furnaces, ovens and kilns for operations between 800°F to 1500°F. Cond. insulation: Inorganic braid over a stranded nickel plated copper conductor.

**Type 3: 2000°F High Temperature Rating** — Suitable as a radiation resistant aircraft or missile lead wire for operations between 1500°F to 2000°F. Cond. Insulation: special formulated ceramic braid over a stranded nickel plated copper conductor, and a nickel plated braided shield overall.

\* For dry locations.

600 V RMS is available to order.

### ELECTRONICS, INC. FAIR LAWN, N.J. 201-796-2886

TFE & FEP TEFLON SHIELDED CABLES • BRIMCROM • BRIMFLYX • STAINLESS STEEL TUBULAR BRAID  
TEFLON IMPREGNATED BRAID OVER SHIELD PER MIL-W-16878 • SHIELDED RETRACTILE CORD

**DESCRIPTION:** One to five twisted conductors of Type E extruded TFE\* insulation (.010" wall), over a stranded silver plated copper conductor. If shielded, braided silver plated shield with a min. coverage of 90% over the conductor(s). When jacketed, either a fused double reversed TFE tape wrap jacket, a Teflon\* impregnated fiberglass braided jacket, or an extruded FEP jacket. Cables are fungus, solvent, flame, acid, alkali, and oil resistant. Rated for 600 Volts. Stranding: 26 AWG — 7 strands, 24 AWG to 16 AWG — 19 strands. Color code: 1-White, 2-Black, 3-Red, 4-Green, 5-Yellow. Jacket color: White. OPER. TEMP.: TFE —65°C to +250°C. FEP: —65°C to +200°C.

### BRIMCROM™

#### MICROMINIATURE TEFLON\* HOOK-UP WIRE

Conductors are silver plated copper dip coated with TFE Teflon\* insulation. Rated for 300 Volts, —90°C to +250°C. BRIMCROM is highly flexible, chemically inert, weather resistant, nonflammable. Suitable wherever high temperatures and lack of space are absolutely critical, such as aircraft, missiles, medical, and microminiaturized electronic components, and system designs.

STD. P-U: 1000'

STD. COLORS: WHITE, RED, BLACK, GREEN.

OTHER COLORS AVAILABLE TO ORDER. OTHER CONSTRUCTION AVAILABLE TO ORDER.

TWO AND THREE CONDUCTOR LAMINATED RIBBON CABLES USING BRIMCROM CONDUCTORS ARE AVAILABLE TO ORDER.

### BRIMFLYX™ ULTRA-FLEXIBLE WIRE

**DESCRIPTION:** Soft bare copper conductor, insulated with a special flexible PVC formulation to minimize kinking & allow for ultra-low bending torque.

Designed for use where wires encounter continuous flexing, such as in data processing equipment, mercury thermostats, magnetic drums, and rotating servo platforms.

OPER. TEMP.: —40°C to +80°C. STD. P-U: 1000 FT.

STD. COLORS: WHITE, BLACK, RED, GREEN. OTHER COLORS ARE AVAILABLE TO ORDER.

UL 1095 & UL 1568 AVAILABLE TO ORDER.

### BRIM OVERALL SHIELDED RETRACTILE COMMUNICATION CORDS — UL APPROVED

RETRACTED LENGTHS: 1, 2, 3, 4 FT.  
EXTENDED LENGTHS: 5, 10, 15, 20 FT.

**DESCRIPTION:** 1 to 7 color coded conductors of 23 AWG 21/36 TC, spiral wrapped TC shield over the conductors, Black "BRYON" jacket overall. UL approved for 1 AMP & 300V max.

OPER. TEMP.: —20°C to +80°C.  
STD. PKG.: 6

## UL & CSA POWER RETRACTABLE CORDS

RETRACTED LENGTHS: 1 ft., 2 ft., 3 ft., 4 ft. EXTENDED LENGTHS: 6 ft., 11 ft., 22 ft. BRIM retractable cords are long lasting, and useful where cords must change their length or position. Our cords will extend to approximately six times their retracted length, and will return to their original shape and length, when they are released. Retractable cords eliminate tangles, twists, knots. OPER. TEMP.: -20°C to +60°C. COND. COLOR CODE: 1-Black, 2-White, 3-Red, 4-Green, 5-Orange, 6-Blue, 7-Yellow, 8-Red/Black. VOLTAGE RATING: SVO SJO SVT & SJT—300V; SO & ST—600V.

## RETRACTILE COMMUNICATION CORDS

### UL APPROVED RETRACTED LENGTHS: 1, 2, 3, 4 ft.

EXTENDED LENGTHS: 6, 11, 16, and 22 ft. OPER. TEMP.: -20°C to +80°C

DESCRIPTION: Cords are composed of multicond. 23 AWG 21/36 tinned soft copper for a longer flex life. Cords are jacketed in either TPR, or special vinyl "Byron" formulation, for a long service life. These cords are suitable for communication equipment, such as ham operations, head sets, radio equipment, telephone car carriers, etc. 300V working, 1 AMP carrying capacity. Nom. cond. resistance .022 ohms per linear foot, .185 ohms per retracted foot. † Stocked in Byron only. STD. PKG.: 6

## SHIELDED RETRACTILE COMMUNICATION CORDS

RETRACTED LENGTHS: 1, 2 and 4 ft.  
EXTENDED LENGTHS: 6, 11 and 22 ft.

DESCRIPTION: Single and multi-cond. spiral shielded communication cables, jacketed in TPR or "Byron" plastic. Shielded conductors are individually shielded. Shield can be pigtailed for soldering. Safe and reliable as a mike cord.

OPER. TEMP.: -20°C to +80°C.

## BRIM MINIATURE SHIELDED COMMUNICATION CORDS

1 FT. RETRACTED FOR 5 FT., EXTENDED

Miniature in size. Suitable for compact equipment, such as FCC required shielded cords for computers or other interfaced devices. All conductors are 28 AWG 19/40 TC, with an aluminum mylar foil shield (foil out), a spiral TC shield, & then a Black Byron VW-1 vinyl jacket overall. 18" & 2" straight ends, cut blunt. Long lasting.

OPER. TEMP.: -20°C to +60°C

# BRIM

## WIRE — CABLE — TUBING — HARDWARE

### ELECTRONICS, INC. FAIR LAWN, N.J. 201-796-2886

## BRIM MINIATURE CABLES • COMMERCIAL RG59/U CABLE

### BRIM COMMERCIAL RG 59/U CO-AX

DESCRIPTION: A type RG 59/U construction, composed of 22(1) bare Copperweld, .055" wall of cellular Polyethylene dielectric, 4x28 AWG drain wires over an Aluminum Polypropylene tape shield, for 100% coverage, and a Black\* PVC jacket overall. MAX. OPER. VOLTAGE: 500V RMS. Dielectric Strength: 1000V RMS. OPER. TEMP.: 80°C STD. P-U: 1000'

#### ATTENUATION RATINGS FOR BC-59/U.

### MINIATURE SHIELDED CONTROL AND INSTRUMENTATION CABLES — 600V 105°C MIL-W-16878D TYPE B

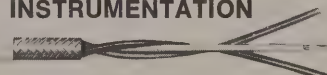

DESCRIPTION: Stranded tinned copper conductors, .010" wall PVC, cabled, mylar binder, braided tinned copper shield, 90% min. coverage, gray PVC jacket overall. All material pass UL VW-1 test. OPER. VOLT.: 600 Volts. OPER. TEMP.: -55°C to +105°C. PVC is resistant to acid, fungus, oils, moisture, solvents, flame. Used as an interconnecting cable for electronic equipment, control and instrumentation cable telemetry and remote control cable for sensitive recording instruments. STD. P-U: 500', 1000'.

### BRIM MINIFLYX™ SUBMINIATURE ULTRA-FLEXIBLE INSTRUMENTATION CABLES

DESCRIPTION: Ultra-flexible stranded bare copper conductors, .005" wall of soft flexible PVC, braided shield, White .010" soft flexible PVC jacket overall. Suitable as an instrumentation cable where Ultra-flexibility & subminiaturization are essential, in low voltage applications. For example: bio-medical instruments, missiles, computer, miniature relays, disc drives, servo systems, recorders. OPERATING TEMPERATURE: -40°C to +90°C. OPERATING VOLTAGE: 200 Volts.

ELECTRONICS, INC. FAIR LAWN, N.J. 201-796-2886

### BRAIDED TC SHIELDED CONTROL — INSTRUMENTATION — MICROPHONE CABLES

#### UL SHIELDED COMPUTER AND CONTROL CABLES

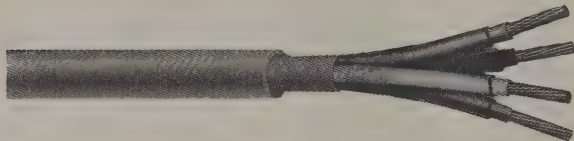

DESCRIPTION: Each conductor UL Type 1061, 24 AWG 7/32 T.C., UL VW-1. Conductors are paired, cabled, mylar wrap, braided tinned copper shield, chrome PVC jacket overall. Color coded. Shielding coverage a minimum of 85%. Cable meets UL Styles 2343 & 2344. Suitable as a control cable, computer cable, shielded audio cable. OPERATING VOLTAGE: 300V UL. OPERATING TEMPERATURE: -40°C to +80°C. STD. P-U: 500', 1000'.

#### HEAVY DUTY SHIELDED CONTROL CABLES MIL-W-16878D TYPE C-18 1000V

DESCRIPTION: MIL-W-16878D Ty C-18, 19/30 TC conductors, twisted, mylar wrap braided tinned copper shield — 90% minimum coverage — chrome PVC jacket overall. Color coded. Cable resistant to acids, oils, moisture, solvents, alkalis, fungus. Cable meets UL VW-1 vertical flame test requirements. OPERATING VOLTAGE: 1000V. OPERATING TEMPERATURE: -55°C to +105°C. Suitable as an interconnecting cable for electronic equipment, instrumentation, control, telemetry data, and remote control of sensitive recording instruments.

STD. P-U: 500', 1000'.

## ALUMINUM MYLAR FOIL SHIELDED CABLES

### ALUMINUM MYLAR FOIL SHIELDED CABLE — INSTRUMENTATION CABLES

DESCRIPTION: Stranded TC conductors, polyethylene insulation, conductors twisted, an aluminum mylar foil shield, foil out, TC drain wire, gray PVC jacket overall. Color coded. Suitable as a light weight shielded instrumentation cable. Shield provides 100% coverage, and drain wire provides quick and easy grounding. OPERATING VOLTAGE: 400V. OPERATING TEMPERATURE: -20°C to +60°C. COLOR CODE 1-Black, 2-Red, 3-White, 4-Green.

\* Common drain wire, and common axis.

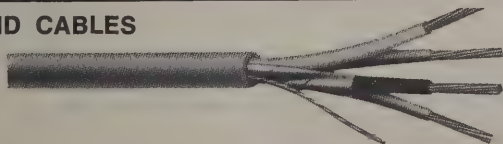

### MULTIPLE PAIRED COMMUNICATION CABLES

DESCRIPTION: 22 AWG SOLID TC conductors, .008" wall polypropylene, or .010" wall PVC, color coded, conductors are twisted into pairs, the pairs are cabled, an aluminum mylar foil shield over all pairs, foil out, a stranded TC drain wire, chrome PVC jacket overall. Suitable for communication telephone and sound systems, control and instrumentation cable. OPERATING VOLTAGE: 200V. OPERATING TEMPERATURE: -40°C to +105°C.

### SOUND CABLES

DESCRIPTION: Four conductors, stranded TC, .009" wall polypropylene, two conductors inside an aluminum mylar foil shield, foil out, a stranded TC drain wire and two conductors outside of shield, chrome PVC jacket overall. Polypropylene insulation is used because of its mechanical toughness and excellent high frequency properties. OPERATING VOLTAGE: 300V. OPERATING TEMPERATURE: -40°C to +105°C. COLOR CODE: Shielded: 1-Black, 2-Red. Unshielded: 3-Green, 4-White.

## CONTROLLED IMPEDANCE CABLE — ELECTRONIC LACING CORDS & TAPES

### BRIM BRIBBON™ 100 OHM CONTROLLED IMPEDANCE CABLE — UL 2651

DESCRIPTION: Flexible .010" UL VW-1 PVC insulation over 28 AWG 7/36 TC conductors, laid parallel. All conductors are colored Gray, with one edge Red for polarity identification. MEETS UL 2651.

BRIBBON™ cables are designed for fast, mass termination to all standard .050" IDC connectors. Double contour allows reverse plane terminations. Easy conductor separation for circuit routing, and uniform breakouts for harness production.

BRIBBON™ cables replace bulky round twisted paired cables, providing easy routing & greater space utilization within confined chassis. Precise spacing for controlled electrical characteristics — controlled crosstalk thru precisely controlled impedance and capacitance.

STD. P-U: 100 ft.

### NYLON FLAT BRAIDED LACING TAPE MIL-T-43435 TYPE I FINISH B

Nylon flat braid, treated with a microcrystalline fungicidal wax finish. Stays flat, flexible, and creates a wider contact to distribute stress. Won't slip when tied. Resistant to fungus, flame, abrasion, and acids.

\* Measured Ground-Signal-Ground-Signal, etc., with all grounds common.

### DACRON FLAT BRAIDED LACING TAPE MIL-T-43435 TYPE II FINISH B

Dacron flat braid, treated with a microcrystalline fungicidal wax finish to help prevent slipping when tying knots, resists fungus and mildew. Won't cut or damage items being held together. Stays flat. Superior to nylon in resistance to acids, and elongation.

| BRIM No. | Color | Size | Nom. Width | Nom. Thick. | Tensile Strength | Std. P-U  |
|----------|-------|------|------------|-------------|------------------|-----------|
| 819      | White | 2    | .110"      | .015"       | 80#              | 250 yards |

### TEFLON FIBERGLASS FLAT BRAIDED LACING TAPE — MIL-T-43435 TYPE IV

OPERATING TEMPERATURE: -103°F to +800°F FINISH D. Teflon impregnated fiberglass braided flat, gives high temperature performance, and strength. Stays flat. Teflon finish adds strength and abrasion protection. Will not cut or damage item tied.

| BRIM No. | Color | Size | Nom. Width | Nom. Thick. | Tensile Strength | Yds./Tube |
|----------|-------|------|------------|-------------|------------------|-----------|
| 805      | White | 1    | .225"      | .016"       | 200#             | 250       |

## FLAT BRAIDED TINNED COPPER SHIELDING — TUBULAR BRAID PER QQ-B-575A

### FLAT BRAIDED TINNED COPPER

TINNED COPPER FLAT shielded braid, woven then rolled flat. Conductors are annealed for flexibility. Used as grounding cable, bonding strap for aircrafts, marine equipment, vehicles, etc., to eliminate ignition interference. Easily slides over wire and cables. Also used as a high current conductor at low voltages.

### TUBULAR BRAID PER QQ-B-575A

TINNED COPPER TUBULAR shielded braid mfg. round per MIL Spec. QQ-B-575A. Shielding coverage of 95% or more. Used in military or critical commercial applications where maximum shielding coverage is required against electrostatic interference. Also useful as grounding wire/cable, bonds, leads, flexible connectors, and protection against mechanical abrasion and stresses for wires/cables. Each wire is soft drawn tinned copper.

## WIRE — CABLE — TUBING — HARDWARE

### ELECTRONICS, INC. FAIR LAWN, N.J. 201-796-2886

## HEAT SHRINKABLE TUBINGS: BRIFLON™ TEFLON — SILICONE RUBBER TUBING

### SH200, SH250, SH254 & SHTF

tubings have excellent resistance to weathering, chemicals (oils, fuels, solvents, acids, alkalis, fluids), & fungus, are non-corrosive, low water absorption (.01%), will not burn nor support combustion, have hi dielectric strength (850V/MIL dry), low dielectric constant, & a very low coefficient of friction. Hi mechanical strength yet flexible. (Low temp. flexibility -67°C). Their excellent electrical characteristics remain stable throughout their electrical range. Longitudinal change with full shrinkage: FEP -15%; TFE -20%. Color: Natural (FEP-transparent; TFE-translucent).

### SH200 (FEP) MIL-I-23053/11

SH200: an extruded modified FEP (Fluorinated-Ethylene-Propylene) Teflon\* tubing, with a continuous Oper. Temp. of +205°C (400°F). SH200 completely shrinks at 350°F (partial shrinkage possible at 200°F). Shrinkage ratio — 1.3:1. It melts at 525-563°F so it can be used to encapsulate. Now many sensitive components, parts, devices, etc. can be protected with Teflon\*. Fills void between the hi temp. of TFE, and low temp. of PVC and polyolefin tubings.

### BRIFLON SH206 HIGH SHRINK RATIO — 1.6:1 FEP TUBING

BRIFLON SH206 tubings are extruded modified FEP (Fluorinated-Ethylene-Propylene) Teflon\*, with an operating temperature up to 205°C (400°F). It can completely shrink at 350°F, with partial shrinkage as low as 200°F. Suitable for those applications where 1.6:1 shrink capabilities are required (standard 1.3:1 shrinkage is insufficient). Sensitive components, parts, devices, etc. can be protected with Teflon\*.

Meets MIL-I-23053/11 Cl.2. Std. Color: Natural (Transparent).

### SH250 (TFE) MIL-I-23053/12

SH250: an extruded modified TFE (PolyTetra-FluoroEthylene) Teflon\* tubing, with a continuous Operating Temperature of +250°C (550°F). SH250 will shrink when heated to 621°F. Shrinkage ratio — 2:1. Used wherever hi-temperature protection required. Applications: Protective covers in corrosive environments, protection for electronic components, cable jacketing, covers on immersion heaters, heat exchangers, light duty bearing surfaces, roll covers.

### SHTF SHRINKABLE TFE/FEP

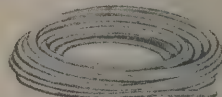

SHTF is made with a combination of TFE and FEP Teflons\*. The inner wall is made of FEP and the outer wall of TFE. When the tubing is heated, the TFE begins to shrink down tightly over the FEP. The FEP inner wall melts and flows-squeezes-into and around the item covered, creating a solid or near solid encapsulation. The fit is so tight that it is safe against most environmental hazards, involving pull or vibrations. It can be used as a strain relief, or moisture-proof covering for wires, connectors, terminals, splices, electronic devices, etc. SHTF is non-flammable, non-corrosive, and offers all of the other outstanding electrical, chemical, and mechanical properties of Teflon\*. Color: Natural (Transparent). OPERATING TEMPERATURE: -85°F to +450°F.

### BRIMFLEX BSR SILICONE RUBBER TUBING—ZZ-R-765 200°C

BRIMFLEX BSR Silicone Rubber tubing is an extremely elastic and stable high temperature and low temperature tubing. Besides being extremely flexible, it has excellent mechanical strength (tear resistance, tensile strength, elongation, and weather resistance), and outstanding dielectric strength, and corona resistance. BSR meets MIL-R-5847 and Fed. Spec. ZZ-R-765, Class 2b, STD. COLOR: WHITE. OPERATING VOLTAGE: 28 AWG-3/8" — 300V, 3/4"-1" — 600V.

### SH254 4:1 SHRINKABLE TFE

SH254 tubing can recover to approximately 1/4 of its expanded size when heated to its "gel" point (521°F-625°F). Because of its exceptional shrinkage capability, its recommended that the outside diameter of the object to be shrunk down upon should not be more than 50% of the expanded I.D. of the size of the tubing used. Many constructions conform to AMS 3584 and MIL-I-23053/12 class 5. SH254 is non-flammable, non-corrosive, and offers all of the other outstanding electrical, chemical, and mechanical properties of Teflon\*.

### BRIMFLEX™ SHRINKABLE TUBINGS — SPIRAL WRAP TUBINGS

### BRIFLEX™ SHRINKABLE PVC TUBINGS: MIL-I-23053/2B & HEAVY WALL PVC TUBING

### SHRINKABLE IRRADIATED POLYOLEFIN: MIL-I-23053/5 — SPIRAL WRAP TUBING

**BRIMFLEX™ POLYVINYLCHLORIDE SHRINKABLE TUBING — MIL-I-23053/2B & UL VW-1**

SHRINK RATIO: 2:1 (50%) — OPERATING TEMPERATURE: -20°C TO +105°C  
BRIMFLEX™ SH105 is a flexible all purpose shrinkable PVC tubing that shrinks 50% of its expanded size when exposed to temperatures below 200°F (within one minute). SH105 meets MIL-I-23053/2B, Class 21, and conforms to MIL-I-631D, Grade C. Longitudinal shrinkage: approximately 20%. SH105 is self-extinguishing, resistant to fungus, most oils, and chemicals, sunlight, moisture, and is non-corrosive. SH105 is suitable for insulating wires, cables, and electronic components, that vary in shapes, and dimensions. Produces a smooth snug flexible fit, in most applications — even around sharp bends. Dielectric Strength: 700V/MIL min., ASTM-D922. Tensile Strength: 2000PSI min. Suggested Storage Temperature: under 70°F for up to 10 months. UL Approved SH105 is available to order.

STD. COLORS: Black, Clear, Red, White. Other colors and †Class 1 is available to order.

### SHRINKABLE IRRADIATED POLYOLEFIN TUBING — ALL PURPOSE — MIL-I-23053/5

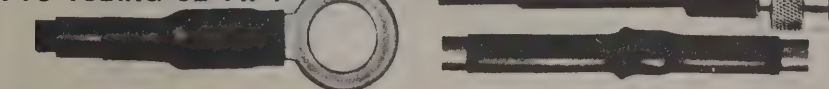

Flexible, yet greater electrical, chemical, and abrasion resistance, and greater mechanical strength than that of shrinkable PVC tubing. It not only insulates, it can also encapsulate, giving a watertight fit. Won't crack or peel. Its non-corrosive, has excellent resistance to soldering irons, oils, solvents, acids, alkalis, fuels, hydraulic fluids, fungus. Shrink Ratio-2:1 (50%). Shrinks when exposed to 250°F. Longitudinal shrinkage: 5%. Dielectric Strength: 1300V/MIL. Colored tubing is self-extinguishing; clear tubing is slow burning. Uses: Strain relief, jacketing material, component insulation. OPERATING TEMPERATURE: -55°C to +135°C. Meets MIL-I-23053/5, Class 1, 2. MIL-I-7444B, AMS 3636B, AMS 3637A, ASTM D876, ASTM D150, ASTM D257, ASTM D2671, ASTM D792.

SEMI-RIGID POLYOLEFIN SHRINKABLE TUBING IS AVAILABLE TO ORDER.  
CUT AND PRINTED WIRE MARKERS ARE AVAILABLE TO ORDER.

### SPIRAL WRAP TUBINGS FOR HARNESSING

Easily twists on and off. Can be repeatedly flexed without cracking or breaking. Expandable. Holds wire, and cable bundles securely, and allows leadoffs or additions at any point. Bends around sharp corners, and protection against sharp edges. Available in 4 types of insulations: Polyethylene, Rulan (a flame retardant type of polyethylene), Nylon, Teflon. All are resistant to organic solvents, alkalis, and acids (nylon satisfactory except for strong acids). OSHA and UL approved for harnessing cables.

**BLACK NYLON AND POLYETHYLENE SPIRAL WRAP FOR ULTRAVIOLET RAY PROTECTION IS AVAILABLE TO ORDER.**

**LOW & HI TEMP. PVC TUBING PER MIL-I-7444 & MIL-I-631 STOCKED.**

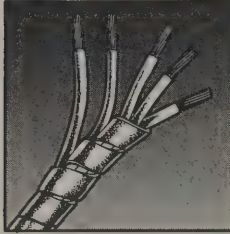

**SHRINK RATIO: 2:1 (50%) — OPERATING TEMPERATURE: -20°C to +105°C**

SH110 meets or exceeds the performance requirements of MIL-I-23053/2B, Class 2 but for its dimensions — its heavier wall. SH110 is a Heavy Wall Shrinkable PVC tubing, yet it's flexible, and will shrink at temperatures below 200°F (within one minute). Provides outstanding dielectric and mechanical protection without damage to enclosed or adjacent components, even around sharp bends. Longitudinal shrinkage: approximately 20%. SH110 is self-extinguishing, resistant to fungus, moisture, sunlight, and most oils, and chemicals. Dielectric Strength: 600V/MIL min., ASTM-D922. Suitable as a heavy duty all-purpose shrinkable tubing that is less expensive, almost as flexible, and has a higher temperature ability than that of Shrinkable Neoprene tubing. Suggested Storage Temperature: Under 70°F for up to 10 months.

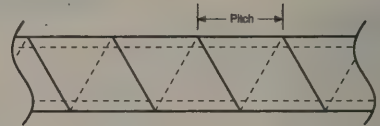

# FORWARD CUT SPIRAL WRAP

158 Governor Drive  
Orange, MA 01364-0720  
508-544-8255

- For Protection of Bundles from .063" to 7"
- Install Gapped for Greater Flexibility or Butted for Maximum Abrasion Resistance, Insulation and Rigidity.
- Available in 4 Materials Including Polyethylenes and Nylon.
- a.k.a.: Right-Hand Cut, Clockwise Cut
- Use Cutting Tool SR-100
- Contact Factory for Availability of Quantities in Custom Colors

• Available in 100 foot rolls

**Use our SR-100 Cutting Tool for all your Plastic Pipe and PVC Conduit needs to 1 1/4" I.D.**

## Features:

- High-carbon, Teflon®-coated replaceable steel blade
- Contoured handle resists tube crushing
- Produces no "sawdust", no need to deburr
- Lightweight, low-profile and no exposed blade when stored

Teflon® is a trademark of the DuPont Corporation

RECOGNIZED

FSCM 65664

Cable Ties are manufactured in our facility in Orange, Massachusetts. State-of-the-art robotic and raw material handling equipment assures product and material integrity throughout the manufacturing process. Overall quality is achieved through statistical analysis and quality driven operator objectives.

Catamount has attained MIL-SPEC I-45208 quality ratings from a number of equipment manufacturers. Where applicable, our products are Mil-Spec Approved, QPL Listed and UL Recognized or Listed. Plant tours are encouraged and may be arranged through your Catamount Distributor.

# CATON

Caton Connector Corporation

## THE CC SERIES HIGH VOLTAGE WIRE

The High Voltage Wire Series consists of the CC Series silicone rubber wire designed by Caton Connector Corporation and the BIW Series manufactured by Draka Intercable - BIW Cable Systems Division.

Our Silicone rubber wire offers high reliability for high voltage requirements. The electrical properties meet or exceed even the best organic insulation materials. Our high voltage wires resistance to extreme temperature changes, ozone, corona, radiation, moisture, deformation, weathering and chemicals is well documented. It is strong and resilient at temperatures where organic rubbers fail. All wire is stocked in spool lengths for quick delivery. Minimum orders apply. For bulk quantities, custom marking or proprietary wire designs, please call our sales department at 1-617-585-4315

### GENERAL SPECIFICATIONS AND CAPABILITIES

Our High Voltage Series Wire has been designed under strict quality control conditions.

#### ELECTRICAL:

Operating Voltage: 10 - 100 KVDC; 5 - 30KVAC  
Current Range: 2.5 - 66 Amps

#### ENVIRONMENTAL:

Operating Temperature: -55° to +125°C

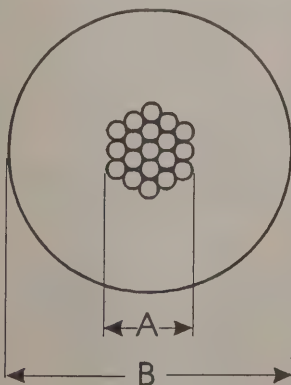

#### MATERIAL

Dielectric: Silicone; Color, White  
Conductor: Silver Plated Copper

### The CC-CATON Series Standard High Voltage Silicone Wire

- All items are stocked in minimum quantity lengths, on spools for quick delivery.
- Bulk lengths are available.

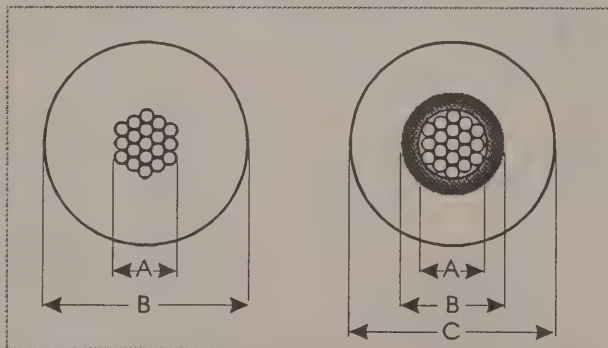

| CONTINUOUS<br>WORKING<br>VOLTAGE | PART<br>NUMBER | WIRE SIZE |           | DIMENSIONS<br>in INCHES |       |

# COMMUNICATION/INSTRUMENTATION CABLE

## MULTI-CONDUCTOR

### UNSHIELDED CABLES

#### Product Construction

##### Conductor:

- 22 thru 12 AWG annealed stranded tinned copper per ASTM B-33

##### Insulation:

- Color coded plastic (PVC) per UL style as indicated

##### Jacket:

- Chrome gray PVC
- Temperature: -20°C to 80°C (UL)
- CL2 rated: -20°C to +75°C

#### Applications

- Public address systems
- Intercom systems
- Remote control circuits
- Satellite actuator controls

#### Special Features

- Tinned conductors provide excellent corrosion resistance
- Also greatly improves soldering connections
- Ease of termination handling due to extra-flexible stranding

#### Industry Approvals

- UL STYLES as indicated
- CL2 RATED as indicated
- CSA-SR PVC Type T2
- OSHA acceptable

#### Packaging

- 1000 ft. spools
- 500 ft. spools
- Also available on bulk reels

#### • QUICK-FEED™

Product available in Consolidated's Quick-Feed™ labor saving cardboard cable dispensing box. 500' or 1000' boxes.

Passes UL VW-1  
Flame Test  
Underwriters Laboratories Inc.

**OSHA** Acceptable  
Occupational Safety and Health  
Administration

**Recognized Component**  
Underwriters Laboratories Inc.

## UNSHIELDED CABLES

### Product Construction

#### Conductor:

- 22 thru 12 AWG annealed stranded bare copper per ASTM B-33

#### Insulation:

- Color coded plastic (PVC) per UL style as indicated

#### Jacket:

- Chrome gray PVC
- Temperature: -20°C to 80°C (UL)

### Applications

- Alarm/security installations
- Remote control circuits

### Special Features

- Ease of termination handling due to extra-flexible stranding

### Industry Approvals

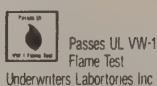

- NEC article 725-38(B)
- UL CL2
- OSHA acceptable

### Packaging

- 1000 ft. spools
- 500 ft. spools
- Also available on bulk reels

### • QUICK-FEED™

Product available in Consolidated's Quick-Feed™ labor saving cardboard cable dispensing box. 500' or 1000' boxes.

# COMPUTER CABLE

## SHIELDED COMPUTER CABLES

### Product Construction

#### Conductor:

- 24 thru 22 AWG annealed tinned copper per ASTM B-33

#### Insulation:

- Color coded semi rigid PVC per UL 1061

#### Shield:

- 100% coverage mylar\*/aluminum foil, foil facing out
- Stranded tinned copper drain wire

#### Jacket:

- Chrome gray PVC
- Temperature: -20°C to +80°C
- Voltage: 300 volts

### Applications

- Computers
- Data transmission
- EIA RS-232
- Control circuits

### Special Features

- Flexible light weight construction
- Excellent abrasion resistance outer jacket

### Industry Approvals

- (UL) CL2
- CSA-SR PVC Type T2
- UL 2464
- NEC article 725-38 (b)
- Passes UL VW-1
- OSHA acceptable

### Packaging

- 1000 ft. spools
- 500 ft. spools
- Also available on bulk reels

\*\* Capacitance between conductors.

\* Mylar—trademark E.I. DuPont.

Listed  
Subject  
13

Certified  
Canadian  
Standard Association

Passes UL VW-1  
Flame Test  
Underwriters Laboratories Inc.

Acceptable  
Occupational Safety and Health  
Administration

Recognized  
Component  
Underwriters Laboratories Inc.

## SHIELDED COMPUTER CABLES

### Product Construction

#### Conductor:

- 24 thru 22 AWG annealed tinned copper per ASTM B-33

#### Insulation:

- Color coded semi rigid PVC per UL 1061

#### Shield:

- 100% coverage mylar\* / aluminum foil shield, foil facing out, plus 70% coverage tinned copper braid shield

#### Jacket:

- Chrome gray PVC
- Temperature: -20°C to +80°C
- Voltage: 300 volts

### Applications

- Computers
- Data transmission
- EIA RS-232 applications
- Control circuits

### Special Features

- Meets FCC docket 20780
- Excellent shielding where noise rejection is critical
- Flexible construction

### Industry Approvals

- (UL) CL2
- CSA-SR PVC Type T2
- UL 2464
- NEC article 725-38 (b)
- Passes UL VW-1
- OSHA acceptable

### Packaging

- 1000 ft. spools
- 500 ft. spools
- Also available on bulk reels

## COMPUTER CABLE

### SHIELDED COMPUTER CABLES

#### Product Construction

##### Conductor:

- 24 thru 22 AWG annealed tinned copper per ASTM B-33

##### Insulation:

- (5710/5791) (5901/5937) Color coded semi rigid pvc insulation UL 1061
- (5300/5338) Color coded poly "low-cap" insulation

##### Shield:

- 100% coverage mylar\*/aluminum foil, 25% overlap, facing out
- stranded tinned copper drain wire

##### Jacket:

- Chrome gray pvc
- Temperature: -20°C to +80°C
- Voltage: 300 volts

#### Applications

- Computers
- Data transmission
- Low capacitance computer application
- Control circuits
- EIA RS-232

#### Special Features

- Meets FCC docket 20780
- Flexible construction
- Excellent shielding where noise rejection is critical

#### Industry Approvals

- (UL) CL2
- UL 2464
- UL 2448
- CSA-SR PVC Type T2
- OSHA acceptable

#### Packaging

- 1000 ft. spools
- 500 ft. spools
- Also available on bulk reels

\*\*Capacitance between pairs

\*Mylar—trademark of E.I. DuPont.

Passes UL VW-1  
Flame Test  
Underwriters Laboratories Inc.OSHA Approved  
Occupational Safety and Health  
Administration

## SHIELDED COMPUTER CABLES

## Product Construction

## Conductor:

- 24 thru 22 AWG annealed tinned copper per ASTM B-33

## Insulation:

- Color coded semi rigid PVC insulation UL 1061

## Shield:

- 100% coverage mylar\* / aluminum foil, foil facing out plus over all 70% coverage tinned copper braid

## Jacket:

- Chrome gray PVC
- Temperature: -20°C to +80°C
- Voltage: 300 volts

## Applications

- Computers
- Data transmission
- Control circuits
- EIA RS-232

## Special Features

- Meets FCC docket 20780
- Excellent shielding where noise rejection is critical
- Flexible construction

## Industry Approvals

- (UL) CL2
- UL 2464
- CSA-SR PVC Type T2
- NEC article 725
- Passes UL VW-1
- OSHA acceptable

## Packaging

- 1000 ft. spools
- 500 ft. spools
- Also available on bulk reels

11044 KING STREET, DEPT. EEM, FRANKLIN PARK, IL 60131

PHONE: 708/455-8830 • WATS LINE: 800/621-4278 • FAX 708/455-8837

## COMPUTER CABLE

### SHIELDED COMPUTER CABLES

#### Product Construction

##### Conductor:

- 28 thru 24 AWG annealed tinned copper per ASTM B-33

##### Insulation:

- Color coded poly "low-cap" insulation

##### Shield:

- (5370/5395) (5755/5766)  
100% coverage mylar\*/aluminum foil, foil facing, out with stranded tinned copper drain plus 65% coverage tinned copper braid
- (5980/5993)  
100% coverage mylar\*/aluminum foil, foil facing out with stranded tinned copper drain plus 90% coverage tin copper braid

##### Jacket:

- Chrome gray pvc
- Temperature: -20°C to +80°C
- Voltage: 30 volts

#### Applications

- High speed computers
- Low capacitance requirements
- Data transmission
- RS-422 CAD/CAM
- RS-485 application

#### Special Features

- Flexible light weight construction
- Low loss high speed computer cable

#### Industry Approvals

- (UL) CL2
- UL 2919
- Passes UL VW-1
- NEC article 725
- OSHA acceptable

#### Packaging

- 1000 ft. spools
- 500 ft. spools
- Also available on bulk reels

## PLTC CABLES

### Product Construction

#### Conductor:

- 22 thru 18 AWG annealed stranded tinned copper per ASTM B-33

#### Insulation:

- Color coded red/black pairs, PVC insulation number marked for easy identification at one inch intervals

#### Shield:

##### (Overall Shield)

- Mylar\*/aluminum foil shield, 100% coverage, foil facing out with stranded tinned copper drain (Individual Shielded Pairs)
- Mylar\*/aluminum foil shield, 100% coverage, foil facing in with stranded tinned copper drain wire each pair

#### Jacket:

- Chrome gray PVC
- Temperature: -20°C to +105°C
- Voltage: 300 volts

### Applications

- Power limited circuits
- Industrial control systems
- Tray cable applications
- Audio intercom
- Security systems

### Special Features

- UL tray cable rated
- Excellent weather and sunlight resistant jacket
- Highly abrasive
- High temperature characteristics

### Industry Approvals

- NEC article 725-38(B) class 2 and 3 power limited circuits
- Meets IEEE 70,000 BTU vertical flame test
- PLTC
- Meets UL 70,000 BTU vertical flame test UL subject 13

### Packaging

- 1000 ft. spools
- 500 ft. spools
- Also available on bulk reels

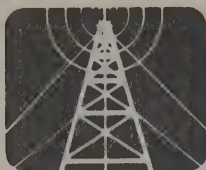

Passes UL VW-1  
Flame Test  
Underwriters Laboratories Inc.

## COAXIAL CABLES

### Product Construction

#### Conductor:

- Bare copper
- Tinned copper
- Silver plated copper
- Copperweld

#### Dielectric:

- Polyethylene
- Air spaced polyethylene

#### Shield:

- Bare copper braid
- Tinned copper braid
- Silver plated copper braid

#### Jacket:

- Polyvinylchloride (PVC)
- Low-temperature non-contaminating PVC
- Polyethylene (P)

### Applications

- Data transmission
- RF communication
- Video
- Broadcast
- Computer

### Industry Approvals

- (UL) CL2
- UL 1354
- UL 1478
- MIL-C-17
- OSHA acceptable

### Packaging

- 1000 ft. spools
- 500 ft. spools
- Also available on bulk reels

 PHONE: 708/455-8830 • WATS LINE: 800/621-4278 • FAX 708/455-8837

## COAXIAL/BROADCAST CABLE

## COAXIAL CABLES

## Product Construction

## Conductor:

- Bare copper
- Tinned copper
- Silver plated copperweld

## Insulation:

- Solid polyethylene (P)
- Foam polyethylene (FP)
- Solid TFE Teflon† (F-1)

## Shield:

- Bare copper braid
- Tinned copper braid
- Silver plated copper braid

## Jacket:

- Polyvinylchloride +80°C
- Teflon† braid +200°C
- TFE Teflon† tape +260°C
- FEP Teflon† jacket +200°C

## Applications

- Data transmission
- RF communication
- Video
- High temperature
- Broadcast

## Industry Approvals

- UL 1354
- OSHA acceptable

## Packaging

- 1000 ft. spools
- 500 ft. spools
- Also available on bulk reels

**DABURN****SPECIALTY • HOOK-UP • BARE COPPER WIRE**

Daburn single conductor wire described below and on the page opposite is a representative selection from the complete line. Daburn stocks single conductor (including shielded and unshielded) MIL-W-76, glass braid, silicone rubber, aircraft, tefzel, kynar, microphone and coaxial (MIL & commercial). Also magnet, bare copper, copperweld, and bronze wire.

**600 VOLT U/L APPROVED**

-105°C (CSA 600V — 90°C)

**STYLE 1015, CSA TR-32, AWM, VW-1**

Resistant to acids, alkalis, oil, flame, fungus and moisture. Temperature Rating: -10°C to +105°C.

**DESCRIPTION:** One conductor stranded annealed copper tinned, plastic insulation.

**COLORS:** Black, Red, Green, Yellow, Blue, White, Orange, Gray, Purple.

**STANDARD PUT-UP:** 100 Ft., 500 Ft., 1000 Ft.

\* Meets MIL-W-76 Type HW.

Daburn stock includes UL hook-up styles: 1007, 1011, and 1061. Many other UL styles available to special order.

**PLASTIC KINKLESS TEST LEAD WIRE**

Soft formulation vinyl maximum flexibility.

Temperature stability from -60°C to

+105°C. Exceed requirements for MIL-I-

3930A Type JP (PVC). Suitable for test leads,

etc. Resistant to gasoline and oil. Excellent

abrasion resistance.

**DESCRIPTION:** One conductor tinned cop-

per stranded, special formulation vinyl in-

sulation — smooth surface.

**OPERATING TEMPERATURE:** -80°C to +105°C, 5000V rating.

**COLORS:** Black, Red, Yellow, Green, White, Blue.

We also stock rubber test lead wire—black & red, #20, #18.

**DAFLEX ULTRA FLEXIBLE SUB-MINIATURE WIRE****U/L STYLE 1568, 1692**

Daflex ultra flexible sub-miniature hook-up wire is designed for continuous flexing applications, such as data processing, mercury thermostats, magnetic memory drums and rotation servo platforms. It offers superior limpness and flexing characteristics.

**DESCRIPTION:** Stranded soft bare copper conductor, insulated with a special formulation of flexible PVC to minimize kinking and fatigue.

**OPERATING TEMPERATURE:** -40°C to +80°C. U/L 1568 voltage rating: 30V.

**IRRADIATED PVC HOOK-UP WIRE****U/L STYLE 1429 • CSA AWM XLPVC • UL STYLE 1430****C/A REW XLPVC • MIL-W-16878D TYPE B & TYPE C • VW-1**

Daburn's irradiated PVC Hook-Up wire is made from extruded polyvinyl chloride insulation which has been exposed to controlled radiation. This exposure causes the insulation to become far superior to ordinary PVC in temperature, abrasion and cut-through resistance. It can withstand direct contact with a soldering iron and it will not shrink back, melt or deform. Ideal for hi-density wiring.

One conductor, solid or stranded tinned copper, with irradiated PVC insulation (XLPVC.)

**TEMPERATURE RATING:** -55°C to +105°C (UL 1429 - 80°C, UL 1430 - 105°C.)

**VOLTAGE RATING:** 600V (UL 1429 - 150V). 1000V (UL 1430 - 300V.)

Temperature rating: -55 to 105°C.

10 colors in stock plus a variety of tracers. Specify.

Nylon jacketed versions for greater physical and chemical protection: type 2510-600V, type 2520-1000V, type 2525N-3000V

Shielded versions to meet MIL-W-16878 and MIL-W-76 with braided tinned copper shields and PVC outer jacket are in stock.

## TEFLON\* WIRE TYPE E — 600 VOLTS PER MIL-W-16878 • UL 1213

### SPEC. MIL-W-16878E/4 High Temperature Rating -90°C to +200°C VW-1

Single conductor, stranded silver plated copper, .010" TFE Teflon\* insulation.

Acid, alkalis, oil, flame, moisture, fungus, solvent resistant. Order nickel plated for 250°C.

## TEFLON\* TYPE EE MIL-W-16878

### Extruded (1000 Volts) MIL-W-16878D MIL-W-16878E/5

DESCRIPTION: Single conductor silver plated copper wire concentrically insulated and insulated with .016 TFE extruded TEFLON\* insulation.

TEMPERATURE RATING: -90°C to +200°C, 1000 volts. Order nickel plated strand for 250°C.

## TEFLON\* TYPE ET MIL-W-16878 250 VOLTS, 200°C

MIL-W-16878E/6

Provides lighter weight, greater flexibility and hi temperature resistance. Size Nos. 32 thru 20 conform to MIL-W-16878D Type ET 250 volts, 200°C. Silver plated copper conductor.

Stocked in ten colors and a variety of tracers. Teflon hook-up also stocked in UL styles 1164, 1180, and 1213 shielded and multiconductor TFE and FEP cable in stock. \*DUPONT

## TUBULAR BRAID PER MIL SPEC QQ-B-575

Tinned copper shielded braid m'd completely round per Mil Spec QQ-B-575-R. Maintains its round configuration. Shielding coverage is 95% or more. Used in military applications where maximum shielding is required against electrostatic interference. Useful against mechanical abrasion and stresses for cables — as grounding cable.

Flat braid (2355 series) and stainless steel braid (2354 series) in stock. Standard put-ups: 50', 100', 250'. Larger spools available. †Manufactured to QQB575 but not listed under spec. Send for our complete catalog. Items on this page may be ordered cut to length, cut & stripped, & printed. Values based on copper in free air at 65°F and intended as a guide only. Silver plated copper and nickel plated copper braid to order.

# HI-VOLTAGE CABLE

Voltage Rating at Sea Level - Voltage Rating at 80,000 feet, approximately 1/3 lower - Minimum life expectancy: 10,000 hours

## HI-VOLT CORONA RESISTANT TEFLON\* CABLE®

**SMALL SIZE:** You do not need bulky, thick, insulation jacketing as used with silicone rubber and polyethylene insulations to get your hi-voltage requirements. Wire used is MIL-SPEC QQ-W-343 and MIL-W-16878. Insulation used conforms to and surpasses MIL-SPEC-W-16878.

**AVOID CORONA PROBLEMS:** Corona Resistant Teflon construction is specifically designed to retard and prevent corona penetration.

Temperature variations from -60°C to +250°C have no life effect on the corona resistant Teflon. In addition, there is no stress or crack failure under severe, adverse conditions including mechanical strain, moisture, corona or chemical conditions.

**DESCRIPTION:** Single Conductor, Stranded Silver Plated Copper, Corona Resistant Teflon\* Insulation.

**TEMPERATURE RATING:** -90°C to +250°C.

**VOLTAGE RATING:** Based on insulation thickness.

**AVAILABLE COLORS:** White, Black, Red, Green, Yellow, Lt. Blue, Brown, Orange, Gray, Violet. (Also available in tracer colors)

**PUT-UP:** 250', 500', 1000'.

**DABURN**

These products represent a small segment of the Daburn multiconductor cable line. In addition to hundreds of configurations on our shelves for immediate delivery, a near infinite variety of designs may be fabricated to order. The broad spectrum of Daburn multiconductor is described at the bottom of this page. Ask for our latest

**DESCRIPTION:** One or more conductors, each conductor silver plated concentrically stranded copper wire. Type E, MIL-W-16878E/4 extruded TFE .010" insulation. When shielded, braided silver plated copper shield over conductor(s), 90% shield coverage. When covered, either a TEFLON® impregnated fiberglass braid or a .010" TEFLON® fused, dou-

master catalog containing complete specs for all Daburn products.

Two other configurations of the family shown below are the 2464 series with teflon impregnated jacket overall and no shield, and the 2430 series of shielded teflon cable, without jacket.

ble tape jacket overall. Fungus, solvent, moisture, flame, acid, alkali and oil resistant. Multi-conductors are twisted.

**VOLTAGE RATING:** 600V, VW-1.

**TEMPERATURE RATING:** -65°C to +200°C. For 250°C USE N.P. CONDUCTOR.

**STANDARD SPOOL PUT-UPS:** 250 Ft., 500 Ft., 1000 Ft. **CONDUCTOR COLOR CODE:** 1—White, 2—Black, 3—Red, 4—Green, 5—Yellow.

**WE ALSO STOCK**—Shield braid over conductors; Teflon® impregnated braid over conductors—no shield. Additional constructions to order.

## FEP TEFLON® CABLE

FEP EXTRUDED JACKET OVER SHIELD TYPE E CONDUCTORS

**DESCRIPTION:** Each conductor silver plated stranded copper wire, Type E extruded TFE .010" insulation. Color coded, cabled, braided silver plated copper shield—90% coverage, FEP white teflon jacket overall.

**TEMPERATURE RATING:** -65°C to +200°C.

**VOLTAGE RATING:** 600V, VW-1.

**CONDUCTOR COLOR CODE:**

1—White, 2—Black, 3—Red, 4—Green.

**STANDARD PUT-UP:** 500 Ft., 1000 Ft.

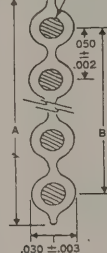

Additional FEP constructions available to order.

## TEFLON HIGH TEMPERATURE FLAT RIBBON CABLE

UL STYLE 20424 • 200°C • 300 VOLTS • VW-1

**NOM. WALL:** .008"

**THICKNESS:** .030 ± .003"

**TEMPERATURE RATING:**

-65°C to +200°C

**DIELECTRIC CONSTANT:** 1.54

**CONDUCTOR RESISTANCE:**

63 Ohms/M

**CAPACITANCE NOM.:**

10.9 PF/FT (G.S.G.)

**IMPEDANCE:** 120 Ohms nom. (G.S.G.)

Each conductor is 28 AWG, 7 strand of 36 AWG silver plated copper with flexible FEP insulation overall. Conductors are spaced on .050" ± .002" centers, allowing for mass termination with conventional insulation displacement connectors.

| DABURN Cat. No. | No. Cond. | (.050 Pitch) |              |

**STANDARD PUT-UP:** 100' (30.48M); larger packages available to order.

**STANDARD COLOR:** Natural

**ADDITIONAL CONSTRUCTIONS AVAILABLE:** Shielded, shielded and jacketed; PFA (for higher temperature), Tefzel; .100" center spacing; 19 strand (for high flexing—above 50,000,000 flexures).

**ADDITIONAL STANDARD CONSTRUCTION THRU 64 COND.**

The two multiconductor computer cables shown below are among many Daburn designs featuring reliable, interference-free operation. Other stock configurations include multi- and twisted-pair styles, single and double shield construction. #24AWG UL Style 2484 & CL2.

## MINIATURE COMPUTER CABLE—SHIELD-PLUS™ CL2 MULTICONDUCTOR TO UL STYLE 2464

**DESCRIPTION:** Each conductor is #28 AWG 7/36 tinned copper, color coded, .009" wall of semi-rigid PVC (UL Style 1061, CSA Type S-R PVC). Conductors are twisted. Overall aluminum/polyester foil shield and 7 strand tinned copper drain wire, plus an overall braided shield of tinned copper (SHIELD-PLUS®). Gray PVC jacket overall. To UL Style 2464, FCC Docket 20780, MIL-STD 461-462B.

Construction is flexible and suitable for computer, communication and control applications.

Cable resists acids, alkalis, oil, solvents, moisture and fungus.

**TEMPERATURE RANGE:** -20°C to +80°C.

**VOLTAGE RATING:** 300V.

**FLAMMABILITY:** Passes UL VW-1.

**WRITE FOR COMPLETE CATALOG****MODULAR PLUG CABLES STRAIGHT AND RETRACTABLE CABLES**

Each Daburn modular cord is 28 AWG 7/36 soft tinned copper, color coded with an overall PVC jacket and modular plugs at each end. Shielded constructions use an overall aluminum/polyester shield and drain wire.

Daburn modular cords are suitable for data equipment, interface, keyboards, audio, telephone handsets, security and alarm applications.

They resist oils, grease, acids, fumes and are abrasion resistant. They will not mar surfaces with which they come in contact.

Note: "Half-Modular" cords — lugs on one end, keyed plugs and UL approved styles are available to order.

STOCK JACKET COLORS: Silver Satin, Black. If not specified Silver Satin will be supplied.

STANDARD PACKAGE: 25 pcs.

Additional lengths to order. R = Round construction.

\*\*7 conductors + 1 conductor ground. Above also available in #28 AWG, i.e., 26-04-7.

Modular plugs, with and without tabs; modular crimping tool for the above cable available.

**DABURN MINI — RETRACTILE COMMUNICATION CORDS - SHIELDED - UNSHIELDED 300V .5 AMP****1, 2 Foot Retracted — 5, 10 Foot Extended**

Miniature. Suitable for compact equipment. Cords are #28 AWG 19/40 soft tinned copper, color coded, where shielded, aluminum polyester foil shield and drain, overall black plastic jacket. 1 Ft. retracted — 12" tangents; 2 Ft. retracted — 6" tangents.

OPERATING TEMPERATURE: -20°C to +60°C.

COLOR CODE: 1—Black, 2—White, 3—Red, 4—Green,

5—Orange, 6—Blue, 7—Yellow, 8—Brown.

STANDARD PACKAGE: 10.

The above cords are also available in 3 Ft. and 4 Ft. retracted, which extend to 15 and 20 feet respectively.

DABURN

LACING CORD-TAPE TO MEET MIL-T-713D TYPE P\* AND MIL-T-43435 COMP. P-TYPE S NYLON FLAT BRAIDED LACING TYPE

TYPE I FIN. B

Nylon fiber flat braided impregnated with MW microcrystalline fungicidal wax. Stays flat. Designed to create a wider contact to distribute the stress. Flexible. Won't slip when knotted. Resistant to fungus, flame, abrasion, acids, MIL-T-43435 (new) supersedes MIL-T-713 (old). 40% maximum elongation.

Addtl. finishes to order.

DABURN STIK KLIPS™ — SELF ADHESIVE

MATERIAL: PVC COLOR: Gray. #680 - 1/4 also available in Black. Temp. Range: -10°F to +175°F.

For fast secure mounting on smooth surfaces. No need to screw, nail or staple in place. Fastens in a flash — just peel off the protective backing and press in place on a clean, dry, smooth surface. For best results allow a few seconds for adhesive to set before applying load.

These plastic clips are insulating, strong and elastic. They have many uses, such as keeping telephone wires off the floor, holding wire, cable, tubing rods, etc. in position.

# DEK®

## WIRE CLIPS

For over 27 years, innovation has been the hallmark of every Dek, Inc. product. Whether it is for state-of-the-art electronic or communication systems...DEK's wire and cable holding devices are recognized as the leaders in cable holding technology.

Dek's complete product line features the patented quick-lock-release clip, cable clamps, flat wire clips, and wire ties. Adhesive backed, pushmount or mechanical fastening styles available.

### DEKLIP Series 021

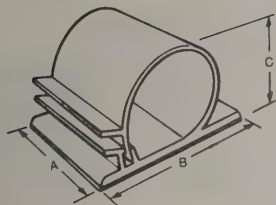

- Exclusive Quick Lock/Release Feature
- Advanced Adhesive Mounting System
- Exceptionally High Performance
- Rugged Injection Molded Flame Resistant Nylon
- Wide Selection of Sizes
- Color: Gray
- UL Listed 94V-2 Material

# ELECTRONIC CABLE

GSI produces special cable for applications where standard off-the-shelf products don't measure up. All GSI products are built to exceed drawing requirements and to benefit from more than thirty years of cumulative experience in design, materials, system requirements and manufacturing methods.

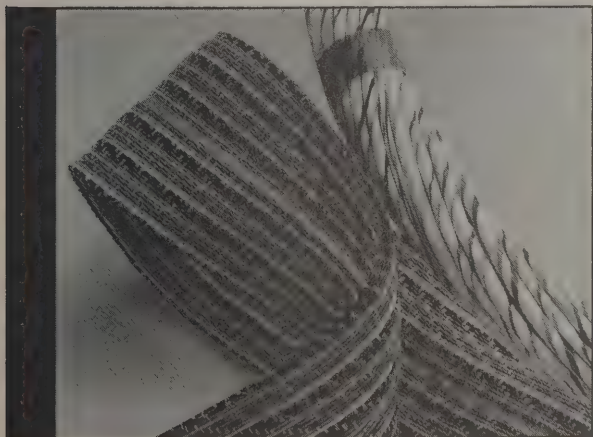

**Flat Ribbon Cable.** □ Flat woven cable can be designed for specific end-use applications and is often the best means of satisfying difficult electronic, mechanical and environmental requirements.

- Precise center-to-center spacing
- Continuous or programmed lengths
- Any conductor size or combination
- Compact and flexible; less weight
- Controlled impedance, low crosstalk

**Flexible Round Cable** □ Round cross section cable can have a concentrically smooth surface, and be flexible in any direction. GSI produces cables with these features by winding layers of flexible conductors in opposite directions around a central core.

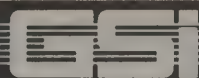

- Contrahelically wound for flexibility
- Single or multiple shields
- Engineered conductor placement
- Braided, wrapped or extruded jackets
- Compact and durable
- Economical in short lengths

**Special Cable Options** □ Whether flat, round, or a combination of the two, every GSI cable is designed and manufactured to meet specific requirements.

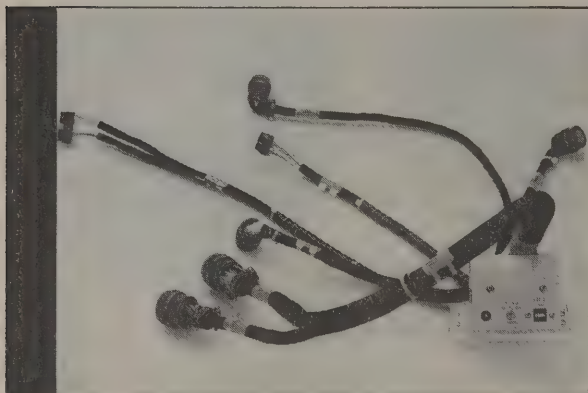

- Tracers or coding to identify conductors
- Flat cables with multiple layers
- Flexibility by design and construction
- Braided or woven shields, composites
- Certification to CSA, UL, MIL specs
- Electronic, mechanical and environmental testing

**GSI Corporation** 1917 Greenspring Drive Timonium, MD 21093-4178 Tel 410-252-1768 FAX 410-561-1768

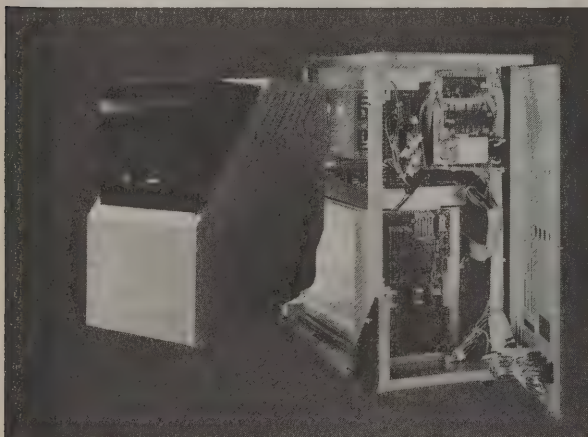

# ELECTRO-MECHANICAL ASSEMBLIES

From one-of-a-kind prototype harnesses to installed interconnection systems, GSI puts it all together. Demanding assembly projects are delivered on time, complete and guaranteed free of faults when GSI takes on the job.

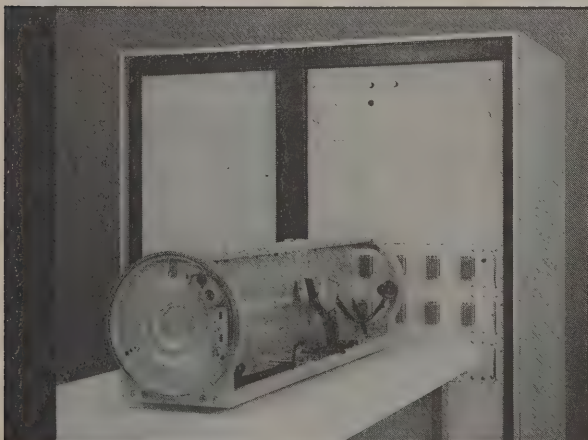

**Branched Harnesses** □ Whether a modular ROI design for Navy aircraft or a conventional format for industrial machinery, GSI harnesses incorporate superior materials, engineering and workmanship.

- Flat cable with programmed breakouts
- Contrahelically wound round sections
- Hand-laid and tied branches
- Shielding and jacketing
- Crimped, soldered or IDC terminations

**Complex Assemblies** □ GSI's contract manufacturing capabilities make available a one-stop source for the integration of military and commercial mechanical and electronic systems.

- Complete chassis fabrication, assembly
- Interconnecting cabling systems
- Design support and documentation
- Just-in-time delivery schedules
- Certified processes
- MIL-STD-2000 soldering

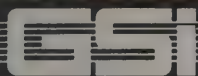

**Comprehensive Testing** □ Structured process controls and inspection procedures ensure that assemblies consistently meet or exceed drawing requirements.

- Programmed hi-pot testing
- Continuity and spark testing
- Pull, bend, abrasion, hardness testing
- Ionic cleanliness for finished products
- Tip-to-ground resistance for equipment
- SPC tracking and documentation

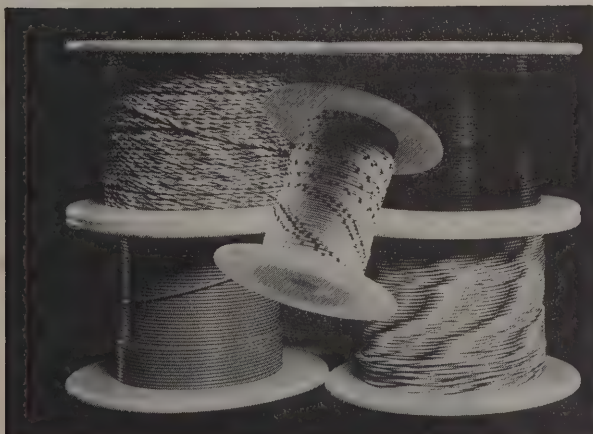

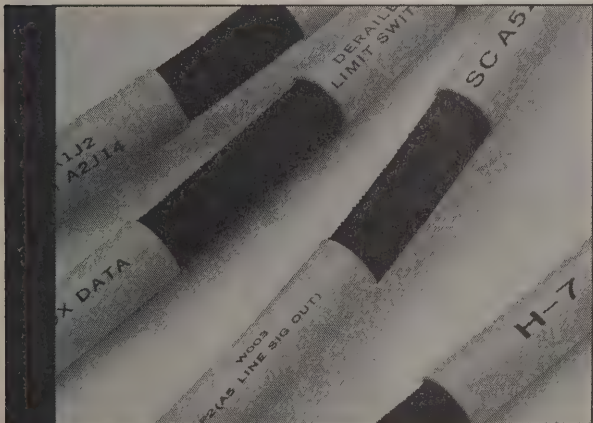

**GSI Corporation** 1917 Greenspring Drive Timonium, MD 21093-4178 Tel 410-252-1768 FAX 410-561-1768

# WIRE AND CABLE MARKERS HEAT SHRINKABLES

A supplier of wire markers, wire marking services and wire marking systems for over thirty years, GSI also offers a comprehensive line of state-of-the-art heat shrinkable products.

**Heat Shrinkable Products** □ A great variety of superior heat-shrink products, from bulk tubing on spools to termination sleeves is available.

- Halogen free polyolefins
- PVCs and elastomerics
- Flexible and semi-rigid Kynars
- QPL-approved termination sleeves
- Shrinkable or non-shrinkable tubing

**Wire and Cable Markers** □ GSI has been producing wire and cable markers since 1962 and is an acknowledged leader in quality and cost effectiveness. Methods feature traditional hot stamping and leading edge thermal transfer technology.

- Up to four lines per marker
- Colors and materials for any application
- Cable ties and identification plates
- A variety of character sizes and styles
- Special logos, graphics and designs
- Bar coding at 200 dots per inch resolution

**Wire Marking** □ GSI has been marking wire for military aircraft and other demanding applications since 1962. Marking methods include color band-coding and alphanumerics.

- Bands, stripes or alphanumerics
- MIL spec durability and legibility
- Wires sizes from 30 to 12 AWG
- Teflon, PVC and other insulation materials
- Up to 100,000 discrete band codes
- 100 percent spark testing

## Pioneer in Irradiated Wire

Judd Wire is a high technology wire company, specializing in the use of electron beam cross-linked thermosets for wire insulation. By applying irradiation cross-linking technology to insulating materials, Judd Wire meets the needs of the wire and cable industry for economical, high-performance products.

Judd Wire manufactures electronic wire and cable in over

100 styles recognized by Underwriters Laboratory, Canadian Standards and/or Military Specifications.

These pages contain comprehensive listings of Judd Wire standard products, many of which are stocked in a variety of colors. For the stocking status of a specific product, please call Judd Wire.

### PCA (80°C & 105°C XLPVC)

PCA is a diverse line of tri-rated electronic wire. Its polychloroalkene insulation is an exclusive irradiation cross-linked PVC with a unique combination of high-performance properties.

- **High heat and burn through resistance.** PCA insulation will not melt or flow at soldering iron temperatures up to 660°F. It eliminates the problem of rework due to soldering iron damage.
- **Wide operating temperature range.** PCA insulated wires are rated for continuous operation from -55°C to 105°C regardless of the temperature range established by UL, CSA and MIL Spec ratings.
- **Improved chemical resistance.** PCA insulation has chemical and solvent resistance that is superior to the best grade PVC insulations.
- **Superior processability.** End costs are reduced with PCA insulated wires, which conform easily to desired shapes for

chassis wiring and harness construction. PCA insulation can be cut and stripped cleanly by automatic processing equipment. The characteristic PVC creep due to insulation stretch is eliminated.

- **VW-1.** PCA insulated wire provides the same excellent flame-resistant properties as the best PVC insulations. It does not melt or shrink back at termination.
- **Ready availability.** PCA insulated wire is available in nine UL styles and over 100 types and configurations. They are UL and CSA rated, and MIL specified at your option.
- **Reduced material costs.** PCA tinned copper conductors do not require expensive silverplating as do many fluorocarbon constructions. PCA with tinned copper is comparable to fluorocarbon insulations with silver plating in every respect but one - price. There, PCA offers the significant advantage of lower cost with equivalent quality.

### FLEXRAD HV™ (105°C XLPE)

FLEXRAD HV is specially designed as a high voltage lead wire for consumer electronics, appliances, test equipment and instrumentation. It has Judd Wire's superior cross-linked polyethylene insulation and is temperature rated for 105° continuous, with excellent overload capacity for short duration.

- **Application-matching variety.** FLEXRAD HV is available in seven voltage ratings. 5kV to 40kV, so it is easily matched to your applications without expensive "overkill." There is no need, for example, to substitute a 15kV wire in a 5kV application. Savings up to 20% in cost, space requirement and wire weight are possible by specifying the right FLEXRAD HV for each job.

- **Superior production properties.** The excellent flexibility of FLEXRAD HV makes it easy to use in tight places. Its tough irradiated polyethylene insulation resists shrink-back and melting, even when in direct contact with a soldering iron.

- **Excellent performance characteristics.** FLEXRAD HV has high resistance to abrasion, deformation, cut-through and chemical attack.

- **Flame retardant rating VW-1.**
- **Three conductor styles.** Solid tinned copper, stranded bare copper with tinned overcoat (TOP), or stranded tinned copper with tinned overcoat (TOC).

### FLEXRAD 125™ (125°C XLPE)

FLEXRAD 125 is an irradiation cross-linked polyethylene insulated wire, tri-rated by UL, CSA and Military Specifications for a wide variety of uses. It is offered in three styles, each of which has these desirable characteristics:

- **High heat and abrasion resistance.** FLEXRAD 125 has excellent abrasion resistance (no cut-through) and exhibits no shrink-back even when in direct contact with a soldering iron.
- **Excellent chemical resistance.** FLEXRAD 125 insulation has unusually high resistance to chemicals and solvents, especially potting systems, which makes it ideal for transformer applications.
- **Wide operating temperature range.** FLEXRAD 125 insulated wires are rated for continuous operation from -55°C to 125°C,

as recognized by UL, CSA and Military Specifications.

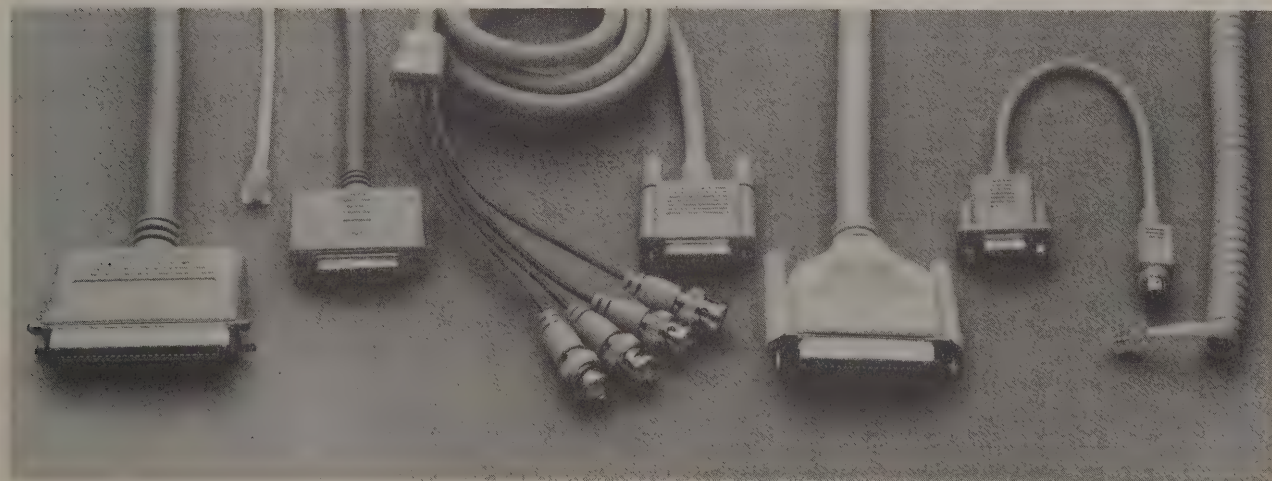

- **Flame retardant rating VW-1.**
- **Superior processability and performance.** Highly flexible FLEXRAD 125 wires conform readily to desired shapes for lead wire and interconnection applications. They avoid the limitations of conventional 105° C PVC: limited temperature range, solder iron shrink-back, creeping insulation during automated cut and strip processing, and poor abrasion resistance. Similarly, FLEXRAD 125 avoids the production problems of fluorocarbons: cold flow, low adhesion, poor cut-through resistance, short lengths, limited flexibility and poor potting ability.
- **Reduced material costs.** Instead of the silver-plated conductors often required with fluorocarbon constructions, FLEXRAD 125 can use tinned copper at substantial savings

## Notes:

- The mark S next to the cord assembly denotes that shielded cord is available when requested.
- Shielded power supply cords are 100% aluminum-mylar tape shielded.
- All cords except Z1, Z2, ZP1 are available in 14 or 16 AWG wire for higher power ratings.

SPECIAL LENGTHS, CUSTOM MADE CORDS, STRAIN RELIEF, ETC. ARE AVAILABLE PER CUSTOMER SPECIFICATIONS.

## STANDARD & CUSTOM MOLDED CABLE ASSEMBLIES

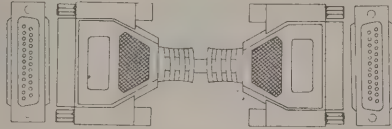

**DB25MM6**  
DB25 male to male fully loaded, 6 ft length, molded or assembly type

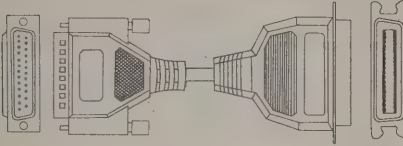

**DB25MF6**  
DB25 male to female fully loaded, 6 ft length, molded or assembly type

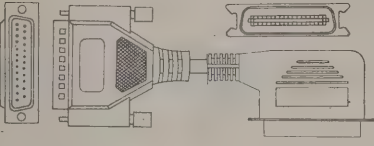

**DB25FF6**  
DB25 female to female fully loaded, 6 ft length, molded or assembly type

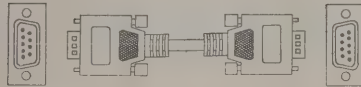

**DB25M36M**  
Printer cable DB25M to 36 pin male, 6 ft long

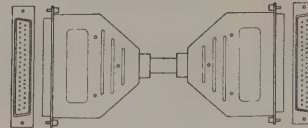

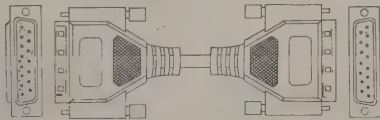

**25M36MRA**  
Printer cable 6 ft with right 90° plug  
**25M36MLA**  
Printer cable, 6 ft with left 90° plug

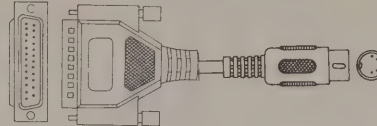

**DB9MM6**  
DB9 male to male fully loaded, 6 ft  
**DB9MF6**  
DB9 male to female, 6 ft  
**DB9FF6**  
DB9 Female to Female 6 ft

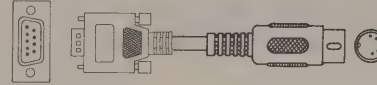

**DB15MM6**  
DB15 male to male, 6 ft fully loaded  
**DB15FF6**  
DB15 female to female, 6 ft  
**DB15MF6**  
DB15 male to female, 6 ft

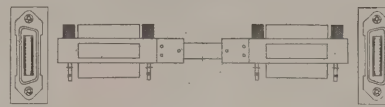

**DB37MM6**  
DB37 male to male, 6 ft, molded or assembly type  
**DB37MF6**  
DB37 male to female 6 ft  
**DB37FF6**  
DB37 female to female 6 ft

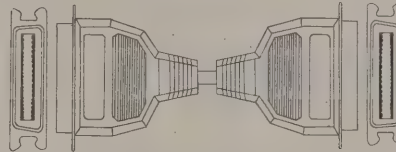

**DB25M5PD6**  
DB25 male to 5 pin DIN plug 6 ft long molded or assembly type

**DB9M5PD6**  
DB9 male to 5 pin DIN plug, 6 ft long, assembly or molded type

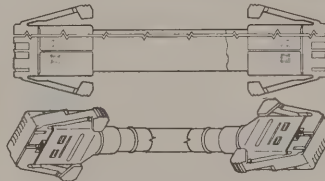

**MCA8522**  
IEEE-488 CABLE 6 ft

**5736MM6**  
36 pin male to male fully loaded, 6 ft  
**5736MF6**  
Male to female, 6 ft  
**5736FF6**  
female to female, 6 ft

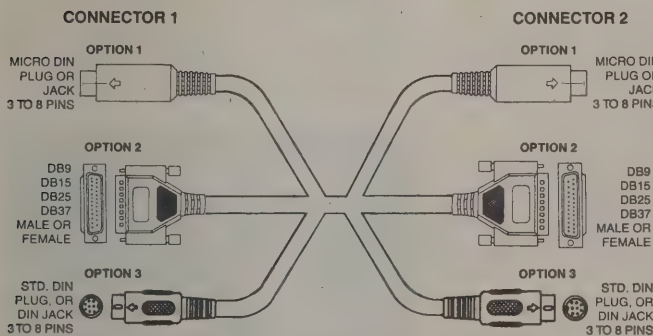

Molded molex connector  
**Mol-3**  
3 position, 6 ft  
**Mol-4**  
4 position, 6 ft

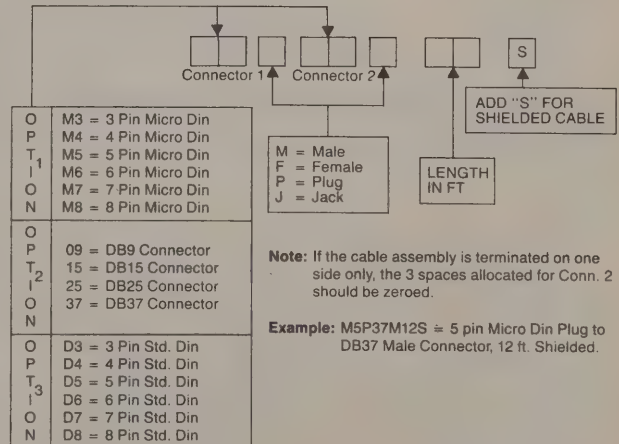

**SDL TYPE**  
4, 6, 8, 16 position  
Custom Length  
Round or Flat

Our goal is to have the wire you need, when you need it. That's why MWS stocks the largest inventory of specialty wires in the country. Over 25,000 types and sizes. If we don't have the wire you need in stock, we'll custom manufacture it. Our short run capabilities provide an alternative to large factory minimums and long deliveries.

# FACILITIES/SERVICES

## CUSTOM ENAMELING

In our custom enameling facilities we enamel most metals from .072" to .0004" round or square and rectangular sizes smaller than 14 AWG or 3500 sq. mil. cross-sectional area. Insulations are available in special colors, builds and bondable overcoats. All insulations meet NEMA MW 1000, 105-220°C, single thru quadruple film builds. Up to 10 insulation colors are available to aid in conductor identification.

## WIRE SHAPING

MWS produces a complete line of miniature square and rectangular wires in a variety of metals. Sizes smaller than 14 AWG sq. and rectangular shapes smaller than 3500 sq. mils. are produced bare as well as film insulated.

## RIBBON ROLLING

MWS operates facilities for production of flat ribbon wire in a wide variety of metals. Thicknesses range from .0005" with widths up to .125". Ribbon wires are available bare, film insulated and plated.

Multifilar® is a registered trademark of MWS Wire Industries. Monel® & Inconel® are trademarks of the Inco family of companies.

## DRAWING AND ANNEALING

Our drawing and annealing capabilities round out our custom manufacturing facilities. These capabilities allow us to fabricate most metals from .064" through .0004" diameter in the temper and quantity you require.

## TESTING LABORATORY

Expanded test facility provides complete chemical, physical and electrical test data for applicable military, federal, commercial and customer standards. Metallurgical and I/R spectro analysis are also available. We can provide you with fast and accurate answers to your technical questions.

## CUSTOM PACKAGING

MWS provides recycled paper shipping containers. These containers eliminate damage in shipping, and later prevent breakage in storage and production line handling.

## WIRE TWISTING

MWS operates facilities for twisting 2 or more conductors 18 AWG and finer. Twisting tightness up to 33 twists per inch and to tolerances of  $\pm 1\%$ . Conductor materials include copper, silver, plated conductors and specialty alloys, in bare and insulated constructions.

## WIRE SPOOLING

Spooling facilities handle every size wire from heavy square and rectangular to ultra-fine. This enables you to buy the quantity of wire you need on the spool size you want.

# MULTIFILAR<sup>®</sup>

## Magnet Wire

Whenever two or more magnet wires travel together, MULTIFILAR magnet wire is worth a closer look. This parallel-bonded, color-coded magnet wire offers many benefits for both small and large users.

Engineers should specify it when they're concerned with space, weight and reliability. Where consistent capacitance and impedance characteristics are needed, MULTIFILAR magnet wire outperforms windings where two separate magnet wires are used.

Production users benefit from increased layer winding speeds, reduced labor and handling. Color-coding assists in conductor identification and reduces termination errors.

MULTIFILAR magnet wires are custom produced by MWS. We guarantee flat, parallel construction in an array of sizes 16 AWG and finer, with up to 20 conductors in some sizes.

Both round and flat constructions are available. Color-coded conductors are available in most insulations with up to 10 different colors in some sizes. Conductor separation is also guaranteed with certain bonding mediums.

For an even closer look, send for a free sample, specifications and ordering information. Production minimums are as low as 500 feet.

\* Solderable Insulations † Trademark of DuPont

NOTE: The above referenced insulations, bonding films, and bond thickness are standard. Other insulations, films and thicknesses are available upon request. CONDUCTOR SEPARATION: Bonding films can be softened and removed by immersion in appropriate solvents. Some mechanical action (i.e. wiping wires following immersion in solvent) may be required to affect conductor separation.

### PART NUMBER ORDERING SYSTEM

Make your own 8 digit part number by following the guidelines outlined below.

EXAMPLE

**B - 2 3 8 1 1 1 1 (155)**

Product letter for all multifilar magnet wire

Number of conductors. Use ( ) for more than 9 conductors

AWG gauge sizes

Insulation thickness  
1= single  
2=heavy  
3=triple  
4=quadruple

Insulation type  
"See above chart for correct code number"

Color coded conductors  
0=none required  
1=red/green  
2=green/clear  
3=red/green/clear  
9=special - call for color code

Bonding film  
"See above chart for correct code number"

EXAMPLE = 2 Conductors—38AWG Single Polyurethane 155°C—Red/Green—Butyral Bond  
When requiring polyurethane or poly nylon 155°C note (155) at the end of the part number.

Cross Section at 100X  
#28 Square Copper  
Insulated with polyester  
base coat and epoxy  
bondable topcoat.

### Miniature square and rectangular magnet wire for specialty coil and motor windings.

When product miniaturization calls for tighter dimensional specifications, MWS Microsquare film-coated magnet wire allows design engineers to create compact coils and small motors that deliver more power in less space.

Microsquare means miniature square and rectangular, copper and aluminum magnet wire. Custom-produced by MWS in sizes smaller than 14 AWG or 3500 sq.mil. cross-sectional area, Microsquare is available in a wide range of solderable and high-temperature insulations and a variety of colors, with or without bondable overcoats. See pages 2 and 3 for information on film insulations and page 10 for information on bondable overcoats.

Microsquare magnet wire was developed to provide improved winding uniformity and maximum use of space.

### Part Number Ordering System. Make your own 7-digit part number by following the guidelines outlined below.

**M - 2 2 1 1 2 1 (155)**

Product letter for all Microsquare magnet wire.

Square AWG Size From chart. Use 88 for special square size. Use 99 for rectangular sizes. (Show size after basic number.)

Conductor Material  
1 = copper  
2 = aluminum  
9 = special

Insulation Build  
1 = single  
2 = heavy  
3 = triple  
4 = quad  
9 = special

Insulation Type  
\* 1 = polyurethane  
\* 2 = poly nylon  
3 = polyester—180  
4 = polyester—200  
5 = polyurethane bondable  
6 = solderable polyester  
7 = formvar  
8 = ML  
9 = special

Color Code  
1 = natural  
2 = green  
3 = red  
4 = blue  
9 = special

EXAMPLE = 22 AWG-Sq. Copper-Single Poly nylon 155°C-Natural Color

NOTE: For part numbers starting with 88 or 99, please show wire dimensions after basic part number.

\*When requiring polyurethane or poly nylon 155°C note (155) at the end of the part number.

**For superior performance and tighter control over twisted wire construction.**

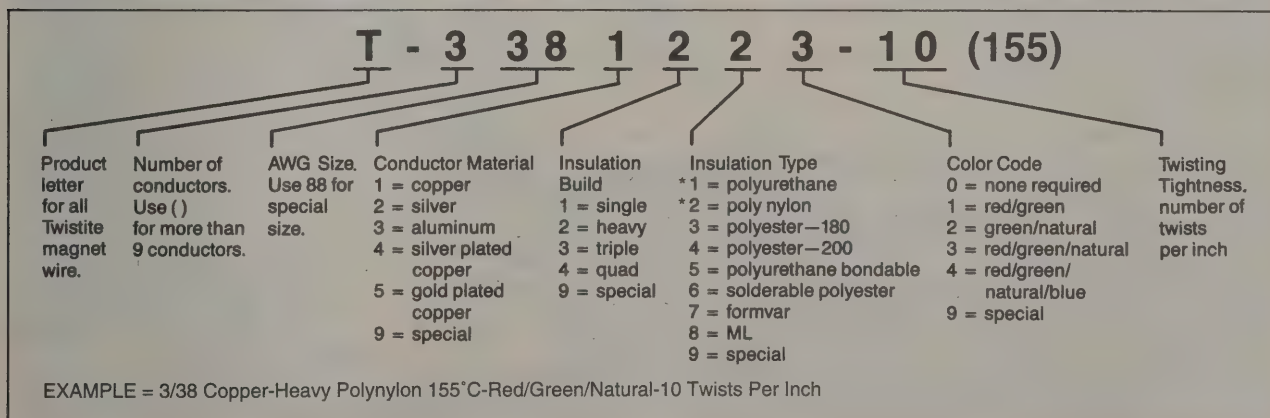

For those who use twisted magnet wire in the production of custom toroid, ferrite and recording head coils, specialty audio and R.F. transformers, Twistite magnet wire offers several advantages over other twisted magnet wire constructions.

Because Twistite is custom produced by MWS, a wider range of twisting constructions is possible. Manufacturing capabilities include:

- up to 33 twists per inch on fine wire
- twisting tolerance as tight as  $\pm 1\%$
- tightly controlled capacitance, inductance and impedance characteristics
- up to 10 colors in some sizes for conductor identification
- huge selection of insulations including NEMA MW 1000, JW 1177, 105-220°C (single through quadruple film builds)
- wide range of sizes: 16 through 52 AWG
- wide variety of conductor materials: copper; silver; plated conductors; and specialty alloys.

### Part Number Ordering System.

Make your own 10-digit part number by following the guidelines outlined below.

\*When requiring polyurethane or polynylon 155°C note (155) at the end of the part number.

# MANUFACTURERS OF ELECTRONIC WIRES & CABLES

As a manufacturer of wire and cable products National Wire & Cable is ready to fill your immediate needs. Choose from our standard lines of wire or cable . . . OR let us design and custom manufacture exactly what you require for your application.

Our wire inventory is now over 160 million feet, and our 1500 different standard multiconductor cables total in excess of 1.5 million feet!

When you call National Wire, you'll find we are especially well equipped to handle your large as well as minimal requirements. If our "standard" items won't meet your application, we have the wire inventory, the machinery, the expertise to produce exactly what you need. 105,000 square feet of manufacturing area and our expert engineering staff are at your disposal!!!! All cable components are produced within our own facility in order to assure complete quality control.

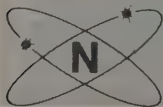

Review the following catalog pages. If you need some assistance with your specific requirement, call our factory direct, or call our representative nearest you.

## CORPORATE OFFICE

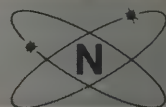

### Factory and Warehouse Facilities

136 San Fernando Road, P.O. Box 31307, Los Angeles, Calif. 90031

Telephone: (213) 225-5611 • FAX: (213) 225-4630

**NATIONAL WIRE & CABLE CORPORATION**  
136 SAN FERNANDO ROAD, LOS ANGELES, CALIFORNIA 90031-0307  
PHONE: (213) 225-5611 • FAX: (213) 225-4630  
CAGE CODE 04569

**U/L RECOGNIZED WIRE****CSA CERTIFIED WIRE****U/L STYLE 1061**

Appliance wiring material available as FR-1 rated 80-degree C Service. .009" semi-rigid vinyl insulation U/L rated: 300-volt service. Meets Mil-W-16878D Type B, and CSA S-R PVC. Also available with solid conductors.

**U/L STYLE 1007**

Appliance wiring available as FR-1 rated 80-degree C Service. 1/64" vinyl insulation U/L rated: 300 volt appliance, use 600 volt electronic use. Meets Mil-W-16878D Type C. Also approved by CSA as Type TR-64 radio wiring for 90-degree C Service. Colors: 10 standard colors plus tracers on solid colors. Also available with solid conductors.

**U/L STYLE 1015**

Appliance wiring material available as FR-1 rated 105-degree C Service 1/32" vinyl insulation U/L rated: 2500 volts electronic use, 600 volt appliance use. Meets Mil-W-16878D Type D. Colors: 10 standard colors plus tracers on solid colors.

**CSA/TYPE TR-32 RADIO WIRE**

Rated: 90-degree C 600 volt, 1/32" vinyl insulation. Also listed as CSA Appliance Wiring Material 90-degree 600 V. Meets U/L Style 1015 & Mil-W-16878D Type D.

**CSA CERTIFIED TYPE TR-64 RADIO WIRE**

Rated: 90-degree C 300 volt, 1/64" vinyl insulation. Meets U/L Style 1007 & Mil-W-16878D Type C.

• Wires recognized by the Underwriter's Laboratories, Inc. for operation in an air or an oil environment. U.L. file #E35793.

• Wires certified by the Canadian Standards Association for radio or electronic uses. CSA File #LR-20482 & LR-32511.

# MILITARY ELECTRONIC HOOKUP WIRE

## MIL-W-16878/1 Type BU

For internal wiring of electronic equipment.  
.010" wall vinyl primary insulation. No  
outer covering.

-54-degree C to +105-degree C, 600 V,  
R.M.S. (working).  
Also available as NABOND.  
Meets U/L Style 1061, and CSA S-R PVC.

## MIL-W-16878/1 TYPE BU

\*Also available in 7 strands

## MINIATURE SIGNAL & CONTROL CABLES

National Wire & Cable Corp. manufactures a complete line of MINIATURE low voltage signal and control cable. Available as cable pairs or cabled singles, with optional overall shield. Conductors are stranded tinned copper with .010" wall of vinyl primary insulation for use up to 105°C. per MIL-W-16878/1.

Insulated for 600 volts working voltage. (Also meets U.L. AWM Type 1061; 300 volt, 80°C.) All are coded using 10 standard colors plus stripes on white per MIL-STD-681. (See table Page 12, Section 8.)

All conductors are planetary cabled and contra-helically laid for optimum flexibility, with a Mylar tape barrier undershields. Shielded cables have a tinned copper braid overall, of 85-90% coverage per MIL-C-7078; and braid angles below 40° for easy pushback.

The outer jacket is black abrasion-resistant 105°C. vinyl meeting MIL-I-631 Type F. All materials are self-extinguishing and fungus resistant. All items are U.L. STYLE 2343 COMPUTER CABLE; rated 80°C. (Higher temp. ratings apply for any non-U.L. service.) Meets E.I.A. Standard RS-232 for 18-24 gauges.

**U.L. and/or CSA certification furnished only when requested.**

Standard Putups: 500 and 1000 ft. No-deposit reels.

**IN STOCK**

## COMPUTER GRADE SINGLE CONDUCTORS (NX SERIES)

**MIL SPEC. & U.L. RECOGNIZED  
STYLE 2343 & CSA CERTIFIED**

### TECHNICAL DATA (all cables)

**Insulation break-down voltage:** Greater than 5000 volts AC RMS, 60cps.

**Capacitance:** Nominal capacitance from a wire to all else in a cable ranges from 45 to 70 pF/ft at 1 kc, depending on gauge and position.

**Insulation Leakage:** 200 megohms/1000 feet minimum @ 500 VDC from any conductor to all else in cable.

**Sheath Leakage:** 10 megohms/1000 feet minimum @ 500 VDC from shield or conductor group through sheath to ground.

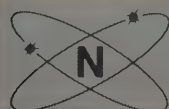

**Temperature Range:** Suitable for continuous use from -40°C. to +105°C. (U.L. Service limited to +80°C.)

**Bending Characteristics:** All cables are suitable for flexing to a circle diameter of 6 cable diameters from +105°C to -20°C. Recommended flex diameter should be greater than 20 cable diameters for flexing at -40°C. For continuous flexing applications consult the factory.

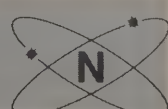

## MULTICONDUCTOR STOCK CABLED SINGLES

Conductor sizes 24, 22 are 7 strand; 20 AWG is 19 strand

## MINIATURE SIGNAL &amp; CONTROL CABLES

National Wire & Cable Corp. manufactures a complete line of MINIATURE low voltage signal and control cable. Available as cabled pairs or cabled singles, with optional overall shield. Conductors are stranded tinned copper with .010" wall of vinyl primary insulation for use up to 105°C. per MIL-W-16878/1.

Insulated for 600 volts working voltage. (Also meets U.L. AWM Type 1061; 300 volt, 80°C.) All are coded using 10 standard colors plus stripes on white per table below.

All conductors are planetary cabled and contra-helically laid for optimum flexibility, with a Mylar tape barrier undershields. Shielded cables have a tinned copper braid overall, of 85-90% coverage per MIL-C-7078; and braid angles below 40° for easy pushback.

The outer jacket is black abrasion-resistant 105°C. vinyl meeting MIL-I-631 Type F. All materials are self-extinguishing and fungus resistant. All items are U.L. STYLE 2343 or 2344 COMPUTER CABLE; rated 80°C. (Higher temp. ratings apply for any non-U.L. service.) Meets RS-423 for 20-24 gauge.

U.L. and/or CSA certification furnished only when requested.

Standard Putups: 500 and 1000 ft. No-deposit reels.

MIL SPEC. & U.L. RECOGNIZED  
STYLE 2343 & 2344 & CSA CERTIFIED

|---------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Insulation break-down voltage:</b> | Greater than 5000 volts AC RMS, 60cps.                                                                                                                                                                                                                 |
| <b>Capacitance:</b>                   | Nominal capacitance from a wire to all else in a cable ranges from 45 to 70 pF/ft at 1 kc, depending on gauge and position.                                                                                                                            |
| <b>Insulation Leakage:</b>            | 200 megohms/1000 feet minimum @ 500 VDC from conductor to all else in cable.                                                                                                                                                                           |
| <b>Sheath Leakage:</b>                | 10 megohms/1000 feet minimum @ 500 VDC from shield or conductor group through sheath to ground.                                                                                                                                                        |
| <b>Temperature Range:</b>             | Suitable for continuous use from -40°C. to +105°C. (U.L. Service limited to +80°C.)                                                                                                                                                                    |
| <b>Bending Characteristics:</b>       | All cables are suitable for flexing to a circle diameter of 6 cable diameters from +105°C to -20°C. Recommended flex diameter should be greater than 20 cable diameters for flexing at -40°C. For continuous flexing applications consult the factory. |
| <b>Impedance:</b>                     | Balanced: 87 ohms ±5%<br>Unbalanced: 52 ohms ±5%                                                                                                                                                                                                       |

## MULTIPLE CONDUCTOR CONTROL CABLES

National Wire & Cable Corp. manufactures a complete line of multiple conductor control cable. All conductors are stranded tinned copper with 1/64" wall of vinyl primary insulation for use up to 105°C per MIL-W-16878/2.\* Insulated for 1000 volts working voltage. Color coded using 10 standard colors plus stripes on white per MIL-STD- 681 (see Page 12, Section 8).

All conductors are planetary cabled and contra-helically laid for optimum flexibility, with a Mylar tape serve over cable bundle. Shielded cables have a tinned copper braid overall, of 85-90% coverage per MIL-C-7078, and braid angles below 40° for easy pushback.

The outer jacket is black abrasion-resistant 105°C vinyl meeting MIL-I-631 Type F. All materials are self-extinguishing and fungus resistant. May be Neoprene to MIL-R-6855 Class 2 Grade 60 specification. (Neoprene at added cost and only available for non-U.L. applications.) Cables are U.L. STYLE 2343 or 2344, rated 80°C, and CSA CERTIFIED for 105°C as described below. U.L. and/or CSA certification furnished only when requested.

\*Insulated wires also meet U.L. style 1007 or 1569 as appropriate for gauge.

\*\* Not recognized under UL styles 2343 or 2344 or CSA in these gauges. — See NWH Series.

### IN STOCK

### HEAVY DUTY

## SINGLE CONDUCTORS (NW SERIES)

MIL SPEC. & U.L. RECOGNIZED  
STYLE 2343 OR 2344 & CSA CERTIFIED

### TECHNICAL DATA (all cables)

#### Insulation Break-down Voltage:

Greater than 8000 volts AC RMS, 60 cps.

#### U.L. Voltage Rating:

300 volts RMS AC (appliance use).  
600 volts RMS AC (electronic use).

#### CSA Voltage Rating:

300 volts RMS AC (appliance use).

#### Military Voltage Rating:

1000 volts RMS.

#### Capacitance:

Nominal capacitance from a wire to all else in the cable ranges from 40 to 65 pf per ft., @ 1000 cps, dependent on gauge and position.

#### Insulation Leakage Res.:

200 megohms/1000 ft. min. at 500 VDC from any conductor to all else in cable.

#### Sheath Leakage Res.:

10 megohms/1000 ft. min. at 500 VDC from overall shield through sheath to outside world.

#### Usable Temp. Range:

Suitable for continuous use from +105°C to -55°C.

#### Bending Characteristics:

All cables are suitable for flexing to a circle diameter of 6 cable diameters from +105°C to -20°C. Recommended flex diameter should be greater than 20 cable diameters for flexing at -40°C. For continuous flexing applications consult the factory.

### MULTI-CONDUCTOR STOCK CABLES

Conductor sizes: 22, 20, 18, 16, 14 & 12 gauge. 22 AWG is 7 strand. All others 19 strand.

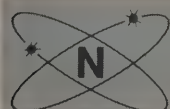

#### UNSHIELDED

## MULTIPLE CONDUCTOR CONTROL CABLES

Identical to National's NW-Series Cables except offered as twisted pairs.

National Wire & Cable Corporation manufactures a complete line of multiple pair control cables. Conductors are of tinned copper strand with 1/64" vinyl primary insulation for use up to 105°C per MIL-W-16878/2.\* Insulated for 1000 volts working voltage. Conductors are color coded using 10 standard basic colors, plus spiral tracers on white per table below.

All pairs are planetary cabled and contra-helically laid with a Mylar tape serve over the cable bundle. Shielded cables have a tinned copper braid overall, of 85-90% coverage per MIL-C-7078, and braid angles below 40° for easy pushback.

The outer jacket is black, abrasion-resistant 105°C vinyl meeting MIL-I-631 Type F. This material is self-extinguishing and fungus resistant. Neoprene to MIL-R-6855 Class 2 Grade 60 specification is also available on special request for non-U.L. applications.

Cables are U.L. STYLE 2343 or 2344, rated 80°C, and CSA CERTIFIED for 105°C as described below. U.L. and/or CSA certification furnished only when requested.

\*Insulated wires also meet U.L. Style 1007 or 1569 as appropriate for gauge.

**IN STOCK**
**HEAVY DUTY**
**TWISTED PAIR  
(NWP SERIES)**
**MIL SPEC. & U.L. RECOGNIZED  
STYLE 2343 OR 2344 & CSA CERTIFIED**

### TECHNICAL DATA (all cables)

**Insulation Break-down Voltage:**

Greater than 8000 volts AC RMS, 60 cps.

**U.L. Voltage Rating:**

300 volts RMS AC (appliance use).

**CSA Voltage Rating:**

600 volts RMS AC (electronic use).

**Military Voltage Rating:**

300 volts RMS AC (appliance use).

**Capacitance:**

1000 volts RMS.

**Insulation Leakage Res.:**

Nominal capacitance wire to wire for a pair ranges from 27 to 40 pF/ft. Capacitance from both wires tied together measured to all else in common ranges from 35 to 60 mmf/ft. dependent on gauge and position. Overall shield has negligible effect on W-W capacitance.

**Sheath Leakage Res.:**

200 megohms/1000 ft. min. at 500 VDC from any conductor to all else in cable.

**Usable Temp. Range:**

10 megohms/1000 ft. min. at 500 VDC from overall shield through sheath to outside world.

**Cold Bending Capability:**

Suitable for continuous use from +105°C to -55°C.

All cables are suitable for flexing to a circle diameter of approximately 6 cable diameters from +105°C to -20°C. Recommended flex diameter should be greater than 20 cable diameters for flexing at -40°C. For continuous flexing applications consult the factory.

### MULTI-CONDUCTOR STOCK CABLED PAIRS

Conductor sizes: 22 AWG is 7 strand. All others 19 strand.

## MINIATURE SIGNAL & CONTROL CABLES

### GRAY PVC JACKET

National Wire & Cable Corporation manufactures a complete line of highly flexible micro-miniature low-voltage instrument control cable. These are available as cabled pairs or singles, with optional overall shield of either foil with drain or a braided shield.

Conductors are stranded tinned copper with .010" wall of tough extruded polyvinyl chloride primary insulation, rated for 300 volt use at +80°C under U.L. style 1061.\* All are color coded using ten standard colors plus white with stripes per MIL-STD-681. (See Table Page 12, Section 8.)

Conductors are planetary cabled and helically laid for optimum flexibility, with a barrier under braids. Shielded cables have a tinned copper braid of 90% coverage per MIL-C-7078, with braid angles below 40° for easy pushback; or have a 100% coverage foil shield in intimate contact with a drain wire for easy termination. See Section 4 of our catalog for relative shield effectiveness.

Outer jacket is highly flexible abrasion-resistant gray polyvinyl chloride thermoplastic, meeting the requirements of U.L. style 2464.\*\* U.L. & CSA certification furnished.

**Military certification furnished only when requested.**

All materials are flame retardant and fungus resistant.

Standard Putups: 500 and 1000 ft. No-deposit reels. For short-er quantities or specific lengths, consult factory.

\*Wire also meets MIL-W-16878/1, rated 600 volts, +105°C.

\*\*Jacket material is military rated for +105°C; meets MIL-I-631, Type F. Meets E.I.A. Standards RS-232 for 18-24 gauges.

## IN STOCK

### EXTRA FLEXIBLE GRAY PVC JACKETS

## SINGLE CONDUCTORS (NQ SERIES)

MIL SPEC. & U.L. RECOGNIZED  
STYLE 2464 & CSA CERTIFIED

### TECHNICAL DATA (all cables)

**Insulation break-down voltage:** Greater than 3000 volts AC RMS, 60cps.

**Capacitance:** Nominal capacitance from a wire to all else in a cable ranges from 25 to 45 pf/ft at 1kc, depending on gauge and position.

**Insulation Leakage:** 200 megohms/1000 feet minimum @ 500VDC from conductor to all else in cable.

**Sheath Leakage:** 10 megohms/1000 feet minimum @ 500VDC from shield or conductor group through sheath to ground.

**Temperature Range:** U.L. rating: +80°C per U.L. style 2464. Military: Continuous use from -40°C to +105°C.

**Bending Characteristics:** All cables are suitable for flexing to a circle diameter of 6 cable diameters from +105°C to -20°C. Recommended flex diameter should be greater than 20 cable diameters for flexing at -40°C. For continuous flexing applications consult the factory.

**Foil Shielded Cables:** The nominal over-all diameter of foil shielded cables will be .006" greater than the non-shielded cables of the same conductor count and wire size.

**Characteristic Impedance (NQP Paired Cables)** Ranges from 150 ohms to 45 ohms, dependent on wire size (AWG), geometry and drive method. Consult our technical staff for data on specific cable types.

## MULTI-CONDUCTOR STOCK CABLED SINGLES

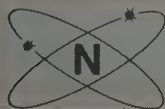

Conductor sizes 28, 26, 24, 22 are 7 strand. All others 19 strand.

## MINIATURE SIGNAL & CONTROL CABLES

### GRAY PVC JACKET

National Wire & Cable Corporation manufactures a complete line of highly flexible micro-miniature low-voltage instrument control cable. These are available as cabled pairs or singles, with optional overall shield of either foil with drain or a braided shield.

Conductors are stranded tinned copper with .010" wall of tough extruded polyvinyl chloride primary insulation, rated for 300 volt use at +80°C under U.L. style 1061.\* All are color coded using ten standard colors plus white with stripes per MIL-STD-681. (See table following page.)

Conductors are planetary cabled and helically laid for optimum flexibility, with a barrier under braids. Shielded cables have a tinned copper braid of 90% coverage per MIL-C-7078, with braid angles below 40° for easy pushback; or have a 100% coverage foil shield in intimate contact with a drain wire for easy termination. See Section 3 of our mater catalog for relative shield effectiveness.

Outer jacket is highly flexible abrasion-resistant gray polyvinyl chloride thermoplastic, meeting the requirements of U.L. style 2464.\*\*

**Military certification furnished only when requested.**

All materials are flame retardant and fungus resistant.

Standard Putups: 500 and 1000 ft. No-deposit reels. For shorter quantities or specific lengths, consult factory.

\*Wire also meets MIL-W-16878/1, rated 600 volts, +105°C.

\*\*Jacket material is military rated for +105°C; meets MIL-I-631, Type F.

Meets E.I.A. Standards RS-232 for 18-24 gauges.

### TECHNICAL DATA (all cables)

|                                                     |                                                                                                                                                                                                                                                        |
|-----------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Insulation break-down voltage:</b>               | Greater than 3000 volts AC RMS, 60cps.                                                                                                                                                                                                                 |
| <b>Capacitance:</b>                                 | Nominal capacitance from a wire to all else in a cable ranges from 25 to 45 pf/ft at 1kc, depending on gauge and position.                                                                                                                             |
| <b>Insulation Leakage:</b>                          | 200 megohms/1000 feet minimum @ 500VDC from conductor to all else in cable.                                                                                                                                                                            |
| <b>Sheath Leakage:</b>                              | 10 megohms/1000 feet minimum @ 500VDC from shield or conductor group through sheath to ground.                                                                                                                                                         |
| <b>Temperature Range:</b>                           | U.L. rating: +80°C per U.L. style 2464.<br>Military: Continuous use from -40°C to +105°C.                                                                                                                                                              |
| <b>Bending Characteristics:</b>                     | All cables are suitable for flexing to a circle diameter of 6 cable diameters from +105°C to -20°C. Recommended flex diameter should be greater than 20 cable diameters for flexing at -40°C. For continuous flexing applications consult the factory. |
| <b>Foil Shielded Cables:</b>                        | The nominal overall diameter of foil shielded cables will be .006" greater than the non-shielded cables of the same conductor count and wire size.                                                                                                     |
| <b>Characteristic Impedance (NQP Paired Cables)</b> | Ranges from 150 ohms to 45 ohms, dependent on wire size (AWG), geometry and drive method. Consult our technical staff for data on specific cable types.                                                                                                |

## MULTI-CONDUCTOR STOCK CABLED PAIRS

Conductor sizes 28, 26, 24, 22 are 7 strand. All others 19 strand.

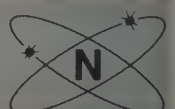

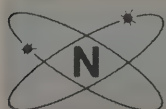

### UNSHIELDED

### OVERALL BRAIDED SHIELD

## SIGNAL & CONTROL TRAY CABLES

National Wire & Cable Corporation manufactures a complete line of DUAL-RATED multiconductor NEC TRAY CABLE Type CL2, for signal, instrumentation and control uses. Also UL rated for use as 300 Volt Appliance Wiring Material (AWM). These are available as cabled singles or pairs, with optional overall shield of aluminum-Mylar foil with drain wire.

Cabled conductors use stranded tinned copper wire with 0.010" wall of tough extruded poly-vinyl-chloride (PVC) insulation, rated for 300. Volt use under U.L. Style 2464.

All wires are color coded using 10 standard solid colors plus white with stripes. Cabled singles are color coded the same as our NQ and NX cable families per MIL-STD-681. (See table in Tech section.) Cabled pairs are color coded the same as our NQP and NXP cable families.

Conductors are helically cabled and laid for optimum flexibility, with a Mylar tape barrier wrap (or Mylar+ Foil) applied between cabled wire bundle and outer jacket.

Shielded cables have an overall Aluminum-Mylar foil shielding tape helically wrapped over cable and a tinned uninsulated drain wire for shield connection. (Use FSJ part number suffix.) For optional composite tinned copper RFI braid(s) + foil shielding, consult factory.

Outer jacket is a special highly flexible abrasion-resistant gray poly-vinyl-chloride (PVC) thermoplastic. DUAL-RATED jacket compound meets the requirements of both U.L. Style 2464 AWM and U.L. 13 Type CL2 TRAY CABLE. Jacket is surface printed with both UL 2464 AWM and U.L. 13 Type CL2 TRAY CABLE identifiers. Jacket wall thickness is .032" nom.

Finished cables comply with applicable U.L. tests for N.E.C. Type CL2 TRAY CABLE Vertical Tray Flame Spread. All materials are flame-spread retardant and fungus resistant. The products are DUAL-RATED for AWM use as U.L. Style 2464 300 Volt, 80°C, OR for U.L. 13 Type CL2 TRAY CABLE 105°C use.

Standard putups: 500 ft. and 1000 ft. No-deposit reels. For shorter quantities or specific lengths consult factory.

## TRAY CABLES NEC 725

## CABLED SINGLES (NL SERIES)

### TECHNICAL DATA (all cables)

#### Rated Working Voltage:

300 VOLTS for AWM uses.

#### Rated Temperature:

DUAL-RATED: + 105°C or + 80°C dependent on AGENCY intended use. See below.

#### Insulation Breakdown Voltage:

Greater than 1000 Volts AC RMS at 60 Hz.

#### Capacitance:

Nominal capacitance from a wire to all else in a cable ranges from 25 to 45 PF/FT at 1 Khz, depending on AWG and position.

#### Insulation Leakage:

100 Megohms/1000 feet minimum @ 500 VDC; from a conductor to all else in a cable, at 25°C.

#### U.L. Agency Voltage & Temperature Ratings:

UL rated: + 80°C AWM, 300 VOLT per UL Style 2464. UL rated + 105°C CL2 TRAY CABLE per UL 13, NEC Type CL2.

#### Bending Characteristics:

All cables are suitable for flexing to a circle diameter of 8 cable diameters from + 105°C to - 10°C. The flex diameter should be greater than 20 cable diameters for flexing at - 20°C.

#### Characteristic Impedance:

RF Impedance of twisted pairs or adjacent singles is: 87 ohms in AWG 24; 80 ohms in AWG 22. Suitable for digital signals.

## MULTI-CONDUCTOR STOCK CABLED SINGLES

Conductor sizes 24, 22 are 7 strand. All others 19 strand.

SIGNAL & CONTROL TRAY CABLES

National Wire & Cable Corporation manufactures a complete line of DUAL-RATED multiconductor NEC TRAY CABLE Type CL2, for signal, instrumentation and control uses. Also UL rated for use as 300 Volt Appliance Wiring Material (AWM). These are available as cabled singles or pairs, with optional overall shield of aluminum-Mylar foil with drain wire.

Cabled conductors use stranded tinned copper wire with 0.010" wall of tough extruded poly-vinyl-chloride (PVC) insulation, rated for 300. Volt use under U.L. Style 2464.

All wires are color coded using 10 standard solid colors plus white with stripes. Cabled singles are color coded the same as our NQ and NX cable families per MIL-STD-681. (See table in Tech section.) Cabled pairs are color coded the same as our NQP and NXP cable families.

Conductors are helically cabled and laid for optimum flexibility, with a Mylar tape barrier wrap (or Mylar + Foil) applied between cabled wire bundle and outer jacket.

Shielded cables have an overall Aluminum-Mylar foil shielding tape helically wrapped over cable and a tinned uninsulated drain wire for shield connection. (Use FSJ part number suffix.) For optional composite tinned copper RFI braid(s) + foil shielding, consult factory.

Outer jacket is a special highly flexible, abrasion-resistant gray poly-vinyl-chloride (PVC) thermoplastic. DUAL-RATED jacket compound meets the requirements of both U.L. Style 2464 AWM and U.L. Type CL2 TRAY CABLE. Jacket is surface printed with both U.L. 2464 AWM and U.L. 13 Type CL2 TRAY CABLE identifiers. Jacket wall thickness is .032" nom.

Finished cables comply with applicable U.L. tests for N.E.C. Type CL2 TRAY CABLE Vertical Tray Flame Spread. All materials are flame-spread retardant and fungus resistant. The products are DUAL-RATED for AWM use as U.L. Style 2464 300 Volt, 80°C, OR for U.L. 13 Type CL2 TRAY CABLE 105°C use.

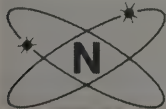

Standard putups: 500 ft. and 1000 ft. No-deposit reels. For shorter quantities or specific lengths consult factory.

TECHNICAL DATA (all cables)

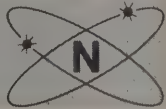

- Rated Working Voltage:** 300 VOLTS for AWM uses.
- Rated Temperature:** DUAL-RATED: + 105°C or + 80°C dependent on AGENCY intended use. See below.
- Insulation Breakdown Voltage:** Greater than 1000 Volts AC RMS at 60 Hz.
- Capacitance:** Nominal capacitance from a wire to all else in a cable ranges from 25 to 45 PF/FT at 1 Khz, depending on AWG and position.
- Insulation Leakage:** 100 Megohms/1000 feet minimum @ 500 VDC; from a conductor to all else in a cable, at 25°C.
- U.L. Agency Voltage & Temperature Ratings:** UL rated: + 80°C AWM, 300 VOLT per UL Style 2464. UL rated + 105°C CL2 TRAY CABLE per UL 13, NEC Type CL2.
- Bending Characteristics:** All cables are suitable for flexing to a circle diameter of 8 cable diameters from + 105°C to - 10°C. The flex diameter should be greater than 20 cable diameters for flexing at - 20°C.
- Characteristic Impedance:** RF Impedance of twisted pairs or adjacent singles is: 87 ohms in AWG 24; 80 ohms in AWG 22. Suitable for digital signals.

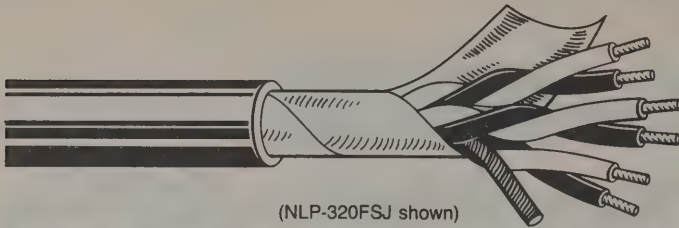

MULTI-CONDUCTOR STOCK CABLED SINGLES Conductor sizes 24, 22 are 7 strand. All others 19 strand.

## DIGITAL DATA TRANSMISSION CABLES

U.S. Pat. No. 3489844

### (D-200 SERIES)

#### UL AWM STYLE 2835

Meets E.I.A. Standards RS-422,  
RS-423, RS-485

## LOW VOLTAGE COMPUTER CABLE

THE D-200 SERIES CABLES ARE MULTIPLE-PAIR FLEXIBLE CABLES DESIGNED FOR TRANSMISSION OF DIGITAL PULSE SIGNALS BETWEEN A COMPUTER AND ITS PERIPHERAL EQUIPMENT.

### DESIGN FEATURES OF THE D-200 SERIES DIGITAL DATA CABLE

Unlike conventional flexible cable construction the primary features offered by the D-200 series data cable are the high and accurately controlled characteristic impedance of every pair, regardless of its position in the cable and special geometry chosen to reduce crosstalk.

#### ADVANTAGES

1. Less crosstalk and noise from mismatched loads, due to proper matching.
2. Uniform light loading on drivers allows direct I.C. drive, accurate prediction of current demands from power supply, and driver power dissipation.
3. Proper load match reduces re-flection and inversion noise where driver end is not matched to line. (Typical of TTL.)
4. Special geometry and pair construction provides exceptionally close capacitance balance between pair wires, reducing differential crosstalk.

#### USAGE

We recommend use of balanced drive and differential-input line receivers for lowest crosstalk and best pulse reproduction, utilizing the 110 ohm balanced impedance of the pairs. With such a system, TTL speeds have been used in D-200 cable at 1 mc data rates over 1000 ft.

Where the system is single-ended drive and receive, all pairs exhibit the 78 ohm impedance. Since these line receivers cannot discriminate between noise and the desired signal, crosstalk limits the cable distance over which transmission is reliable. Typical runs for DTL having 50 ns risetimes are 200 ft. Where risetimes can be slowed to longer than 100 ns, run lengths are practical to 500 ft. Without differential line reception, runs over 500 ft. are not recommended for D-200 cable due to external noise aspects.

The D-210 series cables are recommended for high noise or long-run application. (Utilizing individual shields.)

Although use of balanced drive and differential line reception will avoid most noise problems, there are some installations where the expected external noise is unknown but assumed to be very great. Here, the use of data cables having individually-shielded pairs may be considered as conservative engineering practice. The assurance of a lower received noise may justify the increased size cost and risetime.

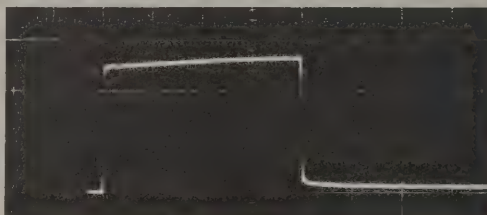

For these high noise-long run applications, Dynatronic Cable Engineering Corp. has developed the D-210 series data cables. Electrical performance is essentially the same as the D-200 series cables, which use only an overall shield. <sup>Δ</sup>An overall tinned-copper shield braid may be specified on either series by the suffix -RF on the part number. Standard D-200 shield is aluminum-mylar foil. THE D220 AND D222 SERIES CABLES ARE RECOMMENDED FOR LONG RUNS WHERE EXTRA-FAST OUTPUT PULSE TIMES ARE REQUIRED.

For runs of 1000-5000 ft. or where extra-fast output pulse risetimes are required, we offer the D220 and D222 series cables: larger versions of the D200 series having improved transmission properties with sufficient mechanical strength for long pulls in conduit.

PULSE TRANSMISSION LOSS in D-series data cables causes a moderate amplitude loss, with definite rounding of the leading and trailing edges from 50% to 90% amplitude. The photos below (for a 1.25 megabit clock rate) show typical waveforms. The D-220 and D-222 series cables offer even lower losses than the D-200 or D-210 cables for long-run or fast-clocked applications.

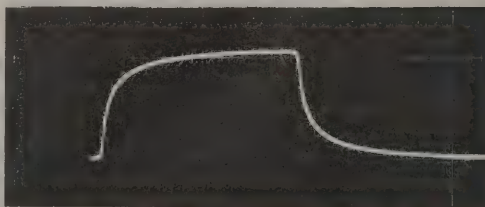

Contact our factory engineering staff for detailed pulse-shape versus distance information, or for special applications.

#### INPUT PULSE

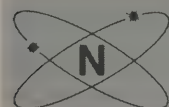

Horizontal: 200. ns/cm  
Vertical : 2. volts/cm

#### OUTPUT PULSE at 500 FT.

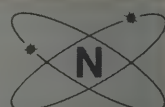

Horizontal: 200. ns/cm  
Vertical : 2. volts/cm

We invite your telephone inquiries for technical information on data cables.

**CUSTOM-MADE CABLE**

TO YOUR OWN SPECIFICATIONS...

**COMPLETE WIRE AND CABLE FACILITIES TO MEET YOUR NEEDS**

If the standard cables shown on the preceding pages do not meet your application requirements, Custom-Made cables to your own specifications are available promptly — and at lower cost than you may suppose...

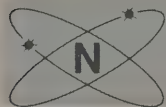

We invite your inquiries on fiber optic cables. National Wire & Cable can manufacture multi-conductor fiber optic cables as well as hybrid cables consisting of fiber and copper conductors.

**BECAUSE NATIONAL HAS:**

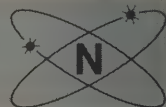

1. The organization & experience to handle short-runs or rush schedules with consistent quality.
2. All types of mill machinery for fabricating cable and all intermediate operations.
3. An enormous wire inventory to draw from for material for your cable. Over 160 million feet in stock.
4. Technical consultants to aid you in properly specifying your cable needs.

**DESIGNERS: May we suggest:**

- A. See Section 8 for technical details regarding custom cables.
- B. Call our engineering department (213-225-5611) and discuss your needs with our technical consultants. They speak your language and may have just the answers you need.
- C. Our consultants will assist you in design, obtain cost and delivery information, provide formal quotations and drawings, and assist with sales & procurement liaison.
- D. On most custom cables, we can print your company name and part number at regular intervals on the outside jacket at no extra cost. This will make your packaging truly "Custom".

## CUSTOM COILED CABLE INQUIRY SHEET

CUSTOMER \_\_\_\_\_ DATE \_\_\_\_\_

CONTACT \_\_\_\_\_ PHONE NO. \_\_\_\_\_

POSITION \_\_\_\_\_ DRAWING \_\_\_\_\_

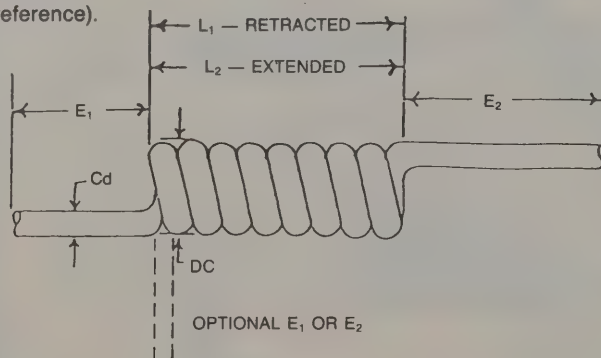

Let us review your requirements by mailing or faxing us this completed inquiry sheet.

### CABLE DESCRIPTION

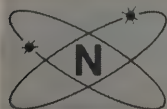

1. Number of Conductors (2 thru 60). \_\_\_\_\_
2. Gauge Size and Stranding of Conductors (30 thru 18). \_\_\_\_\_
3. Conductor Insulation Type (if preference). \_\_\_\_\_
4. Shielding, normally Nafoil or Spiral Tinned Copper (if required). \_\_\_\_\_
5. Jacketing Compound Polyurethane or Hytrel by Dupont. Compound PU, color black. Color matching is available. \_\_\_\_\_
6. Finished cable diameter requirements (if preference). . cd = \_\_\_\_\_
7. Voltage range and temperature range of application. \_\_\_\_\_ v. \_\_\_\_\_ °c \_\_\_\_\_
8. Any special requirements, \_\_\_\_\_  
UL 20197 is available for computer use on request.

### COILED CABLE DESCRIPTION

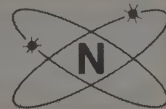

1. Retracted Length L1 = \_\_\_\_\_
2. Extended length (normally 4-5 times recovered length). L2 = \_\_\_\_\_
3. Length of ends to be straight or right angle.  $E1 = \frac{\text{Length} - \text{Angle} -}{\text{Angle} -}$   
 $E2 = \frac{\text{Length} - \text{Angle} -}{\text{Angle} -}$
4. Outside diameter of coil (if preference).

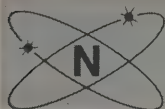

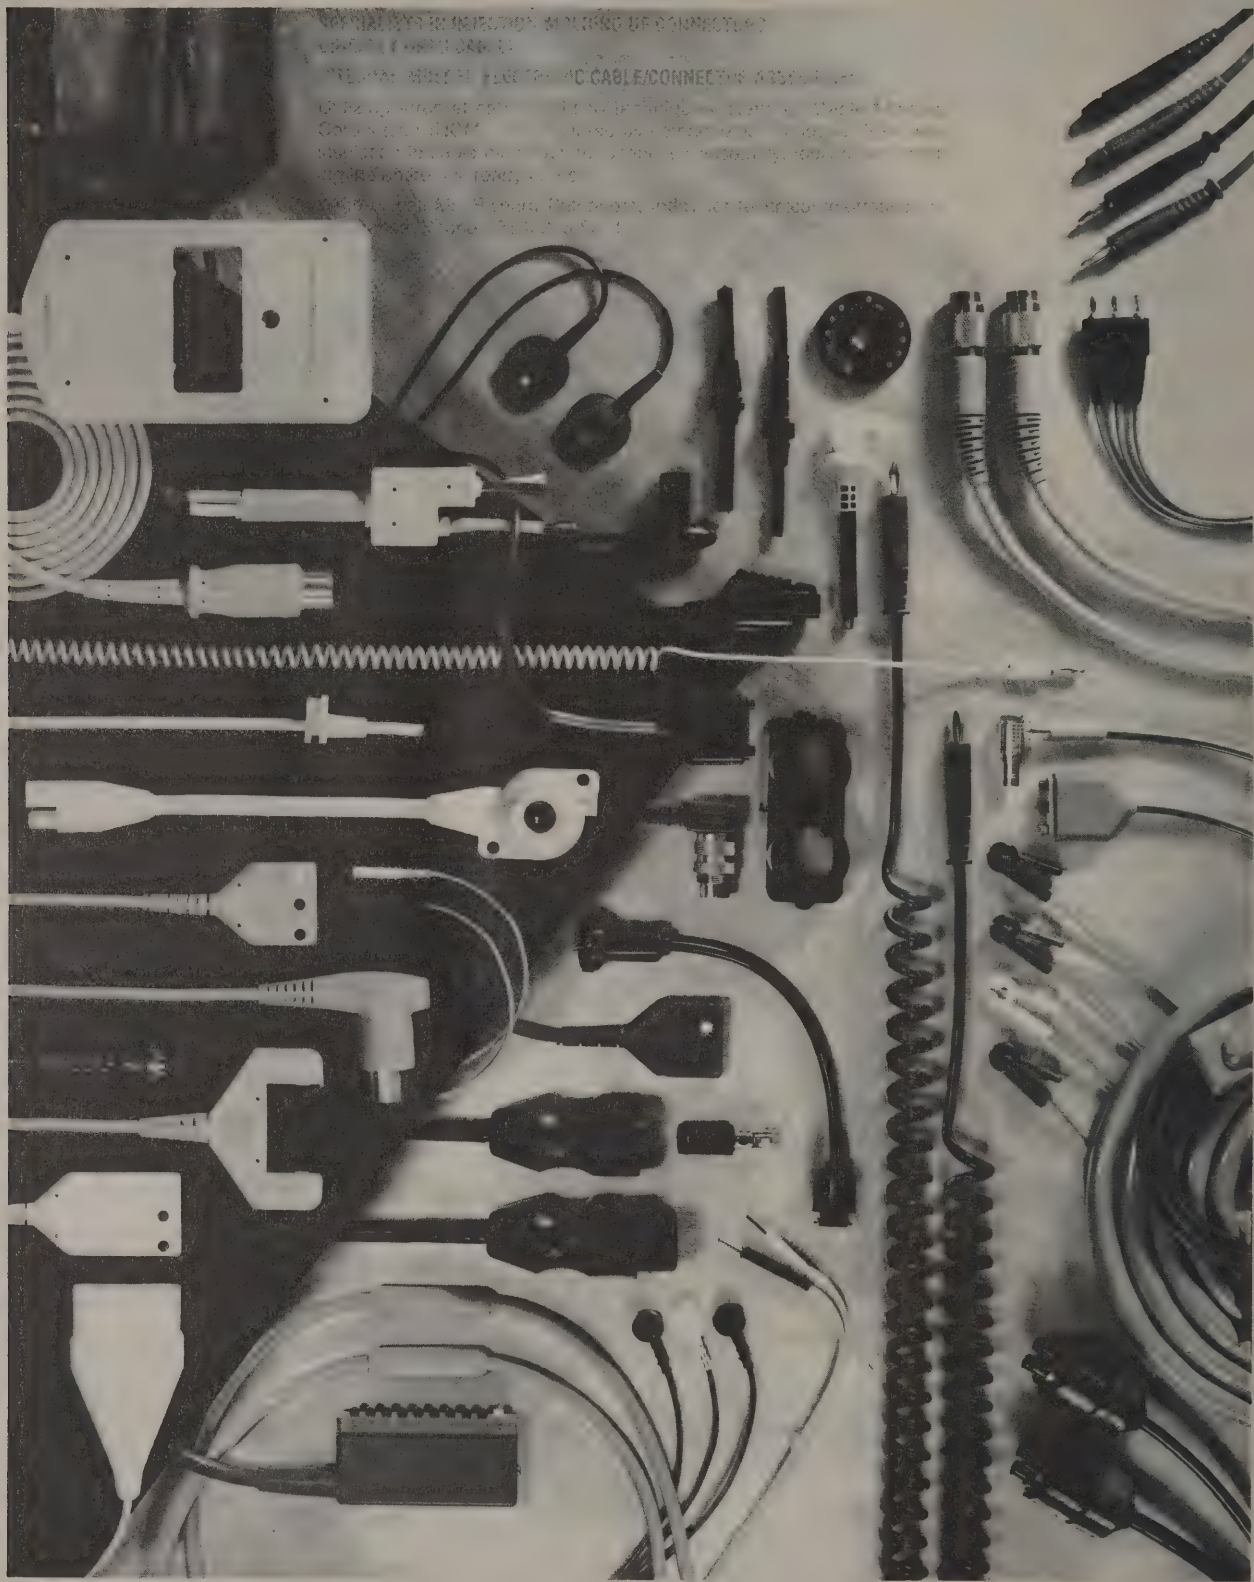

FOR INFORMATION PHOTO COPY THIS PAGE, FILL OUT AND RETURN.

## Cable Harness Abrasion Protector

| Standard Materials                                                                                                                                                                                                                                                                                                                                                               | Max.<br>Oper.<br>Temp. | Min.<br>Oper.<br>Temp. | MIL<br>Spec.<br>& Approvals                                                                                        |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------|------------------------|--------------------------------------------------------------------------------------------------------------------|
| <b>Clear Polyethylene</b><br>Ideal for general applications, this low-cost material is highly abrasion resistant and is not affected by most solvents.                                                                                                                                                                                                                           | 215°F<br>101°C         | -105°F<br>-76°C        | Fed. Spec.<br>LP390<br>MIL-I-631D<br>MIL-P-21922A                                                                  |
| <b>Ultraviolet-Resistant Black Polyethylene</b><br>Has the same properties as clear polyethylene but features an ultraviolet absorber which allows it to be used outdoors in direct sunlight for long periods of time.                                                                                                                                                           | 215°F<br>101°C         | -105°F<br>-76°C        | Fed. Spec.<br>LP390<br>MIL-I-631D<br>MIL-P-21922A                                                                  |
| <b>Fire-Resistant Polyethylene</b><br>This material is self-extinguishing and costs less than Nylon or Teflon; available in White or Black.                                                                                                                                                                                                                                      | 200°F<br>93°C          | -1°F<br>-19°C          |                                                                                                                    |
| <b>Nylon</b><br>Natural Nylon is self-extinguishing and does not produce any toxic or irritating byproducts, even when exposed to an open flame or temperatures beyond its operating range. Recommended for use in enclosed environments where the possibility of fire exists, Nylon is also lightweight, highly abrasion resistant, and operates over a wide temperature range. | 200°F<br>93°C          | -121°F<br>-85°C        | MIL-M-20693B<br>Type I<br>MIL-M-22096A<br>LP 410A<br>MIL-M-19098                                                   |
| <b>Black Nylon</b><br>Features the same properties as Natural Nylon with the added benefit of an ultraviolet absorber so that it can be used in direct sunlight for long periods of time.                                                                                                                                                                                        | 200°F<br>93°C          | -121°F<br>-85°C        | MIL-M-20693A<br>Type II<br>MIL-M-22096<br>LP 410A<br>MIL-I-47287A<br>Type II                                       |
| <b>Teflon (TFE)</b><br>Natural (TFE) features the widest operating temperature range of any material and can be used from -450° to +500°F. It is chemically inert, non-flammable, and can be supplied in a variety of colors.                                                                                                                                                    | 500°F<br>260°C         | -450°F<br>-85°C        | AMS 3651C<br>AMS 3653C<br>AMS 3654<br>AMS 3655<br>ASTM D3295<br>MIL I-22129C<br>P-22296B<br>MIL-T-47287A<br>Type I |

### Spirally Cut Plastic Expandable Cable Wrap Available in Six Sizes

Organizes and bundles wires

Protects hoses from abrasion

- Bundles wires, cables, hoses, and tubing firmly, but allows flexibility
- Wraps on like tape, but can be reused quickly and simply
- Permits wire and hose breakouts in any orientation
- Easy to route or reroute new or replacement wires
- Resists abrasion, dampens vibration, and insulates
- Clamps bundles to standoffs and robotic components
- Available in colors for special identification requirements
- Can be supplied forward or reverse cut for user convenience
- UL recognized component listed under category ZTFR2, Component Wire Positioning Devices. Our file Card Number is E83405 (M).

Sizes from 1/16" thru 1"  
for bundles up to 7" dia.

## International Cords, Cordsets, and Cordage

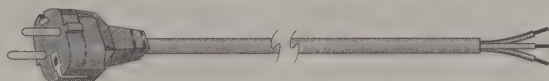

### Specifying International Power Connections

There are several important technical hurdles facing the designer of equipment that will be exported, some of which are:

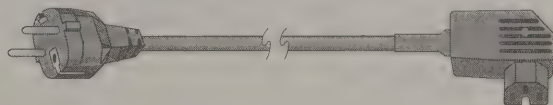

- The product must be easily connected to foreign mains power outlets or wall sockets which vary from country to country;
- The product must work at foreign mains voltages and frequencies which range from 100-250VAC at 50 or 60Hz. European voltages are typically 220-240 at 50 Hz. (See our power inlet modules with integral voltage selectors in Section 2100.)
- The product must conform to foreign product safety standards as enforced by appropriate national standards and test agencies.

1. **Detachable connections** based on IEC 320. Benefit: Flexibility. The IEC 320 power inlet (installed on product) and outlet (on cordset) allows the manufacturer to attach a cordset with the correct international or North American wall plug just before shipment. The IEC 320 standard covers several connector outlines, the most important of which are shown below:

2. **Power Supply Cords:** Usually specified when equipment requires more than 10A. For applications rated at 10-16 amps, 1.5mm<sup>2</sup> (cp. 14AWG) conductors are specified. For ratings above 16A, specify IEC 309 connectors and assemblies.

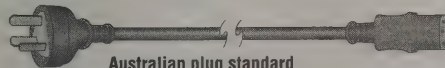

3. **Made-to-Order Cord & Cordset Assemblies:** We offer in-house made-to-order assembly services when a standard model is not available or when special end preparations are required.

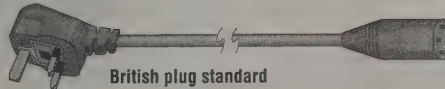

4. **Cordage:** When neither a molded power supply cord or cordset is suitable, international or North American cordage with appropriately sized conductors may be the best alternative.

## Designing for Export? We make it easy!

**Export Designer's Reference/Catalog** gives detailed information about world electrical requirements and safety agencies; each product section begins with a review of international regulations. Call or FAX toll free for a free copy.

Components carry approvals by UL, CSA, VDE, SEMKO, SEV and other safety agencies. Most items are available for fast shipment from our large inventory. We have no minimum order and can ship prototype orders quickly.

# Low Power Cords

## 15A/120VAC North American 10A/220-240VAC International

Standard international power cords. Cable strain reliefs and terminal blocks are available. See section 2100 for international sockets and rewirable plugs. In-house made-to-order assembly services available.

Medium Power International Cordsets

15-20A/120-230VAC No. America  
10-16A/220-240VAC International

The cords below feature a molded-on IEC 320 connector rated at 16A for international models (20A North America.) The plug on cordset model #86595000 is molded on, but plugs on the other cordsets are assembled on to IEC 320 cords #86591000 or #86591010.

# High Power Cords

## 16-32A/220-240VAC/Single Phase

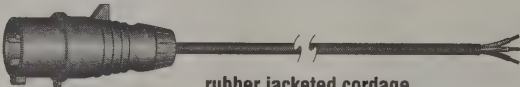

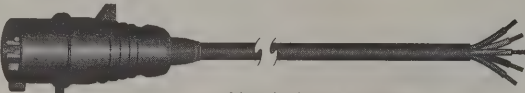

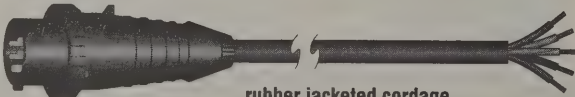

## 32A-125A/380-415VAC/Three Phase

IEC 309 connection system is recommended for North American and international high power connections above 16A. The connectors below carry UL, CSA, and VDE approvals, but differing North American and International cordage standards require AWG cordage for assemblies used in North America and Harmonized cordage for assemblies being shipped overseas (see first page of this section for more information on differences in the cordage types).

The cordsets below are configured with Harmonized cordage; we also offer assemblies with AWG cordage.

| CORDS                                                                                                         |                        |              |        |                |         |           | Approvals                | Current Rating | Voltage Rating | Max. # International & North American Cordage

Products being shipped to Europe—and almost everywhere outside of North America—must utilize Harmonized cordage manufactured to CENELEC standard HD-21 (for PVC jacketed cordage) or HD-22 (rubber jacketed). Harmonized cordage differs from North American AWG cordage in several ways, the most important of which are:

## Conductor color coding:

| Conductor | Harmonized   | North Amer. AWG |
|-----------|--------------|-----------------|
| Line      | Brown        | Black           |
| Neutral   | Blue         | White           |
| Ground    | Green-Yellow | Green           |

**Metric and AWG:** Harmonized wire sizes are expressed in metric units; North American wire sizes are expressed in AWG). Here is how they compare:

| AWG    | Closest Metric Equiv. | Max. Current |
|--------|-----------------------|--------------|
| 18 AWG | 0.75mm <sup>2</sup>   | 6A           |
| 16 AWG | 1.00mm <sup>2</sup>   | 10A          |
| 14 AWG | 1.50mm <sup>2</sup>   | 16A          |

**Constructional differences:** Tensile strength of UL 62 cordage is typically greater than similar sizes of Harmonized cordage. Harmonized cordage may have textile threads in the construction which are used to indicate the manufacturer of the cordage.

## International Harmonized Cordage

All items normally available from stock.  
No minimum order requirements.

Approved by VDE to HD-21 (PVC jacketed cordage) or HD-22 (rubber jacketed cordage). Most cordage is also sold by the reel; contact us for more information.

### 3 Conductors

International color coding: Brown (line), Blue (neutral), Green/Yellow (Ground)

| Part No. | Conductor Size        | Jacket Material | Cur. Rat. | Volt. Rating | Temperature Rating | O.D. (mm) | Color | HD-21 or HD-22 Code |
|----------|-----------------------|-----------------|-----------|--------------|--------------------|-----------|-------|---------------------|
| 86010014 | 3x0.75mm <sup>2</sup> | PVC             | 6A        | 300/500V     | -15°C to +70°C     | 6.4-8.0   | Black | H05VVF3G0.75        |
| 86010044 | 3x1.00mm <sup>2</sup> | PVC             | 10A       | 300/500V     | -15°C to +70°C     | 6.8-8.4   | Black | H05VVF3G1.00        |
| 86010074 | 3x1.50mm <sup>2</sup> | PVC             | 16A       | 300/500V     | -15°C to +70°C     | 8.0-9.8   | Black | H05VVF3G1.50        |
| 86010124 | 3x2.50mm <sup>2</sup> | PVC             | 25A       | 300/500V     | -15°C to +70°C     | 9.6-12.0  | Black | H05VVF3G2.50        |
| 86010380 | 3x1.50mm <sup>2</sup> | Rubber          | 16A       | 450V         | 60°C               | 9.6-12.5  | Black | H07RNF3G1.50        |
| 86010390 | 3x2.50mm <sup>2</sup> | Rubber          | 25A       | 450V         | 60°C               | 11.5-14.5 | Black | H07RNF3G2.50        |

| 86010490 | 5x16.0mm <sup>2</sup> | Rubber | 82A | 450V     | 60°C           | 27.0-35.5 | Black | H07RNF5G16.0 |

## North American AWG Cordage

All items normally available from stock.  
No minimum order requirements.

Note: This cordage is UL listed. It carries CSA certification only if it is ordered by the reel; contact us for reel part numbers.

### 3 Conductors

Color coding: Black (line), White (neutral), Green (Ground)

| Part No. | Conductor Size | Jacket Material | Cur. Rat. | Volt. Rating | Temperature Rating | O.D. (inches) | Color | Cordage Type |

# The Wire of the Future Here Today!

## MHW MICROMINIATURE HOOK-UP WIRE

Using the best insulation known to man and capitalizing on experience in the insulating of Teflon®, dating back to 1951, Phoenix Wire has developed a Multi-layer thin wall wire to aid in miniaturization.

• 300 Volt Service • Operating temperature – 90° to + 260°C • Silver Plated Conductor • Multi-layer TFE-Teflon® insulation insures uniformity, quality, and concentricity • Extreme Flexibility; long lengths • No danger from Soldering Irons • Chemically Inert — Weather resistant, non-flammable; zero moisture absorption; natural lubricity • Available in 10 Bright colors • Space & Weight savings invaluable in miniaturization programs • Parallel flat, triangular, and twisted multi-conductor cables available.

| Catalog Number | AWG Size | Bare Conductor Diameter | Stranding | Insulation Wall Thickness |         | Insulated Wire Diameter |         |         |
|----------------|----------|-------------------------|-----------|---------------------------|---------|-------------------------|---------|---------|

\*Bare Copper Conductor

## TDQ SUBMINIATURE LEAD WIRE

For greater economy, but still retaining all the features of our MHW (with the exception of less flexibility) try our TDQ Wire. Bare Copper or Silver Plated Copper Conductor standard. Conductor of your choice may also be used.

## MFC MULTICONDUCTOR MICROMINIATURE AND SUBMINIATURE FLAT CABLES GAUGES: 24—44

### Servicing... ELECTRONICS MEDICAL PACKAGING

Specializing in the application of less than .00025" to over .006" of Teflon® (TFE and FEP) to wires of any composition in AWG. Gauges: 14 to 60.

- Teflon® Insulated Magnet Wire. Gauges: 14 to 60
- Teflon® Tubing & Lead Wire
- Wire Harness & Electronic Assembly Capability
- Microminiature and Subminiature Flat Cables. Gauges: 24 to 44

**No Order Too Large or Too Small!**

# Rowe High Temperature, High Voltage, Cable and Wire

## High Voltage Cable

Rowe Industries has provided industry and the military with high reliability, corona-free, high voltage cable designed for use in varied and exacting applications such as accelerators, radar, X-ray, and ECM equipment.

The semi-conducting corona-suppressing layers with thermosetting materials provide noise free, corona-free cable and wire. Various high pulse coax and triax types are listed in the chart.

Primary insulation is extruded silicone and outer jacket is silicone, neoprene or PVC. Consult factory for exact cable construction.

Cable jacket color is black. Additional colors are available for some cables. Consult factory.

## High Voltage Silicone Coated Teflon Insulated Wire

Rowe's high voltage silicone coated teflon wire is designed for use in radar systems, ECM's, CRT displays, laser systems, and airborne system applications where maximum operating capability with minimal size is a must.

Silicone coated teflon wire offers excellent dielectric strength while maintaining the small diameter so often required in a systems' package design. The wire can be easily bonded to with most silicone based RTV's, eliminating the need for chemical etching of teflon wires.

All operating voltages listed are continuous DC ratings from +55°C to +150°C, and sea level to 70,000 ft.

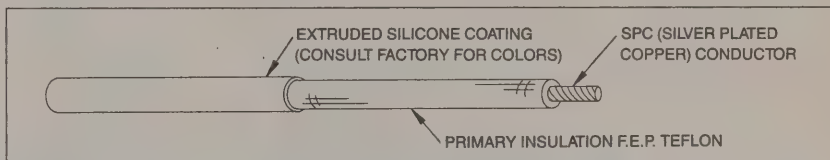

\* Nomex is a trademark for DuPont Aramid (Polyimide) Fibers "Teflon" is a trademark of DuPont

### Features:

- Voltage ratings thru 60 kvdc • 26 AWG thru 20 AWG conductor • -55°C to +150°C operating temperature range • High flexible • Easy bonding to extruded silicone outer jacket • Small diameter
- Available with or without silicone outer jacket
- Available with or without Nomex\* braid

**Ordering Information:** When ordering wire specify part number followed by applicable dash number for color.

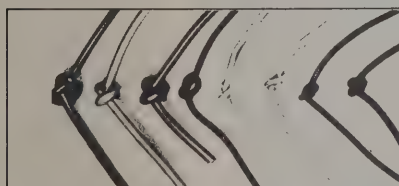

EXAMPLE: **RCB10081-24-6**

Follows standard IEEE color code.

## "Super Tough" and "UL 3239" High Voltage Silicone Lead Wire

"Super Tough" High Voltage Silicone Lead Wire was developed for high abrasion resistance requirements and exhibits excellent dielectric capability in extreme environments. "UL 3239" High Voltage Silicone Lead Wire exhibits excellent dielectric capability in extreme environment areas where high abrasion resistance, high voltage, flame resistance, and flexibility are major requirements.

### Specifications\*

Conductor — Silver or tin plated copper stranding\*\* (SPC indicates silver plating)

Temperature Rating:

"Super Tough" —

SPC -65° to +200°C (250°C Intermittent)

TPC -40°C to +150°C

"UL 3239" — 150°C (250°C Intermittent)

Voltage Ratings — Maximum DC voltage rating in air

Wire Marking — Per UL 3239 requirements

### "Super Tough" High Voltage Silicone Lead Wire

| Rowe Catalog No. | AWG Size | Strand | O.D. Nom. | Maximum Operating Voltage Rating DC |
|------------------|----------|--------|-----------|-------------------------------------|

| *R800-5010       | 10       | 105/30 | .160                         | .440      | 50KV           |

\*Per UL3239 requirements.

\*Consult factory for variation available for conductor stranding, plating, AWG, size and voltage rating. Standard insulation is white. Other colors and special configurations available.

\*\*When ordering tin plated stranding, add "TPC" to P/N (i.e. R790-2022/TPC)

# SHOGYO CONNECTORS, JACKS & PLUGS

Your design deserves Shogyo quality and reliability.

You deserve...

Shogyo Service... comprehensive, responsive and fast  
Shogyo Professionalism... the helpful experience you need

Shogyo Prices... always competitive, usually better  
and...

Shogyo Selection... with complete custom design capabilities

Including a diverse offering of miniature and microminiature:

• Connectors:

modular, panel mount, chassis mount, pin printed circuit mount, DIN, coaxial cable, cable, miniature consent, feeder consent, tube socket, BNC, UHF, and MIC

• Jacks:

RCA phono and chassis mount, communications, phone, multi-conductor, closed and open circuit, stereo, in-line, barrel, sub miniature enclosed phone, PC mount, panel mount, DC, open frame, DC power, earphone, DIN, headphone, combination, auto an-

tenna, pin polarized, and banana

• Plugs:

phone, communication, barrel, microphone, DC, automobile, automobile antenna, DIN, RCA phono, pin, coaxial, banana, solderless, pin tip, and polarizing

• Modular telephone apparatus:

a full line of jacks, connectors, handset and line cords

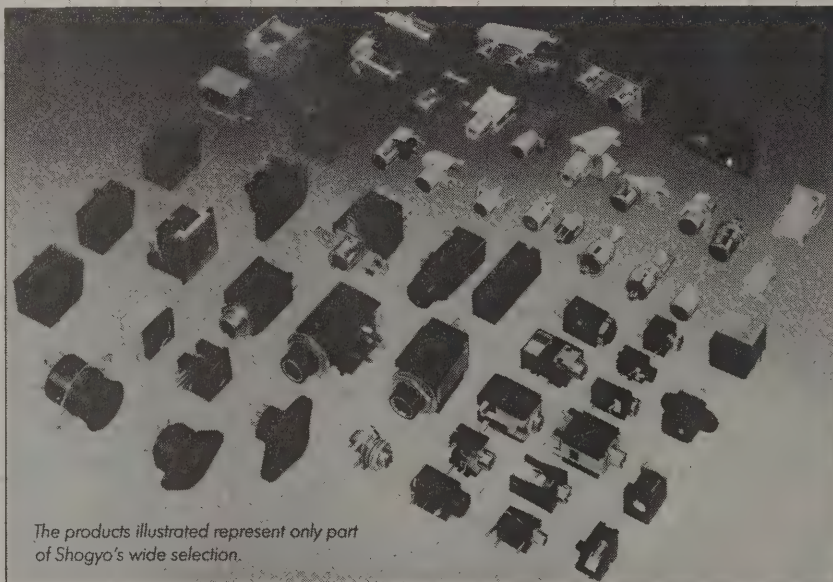

• Terminal boards, binding posts, barrier strips, clips, and fuse holders

And featuring:

• Shielding

• A wide variety of angles, mountings, sizes and shapes

• Mating components for virtually all items

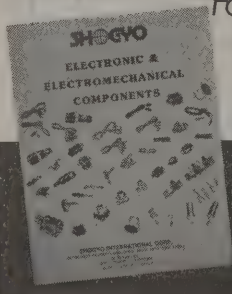

The products illustrated represent only part of Shogyo's wide selection.

# SHOGYO CORD SETS AND CABLE ASSEMBLIES

Your design deserves Shogyo quality and reliability.

You deserve...

Shogyo Service... comprehensive, responsive and fast

Shogyo Professionalism... the helpful experience you need

Shogyo Prices... always competitive, usually better

and...

Shogyo Selection... with complete custom design capabilities

Including a diverse offering of:

- Telecommunication:

coiled, straight, round, flat, or oval; copper, stranded or tinsel; with 4, 6 or 8-position modular plugs or spade lugs; and keyed or un-keyed for mating with connectors

- Audio:

shielded, unshielded, single or multi-conductor, with molded plugs and in-line jacks

- Zip:

standard or custom lengths, gauges, insulation thicknesses and jacket colors, with DC or phone plugs in a variety of sizes

- Computer/Video:

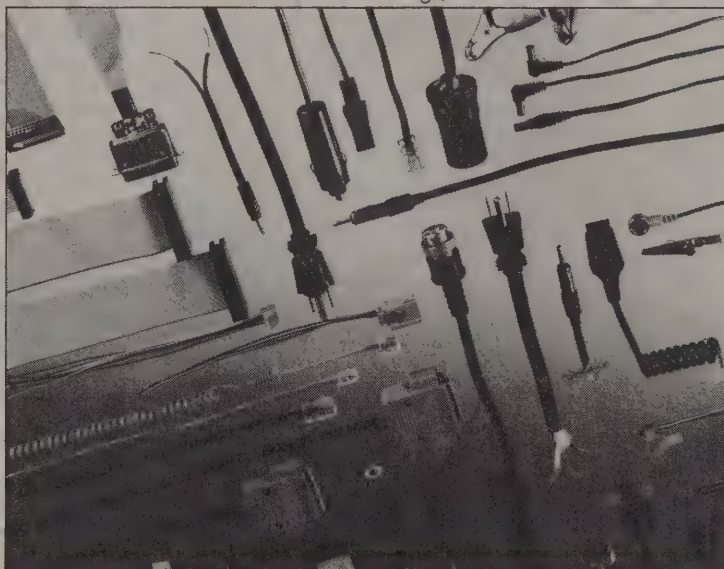

(from 9-50 pins, male or female, plastic or metal, low-profile, edgewise or multi-polar), DIN cables produced to spec (available with shielding), and RCA phono

- Power:

European or American, single or multi-conductor, custom made to specified current and temperature ratings, standard SPT-1 & 2, ST, SVT, SJT, XT or PXT, UL/CSA approved

- And featuring:

- A comprehensive selection of lengths, thicknesses, coilings, and end terminations

The products illustrated represent only part of Shogyo's wide selection.

# Switchcraft

A Raytheon Company

## M O L D E D C A B L E A S S E M B L I E S

Switchcraft quality-molded cable assemblies offer built-in cable clamps to eliminate strain. Cables are available in black or chrome gray with matching plastic handles which have been functionally designed for a positive grip. Other features which ensure exceptional life and performance are:

- Soldered and/or crimped connections for positive electrical continuity.
- Molded assemblies protect against moisture, noise and shorts.
- Shielding and impedance matched to eliminate RF noise and guard against loss of frequency response.

### DIN PLUGS

Switchcraft's versatile system of molded cable assemblies and mating receptacles meets the increased demand for modern, miniature connectors for a wide range of electrical/electronic applications. Connectors are DIN circular type and are fully field-proven in electronic applications. Strict requirements of FCC 20780 docket are fully addressed in offering fully shielded links.

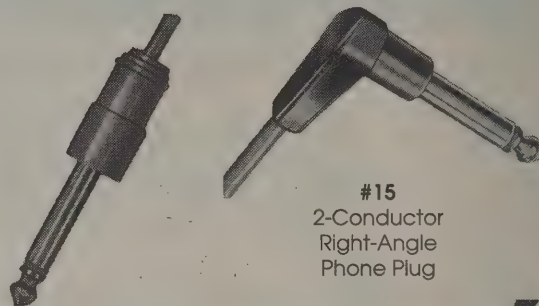

The system comprises male and female plugs, locking and non-locking, with 3 to 8 pins/contacts. Units are fully-molded and protected with a rugged handle and advanced design cable relief. A complete range of mating receptacles is also available.

### CABLE TYPES

| DESIGNATION | DESCRIPTION                                      | SIZE (AWG) |
|-------------|--------------------------------------------------|------------|
| A           | 1-conductor coaxial with spiral shield           | 22         |
| B           | 2-conductor with single spiral shield and jacket | 22         |
| D           | 1-conductor coaxial with spiral shield           | 25         |
| F           | 2-conductor parallel coaxial                     | 25         |

NOTE: F is a twin cable which can be attached on each end to either a pair of mono connectors or a single stereo connector.

#### STEREO MOLDED CABLE ASSEMBLIES

|     |           |   |                 |     |
|-----|-----------|---|-----------------|-----|
| 1 0 | G - Gray  | B | (same as above) | 1 0 |
| 8 1 | H - Black | F |                 | 8 4 |

\* See "Cable Types" chart on previous page.

#### NOTES:

- Some configurations will be special orders.
- Only cable "A" may be used with #80 termination.
- Larger plug (#45) will be supplied in place of #40 plug when used with cable "A".
- Mono plugs attached to twin cable "F" will have one plug colored red for right channel.
- Contact Switchcraft for all special orders.

#### TYPICAL STANDARD PART NUMBERS

| Straight 2-conductor Phone Plug (#05) to: |       |        |                          |
|-------------------------------------------|-------|--------|--------------------------|
| Termination (other end)                   | Cable | Length | Part Number <sup>1</sup> |
| (phone plug) #05                          | A     | 6'     | 05HA07205                |
| (stripped wires) #84                      | A     | 3'     | 05HA03684                |

| Phono Plugs (#25) to: |   |    |           |
|-----------------------|---|----|-----------|
| (phono jack) #82      | A | 6' | 25HA07282 |

| Dual Phono Plugs (#25) to: |   |     |           |
|----------------------------|---|-----|-----------|
| (dual phono jacks) #82     | F | 10' | 25HF12082 |

| 3.5mm Miniature Plug (#40) to: |   |    |           |
|--------------------------------|---|----|-----------|
| (3.5 mm plug) #40              | D | 6' | 40HD07240 |

# COMMONLY USED ELECTRICAL/ELECTRONIC ABBREVIATIONS AND ACRONYMS

## A

**A/D** acrylonitrile butadiene-styrene  
**A/D** analog to digital  
**ADC** analog to digital converter  
**ADP** automatic data processing  
**AFC** audio frequency control  
**AFT** automatic filter test  
**ALGOL** algorithmic language  
**AM** a logical operator  
**AQL** acceptable quality level  
**ASCII** American national standard code for information interchange  
**ASIC** application specific IC  
**ATE** automatic test equipment  
**ATG** automatic test generation  
**AWG** American wire gauge

## B

**BALUN** balanced to unbalanced  
**BASIC** beginners' all-purpose symbolic instruction  
**BCD** binary-coded decimal  
**BNC** baby "N" connector  
**BUS** basic utility syste

## C

**CAD** computer-aided design  
**CAE** computer-aided engineering  
**CAM** computer-aided manufacture  
**CAMAC** computer-automated measurement and control  
**CAPP** computer-aided process planning  
**CAT** computer-aided test  
**CATV** cable television or community antenna television  
**CCC** (leaded) ceramic chip carriers  
**CCD** computer-controlled display  
**CERMET** ceramic metal element  
**CIE** computer-integrated engineering  
**CIM** computer-integrated manufacturing  
**CLCC** ceramic leadless chip carriers  
**CMOS** complementary metal-oxide semiconductor  
**Comm.** communications  
**CPS** characters per second  
**CPU** central processing unit

## D

**D/A** digital to analog  
**DAC** digital to analog converter  
**DBMS** data base management system  
**DC** direct current  
**DFT** design for testability  
**DIAC** bidirectional trigger diode  
**DIL** dual in-line  
**DIN** Deutsche Industrie Normenausschuss  
**DIP** dual in-line package  
**DPM** digital panel meter  
**DRAM** dynamic RAM  
**DTL** diode transistor logic

## E

**EDA** electronic design automation  
**EDP** electronic data processing  
**EBCDIC** extended binary coded decimal interchange code  
**EEPROM** electrically erasable PROM

**EIA** Electronic Industries Association

**EMC** electromagnetic compatibility  
**EMI** electromagnetic interference  
**EMP** electromagnetic pulse  
**EPROM** erasable programmable ROM  
**ESR** equivalent series resistance

## F

**FEP** fluorinated ethylene propylene Copolymer, 200° Teflon  
**FET** field-effect transistor  
**FM** frequency modulation  
**FORTAN** formula translator

## G

**GaAsFET** gallium arsenide FET  
**CMIP** commn management information protocol  
**GPIB** general purpose interface bus  
**GPS** global positioning system

## H

**HF** high frequency (3 to 30 MHz)  
**HIPOT** test, measurement, and diagnostic equipment  
**HLL** high level language  
**HV** high voltage  
**Hz** Hertz

## I

**IAB** Internet Activities Board  
**IC** integrated circuit  
**IDC** insulation displacement contact  
**IF** intermediate frequency  
**IO** input/output (devices)  
**IR** insulation resistance (or) infrared  
**ISDN** integrated services digital network  
**ISO** International Standards Organization

## J

**JEDEC** Joint Electronic Device Engineering Council  
**JFET** junction FET  
**JMOS** junction MOS

## K

**kHz** kilohertz ( $10^3$  hertz)  
**KSR** keyboard send/receive

## L

**LAN** local area network  
**LC (filters)** inductance/capacitance  
**LCC** leaded chip carrier  
**LCD** liquid crystal display  
**LED** light-emitting diode  
**LF** low frequency (30 to 300 kHz)  
**LIF** low insertion force  
**LNA** low noise amplifier  
**LNB** low noise band  
**LSI** large scale integration  
**LVDT** linear velocity displacement transformer

## M

**MASER** microwave amplification by stimulated emission of radiation  
**MATV** master antenna television

**μF** microfarad  
**MHz** megahertz  
**MIC** microwave IC  
**MIPS** million instructions per second  
**MIB** microcomputer interface board  
**MOS** metal oxide semiconductor  
**MOSFET** metal oxide semiconductor FET  
**MOSIGT** metal oxide semiconductor insulated-gate transistor  
**MOV** metal oxide varistor  
**MPU** microprocessor unit  
**MSI** medium scale integration

## N

**NBS** National Bureau of Standards  
**NEMP** nuclear electromagnetic pulse  
**NIM** national instrumentation module  
**NOR** not OR  
**NTC** negative temperature coefficient

## O

**OCR** optical character reader  
**OEM** original equipment manufacturer  
**OR** a logical operator  
**OSI** open systems interconnection

## P

**PAL** programmable array logic  
**PC** printed circuit  
**PCB** printed circuit board  
**PCM** pulse code modulation  
**PCS** plastic clad silica  
**pF** picofarad  
**PGA** pin grid array  
**PIN** positive-intrinsic-negative (transistor)  
**PLA** programmable logic array  
**PLCC** plastic leaded chip carrier  
**PLL** phased lock loop  
**PPI** plan position indicator  
**PROM** programmable ROM  
**PTC** positive temperature coefficient  
**PUT** programmable unijunction transistor

## Q

**QAM** quadrature amplitude modulation  
**Q (meter)** quality-factor meter

## R

**RAM** random access memory  
**RC** resistance-capacitance  
**RFI** radio frequency interference  
**RMS** root mean square  
**ROM** read only memory  
**RF** radio frequency  
**RFC** radio-frequency choke  
**RFI** radio-frequency interference  
**RTD** resistance-temperature detector  
**RTL** resistor transistor logic  
**RTV** room temperature vulcanizing  
**RW** read/write

## S

**SAS** silicon asymmetrical switch  
**SBC** single board (micro) computer

**SBS** silicon bilateral switch  
**SCR** silicon-controlled rectifier  
**SCS** silicon-controlled switch  
**SDA** source & detector assemblies  
**SGMP** simple gateway monitoring protocol  
**SIDAC** bidirectional voltage-triggered switch  
**SIMM** single in-line memory module  
**SIP** single in-line package  
**SMD** surface mount device  
**SMT** surface mount technology  
**SNMP** simple network management protocol  
**SO** small outline  
**SOIC** small outline IC  
**SOT** small outline transistor  
**SSI** small scale integration  
**SSR** solid-state relay  
**STL** Schottky transistor logic  
**SUS** silicon unilateral switch

## T

**TC** temperature coefficient  
**TCE** thermal coefficient of expansion  
**TXCO** temperature compensated crystal oscillator  
**TFE** tetrafluoride ethylene propylene Copolymer, 250° Teflon  
**TRIAC** bidirectional AC switch  
**TTL** transistor-transistor logic  
**TTY** teletypewriter

## U

**UHF** ultra high frequency (300 MHz to 3 GHz)  
**UJT** silicon unijunction transistor  
**UL** Underwriters Laboratory  
**UPS** uninterruptible power supply

## V

**VAC** volts (of) alternating current  
**VAN** value-added network  
**VAR** volt-ampere reactive  
**VCR** video cassette recorder  
**VDC** volts (of) direct current  
**VHF** very high frequency (30 kHz to 300 MHz)  
**VHSIC** very high speed integrated circuit  
**VLF** very low frequency (3 to 30 kHz)  
**VLSI** very large scale integration  
**VME** virtual machine environment  
**VRM** voice recognition module  
**VTVM** vacuum tube volt meter  
**VU** volume unit  
**VSWR** voltage standing wave ratio

## W

**WPS** word processing software

## Y

**YIG** yttrium iron garnet

## Z

**ZIF** zero insertion force

# Technical Devices

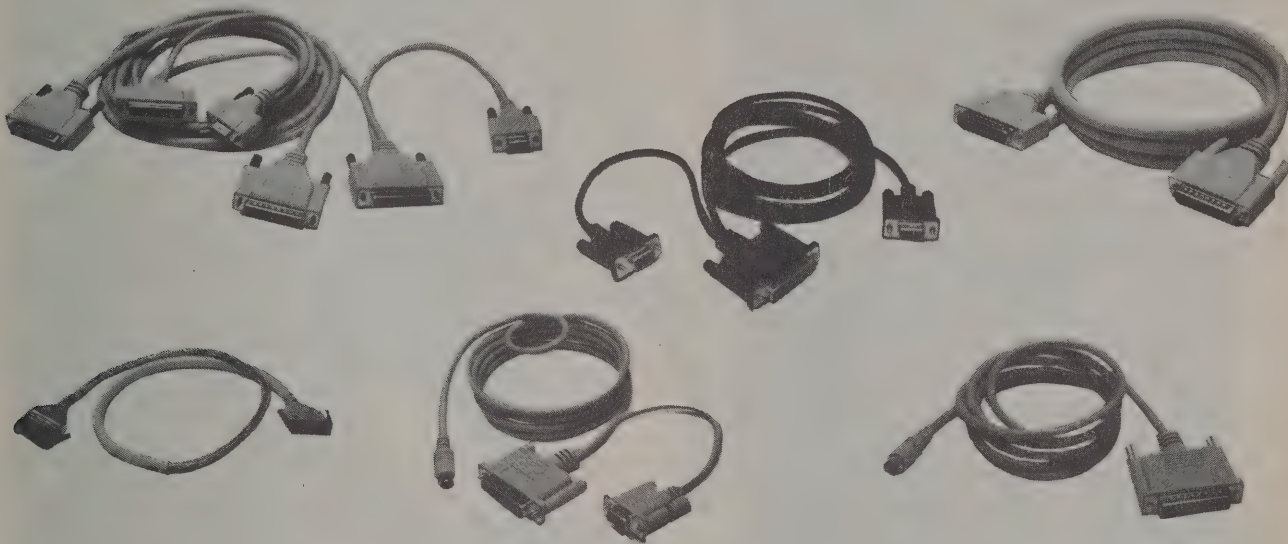

Adaptors • Power Supplies  
Transformers • Custom Cables

**YOUR SATISFACTION IS OUR REPUTATION**

## Custom Molded / Shielded Cables

At Technical Devices, we specialize in custom cable applications built to your specification; or our technical support team is ready at a moments notice to help you develop the exact cable assembly you need. All of our cables are expertly constructed to offer exceptional quality and customer satisfaction.

Uses for our molded cable assemblies include commercial, computer, industrial and medical applications. Whatever your need, it is a challenge we will meet. Whether you are a manufacturer, V.A.R., or distributor, you will be pleased by our attention to detail and appreciate our on time delivery service.

### OPTIONS

- Multi Conductor/Twisted Pair
- Shielded/Molded Cables
- Aluminum Mylar Foil/Braided Shield
- RS232C Applications
- Low Capacitance Cables
- Meets FCC EMI/RFI Emissions Regulations
- Custom Designs Such As Termination, Colors, Logo And Marking Are Available

### TYPES OF CABLE TERMINATION

- D-Subminiature
- Ribbon (Centronics Type)
- DIN
- Coaxial
- SCSI 2
- "Box" Contacts
- Terminals
- Edge Card Connectors

### APPLICATIONS

- RS232C Communication Cables
- Computer Peripheral Equipment Such As Printers And Modems
- Keyboard Cables
- Data Transmission Cables
- Satellite Communication Cables
- Telecommunications
- Optic Readers
- Extension Cables
- Medical

### STANDARD CABLES

- Printer
- Modem
- Keyboard
- SCSI

**CALL OR FAX US TODAY AND ASK US TO MEET YOUR CHALLENGE.**

See our catalog page in the DC Power Supplies Category...D-1956-D-1957

**Virginia Plastics Company**

# Assemble a World Class Combination

With Virginia Plastics Company Products

Virginia Plastics Company manufactures coiled cord assemblies with a vinyl rubber blend jacket which offers excellent memory characteristics, high reliability and excellent coil flex life.

Assemblies are used for bar code readers, mobile communications, medical equipment and computer keyboards.

Custom cable and made-to-order cable assemblies are also available.

## FEATURES

- ◆ High reliability cable
- ◆ Outer jackets offer a wide range of continuous operating temperatures:
  - PVC - Outer jacket:
    - 25° to 90°C
  - C75 - Outer jacket:
    - 30° to 90°C

## OTHER APPLICATIONS

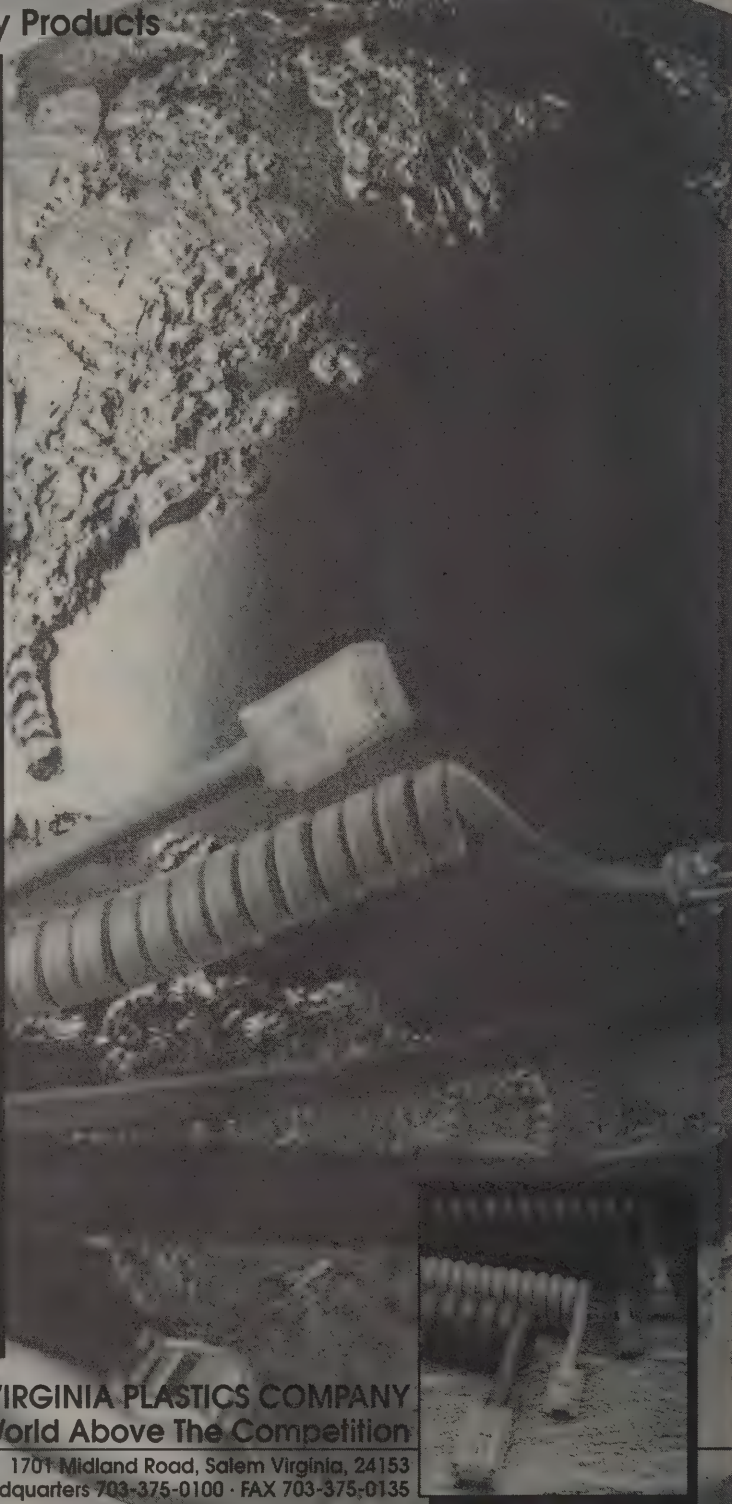

- ◆ Data transmission equipment
- ◆ Computer peripheral interconnections
- ◆ Data collection systems
- ◆ Optical scanning equipment
- ◆ Business information systems

## OTHER PRODUCTS

- ◆ High reliability modular connectors
- ◆ Field installable modular plugs
- ◆ Field termination tools
- ◆ Data communication and transmission line cable

## FLAT/OVAL MULTI-CONDUCTOR/UNSHIELDED

- ☐ UNIFORM CAPACITANCE THROUGHOUT THE CABLE OR ANY CABLE SECTION
- ☐ provides consistent electrical transmission properties between multiple lots of cable
- ☐ DESIGNED FOR CONNECTORIZING WITH DATA MODULAR MALE PLUGS
- ☐ GOOD FIELD RELIABILITY
- ☐ IMPROVED FLEXIBILITY FOR EASIER INSTALLATION AND ENHANCED APPEARANCE
- ☐ LOW HEIGHT OF CABLE COMPARED TO STANDARD I/O CABLES
- ☐ reduces bulkiness of an installation
- ☐ allows higher density of multiple cables
- ☐ FLAT/OVAL CABLE CONSTRUCTIONS ARE CONFIGURABLE IN ONE OF TWO WAYS FOR CONNECTING THE CABLE:
  - ☐ simulated pairs—balanced line configuration
  - ☐ parallel—non-balanced or single line configuration

### 2 CONDUCTOR CONFIGURED TO BE A

| Simulated Pair Termination | Parallel Termination |
|----------------------------|----------------------|
| Pair<br>#1 Red/Green       | #1 Red<br>#2 Green   |

(this cable is identical for either configuration)

### 4 CONDUCTOR CONFIGURED TO BE A

| Simulated Pair Termination              | Parallel Termination                        |
|-----------------------------------------|---------------------------------------------|
| Pair<br>#1 Black/Red<br>#2 Green/Yellow | #1 Black<br>#2 Red<br>#3 Green<br>#4 Yellow |

### 6 CONDUCTOR CONFIGURED TO BE A

| Simulated Pair Termination                               | Parallel Termination                                               |
|----------------------------------------------------------|--------------------------------------------------------------------|
| Pair<br>#1 White/Black<br>#2 Red/Green<br>#3 Yellow/Blue | #1 White<br>#2 Black<br>#3 Red<br>#4 Green<br>#5 Yellow<br>#6 Blue |

### 8 CONDUCTOR CONFIGURED TO BE A

| Simulated Pair Termination                                                 | Parallel Termination                                                                       |
|----------------------------------------------------------------------------|--------------------------------------------------------------------------------------------|

| UL Temperature Rating      | 60°C – 80°C                                | 60°C – 80°C                       | 60°C – 80°C                       | 60°C – 80°C                       |

Other conductor sizes and cable constructions are available upon request. Color-matched outer jackets to customer specifications are available. UL styles are available.

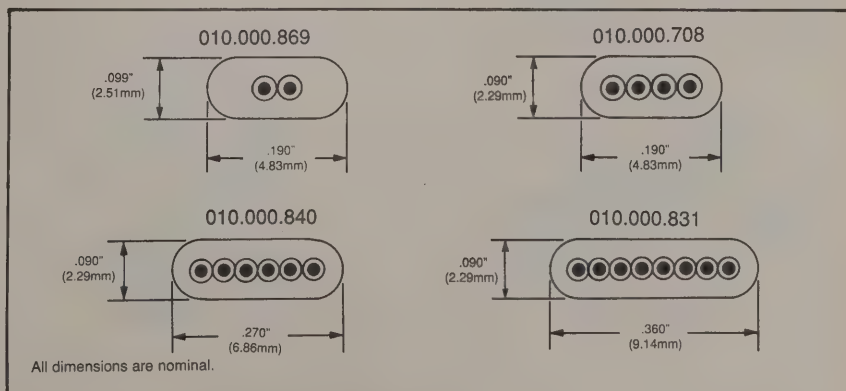

### MATERIALS FEATURES:

#### C41: Polyolefin

- Excellent data transmission characteristics
- Outstanding electrical properties
- Moderate cut-through resistance
- Very good stress crack resistance
- Excellent for low temperature usage
- Exceptional chemical resistance

#### Flexible PVC

- Outstanding flame retardancy (UL94V-0)
- Provides highly flexible cables
- Moderate abrasion resistance
- Improved cut-through resistance for flexible PVC
- Good operating temperature range
- Good chemical resistance

## MULTI-PURPOSE DATA CABLES/UNSHIELDED\*\*

- ☐ UNIFORM CAPACITANCE THROUGHOUT THE CABLE OR ANY CABLE SECTION
- ☐ reduces capacitance imbalances between sections taken from a single length of cable
- ☐ eliminate impedance mismatches that are typically found throughout a single length of cable
- ☐ provides consistent electrical transmission properties between multiple lots of cable
- ☐ DESIGNED FOR CONNECTORIZING WITH DATA MODULAR MALE PLUGS
- ☐ HIGHER FIELD RELIABILITY THAN STANDARD I/O CABLES
- ☐ IMPROVED FLEXIBILITY FOR EASIER INSTALLATION AND ENHANCED APPEARANCE
- ☐ ALL MULTI-PURPOSE DATA CABLE CONSTRUCTIONS ARE CONFIGURABLE IN ONE OF TWO WAYS FOR CONNECTING THE CABLE:
  - ☐ simulated pairs—balanced line configuration
  - ☐ lower capacitance isolated conductors\*—non-balanced or single line configuration

### 4 CONDUCTOR CONFIGURED TO BE A

| Simulated Pair Termination | Lower Capacitance Termination |

### MATERIALS FEATURES:

#### C21 (CPRE 21): Oriented Polyester

- Comparable to oriented polyesters like Mylar®
- Toughness suited for thin wall construction
- Outstanding cut-through resistance
- Excellent flex and stress crack resistance
- Wide operating temperature range
- Flame retardant
- Good chemical resistance

#### C75 (CPRE75): Vinyl-Rubber blend

- Outstanding flame retardancy (UL94V-O)
- UL evaluated/classified as a unique material
- Superior cut-through/abrasion resistance
- Undamaged by tough, abusive environments
- Excellent resistance to ultraviolet light
- Excellent strength characteristics
- Wide operating temperature range

## TWISTED PAIR DATA CABLE/UNSHIELDED\*

- ☐ UNIFORM CAPACITANCE THROUGHOUT THE CABLE OR ANY CABLE SECTION
- ☐ minimizes capacitance imbalances between sections of cable typically found in datacommunications cable
- ☐ provides matched impedance throughout the cable
- ☐ provides consistent electrical cable properties between multiple lots of cable
- ☐ SPECIAL CABLING PROCESS PRODUCES A UNIFORM TWIST OF THE PAIRED CONDUCTORS
- ☐ DESIGNED FOR CONNECTORIZING WITH DATA MODULAR MALE PLUGS
- ☐ GOOD FIELD RELIABILITY AND EXTENDED LIFE
- ☐ PAIRED CONDUCTORS MAINTAIN THEIR TWIST ARRANGEMENT REGARDLESS OF CABLE ROUTINGS USED FOR INSTALLING OFFICE LAYOUTS OR LAYOUT CHANGES
- ☐ IMPROVED FLEXIBILITY FOR EASIER INSTALLATION AND ENHANCED APPEARANCE

## MIL-W-16878/1

### TYPE B - 600V

(PASSES UL VW-1 FLAME TEST)

#### DESCRIPTION:

Stranded Tinned Copper, Color Coded  
Polyvinylchloride Insulation

#### CHARACTERISTICS:

- Temperature Rating: -55°C to +105°C
- Voltage Rating: 600 Volts

## MIL-W-16878/3

### TYPE D - 3000V

(PASSES UL VW-1 FLAME TEST)

#### DESCRIPTION:

Stranded, Tinned Copper, Color Coded  
Polyvinylchloride Insulation

#### CHARACTERISTICS:

- Temperature Rating: -55°C to +105°C
- Voltage Rating: 3000 Volts

## HOOK-UP WIRE PVC INSULATED

### MIL-W-16878/1 PREBONDED TYPE B - 600V

(PASSES UL VW-1 FLAME TEST)

#### DESCRIPTION:

Stranded Double Tinned, Pre-Bonded  
Copper Conductor, Color Coded PVC  
Insulated

#### CHARACTERISTICS:

- Temperature Rating: -55°C to +105°C
- Voltage Rating: 600 Volts

#### APPLICATION:

The pre-bond conductor maintains much of the flexibility of an ordinary stranded wire but reduces processing and handling costs on soldering, retwisting of strands after stripping, and hand tinning operations.

(PASSES UL VW-FLAME TEST)

## DESCRIPTION:

Stranded Tinned Copper, Color Coded  
Semi-Rigid Polyvinylchloride Insulation

## CHARACTERISTICS:

- Temperature Range: —10°C to +80°C
- Voltage Rating: 300 Volts

## APPLICATIONS:

Internal Wiring of Computers, Electric  
bookkeeping, Accounting machines, and  
other office and Control Equipment.

## MULTICONDUCTOR—

### UNSHIELDED

**80°C-300V-PVC**

(PASSES UL VW-1 FLAME TEST)

**UL 2464**

**CL2  
RATED**

#### DESCRIPTION:

Each Conductor Stranded Tinned Copper,  
Color Coded Polyvinylchloride Insulation,  
Gray Polyvinylchloride Jacket Overall.

#### CHARACTERISTICS:

- Temperature Range: -20°C to +80°C
- Voltage Rating: 300 Volts (UL)

COLOR CODE: CONSULT OUR FACTORY

## MULTICONDUCTOR 80°C-300V-PVC

(PASSES UL VW-1 FLAME TEST)

### DESCRIPTION:

Each Conductor Stranded Tinned Copper,  
Color Coded Polyvinylchloride Insulation,  
Gray Polyvinylchloride Jacket Overall.

- PVC Insulation UL 1061, CSA SR-PVC
- Clear Mylar Tape Wrap .001"
- Jacket Print: CSA AWM SR-PVC 80°C 300 Volts

### CHARACTERISTICS:

- Temperature Range: -20°C to +80°C
- Voltage Rating: 300 Volts (UL)

## MULTICONDUCTOR FOIL SHIELD 60°C-PE/PVC-300V

\*2092 2093 2094

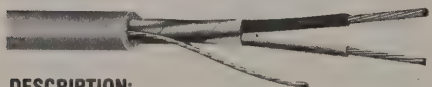

### DESCRIPTION:

Each Conductor Stranded Tinned Copper,  
Color Coded Polyethylene Insulation,  
Conductors Twisted, Wrapped Mylar  
Supported Aluminum Foil Shield, Drain  
Wire, Gray Polyvinylchloride Jacket  
Overall.

### CHARACTERISTICS:

- Temperature Range: -20°C to +80°C (UL 60°C)
- Voltage Rating: 300 Volts
- Small Cable Diameter
- 100% Shield Coverage

## MULTICONDUCTOR - FOIL SHIELD 105°C-PP/PVC-200V

### DESCRIPTION:

Conductor, Stranded or Solid Tinned  
Copper. Insulation, Color Coded  
Polypropylene (PP). Shield, Aluminum/  
Polyester Tape, Foil Facing Inward (100%  
Coverage). Drain Wire, 22 AWG Tinned  
Copper. Jacket, Gray PVC

### CHARACTERISTICS:

- Temperature Range: -20°C to +105°C
- Voltage Rating: 200 Volts

## MULTIPAIR 80°C - POLYPROPYLENE INSULATED - 400V

### DESCRIPTION:

Each Conductor Stranded Tinned Copper, Polypropylene insulated, twisted into pairs (Black with Red and Green with White). Each Pair Aluminum Polyester Shielded with Stranded Tinned Copper Common Drain Wire, Overall Gray PVC Jacket.

### CHARACTERISTICS:

- Temperature Range: -20°C to +80°C
- Suggested Voltage Rating: 400 Volts

## INDIVIDUALLY FOIL SHIELDED 80°C - PP/PVC 300, 400V

**2493**

(PASSES UL VW-1 FLAME TEST)

### DESCRIPTION:

Each Conductor Tinned Copper, Color Coded Polypropylene Conductors Twisted into Pairs, Mylar-Supported Aluminum Foil Shield, Aluminum Facing Inward, Stranded Tinned Copper Drain Wire, Gray Polyvinylchloride Jacket.

### CHARACTERISTICS:

- Temperature Range: -20°C to +80°C
- Suggested Working Voltage:
  - 22 AWG—300V
  - 18 AWG—400V
- UL Does Not Specify Voltage

## MULTICONDUCTOR, BRAID SHIELD

80°C - 300V

(PASSES UL VW-1 FLAME TEST)

**UL** 1108 2095

CL2  
RATED

### DESCRIPTION:

Each Conductor Stranded Tinned Copper, Color Coded Polyvinylchloride Insulated, Tinned Copper Braided Shield, Gray PVC Jacket Overall.

### CHARACTERISTICS:

- Temperature Rating: -20°C to +80°C
- Voltage Rating: 300 Volts

### INSULATION THICKNESS .016"

## MULTICONDUCTOR SPIRAL SHIELD 80°C-300V-PVC

CL2  
RATED

**UL 1108 2095**

(PASSES UL VW-1 FLAME TEST)

### DESCRIPTION:

Each Conductor Stranded or Solid Tinned Copper, Color Coded Polyvinylchloride Insulation, Spiral Wrapped Bare Copper Shield. Nom. .020" Gray Polyvinylchloride Jacket Overall.

### CHARACTERISTICS:

- Temperature Range: -20°C to +80°C
- 95% Shield Coverage
- Suggested Working Voltage: 300 Volts
- Excellent for Production Line Work, Use of Spiral Shield Makes Shield Termination Extremely Simple and Fast

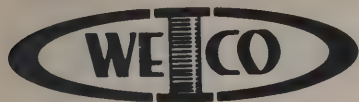

**COLORS:** 1 = Black 3 = White 5 = Yellow  
2 = Red 4 = Green 6 = Blue

# COMMUNICATION AND CONTROL CABLE

## MIL-C-27500 AEROSPACE ELECTRONIC CABLE

TYPE RC (MIL-W-22759/11) 06

### APPLICATIONS:

For general aerospace flight vehicle applications. These cables use M22759/11 insulated conductors in their construction. QPL to Mil-W-22759/11 is required on the insulated conductors in these cables.

### SPECIFICATIONS:

**Conductor:** Stranded silver plated copper wire.

**Insulation:** Extruded polytetrafluoroethylene (\*Teflon PTFE) in accordance with Mil-W-22759/11.

**Cable:** Up to seven conductors available in cable configuration.

**Shield:** Silver plated copper wire braid, 85% minimum coverage, #38 AWG on core diameters less than 0.060", #36 AWG on 0.060" and larger.

**Jacket:** Taped and fused white polytetrafluoroethylene (PTFE).

**Voltage Rating:** 600V RMS

**Temperature Rating:** -55°C to +200°C

**Identification:** Marker tape under the shield with cable code and manufacturer's I.D. except single conductor where identification is printed on the conductor insulation.

## COAXIAL-CL2P (NEC-725-2b)

### DESCRIPTION:

Fluoropolymer Coaxial Cables are made to the most exacting specifications in the wire and cable industry. WEICO'S designs and standards allow for dramatic improvements in critical data communications electrical characteristics such as: signal speed, attenuation, and capacitance.

### CHARACTERISTICS

- High Transmission Speed
- Allows Longer Cable Lengths In Computer Systems
- Can Be Installed In Air Ducts And Plenums Without Conduit
- UL Listed
- Temp. Range: -90°C to +200°C

# PLENUM CABLE

**CL2P-(NEC-725-2b)  
(NON-CONDUIT)**

**SHIELDED - UNSHIELDED,  
PAIRED - UNPAIRED**

## DESCRIPTION:

Conductors Tinned or Bare Copper  
Insulated with Fluoropolymer Resin,  
Conductors Paired or Cabled, Unshielded  
or Overall Foil Shield (100% Coverage),  
Drain Wire, Extruded Fluoropolymer  
Transparent Jacket Overall.

## APPLICATION:

Computer Interconnect, Instrumentation  
and Control, Business Machines, and  
Remote Control Signaling.

### UNPAIRED—SHIELDED

# PLENUM TELEPHONE CABLE

## CMP-(NEC-800-3d) (NON-CONDUIT)

### DESCRIPTION:

Each Conductor Solid Bare Copper,  
Color Coded Fluoropolymer Resin  
Insulated, Conductors Cabled, Extruded  
Fluoropolymer Jacket Overall.

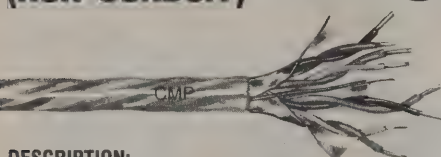

### APPLICATION:

General Intercommunications, Sound  
Systems, Industrial And Residential  
Telephone Service.

### UNPAIRED—UNSHIELDED

## CMP-(NEC-800-3d) (NON-CONDUIT)

### DESCRIPTION:

Each Conductor Solid Bare Copper, Color  
Coded Fluoropolymer Resin Insulated,  
Conductors Twisted into Pairs, Overall  
Aluminum Foil Shield (100% coverage)  
Stranded Drain Wire, Fluoropolymer  
Jacket Overall.

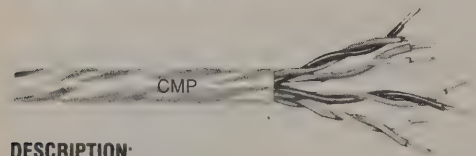

### APPLICATION:

General Intercommunications, Sound  
Systems, Industrial And Residential  
Telephone Service.

### DESCRIPTION:

Tinned Copper Strands Woven And Rolled Flat At Time of Manufacture To Specific Width Depending on Construction

### APPLICATION:

Used For Bonding, Straps, Grounding or Connecting Moving Parts. Recommended For High Current.

### DESCRIPTION:

Tinned Copper Braid Woven in Completely Round Configuration as Outlined in SPEC QQ-BB-575.

### APPLICATION:

Used As Both Shielding and Protective Covering. Shielding is 95% Or More When Placed Over Equivalent Diameter Mandrel To The Inside Diameter of Tubular Braid.

Standard Put-Ups: 100 ft., 500 ft., 1000 ft.

\*Values shown are for bare cable in free air at 30°C (86°F) and intended as a reference guide only. Actual values will depend on permissible temperature rise. Permissible voltage drop and other conditions of service.

WEICO WIRE & CABLE INC. • 161 Rodeo Drive • Edgewood, N.Y. 11717 • TEL 516-254-2970 • FAX 516-254-2099

## BUS BAR TINNED COPPER

### SOFT DRAWN BUS MIL-W-3861 TYPE S QQ-W-343 TYPE S ASTM-B-33

**DESCRIPTION:**

Electrolytic, Soft Drawn and Annealed,  
Solid Tin-Plated Copper.

**APPLICATION:**

Point to Point Wiring, Component Leads  
and Ground Wire

Standard Put-Ups: 100 ft., 1000 ft.

### HARD DRAWN BUS MIL-W-3861 TYPE S

**DESCRIPTION:**

Electrolytic, Hard Drawn Copper Electro-  
tinned Plated, Straightened and Cut to 2  
Ft. Lengths.

**APPLICATION:**

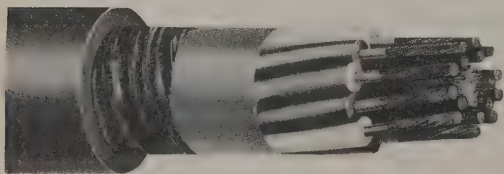

For Hooking Up All Types of Transmitters,  
Especially Ultra Shortwave Equipment  
Connecting Common Connector  
Terminals.

Weico's gray Flat Cable is designed for general purpose applications. Because of its exacting specifications, it provides consistent reliable performance. Being ribbed on both sides permits reverse plane termination ability on the same cable length. Flexibility and excellent teardown characteristics allow intricate circuit routing and uniform breakouts for harness production. Weico's Flat Cable is stocked in bulk (100 Ft./Reel).

#### DESCRIPTION:

- 28 AWG (7/36) stranded tinned copper conductor
- Nominal Insulation Thickness: .010" PVC
- Conductors on .050" centers
- Gray PVC with red stripe on leading edge
- UL listed—Style 2651
- Passes UL VW-1

#### CHARACTERISTICS:

- Temperature Rating: —105°C
- Voltage Rating: 300 Volts
- Capacitance: 14 pF/ft nom.\*
- Propagation Delay: 1.4 ns/ft—.18 ns rise time pulse @ 1 mhz\*
- Impedance: 105 ohms nom.\*
- Crosstalk: nom. between two adjacent signal lines @ 1 ns rise time over 10 ft. length; near end 3.2%—far end 11.5%\*
- Environmental: resists acids, alkalis, oil, moisture, solvents, ozone and fungus

Standard Packaging: 100 foot spool

\*Transmission Characteristics: Ground-Signal-Ground-Signal Etc. With All Grounds Common

# FLAT CABLE COLOR CODED

## 105°C PVC

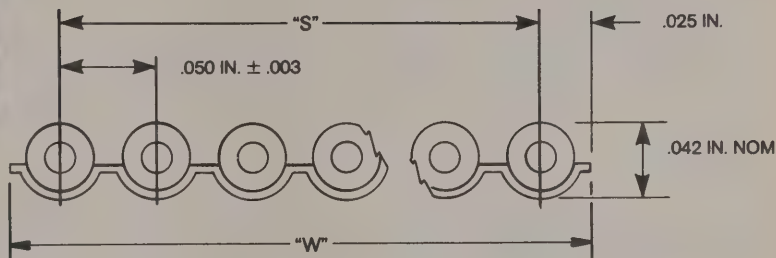

### 2884

(PASSES UL VW-1 FLAME TEST)

Weico's color coded Flat Cable is manufactured from pre-insulated color coded conductors which are then laminated on .050 center to center spacing. This permits conventional termination using insulation displacement connectors. Color coding affords immediate identification of discrete wires for positive termination and traceability. Weico's Flat Cable is stocked in bulk (100 ft/reel).

#### DESCRIPTION:

- 28 AWG (7/36) stranded tinned copper conductor
- 0.10" nom. wall PVC
- Conductors laminated to a sheet of .009" clear PVC
- Color Code: brown, red, orange, yellow, green, blue, violet, gray, white, black. Color code repeats beyond 10 conductors
- UL listed-Style 2884
- Passes UL VW-1

#### CHARACTERISTICS:

- Temperature Rating: 105°C
- Voltage Rating: 300 Volts
- Capacitance: 14 pF/ft @ 1 mhz\*
- Propagation Delay: 1.4 ns/ft—.18 ns rise time pulse\*
- Impedance: 105 ohms nom.\*

DESCRIPTION:

- Stranded Bare Copper Conductors
- Color Coded PVC or Rubber Insulation
- PVC (SVT-SJT), Rubber (SV-SJ) Or Neoprene (SJO) Jacket
- One End Fitted With Molded Three Prong Male Plug, Other End Has Jacket and Conductors Stripped Back
- Shielded or Unshielded As Indicated In Table

APPLICATIONS:  
Type SV-SVT: Small Tools, Business

Type SJ-SJT-SJO: Heavier Duty Tools, Electric Saws, Small Motors, Grinders, Saws, Sanders

# TUBING

## EXPANDABLE BRAIDED POLYESTER SLEEVING

(PASSES VW-1 FLAME TEST)

### DESCRIPTION:

WEICO XPT and XFR are lightweight, expandable sleeveings that offer extreme flexibility. The open weave allows for a wide range of sleeving diameters, thus ensuring ease of installation over a wide range of shapes and sizes. This sleeving provides an economical, flexible, protection for bundling wires, harnesses, and cable assemblies on various types of machinery, from industrial robots to CAD/CAM controlled process and machine tool equipment.

| GENERAL PURPOSE WEICO NO. | FLAME RETARDANT WEICO NO. | MINIMUM SUPPLIED I.D. (INCHES) | MAXIMUM EXPANDED I.D. (INCHES) | NOM. WALL THICKNESS (INCHES) |

COLOR: Black

### CHARACTERISTICS:

- Operating Temperature: -70°C to +125°C
- Applicable Specifications: MIL STD-810B—Method 508
- Fungus inert
- Resists abrasion and cut through, self-extinguishing when used to encase non-flammable wires or cables.

Standard Put-Ups: Consult Factory

## TUBING \*"TEFLON"

### DESCRIPTION:

WEICO'S Teflon Tubing is Rated For Continuous Operation at 260°C While Retaining Exceptional Toughness and Flexibility. The Dielectric Strength of Teflon at High Frequencies is Many Times That of Other Insulators. The Insulation Resistance Properties are Unaffected by Heat Aging or Temperature Use up to 260°C.

### SPECIFICATIONS:

ETT: AMS 3654, ASTM D 3295 CLASS A  
TT: AMS 3655, ASTM D 3295 CLASS B  
TS: AMS 3653, ASTM D 3295 CLASS C  
MIL-I-22129

### CHARACTERISTICS:

- Operating Temperature: -65°C to +260°C
- Dielectric Strength: 550 Volts/MIL
- Fungus Resistant
- Self-Extinguishing
- Non-Corrosive
- Zero Water Absorption

### COLORS: Natural = C

0 = Black 2 = Red 4 = Yellow 6 = Blue 8 = Gray  
1 = Brown 3 = Orange 5 = Green 7 = Violet 9 = White

Standard Put-Ups: 100 ft., 1000 ft.

# TUBING

**PVC**  
**105°C**

(PASSES VW-1 FLAME TEST)

## DESCRIPTION:

WEICO'S PVC Tubing is an Economical All-Purpose Insulating Material. It is Flexible, Heat and Oil Resistant and has Superior Thermal, Mechanical and Electrical Properties.

## SPECIFICATIONS:

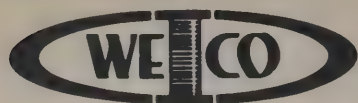

- MIL-I-631-TYPE F,  
FORM U, GRADE C, CLASS 1,  
CATEGORY 1

## CHARACTERISTICS:

- Operating Temperature:  
—20°C to +105°C
- Dielectric Strength:  
800 Volts/MIL
- Non Corrosive
- Self Extinguishing
- Fungus Resistant

## TUBING

### PLASTIC IMPREGNATED FIBERGLASS TUBING

**CONFORMS TO:**

MIL-I-3190—GRADE B AND MIL-I-21557

**THERMAL CLASS B:**

(130°C). NEMA Type 3

**DIELECTRIC: 4000 VDC**
**OPERATING TEMPERATURE:**

—20°C to +130°C

- Non Corrosive
- Self Extinguishing
- Fungus Resistant

**STOCK COLOR:** Black

**Standard Put-Ups:** 100 ft., 1000 ft.

**DESCRIPTION:**

The Weico FG Tubing is a Woven Fiberglass Braid Impregnated With a Heat Resistant, Extremely Flexible, Tough Plastic Insulation. It is Formulated

to Provide The Optimum in Electrical, Chemical Resistance, Heat Stability, and Abrasion Resistant Properties.

### SILICONE RUBBER COATED FIBERGLASS TUBING

**DESCRIPTION:**

The WEICO RSF Tubing is a Tightly Woven, Fiberglass Braid, Coated With Silicon Rubber. It Offers High Heat and Superior Electrical Characteristics in Any Application Requiring Class H Insulation, and Maintains Exceptional Flexibility Over Its Entire Operating Temperature Range.

**THERMAL CLASS H:** for 200°C operation.

NEMA Type 5.

**GRADE A-1:** 8000V. Dielectric.

**MEETS MILITARY SPECIFICATIONS:**

MIL-I-3190 and MIL-I-18057.

**OPERATING TEMPERATURE RANGE:**

—85°C to +200°C

- Non Corrosive
- Self Extinguishing
- Fungus Resistant

**STOCK COLOR:** Natural

**Standard Put-Ups:** 100 ft., 1000 ft.

# TUBING, SHRINKABLE

## PVC 105°C

### SPECIFICATIONS:

- MIL-I-23053/2
- AMS-3582
- UL RECOGNIZED

### CHARACTERISTICS:

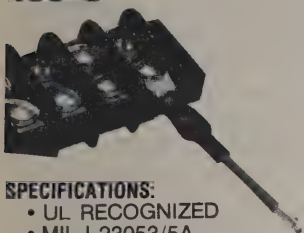

Operating Temperature:  $-35^{\circ}\text{C}$  to  $+105^{\circ}\text{C}$   
 Shrinkage Ratio: to 50% of Supplied Diameter at  $175^{\circ}\text{C}$   
 Longitudinal Shrinkage: 10% Nominal  
 Dielectric Strength: 750 Volts/MIL

## POLYOLEFIN 135°C

### SPECIFICATIONS:

- UL RECOGNIZED
- MIL-I-23053/5A
- AMS-3636B (Colors) Nonflammable
- AMS-3637B (Clear) Flammable

### CHARACTERISTICS:

Operating Temperature:  $-55^{\circ}\text{C}$  to  $+135^{\circ}\text{C}$   
 Shrinkage Ratio: to 50% of Supplied Diameter at  $121^{\circ}\text{C}$   
 Longitudinal Shrinkage: 5% Nominal  
 Dielectric Strength: 1300 Volts/MIL

WEICO'S Polyolefin tubings offer an outstanding balance of properties—electrical, physical and chemical—that make them the most popular choice for a wide variety of industrial and military applications.

Rated for  $135^{\circ}\text{C}$  continuous operation and engineered for superior flame resistance properties, Polyolefin tubings are typically used as a shrink-fit electrical insulation over cable splices and terminations. Polyolefin tubings are also excellent for light-weight wire harness covering, wire marking and bundling, component packaging and fire resistant covering. Polyolefin clear tubings provide excellent visibility for component packaging. All Polyolefin tubings are split-resistant, mechanically tough, easily marked and they resist cold flow.

COLORS: 0 = Black 4 = Yellow 9 = White  
 2 = Red 6 = Blue C = Clear

Also available UL & CSA printed—please specify when ordering.

# TUBING, SHRINKABLE

## KYNAR\* TUBING

WEICO'S Kynar is an irradiated, thin-wall, heat-shrinkable tubing offering a high degree of mechanical strength and high-temperature resistance. Kynar is fabricated from polyvinylidene fluoride, hence, their outstanding abrasion resistance and cut-through properties in combination with high dielectric strength. Kynar is inherently flame-retardant and semi-rigid. It is highly resistant to most industrial fuels, chemicals and solvents.

Kynar tubings are recommended for shrink-fit protection and strain relief of wires, solder joints, terminals and connections. Suggested applications include automotive wiring, jackets, fuse coverings and military wire markers. Because the tubing is transparent, it affords see-thru inspection and identification when used as a jacketing for components such as resistors and capacitors. Kynar tubings are readily marked by hot-stamp and print-wheel equipment.

Kynar tubings are rated for continuous operation from  $-55^{\circ}\text{C}$  ( $-67^{\circ}\text{F}$ ) to  $+175^{\circ}\text{C}$  ( $+347^{\circ}\text{F}$ ). The tubings will withstand higher operating temperatures for short time intervals.

Minimum shrink temperature for Kynar tubings is  $+175^{\circ}\text{C}$  ( $+347^{\circ}\text{F}$ ).

Kynar tubings meet the requirements of MIL-I-23053/8, AMS 3632, and are U.L. recognized for 600 volts @  $150^{\circ}\text{C}$ ; U.L. VW-1 rated.

### CHARACTERISTICS:

- High Mechanical Strength
- High Temperature

## TUBING, SHRINKABLE

### NEOPRENE TUBING

NEOPRENE very flexible, self-extinguishing, modified polychloroprene tubings combining a high degree of mechanical toughness and oil-resistance with 121°C continuous operating temperature.

WEICO'S Neoprene heat-shrinkable tubings are recommended for applications requiring a tough, highly flexible covering. Neoprene tubings are thick-walled, and provide superior cut-through and abrasion resistance. The tubings are unaffected by common fluids and solvents. Resistance to oils is excellent.

Neoprene tubings maintain flexibility at low temperatures. The tubings are particularly useful for the fabrication and repair of flexible harnesses and wire bundles and for covering of hydraulic couplings. The superior mechanical properties of Neoprene tubings make them ideal choices for the jacketing of cable harnesses and custom-made cables that must operate in severe environmental conditions.

Neoprene tubings are rated for continuous operation from -70°C (-94°F) to +121°C (+250°F). The tubings will withstand higher operating temperatures for short time intervals.

COLOR: Black

Standard Put-Ups: Spools

Minimum shrinkage temperature for neoprene tubings is +135°C (+275°F)

Neoprene tubings can be readily marked by hot-stamp and print-wheel methods.

Neoprene tubings are self-extinguishing and meet the requirements of MIL-I-23053/1 Class 1 & 2; MIL-R-46846, Type 1, Class 1 and AMS 3623.

### IRRADIATED POLYOLEFIN MULTIPLE WALL, INNER WALL MELTS

WEICO'S SMW Tubings are rated for continuous operation at temperatures from -55° to +110°C and will withstand higher operating temperatures for brief time intervals.

WEICO'S SMW Tubings meet the requirements of AMS 3634 and MIL-I-23053/4, Class 1.

WEICO'S SMW is a semi-rigid, 110°C heat-shrinkable polyolefin tubing that is co-extruded and selectively cross-linked to provide an integral, meltable inner wall.

On the application of heat in excess of 135°C WEICO'S SMW Tubing automatically shrinks

and closely conforms to the contours of the underlying substrate. The inner meltable wall of the tubing is simultaneously softened and forced by the shrink action into intimate contact with all underlying surfaces, interstices and small voids. Upon cooling, the installed SMW Tubing represents a tough protective and insulating barrier, highly resistant to penetration by moisture and the attack of chemicals and solvents.

## ALL NEW with this edition of EEM **GET ORGANIZED!**

Are your catalog files organized? Can you find any given catalog in a matter of seconds? If your answer is "Yes," you probably already have the EEM File System. But, if you said "No," you really ought to look into this simple system. It will save hours of time and tons of aggravation.

The EEM File System was invented over twenty-five years ago to help people who specify, buy, or work with electronic products and equipment. It is upgraded on a constant basis to reflect the current state of the art. It's easy to use and easy to customize to your particular needs.

You say you want to file catalogs by type of product? That's easy to do with the System. But, what are you going to do when there are multiple products in one catalog? Take Mallory for example. There are all kinds of products in the Mallory Short Form Catalog. With the EEM File System all you do is file the catalog under "M"

for Mallory and refer to it on all of the cross reference cards that apply.

There are thousands of EEM File Systems in everyday use in engineering and procurement offices all over the world. Shouldn't you be using this proven system?

The EEM File System is shipped in one neat package. The package contains everything you need to set up your very own filing system. Best of all, it's easy to get and very affordable. Send a check or money order for \$25.00 and EEM will pay the postage and sales tax. If you must use a purchase order, please add \$5.00 for postage and handling. An invoice will be mailed to you under separate cover.

Don't waste any more time. Get organized now!

**EEM FILE SYSTEM,**  
645 Stewart Ave., Garden City, NY 11530

<sup>a</sup> Delivered capacity when discharged at normal temperatures (20°C) at normal discharge rates.

<sup>b</sup> Based on fuel consumption only.

<sup>c</sup> Weight of air not considered in computation of watt hours.

<sup>d</sup> Water-activated

<sup>e</sup> Automatically activated; high rate discharge; 2- to 10-min rate.

<sup>f</sup> Fused salt; heat-activated; high rate discharge; 2- to 10-min rate.

<sup>g</sup> Four-minute discharge rate.

<sup>h</sup>  $\beta$ -alumina electrolyte, 300°C operation.

<sup>i</sup> Fused salt; 350°C operation.

<sup>j</sup> Solid RbAg<sub>4</sub>I<sub>5</sub> electrolyte.

<sup>k</sup> Several different cathode materials used.

<sup>l</sup> Fuel consumption is based on source of H<sub>2</sub>.

<sup>m</sup> Based on methanol battery-fuel supply in situ.

## MINIGLOSSARY CAPACITORS

**Anode:** One of two plates or conductors. In polarized capacitors, the anode should be connected to the positive conductor in the circuit.

**Capacitive Reactance:** The opposition (in ohms) of capacitance to the flow of alternating current, equal to the reciprocal of the product of the angular frequency ( $2\pi$  times frequency in Hertz) of the current times the capacitance in farads.

**Cathode:** One of two plates or conductors. In electrostatic capacitors the cathode is metallic. In electrolytic capacitors the cathode is a liquid, gel or other conductive material which is in intimate contact with a metallic cathodic connection.

**Dielectric Constant:** The ratio of the capacitance of a capacitor with some material other than air between the capacitor plates to the capacitance of the same capacitor with air between the plates. For example, the dielectric constants of air, Teflon®, polystyrene and ruby mica are 1, 2.1, 2.6 and 5.4, respectively.

**Electrolytic:** A capacitor with one metallic conductor (generally the anode) and with a liquid or semiconductor cathode. Nonpolarized electrolytic capacitors generally have two equal anodes as well as the liquid cathode. These anodes operate alternately as anode and cathodic connection as alternating current is applied.

**Electrostatic:** One of two general classes of capacitors in which two or more discrete metallic conductors are present and separated by an insulating dielectric material. Examples include: mica, ceramic, film, and paper types.

**Farad:** The basic unit of measure in capacitors. A capacitor charged to one volt with a charge of one coulomb (one ampere flowing for one second) has a capacitance of one farad. Capacitors are generally rated at portions of a farad (microfarads or picofarads).

1 farad (F) = 1,000,000 microfarads ( $\mu$ F)  
1 microfarad ( $\mu$ F) = 1,000,000 picofarads (pF)

**Impedance:** All capacitors exhibit impedance. It is a function of capacitor type and internal construction. This can be particularly important in certain applications such as filters for switching power supplies. Capacitors used in these applications often have special multiple tab construction to shorten current paths and to reduce internal resistance.

**Leakage Current:** Expressed as dcl for electrolytic capacitors, a measure of the intrinsic losses in a charged capacitor. Generally speaking, the lower the dcl, the higher quality the capacitor.

**Power Factor:** A measure of the overall efficiency of a capacitor. Power factor ratings take all internal losses into consideration in a complex formula. This parameter of certain capacitors is often very important in AC applications such as motor-start and/or motor-run capacitors

**Rated Voltage:** The rated working voltage of a capacitor. Generally expressed in DC Volts (Vdcw). This is the voltage at which a capacitor may be safely operated at 25°C continuously within its overall parameters.

**Ripple Current:** The total amount of alternating and direct current that may be applied to an

electrolytic capacitor under stated conditions. In general, the higher the ripple current applied, the shorter the operating life of the capacitor will be. Application of significantly higher than rated ripple currents can shorten the capacitor life dramatically and may even cause catastrophic failure (explosion).

**Surge Voltage:** The momentary surge voltage which may be applied for a stated length of time without doing permanent damage to the unit.

**Temperature:** Capacitors are generally rated at 25°C at sea level under specific humidity conditions. Operating temperature ranges are also given, along with derating (reliability) curves for operation at temperatures other than 25°C.

**Temperature Coefficient:** Expressed as TC in ppm (parts per million) or in percent (%) from the norm of 25°C. This is seldom a straight line and may vary widely for certain types. Most capacitors have positive TC in that the capacitance increases as temperature increases. Some types, however, have negative TC in that the capacitance decreases as temperature increases.

# MINIGLOSSARY

## BASIC

## CAPACITOR FORMULAS

### I. Capacitance (farads)

English:  $C = \frac{.224 \text{ K A}}{t_D}$

Metric:  $C = \frac{.0884 \text{ K A}}{t_D}$

### II. Energy stored in capacitors (Joules, watt-sec)

$$E = \frac{1}{2} CV^2$$

### III. Linear charge of a capacitor (Amperes)

$$I = C \frac{dV}{dt}$$

### IV. Total Impedance of a capacitor (ohms)

$$Z = \sqrt{R_s^2 + (X_c - X_L)^2}$$

Where  $R_s$  = ESR

### V. Capacitive Reactance (ohms)

$$X_c = \frac{1}{2 \pi f C}$$

### VI. Inductive Reactance (ohms)

$$X_L = 2 \pi f L$$

### VII. Phase Angles:

Ideal Capacitors: Current leads voltage  $90^\circ$

Ideal Inductors: Current lags voltage  $90^\circ$

Ideal Resistors: Current in phase with voltage

### VIII. Dissipation Factor

$$DF = \tan \delta \text{ (loss angle)} = \frac{ESR}{X_c} = \frac{1}{2 \pi f C} (ESR)$$

### IX. Power Factor

PF = Sine  $\delta$  (loss angle) = Cos  $\phi$  (phase angle)

PF = DF (when less than 10%)

### X. Quality Factor (dimensionless)

$$Q = \cotan \delta \text{ (loss angle)} = \frac{1}{DF}$$

### XI. Equivalent Series Resistance (ohms)

$$ESR = (DF) (X_c) = (DF) \left( \frac{1}{2 \pi f C} \right)$$

### XII. Power Loss (watts)

$$\text{Power loss} = (2 \pi f CV^2) (DF)$$

### XIII. KVA (Kilowatts)

$$KVA = 2 \pi f CV^2 \times 10^{-3}$$

### XIV. Temperature Characteristic (ppm/ $^\circ$ C)

$$TC = \frac{C_t - C_{25}}{C_{25} (T_t - 25)} \times 10^6$$

### XV. Cap Drift (%)

$$C.D. = \frac{C_1 - C_2}{C_1} \times 100$$

### XVI. Reliability of Ceramic Capacitors

$$\frac{L_o}{L_t} = \left( \frac{V_t}{V_o} \right)^x \left( \frac{T_t}{T_o} \right)^r$$

### XVII. Capacitors in Series (current the same)

$$\text{Any number: } \frac{1}{C_T} = \frac{1}{C_1} + \frac{1}{C_2} + \dots + \frac{1}{C_N}$$

$$\text{Two: } C_T = \frac{C_1 C_2}{C_1 + C_2}$$

### XVIII. Capacitors in Parallel (voltage the same)

$$C_T = C_1 + C_2 + \dots + C_N$$

### XIX. Aging Rate

$$A.R. = \% \Delta C / \text{decade of time}$$

### XX. Decibels

$$db = 20 \log \frac{V_1}{V_2}$$

### Metric prefixes:

|       |              |
|-------|--------------|
| Pico  | X $10^{-12}$ |
| Nano  | X $10^{-9}$  |
| Micro | X $10^{-6}$  |
| Milli | X $10^{-3}$  |
| Deci  | X $10^{-1}$  |
| Deca  | X 10         |
| Kilo  | X $10^3$     |
| Mega  | X $10^6$     |
| Giga  | X $10^9$     |
| Tera  | X $10^{12}$  |

### Symbols:

|          |                             |
|----------|-----------------------------|
| K        | = Dielectric Constant       |
| A        | = Area of electrode overlap |
| $t_D$    | = Dielectric thickness      |
| V        | = Voltage (volts)           |
| t        | = time (hours)              |
| $R_s$    | = Series Resistance (ohms)  |
| f        | = frequency (Hertz)         |
| L        | = Inductance (henries)      |
| $\delta$ | = Loss angle                |

|        |                                              |
|--------|----------------------------------------------|
| $\phi$ | = Phase angle                                |
| x+y    | = Exponent effect of voltage and temperature |
| $L_o$  | = Operating life (hours)                     |
| $L_t$  | = Test life (hours)                          |
| $V_t$  | = Test voltage (volts)                       |
| $V_o$  | = Operating voltage (volts)                  |
| $T_t$  | = Test temperature ( $^\circ$ C)             |
| $T_o$  | = Operating temperature ( $^\circ$ C)        |

## MINIGLOSSARY CONNECTORS

**Connector terminology** is often quite confusing. This confusion starts with the very names of connectors. The name of a connector may derive from its shape, application, type of conductor or even method of termination.

**Shape**—Circular, cylindrical, and rectangular.

**Electrical application**—High voltage, RF, microwave, input/output, etc.

**Mechanical application**—Printed circuit, rack & panel, cable, etc.

**Conductor type**—Coaxial, flat cable, ribbon cable, flex circuit, etc.

**Termination method**—Wirewrap, soldercup, solderless, etc.

Hardware such as clamps, hoods, and adapters are frequently used to convert cable connectors to rack and panel types. This adds to the name confusion. A very common telephone connector, for example (the "C" type) got its name from the model number of the original maker.

**Contact:** The part(s) of the connector that actually provides circuit continuity between its two sections—the parts which are normally mated. The back end of the connector should properly be called the *termination*. This is the point where the wires or PC board is attached to the connector.

**Contact alignments:** Often called *contact float*. Describes the amount of allowable contact movement within the connector body. Permits self-alignment.

**Male vs. female:** In the U.S. this describes the contact construction. In Europe this term is more often used to describe the outer shell mating action which may be the reverse of the contacts.

**Closed entry:** A female contact which prevents entry of a male contact larger than a specific size.

**Open entry:** A female contact designed for a specific size of male contact but which will allow entry of larger male contacts by spring action.

**Hermaphrodite:** Contacts or connector bodies which are the same configuration. Male/female designations do not apply. Bodies usually have some mechanical means for maintaining polarity.

**Hermetic seal:** Glass-to-metal seals at terminations. Often used improperly to describe vacuum-tight seals.

**Waterproof seal:** May or may not be truly *waterproof*. May prevent easy entrance of casual water by means of a rubber or other boot.

**Printed circuit connector:** Connectors which are used in conjunction with printed circuit boards. There are two distinctly different styles.

**Edgeboard.** May be called *edge* or *card*. The printed circuit (PC) board edge enters the connector.

**Two-piece:** One part of the connecting pair is physically attached to the PC board itself. The other part is attached to something else such as a cable or a motherboard.

**Readout:** Describes the arrangement at the terminating edge of a PC board.

May be single or double. A double read-out PC board has termination strips on each side not usually interconnected.

**Ribbon connectors:** A type of connector which allows flat "ribbon" cable to be attached to a round or rectangular connector but also used interchangeably for flat connectors to flat cable.

**Ribbon contact connector:** Describes the contacts in a rectangular connector which have a self-wiping mating action. Not the same as ribbon connector.

**Solderless terminal:** Any style of termination which does not require solder for a permanent connection. See *crimp* and *insulation displacement*.

**Crimp termination:** A stripped wire is inserted into a barrel or trough which is then crimped to the conductor with a suitable tool.

**Insulation displacement:** Unstripped insulated wire is fitted into a channel containing metal teeth which are forced through the insulation to make contact with the conductor.

**Service rating:** The maximum rated voltage and/or current which may be applied continuously. May be called *working voltage*. Can be confused with the term used to describe how many times a connector may be mated and separated.

**Withstanding voltage:** Also called *test voltage*. The voltage a connector must withstand for one minute without breakdown. Applied between connectors and between connectors and shell and any grounding devices of the connector.

| =   | Equal Sign            |
| "   | Quotation Mark        |

# SSSSSSUPER TTTTTIME SSSSSAVER!

**D**o you work with ICs? Do you have trouble finding the IC you need? Are you sick and tired of sifting through dozens of manufacturers' data books? Do you have trouble comparing one set of specs to another? Are you sick and tired of wasting time?

Do we have good news for you! Get your hands on the latest annual copy of the IC Master. The Master will save you both time and money. Here's how.

The Master lists every single IC you can buy. Better yet, the Master lists ICs by function. You know what you want to do. The Master tells you who makes what for what you want to do.

There's more! The Master lists every known alternate source to every integrated circuit. If

somebody makes a substitute for an IC, the Master tells you. And fast!

Want to find a custom or semicustom IC? The Master tells you who the manufacturers are, what their capabilities are, and what design tools you need.

Looking for a distributor or a local sales office? The Master tells you where they are. Got a technical problem? The Master tells you who to call. Can't figure out a part number? The Master tells you how the part number systems work.

There's more! The Master has a section on microprocessor development tools with complete performance parameters. There's another section on programmable logic devices giving you everything from output configuration to PLD development systems.

Want to know if there's an application note available on a given part? The Master tells you!

If your job has anything to do with integrated circuits, you need the IC Master. Subscribe now by calling (516)227-1314. Ask for Marie Botta. Tell Marie you need the Master now.

If you prefer, FAX Marie at (516)-227-1901. She'll FAX the IC Master subscription form back to you right away.

And, if you tell her you saw it in the 1993/94 EEM, she'll take \$10 off the subscription price!

## IC MASTER

*Published annually in February,*

# SHOGYO CONNECTORS, JACKS & PLUGS

Your design deserves Shogyo quality and reliability.

You deserve...

Shogyo Service... comprehensive, responsive and fast  
Shogyo Professionalism... the helpful experience you need

Shogyo Prices... always competitive, usually better  
and...

Shogyo Selection... with complete custom design capabilities

Including a diverse offering of miniature and microminiature:

• Connectors:

modular, panel mount, chassis mount, pin printed circuit mount, DIN, coaxial cable, cable, miniature consent, feeder consent, tube socket, BNC, UHF, and MIC

• Jacks:

RCA phono and chassis mount, communications, phone, multi-conductor, closed and open circuit, stereo, in-line, barrel, sub miniature enclosed phone, PC mount, panel mount, DC, open frame, DC power, earphone, DIN, headphone, combination, auto an-

tenna, pin polarized, and banana

• Plugs:

phone, communication, barrel, microphone, DC, automobile, automobile antenna, DIN, RCA phono, pin, coaxial, banana, solderless, pin tip, and polarizing

• Modular telephone apparatus:

a full line of jacks, connectors, handset and line cords

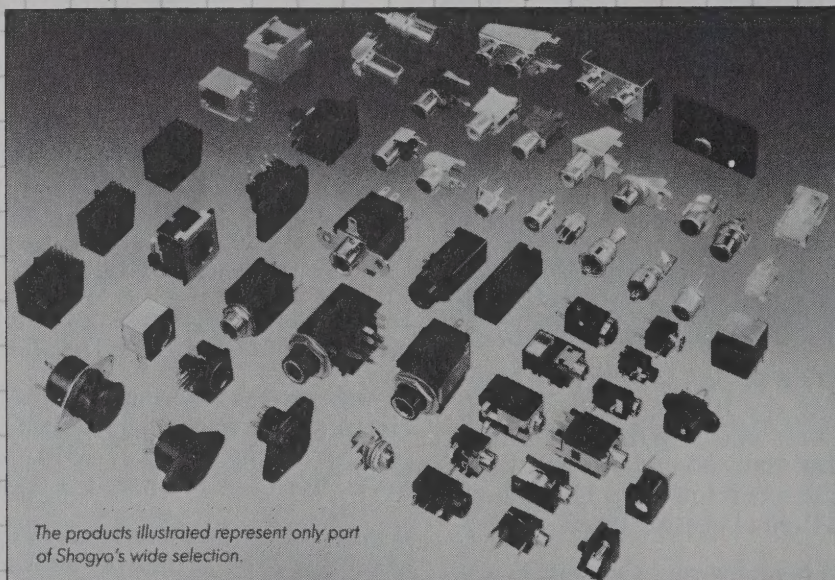

• Terminal boards, binding posts, barrier strips, clips, and fuse holders

And featuring:

• Shielding

• A wide variety of angles, mountings, sizes and shapes

• Mating components for virtually all items

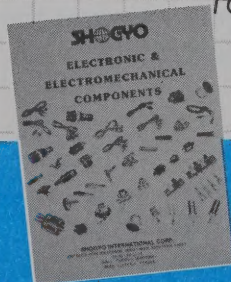

The products illustrated represent only part of Shogyo's wide selection.

For immediate assistance and specific information on the product(s) you require:

Dial 516-466-0911 or FAX 516-466-0922

For complete product listings and specifications, request our free catalog.

SPECIFY SHOGYO. ELECTRONIC COMPONENTS AS GOOD AS YOUR DESIGN.

Shogyo International Corporation  
Dept. EM, 287 Northern Boulevard,  
Great Neck, New York 11021-4799

# SHOGYO

# Shogyo electronic components. Any spec...any time.

Shogyo doesn't produce every electronic component...just the ones you need most. High-quality, ultra-reliable, inexpensive components...manufactured in production quantities to your exact specifications...and shipped on-time, directly to you, usually within thirty days from receipt of order.

It's time you discovered why Shogyo's

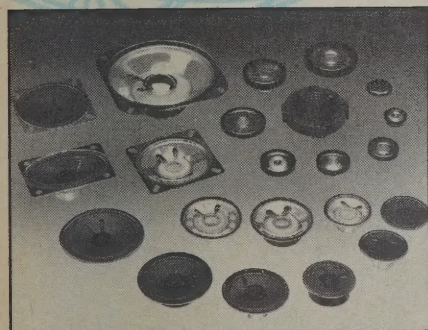

OEM customer base has grown every year since 1976. Choose from our wide selection of standard designs...or take advantage of our comprehensive custom design capabilities. Shogyo's perfect balance of superior products, pricing and service will earn your trust, respect and continuing component business. Any spec...any time.

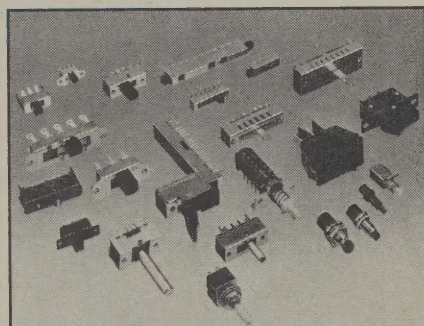

**Perfect balance for you  
and your designs.**

**Shogyo International Corporation**

# It Isn't Magic, But Our Electronic Enclosures Appear Before Your Very Eyes!

Now you can design, spec., view, price and order electronic cabinets from the convenience of your PC.

Do it all with CAB-NET™, Equipto Electronics' new, FREE software program. Included are over 13,500 items in limitless combinations, technical drawings, accessories, complete text descriptions, color/black-and-white photographs, prices and more.

Description and part number sorts guide you to information you seek. Print out technical data, photographs, support materials, orders and more.

An E-Mail function lets you ask questions, state special requests or specify virtually anything else not found in our catalog.

Modem communication to Equipto Electronics' office 24 hours a day, seven days a week.

While you're on-line, we'll automatically update your program with any new items, changes or prices.

Of course, all our extra services — including live engineering consultation, live customer service reps, and Express Line 5 Day Shipping — are readily available to you. Only now, you'll probably have less need of them.

CAB-NET™ is available at no cost to all engineers and buyers of electronic enclosures. It runs on any IBM® compatible PC with free user support from us or through our nationwide network of field sales offices.

For your **FREE** copy of CAB-NET™\*, contact your Equipto Electronics representative or call us at (708) 897-4691, Fax [708] 897-5314.
